approved the granting of a permit for this purpose provided the general public is properly protected.

The Engineer brought up for discussion matters pertaining to the 1947 Minor Betterment Program and particularly requested authority to purchase from commercial concerns oil rock that is needed for next summer's operations in improvement of shoulders adjacent to highway pavements. This material, he said, is urgently needed and should be arranged for at the earliest possible time so as to avoid delays in construction. He estimated the cost of this material at $60,000, including the oiling work. The Commission approved the expenditure by unanimous vote.

In this connection the Commission also discussed the matter of constructing footpaths but decided not to take any action on such matter until the Legislature adjourns.

The Engineer requested authority to perform certain bridge betterment work which is included in the 1947 Minor Bridge Betterment Budget, particularly ordinary items such as riprapping and construction of masonry walls, extending reinforced concrete box culverts, etc. He advised that the Commission, on November 26, 1946, authorized him to perform such routine work under work orders prepared at that time aggregating $40,775, and his object in bringing the matter up at this time is to secure authority for an additional expenditure of $36,415 on primary highways and $16,260 on secondary highways. The Commission approved the request by unanimous vote.

The Engineer again brought up for discussion the matter of constructing channelization projects and in connection therewith exhibited a model of such a project proposed for the Milton-Freewater Section of the Oregon-Washington Highway. Included in the discussion was the project proposed at Pringle Corner Junction a short distance west of McMinnville and that proposed on the Old Oregon Trail in the City of Pendleton. Chairman Banfield indicated his opposition to construction of such projects generally. As the result of the discussion the Engineer was instructed hereafter to discuss all such projects with the Commission prior to the final preparation of the plans.

The Commission considered and signed agreements, etc., as follows:

Agreement with Crown Zellerbach Corporation extending its lease to riparian rights in the Willamette River at Oregon City.

Agreement with MacWilkins, Cole & Weber covering the furnishing of advertising services for the Travel and Information Department during the year 1947.

Agreement with T. B. and Evelyn Waters covering the lowering of a culvert under The Dalles-California Highway at Engineer's Station 301+25 north of Klamath Falls, Klamath County.

Agreement with Wagner and Bevier Logging Company covering this Company's logging operations adjacent to the Albany-Lyons Secondary Highway along Thomas Creek, Linn County.

Agreement with the O.W. R.&N. Company and the Union Pacific Railroad Company covering installation of a metal pipe through a railroad embankment on the Vale-West Secondary Highway at Hope, Malheur County.

Cooperative contract with the U.S. Department of Agriculture, Forest Service, covering snow removal operations on Timberline Road during the 1946-47 snow season.

Permit granting to the Central Lincoln People's Utility District temporary permission to attach its facilities to the Coos Bay Bridge on the Oregon Coast Highway, in Coos County.

Agreement with Malheur County providing for the abandonment of certain portions of the old right of way of the Nyssa-Adrian Secondary Highway when contemplated improvements have been completed.

Agreement with the City of Coos Bay providing for disposition of the former route of the Oregon Coast Highway between Ingersoll Avenue and Johnson Avenue and through the Bunker Hill district in the City of Coos Bay since the highway has been rerouted and these sections are no longer of value for state highway purposes.

There being no further business to come before the Commission at this time the meeting adjourned at 12:30 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
March 24, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting held on February 3, 4, and 5, 1947.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Proposed maintenance expenditures in Sodaville State Park, jurisdiction over which recently was transferred by the State Legislature from the State Board of Control to the State Highway Commission: The Parks Superintendent requested approval of an expenditure of $1,800 in 1947 for this purpose, which includes employment of a caretaker at $35 a month. He further advised that the amount is provided for in the 1947 budget. The Commission approved the request by unanimous vote.

2. Proposed purchase of an 80-acre wayside timber tract on the Pendleton-John Day Highway at the junction of the John Day River with Camas Creek, in Umatilla County: The Parks Superintendent advised that this property is owned by G. E. Carnes who has offered to sell it to the state for park purposes at the rate of $10 per acre. He recommended acceptance of the offer. The Commission approved the purchase by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

3. Proposal of Alfred D. Collier, Klamath Falls, for construction of a museum in Collier State Park, Klamath County: At the request of the Parks Superintendent the Secretary read aloud a letter from Mr. Collier setting forth his ideas with respect to the establishment of such a museum and tendering his check in the amount of $2,000, which is to be used in connection therewith. The Commission deferred action on the matter pending further investigation by the Parks Superintendent as to the costs involved, etc.

4. Request of Julius Siller, Winchester Bay, for permission to operate "dune skooters" in Umpqua Lighthouse State Park: The Commission indicated a reluctance to approve this request because it would establish a precedent which would be difficult to avoid in passing on similar requests in the future. Motion was made by Commissioner Schaupp that the

matter be laid on the table. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

5. Betterment orders covering four Eastern Oregon state parks: The Parks Superintendent presented betterment work orders for such parks for 1947 undertaking as follows:

Cline Falls State Park, Deschutes County

10 picnic tables	$ 100.00	
2 small latrines	126.00	
1 fireplace	100.00	$ 326.00

Wallowa Lake State Park, Wallowa County

*1-Floating pier, material and labor	$1,000.00	
**2-Caretaker's house	7,000.00	
*3-1 latrine	1,000.00	
**4-1 picnic kitchen	750.00	
*5-15 picnic tables	150.00	
*6-Betterment and extension of water system, estimate	150.00	$10,050.00

The Cove State Park, Jefferson County

*1-Construction of swimming pool	$20,000.00	
*2-Installation of water system, including ram and 5,000 gal. storage tank	600.00	
*3-Drinking fountain	84.00	
*4-10 picnic tables	60.00	
*5-2 stoves	60.00	$20,804.00

(Note: It is intended to apply the $4,000 received from Morrison-Knudsen, June 10, 1943, as payment for cinders sold from an area leased from the Government, toward the construction of the swimming pool. The Government requires all money received to be spent for improvement of the area and this sum has been earmarked since its receipt to be spent in this manner when materials are available.)

* To be constructed

Collier State Park, Klamath County

*1-Install drinking water system	$ 600.00

(Con't)

Collier State Park, Klamath County (Con't)

*2-Install irrigation system	$2,600.00	
*3-Latrine	1,000.00	
**4-Three-way stove	1,200.00	
*5-20 picnic tables	200.00	
*6-Memorial monument	500.00	
**7-Construction of caretaker's house	7,000.00	$13,100.00

* To be constructed
** To await better prices

The following action was taken by the Commission on the foregoing betterment orders by unanimous vote:

(1) The Commission approved all proposed expenditures in Cline Falls State Park totaling $326.00.

(2) The Commission approved all proposed expenditures in Wallowa Lake State Park except the construction of the caretaker's house.

(3) The Commission approved all items for The Cove State Park except construction of the swimming pool, action on which was deferred until a later date.

(4) The Commission approved all items listed for Collier State Park except construction of the caretaker's house.

6. Request of Marine Parks Committee of the Columbia River Yachting Association for development of boating facilities and picnic areas bordering navigable streams in Oregon: The Parks Superintendent presented a map showing existing state parks at such locations. The Commission went on record as being opposed to the acquisition of additional lands for the special accommodation of people who are interested in boating, however, indicated that it would approve the development of landing places for boats in existing state parks which border on such streams.

7. Proposed acquisition of wayside tracts along the Upper Columbia River Highway: The Parks Superintendent advised that there are several tracts adjacent to this highway which it would be desirable to acquire and suggested the use of Federal funds in connection therewith. In the discussion it was pointed out that Federal funds which are required to be expended for purposes of this kind are all obligated. The Commission decided not to consider the acquisition of these tracts unless the State Parks Superintendent should recommend purchase with state funds set up in the 1947 budget for acquisition of new parks.

8. Proposal for establishment of a state park at Owyhee Damsite,

Malheur County: The Parks Superintendent advised that local people have suggested establishment of a state park at this location, however, inquiry reveals that the National Park Service has already made investigations to that end, so there is a question whether or not the state should do anything about it. He pointed out that the site is situate about 14 miles from a state highway, and the development of the area would require improvement of the road leading to the site and construction of about ten miles of road around the lake. The Commission decided unanimously to let the National Park Service take the initiative in the matter.

9. Suggestion of the Springfield Chamber of Commerce that the state acquire timbered wayside strips along the McKenzie Highway between Finn Rock and Blue River: The Parks Superintendent advised that investigation reveals that the timber has already been removed by a logging concern, in view of which there is no particular object in acquiring the land at this time. The Commission decided unanimously not to purchase the property.

10. Proposed rental of CCC buildings located at Silver Creek Falls State Park: The Parks Superintendent advised that two church organizations, the Seventh Day Adventists and the Christian Church, have requested the privilege of using these buildings for about one week each some time during the coming summer season. He recommended approval of the requests on the condition that the churches will pay 15 cents per day for each person in their groups, which is the charge that was made last year for the same privilege. The Commission approved the recommendation unanimously.

11. Acquisition of two parks in Douglas County: The Parks Superintendent reported consummation of negotiations under way for some time with Douglas County concerning the acquisition of two park areas, both of which are former O. & C. lands. One of these consists of 200 acres located at Elkton Tunnel on the Umpqua Highway and the other is a 160-acre tract on Camas Mountain on the Coos Bay-Roseburg Highway. He recalled that the State Highway Department had these tracts under lease from the Federal Government for a number of years, having paid an annual rental for them, with a view to acquiring them outright; however, according to the Federal law the state cannot acquire them except through the county. Douglas County, he said, now owns both tracts and is willing to deed them to the state at the rate of $1 per thousand for the timber standing thereon, which totals $5,485. The Commission by unanimous vote authorized the acquisition of these properties at such figure.

12. Proposed addition to Rocky Creek State Park in Lincoln County: The Parks Superintendent presented an offer from Mr. Paul Beard to sell to the state 44 acres of land which he owns adjoining the present park for the sum of $4,000. He advised that the tract contains a beautiful stand of wayside timber and has a one-half mile frontage on the Oregon Coast Highway. Mr. Beard, he said, has been offered the sum of $5,000 for the property but wishes to give the state first refusal. Following

considerable discussion the Commission deferred a decision in the matter until a future date.

13. Suggestion of people of Eugene that the state acquire property on the south side of the McKenzie River about eight miles east of Vida, for park purposes: The Parks Superintendent recommended against the purchase of this property because it is located on the opposite side of the McKenzie River from the Highway. The Commission approved the recommendation by unanimous vote.

In the consideration of park matters the Engineer brought up for discussion the proposed revision of the Oregon Coast Highway across lands owned by Mr. W. F. Badley at Otter Crest. He advised that Mr. Badley is willing to sell the right of way only but wants to retain the area between the old and new highway locations to develop for business purposes; moreover, he wants the state to build a connecting roadway between the new and the old highway locations. He pointed out that if Mr. Badley were allowed to retain and develop the area between the two highway locations and constructed buildings thereon, the ocean view very likely would be cut off. He suggested that it would be advisable, before taking action in the matter, to secure a report from the State Parks Superintendent as to the effect such development would have on the state park at this location. The Assistant Counsel, Mr. DeSouza, confirmed the statements of the Engineer and gave figures of the value of the property as appraised by three different appraisers, one of which appraisal amounts to approximately $20,000, the second, approximately $37,000, and the third, about $62,000. As the result of discussion the Commission deferred a decision in the matter until the next meeting. The Engineer, the Chief Counsel, and the State Parks Superintendent were instructed in the meantime to make a thorough analysis of the matter and to report their findings at that time.

The Assistant Counsel, Mr. J. W. DeSouza, was present and asked the Commission to authorize the acquisition of certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with the offer that he recommended in connection with each parcel. Following careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FOOTNOTES:

In the consideration of the property acquisitions mentioned in the foregoing resolution the Commission also discussed acquisition of right of way required for the improvement of the Midland-Mac's Store Section of the Lower Klamath Lake Secondary Highway. The Assistant Counsel presented offers from the several property owners based on a right of way 60 feet wide. The Commission considered such width right of way too narrow for a highway of this importance and ordered further negotiations based on a right of way 80 feet wide. (During the afternoon session the Assistant Counsel reported that a right of way 80 feet wide for this project would cost about twice as much as a 60-foot right of way. The Commission decided, notwithstanding the increased cost, to acquire an 80-foot right of way and so ordered.)

The Commission also ordered hereafter that no right of way should be acquired less than 80 feet wide unless under specific approval of the Commission.

The Commission also decided unanimously hereafter not to award a contract for any highway construction project unless and until the right of way for such project absolutely has been obtained.

In this connection the question arose as to the width of the right of way that should be acquired for the Klamath Falls-Merrill Section of the Klamath Falls-Malin Highway in the vicinity of the USRS Canal crossing. It appears that the present right of way is 60 feet wide, and objections have been raised by certain property owners to widening it because it would necessitate taking considerable valuable private land. The Engineer was instructed to consult with Commissioner Schaupp relative to the width that should be obtained.

* Pringle Corner-McMinnville Section, Salmon River Highway and Pacific Highway West: Prior to approving acquisition of the properties listed under this heading the Commission had under consideration the adoption of the permanent location survey for this section of the highway. The Engineer presented a map and other material showing the recommended location and advised that the survey has been completed in conformity therewith. He also reported the completion of additional surveys as follows and submitted maps and other material for each:

Midland-Mac's Store Section of the Lower Klamath Lake Secondary Highway, Klamath County

Carlton-Chehalem Valley Section of the Carlton-Chehalem County Road, Yamhill County

Roseburg-Dixonville Section of the North Umpqua County Road, Douglas County

Canemah-New Era Section of US99E, Clackamas County

Fremont Highway Junction-Camas Valley Section, Warner Secondary Highway, Lake County

Sheep Creek Hill Section, Little Sheep Creek Secondary Highway, Wallowa County

Mud Creek-Drakes Creek Section of the Warner Secondary Highway, Lake County

After study, the Commission approved the relocations as reported and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

Pringle Corner-McMinnville Section of the Salmon River Highway and Pacific Highway West, Yamhill County;

Midland-Mac's Store Section of the Lower Klamath Lake Secondary Highway, Klamath County;

Carlton-Chehalem Valley Section of the Carlton-Chehalem County Road, Yamhill County;

Roseburg-Dixonville Section of the North Umpqua County Road, Douglas County;

Canemah-New Era Section of US99E, Clackamas County;

Fremont Highway Junction-Camas Valley Section, Warner Secondary Highway, Lake County;

Sheep Creek Hill Section, Little Sheep Creek Secondary Highway, Wallowa County;

Mud Creek-Drakes Creek Section of the Warner Secondary Highway, Lake County;

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 6B-15-15 and 5B-8-19, 6B-22-21, 6B-22-8, 5B-13-22, 6B-23-3, 6B-22-17, 6B-16-5 and 6B-16-6, and 6B-22-22, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of March, 1947.

The Engineer also reported completion of the following surveys:

Mill Creek Section, Pacific Highway, Eugene, Lane County

Proposed Sullivan's Gulch Section of the Columbia River Highway, Multnomah County

Ft. Hill Bridge Section of the Salmon River Highway, Polk County

He presented maps and other material with respect to each. A decision with respect to the approval of the survey for the Mill Creek Section of the Pacific Highway, in Eugene, was deferred by the Commission until its next meeting.

With respect to the survey of the Sullivan's Gulch Section of the Columbia River Highway, Portland, the Commission decided unanimously that the time is not propitious to approve such survey; however, the Com-

mission instructed the Engineer and the Chief Counsel to present the facts in detail to the Portland City Council and to ascertain the extent of the cooperation that the City of Portland will offer in the event the Commission approves the project for construction. The Engineer and the Chief Counsel were also instructed to discuss the facts with the officials of the railroad company which is involved. The Commission made it clear that it is making no commitment or assuming no obligation whatsoever at this time as to construction of the project.

The Commission deferred a decision with respect to the survey for the Ft. Hill Bridge Section of the Salmon River Highway until the following day pending receipt of additional information. (This survey was adopted by the Commission on March 25. See resolution ahead.)

The Assistant Counsel, Mr. DeSouza, also requested authority to condemn certain parcels of real property which cannot be acquired at reasonable cost by negotiation. He presented a list of such properties and the offer that he recommended in connection with each parcel, as follows:

		Recommended Offer
BARNES ROAD-MULTNOMAH COUNTY LINE SECTION OF THE SUNSET HIGHWAY		
3164-B	John H. Pointer and Nan A. Pointer	$6,000.00
3227-A	Frank W. Pointer, et al.	2,750.00
12928	Washington County, et al.	7,500.00
1352-A	Oregon Realty Company	4,500.00
3505-A	Ivan F. Phipps	1,100.00
13202	Etienne C. Ureel	600.00
3226-A	George Durig and Gladiola Durig	12,000.00
MORROW COUNTY-STANFIELD SECTION OF THE BOARDMAN-STANFIELD HIGHWAY		
13490	Frank Correa, Sr.	200.00
13489	Albert Leal, et al.	200.00
PLEASANT HILL-LOST CREEK SECTION OF THE WILLAMETTE HIGHWAY		
12039-A	Henry Knowles, et al.	900.00
SWEET HOME SECTION OF THE SANTIAM HIGHWAY		
13458	Vivian Weddle Long	5,650.00
PRINGLE CORNER-McMINNVILLE SECTION OF THE SALMON RIVER HIGHWAY		
13194	W. N. Ross and Laura Ross	450.00
13197	Estate of Charlotte McPhillips	350.00

(Con't)

PRINGLE CORNER-McMINNVILLE SECTION OF THE PACIFIC HIGHWAY WEST		Recommended Offer
13188	Sunset Oil Co.	$2,700.00
13186	Ethel Clark Fuller	350.00

Following careful consideration of each item the Commission approved the request and the offers and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities or towns, together with rights of access from the abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, the Sunset Highway (State Highway No. 47) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Barnes Road-Multnomah County Line Section. For the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Sunset Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties hereinafter described are needed and required for use in connection with the construction and maintenance of the section of the Sunset Highway known and designated as the Barnes Road-Multnomah County Line Section;

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, all of which are made a part of this resolution; *

3. That all and each of said real properties are needed and the acquisition of the same is necessary for the specific purpose stated in the description of and for each ownership;

4. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage;

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described hereinafter in this resolution, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property herein described and the highway which is to be constructed thereover, except at

such points or places as may be designated by the State Highway Commission;

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission;

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

9. The real properties sought to be acquired are described on the attached sheets, consisting of 3 pages, and on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties; said parcels of real property are otherwise identified as Parcels 1 to 7 inclusive. *

20. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of March, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 73, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Commission heretofore has constructed a certain highway known and designated as the Boardman-Stanfield Highway; and

WHEREAS, a portion or section of said highway; namely, the section lying between Engineer's Station 1335 and Engineer's Station 1360, is in the vicinity of the Umatilla River and said section during flood

periods is being damaged and otherwise impaired, and it is the judgment of the Commission that if the causes and conditions which contribute to such damage and impairment are not corrected or adequately controlled irreparable damage will result to said highway; and

WHEREAS, in addition to the damage and threatened damage to said highway there are private properties located in the flood area, which properties are subjected to damage during flood periods; and

WHEREAS, it is the judgment and opinion of the Commission, based on the advice of its Engineer, that a dike or embankment should be constructed and maintained at a site and in a manner which will tend to confine the waters of said river within its walls or banks; and

WHEREAS, in order that a proper dike or embankment may be constructed, it is necessary that additional real property be acquired;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting:

1. That the Commission does hereby find and declare that in order to protect the Boardman-Stanfield Highway from the effects of the Umatilla River flood waters it is necessary that a dike or embankment be constructed for the purpose of confining flood waters within the river channel;

2. That the Commission does further find and declare that the real properties hereinafter described are necessary and that title thereto or an easement thereover must be acquired by the State so that there may be constructed thereon the said dike or river embankment;

3. That the real properties title to which or an easement over which is needed for the construction and maintenance of said dike are described as follows:

Parcel No. 1

A parcel of land lying in the northeast quarter (NE¼) of the northwest quarter (NW¼) of Section 8, Township 3 North, Range 29 East, W. M., Umatilla County, Oregon; the said parcel being all that portion of the northeast quarter (NE¼) of the northwest quarter (NW¼) of Section 8 included in a strip of land of variable width lying on each side of the center line of the Umatilla River Dike as said dike has been surveyed over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 8+22.5 through equation 14+76 back equals 15+00 ahead to Station 23+80, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 8+22.5, at which point the said center line intersects the north line of Section 8; said point being 30 feet east of the northeast corner of the northwest quarter (NW¼) of Section 8, Township 3 North, Range 29 East, W. M.; thence South 2° 26' West 480.7 feet; thence South 13° 24' 30" West 172.8 feet; thence South 27°50'30" West 205.94 feet; thence South 28° 48' 30" West 301.5 feet; thence South 62° 03' 30" West 195.7 feet; thence South 19° 09' East 176.86 feet to Station 23+80, opposite which the easterly line of said strip of land intersects the southerly line of the northeast quarter (NE¼) of the northwest quarter (NW¼) of Section 8.

The widths (in feet) of the strip of land above referred to are as follows:

Station to Station	Total Width	Width on East Side of Center Line	Width on West Side of Center Line
8+22.5 to 11+80	50 feet	20 feet	30 feet
11+80 to 15+50	70 feet	20 feet	50 feet
15+50 to 23+80	50 feet	20 feet	30 feet

The parcel of land to which this description applies contains 1.46 acres.

Parcel No. 2

A parcel of land lying in the southeast quarter (SE¼) of the northwest quarter (NW¼) and the northeast quarter (NE¼) of the southwest quarter (SW¼) of Section 8, Township 3 North, Range 29 East, W. M., Umatilla County, Oregon; the said parcel being all that portion of the southeast quarter (SE¼) of the northwest quarter (NW¼) and the northeast quarter (NE¼) of the southwest quarter (SW¼) of Section 8 included in a strip of land variable feet in width lying on each side of the center line of the Umatilla River Dike as said dike has been surveyed over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 23+65, through equation 36+78.95 back equals 30+56.15 ahead, to Station 39+84.4, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 23+65, opposite and 20 feet distant from which point the westerly line of the said strip of land intersects the north line of the southeast quarter (SW¼) of the northwest quarter (NW¼) of Section 8; said point being 1342 feet south and 400 feet west of the northeast corner of the northwest quarter (NW¼) of Section 8, Township 3 North, Range 29 East, W. M.; thence South 19° 09' East 128.61 feet; thence

South 33° 23' West 74.72 feet; thence North 32° 44' West 193.1 feet; thence South 89° 41' West 414 feet; thence South 17° 38' East 502.62 feet; thence South 23° 33' 30" West 183.51 feet; thence South 1° 05' East 148.84 feet; thence South 24° 34' East 386.92 feet; thence South 8° 05' West 198.98 feet to Station 39+84.4, which station is approximately 20 feet south and 700 feet west of the center of Section 8.

The widths (in feet) of the strip of land above referred to are as follows:

Station to Station	Total Width	Width on Left Side of Center Line	Width on Right Side of Center Line
23+65 to 25+68.33	30 feet	10 feet	20 feet
25+68.33 to 39+84.4	30 feet	15 feet	15 feet

The parcel of land to which this description applies contains 1.54 acres.

That Parcel No. 1, above described, it appears is owned by Rhea Pedro Leal and Manuel Pedro, Jr., and is in the possession of Frank Correa, Jr., as tenant; and that Parcel No. 2 above described it appears is owned by and is in the possession of Frank Correa;

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

5. That J. H. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. H. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to or an easement over the said parcels of real property;

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners; and

7. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of March, 1947.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities or towns, together with rights of access from the abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways, or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Willamette Highway (State Highway No. 18) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the

traveling public, the Highway Commission relocated the section of said highway known as the Pleasant Hill-Lost Creek Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Willamette Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THER FORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property hereinafter described is needed and required for use in connection with the construction and maintenance of the section of the Willamette Highway known and designated as the Pleasant Hill-Lost Creek Section, which said property is owned by Henry Knowles and Alice Knowles, husband and wife, and is particularly described as follows:

A parcel of land lying in the southeast quarter (SE¼) of Section 1, also in the Jonathan Morgan D. L. C. No. 37, Township 19 South, Range 2 West, W. M., Lane County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Henry Knowles and Alice Knowles recorded in Book 155, Page 56, of Lane County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 170 feet in width, 80 feet on the northerly side and 90 feet on the southerly side of the center line of the Willamette Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 477+44.2 to Station 486+33.8, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 477+44.2, opposite and 80 feet distant from which point the northerly line of the said strip of land intersects the west line of said property; said point being 707.2 feet north and 2302.8 feet east of the southeast corner of the James R. Fisher, D. L. C. No. 43 in Section 1, Township 19 South, Range 2 West, W. M.; thence South 62° 53' East a distance of 889.6 feet to Station 486+33.8, opposite and 90 feet from which station the southerly line of said strip of land intersects the east line of said property.

The parcel of land to which this description applies contains 3.20 acres

2. That said property is needed and the acquisition of the same is necessary for right of way purposes in connection with said section of said highway;

3. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage;

4. The Commission does hereby further find and declare that, in addition to the acquisition of said real property above described, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission;

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

6. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto except at such points or places as may be designated by the

State Highway Commission, and in the event that no satisfactory agreement can be reached then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission;

7. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners; and

8. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of March, 1947.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways, or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are necessary for right of way purposes in connection with the Santiam Highway, which real property is owned by Vivian Weddle Long, is identified in the records of the Highway Commission as file R 13458, and is more particularly described as follows:

Parcel No. 1

A parcel of land lying in the southwest quarter (SW¼) of the northeast quarter (NE¼) of Section 31, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Vivian Weddle Long recorded in Book 143, Page 21, of Linn County Record of Deeds; the said parcel being described as follows:

Beginning at the intersection of the west line of First (now Twelfth) Street in Sweet Home with the south right of way line of the Santiam Highway, said point being 30 feet distant from (when measured at right angles to) the center line of said highway at Engineer's Station 1510+76.7; said point also being 74.5 feet north and 513.0 feet east of the southeast corner of the east projection of the Lowell Ames, Jr., D. L. C. No. 47 in said township and range; thence South 14° 56' East along the west line of said street a distance of 18.0 feet; thence South 76° 53' West parallel with the center line of said highway a distance of 95.7 feet to the west line of said Long property; thence North 14° 56' West along said west line a distance of 18.0 feet to the south right of way line of said highway; thence North 76° 53' East along said right of way line a distance of 95.7 feet to the point of beginning; containing 1723 square feet.

Parcel No. 2

A parcel of land lying in the southwest quarter (SW¼) of the northeast quarter (NE¼) of Section 31, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Vivian Weddle Long recorded in Book 143, Page 21, of Linn County Record of Deeds; the said parcel being described as follows:

Beginning at the Northeast corner of said property, said point being on the south right of way line of the Santiam Highway and 30 feet distant from (when measured at right angles to) the center line of said highway at Engineer's Station 1512+36.5; said point also being 110.8 feet north and 668.6 feet east of the southeast corner of the east projection of the Lowell Ames, Jr., D. L. C. No. 47 in said township and range; thence south along the east line of said property a distance of 18.5 feet; thence South 76° 53' West parallel with and 58 feet southerly from the center line of said highway a distance of 105.0 feet to the east line of First (now Twelfth) Street in the City of Sweet Home; thence North 14° 56' West along said street line a distance of 18.0 feet to the south right of way line of said highway; thence North 76° 53' East along said right of way line a distance of 109.8 feet to the point of beginning; containing 1933 square feet.

2. That the Commission does hereby find and declare that the said described parcels of real property are required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner of said real properties and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admis

sion in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of March, 1947.

The Engineer reported that the Legislative Assembly, now in session, recently approved the Civil Service pay plan prepared by the State Civil Service Commission and that as a result of this action by the Legislature the plan becomes effective as of March 1, 1947. He explained that the plan includes the State Highway Department as well as other state departments, and if it is to be made effective in the Highway Department on March 1, then the Highway Commission should pass on the matter at this meeting. The Chief Counsel confirmed the Engineer's statement that the State Highway Department comes under the regulations the same as any other state agency. He pointed out that the plan has been approved by the State Budget Director and also by Governor Earl Snell and is in conformity with provisions of the statutes covering the subject. He and the Engineer both recommended approval by the Commission at this time. Following discussion the Commission approved the plan, by unanimous vote, effective March 1, 1947, upon assurance by the Engineer and the Chief Counsel that the plan is in conformity with the legal requirements, and that it is their recommendation it be adopted by the Commission.

The Chief Counsel brought up for discussion Senate Bill No. 139 now before the Legislature relating to the condemnation of real property by the State Highway Commission. He recommended that the Commission oppose this bill as unwise and unnecessary legislation in that it will prove detrimental to public welfare and will afford opportunity for delays and postponements in highway projects and will materially increase highway costs. He explained that the bill imposes on the state the burden of paying, in addition to other costs incident to condemnation cases, the attorneys' fees which may be allowed to the defendant by the court, and, in his estimation, if the bill becomes law, property owners will then be able to force the state into court under the condemnation statute in connection with right of way settlements. The Chief Counsel advised that this bill has already passed both houses of the Legislature and will soon be placed on the Governor's desk for approval and signature, if it is not already there. He read aloud a suggested letter directed to the Governor urging and recommending that he veto the bill. Commissioner Chandler moved approval of the letter as prepared. The motion was seconded by Commissioner Schaupp and carried by unanimous vote of the Commission. The Commission thereupon signed the letter.

The Commission recessed for luncheon at 11:55 a.m. and reconvened the meeting at 2:00 p.m. in the same room with the same persons present and participating.

At 2:00 p.m. bids as follows for highway construction were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 4:30 p.m. in the same room:

MT. HOOD AND WAPINITIA HIGHWAYS IN CLACKAMAS, HOOD RIVER AND WASCO COUNTIES

The Chief Counsel brought up for discussion Senate Joint Resolution No. 9 providing for a committee to make a study of the transportation facilities of the state to determine the immediate and future need with respect to the construction and maintenance of public thoroughfares in the State of Oregon. He advised that the Senate Roads and Highways Committee will be in session on the following evening, March 25, and suggested that the Highway Commission should be present and express themselves relative thereto and particularly to inform the Committee of the attitude of the Commission with respect to that portion of the resolution which recommends and urges the State Highway Commission to consult with the several county courts and with the municipal authorities and render possible financial aid consistent with the primary obligation revolving on the state. It was his thought that the Commission should adopt a resolution expressing in writing its attitude with respect to such matters. He read aloud a form of resolution which he had prepared for the purpose. It appeared to the Commission that the resolution is in conformity with the ideas that were expressed to the county delegation which appeared before the Commission at its previous meeting. The Commission thereupon, by unanimous vote, adopted such resolution as follows:

WHEREAS, by the passage of Senate Joint Resolution No. 9 the Forty-Fourth Legislative Assembly of Oregon has recognized the ever-

increasing problems of highway, road and street construction and maintenance and has recognized also the problems of finance connected therewith; and

WHEREAS, for the purpose of evolving a businesslike approach to and a comprehensive solution of the problems which confront not alone the State but the counties and the municipalities as well, the legislature by the passage of said Senate Joint Resolution No. 9 has created a committee composed of members of the legislature and has charged said committee "to make a complete and exhaustive study of the transportation facilities of the state, including state highways, county roads and city streets; and, based upon such study and examination, determine the immediate and future needs and requirements with respect to the construction and maintenance of public thoroughfares of the state of Oregon"; and

WHEREAS, the members of the Oregon State Highway Commission appreciate the purpose of the Oregon legislature as disclosed in said resolution, and this Commission recognizes the real value which the work of said committee can and will contribute to the problems which need and demand solution; and

WHEREAS, the Oregon legislature in and by said resolution has said to this Commission:

> "Resolved, That pending the report and recommendation of said committee and action thereon by the legislature, it hereby is recommended and urged that the state highway commission confer, consult and cooperate with the several county courts and with the municipal authorities of the cities of the state and render all possible financial aid consistent with the primary obligation devolving on the state, to the end that the welfare of the cities, the counties and the state may be best served.";

and

WHEREAS, prior to the convening of the Forty-Fourth Legislative Assembly of Oregon, the Highway Commission after and as a result of conference with the Executive Committee of the County Judges of the State of Oregon undertook to expend on county roads during each of the years 1947 and 1948 one million dollars of highway funds, which allocation is to be in addition to the highway funds already allocated by law to the counties; and

WHEREAS, this Commission has heretofore recognized the needs of municipalities for additional funds for street construction and maintenance, and in keeping with such recognition has been contributing to some of the cities or towns of the State additional funds for street improvement; and

WHEREAS, for the purpose of joining with the Oregon legislature in its effort and plan to find a scientific and businesslike answer to the

problems with which State, county and city authorities are concerned, it is deemed by the Highway Commission appropriate that at this time the members of the Forty-Fourth Legislative Assembly be advised of the Commission's plans and commitments;

NOW, THEREFORE, BE IT RESOLVED BY THIS COMMISSION, all members being present and affirmatively voting, as follows:

1. That the Oregon State Highway Commission does hereby endorse the action of the Forty-Fourth Legislative Assembly of the State of Oregon in its purpose and objective as disclosed in said Senate Joint Resolution No. 9.

2. That the records, findings and data in the files of the Highway Commission relative to the subject and purpose set forth in said resolution and the services of the Highway Department be made available to the legislative committee created by the legislature.

3. That in response to the recommendation by the legislature as set forth in said resolution the Commission does hereby set aside for expenditure on county roads during the years 1947 and 1948 the sum of one million dollars for each year and does hereby set aside for expenditure on city streets during the years 1947 and 1948 the sum of five hundred thousand dollars for each year.

4. That the particular county roads to which said highway funds shall be applied and the type and character of construction or maintenance work to be done shall be determined as a result of conference between the Highway Commission and the county court of the county in which said roads are located, and the particular street or streets and the type and character of work to be done thereon shall be determined as a result of a conference between the Highway Commission and the municipal authorities of the cities in which such streets are located.

5. That the funds set aside by this resolution for expenditure on county roads shall be allocated to the several counties of the State pursuant to the following formula: one-third in the ratio which the area of each county bears to the total area of the State; one-third in the ratio which the rural population of each county bears to the total rural population of the State as shown by the latest federal census; and one-third in the ratio which the mileage of rural post roads in each county bears to the total mileage of rural post roads in the State.

6. That the funds set aside by this resolution for expenditure on city streets shall be allocated to the several cities of the State pursuant to the following formula: four hundred thousand dollars of highway revenues shall be allocated on the basis of the ratio that the urban population of each city bears to the total urban population of the State in accord with the latest federal census; provided that, if objection be made by any city on account of the growth of the city since the 1940

census was taken, the actual population may be determined by the Secretary of State by actual count, the cost of which shall be borne by the city, and the population so determined shall for the purpose of this resolution be regarded as the population of the city until the next federal census is taken. One hundred thousand dollars of state highway funds shall be reserved for expenditure by the State Highway Commission on the basis of need and shall be spent each year by the Commission on streets not a part of the state highway system and which streets are receiving excessive wear through sudden increases in population or heavy or unusual industrial traffic. The Commission shall determine the distribution of such expenditures upon applications made by the cities so affected.

7. That if additional funds are allocated to the counties and to the cities by the Forty-Fourth Legislative Assembly over and above the funds allocated to the counties pursuant to the provisions of Section 100-129, O. C. L. A., as amended by Chapter 376, Oregon Laws 1941, and over and above funds now allocated to the cities pursuant to the provisions of Chapter 371, Oregon Laws 1943, then the Highway Commission cannot make available for county roads or city streets the allocations set up in this resolution, for the reason that a double allocation of highway revenues for said purpose would so deplete highway revenues that the Commission would be unable to meet commitments and obligations already assumed.

8. That this resolution shall be entered in the minutes and records of the Commission as of March 24, 1947, and copies be made available to the members of the Forty-Fourth Legislative Assembly of the State of Oregon.

Dated this 24th day of March, 1947.

The Commission also had under discussion Senate Bills Nos. 433 and 434 relative to construction of an office building for the State Highway Department. The matter was discussed at considerable length in a general way, but no definite action was taken on the matter.

The Assistant Counsel brought up for discussion the question of constructing a fence along property that was acquired from N. Brown and Sons for right of way for the Burns-Lawen Section of the Burns-Crane Highway, in Harney County. He advised that as part consideration in acquiring the right of way the state agreed to re-establish an existing fence. This was done, but the posts were turned upside down, and because of decay the top part is not very attractive. Mr. Brown, he said, has asked the replacement of about 50 posts which he alleges should not have been used, and he agrees to purchase and install the posts himself if the Commission will allow him $25 for his trouble. The Commission by unanimous vote authorized settlement with N. Brown and Sons on such basis.

The Assistant Counsel reported on a proposed settlement of the damage claims of the Misses Mendenhall and Gilbert Hays resulting from flood waters of the Umatilla River on the Boardman-Stanfield Highway near Stanfield. The claims have been investigated, he said, and there is no question that the damage occurred and that the state is responsible. He said that the Misses Mendenhall, who own the property, will accept the sum of $725 in payment of the damage, and that Mr. Hays, who is a tenant on the Mendenhall property, will accept the sum of $55 to satisfy his claim. He recommended approval of both settlements. The Commission approved the recommendation unanimously.

The Assistant Counsel also presented an offer from Mr. Evan Lum, Portland, to pay $150 for a four-foot strip of state-owned land situate in Lot 2, Block 10, McClure's Addition to Astoria, which property abuts on other property that he owns and is desired by Foster and Kleiser Company on which to erect a platform for use by workmen in maintaining a sign on Mr. Lum's building. He gave as his thought that this was a very good offer and recommended acceptance of it. The Commission approved the recommendation, however, ordered that the deed of conveyance not be delivered to Mr. Lum until he has paid the purchase price.

The Assistant Counsel, Mr. George Neuner, reported a compromise settlement of a condemnation case involving right of way being acquired from Chester A. Smith for the Azalea-Glendale Section of the Pacific Highway, in Douglas County. He advised that the highway alignment was shifted slightly and Mr. Smith has agreed to accept the sum of $1,714 for land required of him, being 38/100 of an acre in excess of the area previously negotiated for. He recommended approval of the settlement on such basis. The Commission approved the recommendation unanimously.

The Engineer reported that because of the improvement of the Shaniko-Fossil Secondary State Highway between Porcupine Butte and Chichester Gulch and between Chichester Gulch and the Summit, in Wheeler County, portions of the right of way of the old highway no longer are of value for state highway purposes. He exhibited a map showing such portions and recommended appropriate action by the Commission relinquishing the state's right, title, and interest in such portions and allowing them to revert to the respective owners of the abutting land or lands. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler:

> WHEREAS, the Highway Commission has found it necessary and desirable to relocate sections of the Shaniko-Fossil Secondary Highway otherwise designated as State Highway No. 291 in Wheeler County, Oregon; and
>
> WHEREAS, such relocation has been made and the line established and the survey adopted by the Commission and a new highway has been constructed thereover; and

WHEREAS, by reason of the relocation of said sections of said highway sections or units of the right of way of the highway as orignally located have been eliminated from the highway as now located and such eliminated sections will no longer be needed for highway or other public purposes nor will they or any one or more of them be needed for the maintenance of a public highway for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the units or sections of right of way of said highway affected by reason of the said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the sections of the Shaniko-Fossil Secondary Highway known as the Porcupine Butte-Chichester Gulch Section and the Chichester Gulch-Summit Section, which begin at Highway Engineer's Station 293+50 on the new route and end at Highway Engineer's Station 0+08.5 of the new route, have been completed and made available for travel, and that the sections of the old route herein defined and described as Units A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, and X, are no longer deemed a part or parts of the route of the Shaniko-Fossil Secondary Highway but shall be and hereby are eliminated therefrom.

2. The parts or sections of the old route of the Shaniko-Fossil Secondary Highway lying outside the established right of way of the relocated highway which for the purpose of this agreement are identified as Units A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, and X, and are more particularly described as follows:

Unit A

Beginning at State Highway Engineer's Station 291+60 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 287+20 of the relocated Shaniko-Fossil Secondary Highway in the said Southeast quarter of the Northwest quarter of Section 3, Township 8 South, Range 20 East, W.M.

Unit B

Beginning at State Highway Engineer's Station 285+70 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence easterly via the former route of the Shaniko-Fossil Secondary Highway to the State Highway Engineer's

Station 271+80 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.

Unit C

Beginning at State Highway Engineer's Station 270+50 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence southeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 266+00 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.

Unit D

Beginning at State Highway Engineer's Station 261+85 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 257+50 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.

Unit E

Beginning at State Highway Engineer's Station 257+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence easterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 253+90 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.

Unit F

Beginning at State Highway Engineer's Station 254+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 3, Township 8 South, Range 20 East, W.M.; thence southeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 245+80 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit G

Beginning at State Highway Engineer's Station 245+00 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 238+00 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit H

Beginning at State Highway Engineer's Station 234+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence easterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 230+50 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit I

Beginning at State Highway Engineer's Station 225+75 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 221+80 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit J

Beginning at State Highway Engineer's Station 220+10 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Easterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 216+70 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit K

Beginning at State Highway Engineer's Station 209+70 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Easterly via the former route of the

Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 207+10 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit L

Beginning at State Highway Engineer's Station 202+60 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 198+50 of the relocated Shaniko-Fossil Secondary Highway in the Northeast quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.

Unit M

Beginning at State Highway Engineer's Station 193+70 of the relocated Shaniko-Fossil Secondary Highway in the Northeast quarter of the Northeast quarter of Section 2, Township 8 South, Range 20 East, W.M.; thence Easterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 190+40 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Southeast quarter of Section 35, Township 7 South, Range 20 East, W.M.

Unit N

Beginning at State Highway Engineer's Station 184+20 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Southeast quarter of Section 35, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 178+30 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit O

Beginning at State Highway Engineer's Station 176+50 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly along the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 174+50 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit P

Beginning at State Highway Engineer's Station 172+00 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 167+50 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit Q

Beginning at State Highway Engineer's Station 158+60 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Southwest quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 156+40 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit R

Beginning at State Highway Engineer's Station 153+60 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 148+50 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit S

Beginning at State Highway Engineer's Station 148+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 144+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northwest quarter of Section 36, Township 7 South, Range 20 East, W.M.

Unit T

Beginning at State Highway Engineer's Station 128+90 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Northeast quarter of Section 36, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former

route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 118+40 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Southeast quarter of Section 25, Township 7 South, Range 20 East, W.M.

Unit U

Beginning at State Highway Engineer's Station 115+70 of the relocated Shaniko-Fossil Secondary Highway in the Southwest quarter of the Southeast quarter of Section 25, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 99+70 of the relocated Shaniko-Fossil Secondary Highway in the Northeast quarter of the Southeast quarter of Section 25, Township 7 South, Range 20 East, W.M.

Unit V

Beginning at State Highway Engineer's Station 95+60 of the relocated Shaniko-Fossil Secondary Highway in the Northeast quarter of the Southeast quarter of Section 25, Township 7 South, Range 20 East, W.M.; thence Northerly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 89+30 of the relocated Shaniko-Fossil Secondary Highway in the Northeast quarter of the Southeast quarter of Section 25, Township 7 South, Range 20 East, W.M.

Unit W

Beginning at State Highway Engineer's Station 86+80 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 25, Township 7 South, Range 20 East, W.M.; thence Northerly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 85+00 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 25, Township 7 South, Range 20 East, W.M.

Unit X

Beginning at State Highway Engineer's Station 84+20 of the relocated Shaniko-Fossil Secondary Highway in the Southeast quarter of the Northeast quarter of Section 25, Township 7 South, Range 20 East, W.M.; thence Northeasterly via the former route of the Shaniko-Fossil Secondary Highway to State Highway Engineer's Station 2+30 of the relocated Shaniko-Fossil Secondary Highway in the Northwest quarter of the Southwest quarter of Section 20, Township 7 South, Range 21 East, W.M.

shall be and hereby are abandoned as parts of said highway, and hereafter

all right, title and interest which the state has in said rights of way shall and hereby do revert to the respective owners of the abutting land or lands.

3. A print or sketch map is on file in the office of the State Highway Commission in Salem, Oregon, which print or map for identification purposes bears the signature of the State Highway Engineer and the signature of the Secretary of the Commission, and by this reference is made a part of this resolution. A similar copy of said map, together with a copy of this resolution, is to be filed with the County Clerk of Wheeler County. On said print there are shown colored in brown the sections of the old route of said highway designated as Units A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, and X, and there is likewise shown on said print colored in green the route of the highway as relocated. *

4. That this resolution shall be entered in the minutes and records of the Highway Commission as of the 24th day of March, 1947, and a certified copy thereof delivered to the County Court of Wheeler County, as provided herein.

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 155, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission had under discussion a proposed agreement with the Spokane, Portland and Seattle Railway Company relative to purchase by the railroad company of a small portion of state-owned property known as "Krueger Quarry" at the west end of Cornelius Pass Tunnel, Washington County, which land the Company needs in connection with a proposed revision of its railroad. The Engineer advised that the parcel contains 1.63 acres and that the Company has agreed to pay the sum of $244.50 for it, which is the amount it cost the state; moreover, the Company agrees to construct a new hauling road for the state's contractor, Porter W. Ivett, who is conducting operations in this quarry, so that neither the state nor the contractor will sustain increased costs. He recommended approval of the railroad company's request. The Commission approved the recommendation by unanimous vote. (An agreement covering the matter was signed by the Commission on the following day.)

The Assistant Counsel, Mr. DeSouza, reported on the cost to acquire additional right of way needed for state highways within the borders of Camp Adair. He particularly pointed out that such right of way is needed for the

Tampico-Lewisville Secondary Highway No. 202, which will cost $900; two tracts for the Pacific Highway West in Benton County, one of which will cost $6,750 and the other $500; right of way for the Pacific Highway West in Polk County which will cost $1,000, and a quarry site containing 27.46 acres which will cost $2,400. These prices, he said, were obtained from the Federal Land Bank of Spokane, which has jurisdiction, and are the prices which the Highway Commission must bid for the properties if it wants to acquire them. He recommended submission of offers at this time so as to make certain that the property does not get into private ownership. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote and authorized the Secretary to execute the offers on behalf of the Commission in conformity with provisions of the resolution adopted on November 25, 1946.

The Chief Counsel reported on the matter of establishing a policy with respect to charging utilities for use of state highway bridge structures on which to carry company wires, cables, water or gas mains, and other facilities. He gave as his opinion that whenever the use of a bridge structure by a public utility for such purposes entails additional expense to the state, then the utility should be required to at least reimburse the state to that extent. On the other hand, if the state is in no wise inconvenienced, either in maintenance or operation costs, by reason of the presence of the utility's facilities, then, in his estimation, no charge should be made, but it should be clearly understood that the Commission would not in any way assume any responsibility or liability for the safety of the utility or its equipment; moreover, the subject should be covered by a permit setting forth the conditions pursuant to which the utility would be authorized to use the structure, and appropriate provisions should be incorporated therein by which the state would be protected under all circumstances. He recommended adoption of a policy in conformity therewith. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote and so ordered.

The Commission discussed a suggestion from the Chief Counsel with respect to the abandonment of old right of way no longer of value for highway purposes by reason of relocation. (See Chief Counsel's letter dated March 7, 1947, direct to members of the State Highway Commission in general files for details.) Briefly, the Chief Counsel suggested that the state should share with the counties the burdens imposed on the counties by reason of the abandonment of old highway rights of way. The Engineer suggested, in order to avoid confusion, in future maintenance of numerous short sections of old roadway, that it might be advisable to negotiate with the counties from the standpoint of the counties assuming jurisdiction over such abandoned portions of the state highway right of way and the state assuming jurisdiction over some other county road. It appeared to him that such procedure would accomplish the objective that the Chief Counsel has in mind. The Commission instructed the Engineer and the Chief Counsel to work out a solution to the matter and to report back to the Commission at its next meeting.

The Assistant Counsel, Mr. Neuner, requested instructions relative to the claim of Charles W. Brundle who alleges damage to his property on the Crater Lake Highway as the result of the blocking of a highway culvert which

allowed surface water to flow on to his premises. It appears that Mr. Brundle operates a service station at this location and that about 200 gallons of ethyl gasoline were destroyed by the water, and it was also necessary for him to clean out a number of gasoline tanks, fuel pumps, and carburetors of the cars of some of his customers. Investigation reveals, he said, that the state is responsible for the damage, and he recommended payment of the claim, which amounts to $85.15. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Chief Counsel reported receipt of the petition of Geo. S. Rusco for vacation of a portion of Peck Boulevard, which Boulevard, at the north end, abuts on the Klamath Falls-Lakeview Highway, in Klamath Falls. He recommended that the Commission join in this petition because Peck Boulevard is unused at the present time and the approach to and upon the highway from the north end of said Boulevard is precipitous and steep and would create a traffic hazard should an entrance to the highway be made at that place. The Commission approved the recommendation by unanimous vote. The Secretary was authorized to sign the petition on behalf of the Commission.

The Chief Counsel reported that the Union Pacific Railroad Company has presented to the Legislature its claim in the amount of $134,571 for damages that it alleges occurred to its property by reason of slides on the Upper Columbia River Highway in February of 1946. He recalled that the Commission previously denied the claim, but his reason for bringing it up at this time is because the matter is now before the Legislature. He recommended confirmation of the previous action denying the claim. The Engineer concurred therein. Motion was thereupon made by Commissioner Schaupp that the claim be denied. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Chief Counsel reported on the attitude of the people of Gold Beach with respect to right of way needed for the proposed improvement of the Oregon Coast Highway through this town. He advised that these people are very anxious for the highway improvement and are unanimously in favor of proceeding on the original basis; moreover, they have stated a willingness to cooperate with the State Highway Department in acquiring the right of way. The Commission took no action on the matter.

The Commission had under discussion a report from the Engineer on the widening of Sandy Boulevard, Portland, (US30), as requested by a Parkrose delegation at the previous meeting. The Engineer recalled that the delegation alleged the former Highway Commission promised to make certain improvements to this thoroughfare. A check of the records, he said, reveals that at a meeting on July 23, 1941, the former Commission did authorize expenditure of $40,000 for certain improvements between 82nd Avenue and 108th Avenue and also authorized an additional expenditure of $3,500 to oil the shoulders between 108th Avenue and 122nd Avenue, but the work was not done because of wartime conditions. He further reported that the most important portion of the section is between 82nd Avenue and 96th Avenue, the improvement of which is estimated to cost about $60,000, and the installation of storm drains

between these same points which is estimated to cost an additional $20,000. He recommended, in view of the definite commitment made by the former Highway Commission, the approval at this time of the proposed improvement between 82nd Avenue and 96th Avenue, totaling $80,000. The Commission approved the recommendation unanimously.

The Commission also had under discussion the request of the Bay City Chamber of Commerce for improvement of the Oregon Coast Highway through their city, 0.6 mile in length, in a manner similar to the development through the town of Ocean Lake. The Engineer estimated that such improvement would cost about $60,000 and recommended disapproval of it because there are so many other more important widening jobs through small towns which have a higher priority, not only on the Oregon Coast Highway, but also at other points throughout the state. The Commission approved the recommendation unanimously.

The Engineer gave a partial report on the cost to install continuous lines of sight posts with reflector buttons as compared with guard fence construction on mountain grades as an accident-prevention measure, particularly on the Minam Hill Section of the Wallowa Lake Highway, in Wallowa County, and on the Siskiyou Mountain Section of the Pacific Highway, in Jackson County.

With respect to the Minam Hill Section, he advised that approximately two miles of guard fence would be required which would cost about $21,000, whereas the edge of the road could be outlined at all points by the installation of about 50 additional sight posts for about $200. The sight posts, he said, would be painted white and "cats eye" reflectors would be attached to each to outline the road at night.

As to the Siskiyou Mountain Section, he said that about ten miles of guard fence would be required which would cost in excess of $200,000, but sight posts could be installed with reflector buttons to clearly outline the highway both day and night, for about $1,000. He recommended installation of the sight posts with reflector buttons in both instances. In this connection the Engineer read aloud a report from the Grand Jury in the Circuit Court of the State of Oregon, in Jackson County, in which the need for guard-fence construction along the north slope of the Siskiyou Mountain Section of the Pacific Highway was stressed. In the discussion of this matter the Chief Counsel advised that the State Highway Commission is not required to go to extremes in providing protection for the traveling public in such locations; however, if there is a place where repeated accidents occur and those accidents are due to lack of sufficient warning, then the Commission is under obligation to do whatever may be necessary to protect the public. The Commission, he said, after building the highway is supposed to make it reasonably safe for traffic, but it does not have to guarantee the general public absolute safety. This matter was discussed at some length, but a decision with respect thereto from a state-wide standpoint was deferred pending a report from the Engineer as to what other states are doing in like situations. In the meantime the Engineer was authorized to proceed with the installation of sight posts as recommended on the Minam Hill Grade and the Siskiyou Grade.

The Engineer read aloud a written report dated February 27, 1947, directed to the Oregon State Highway Commission with respect to the condition of the Cottonwood Canyon Grade Section of the Wasco-Heppner Secondary Highway where this highway crosses the John Day River. He estimated it would cost about $300,000 to grade the four and one-half mile section in West Cottonwood Canyon to a width of 26 feet with maximum 14 degree curvature, including surfacing, and that a minimum project to make this grade safe for traffic by constructing a 16-foot roadbed on the present alignment with passing places at frequent intervals, would cost about $50,000. The East Cottonwood Grade Section, he said, is now being taken care of, there being included in the Commission's program for Federal Aid Secondary Highway projects an amount of $102,000 for grading and surfacing this section, the contract for which will probably be awarded either this fall or in the early spring of 1948. He gave as his belief that a $50,000 project on the West Cottonwood Grade would satisfy the local people who use this road. The Commission deferred action in the matter until its next meeting.

The Engineer reported that the Canby City Council has been contacted relative to its request for signalization of traffic on US99E through this town with the result that the Council changed its attitude upon learning that the city would be required to pay one-half of the expense; however, the city officials appeared to be quite interested in a suggestion that was made that it employ a special police officer with a prowl car to apprehend violators of the speed regulations. The City Council, he said, is going to give this suggestion serious consideration, so the subject may be considered as a closed issue for the time being. The Commission took no action on this report.

The Commission discussed the Engineer's written report dated March 10, 1947, relative to the request of the Douglas County Court for state cooperation in the construction of a new bridge over Little River on the North Umpqua County Road, in Douglas County. The Engineer estimated the cost of the structure at $68,300 and the cost to widen the approach embankments at about $6,700, making a total cost of $75,000, fifty percent of which would be paid by the state and 50 percent by Douglas County. He recommended approval of the county's request on such basis if highway revenues are not seriously decreased by action of the Legislature now in session. The Commission appeared favorably inclined to approve the recommendation but deferred its decision until the next meeting.

The Commission discussed a report from the Engineer and the Chief Counsel on the subject of installing stop and go signals at the Twin Tunnels on the Upper Columbia River Highway. The Engineer recalled that the Commission at a previous meeting authorized the installation of signals at this place but later postponed the installation pending further study of the situation because traffic would be required to stop on the highway at a point where it would be subject to the hazard of rocks falling from the hillside above, and there was a question which would be the greater hazard to motorists—falling rocks or collisions occurring in the tunnel. The Engineer advised that these tunnels are narrow and cannot accomodate two trucks going in opposite directions. To widen them sufficiently to accomodate all traffic, he

said, would cost about $120,000 and would be a difficult undertaking, but if that were done the problem would be completely solved since traffic then could move through the tunnels at all times without stopping for clearance. He suggested, however, that before proceeding with the widening work it would be advisable to try out a system of light signals which would allow westbound traffic to proceed at all times except when the signal would indicate that the tunnels are occupied by eastbound traffic. The eastbound traffic signals, he said, would be set far enough away from the tunnel portal to avoid the danger of falling rocks. As a result of considerable discussion of this matter the Commission by unanimous vote referred the problem to the Engineer to eliminate the existing hazard in the best possible manner.

The Engineer also reported on the cost to revise the Columbia River Highway at Oneonta Tunnel. He advised that the 1947 maintenance budget contains an item of $12,000 for construction of a timber lining in this tunnel but it still will permit only one-way traffic under signal control. He suggested that it would be preferable to reroute the highway around the tunnel using the location formerly occupied by the Union Pacific Railroad, which would eliminate the necessity to do the lining work in the tunnel and to maintain the traffic signals. He estimated the cost to build the new road around the tunnel at about $22,000 and the cost to backfill the existing tunnel in order to prevent the possibility of weakening the grades at about $5,000, or a total of $27,000, slightly in excess of twice the cost of relining the present tunnel. He recommended approval of the project and that he be given authority to proceed with the work as minor betterment work. The Commission approved the recommendation unanimously.

The Commission had under consideration the matter of designating as a state secondary highway the county road which extends from Estacada to Milwaukie via Eagle Creek and Barton. The Engineer and the Chief Counsel both assured the Commission that all of the requirements with respect to such designation have been satisfied, including the furnishing of additional right of way by Clackamas County. In view of this assurance motion was made by Commissioner Chandler that the road be placed on the State Secondary Highway System. The motion was seconded by Commissioner Schaupp and carried unanimously. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

> WHEREAS, under the provisions of Title 100, O.C.L.A., and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and
>
> WHEREAS, the State Highway Commission, by mutual agreement with the Clackamas County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted

and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described county road in Clackamas County be and the same hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Clackamas Secondary State Highway No. 171:

Beginning at a point in Section 33, Township 3 South, Range 4 East, W.M., in Clackamas County, Oregon, at the Northwest terminus of the Forest Service Upper Clackamas Construction and Maintenance Project, approximately 1.6 miles southeast of Estacada; thence northwesterly via Estacada, Eagle Creek, Barton, and Carver to Clackamas; thence northerly from Clackamas 1.10 miles to a road junction; thence westerly and northwesterly via Milwaukie to the log boom and dump on the Willamette River in Milwaukie, a distance of 26.00 miles.

2. The selection and designation of said county road as a state secondary highway is made upon the representation and assurance of the County Court that a right of way not less than sixty feet in width has been acquired, or will be acquired by the county at county expense for the entire length of said county road and that said right of way will be made available to the state.

3. When a sixty foot right of way throughout the entire length of said county road has been acquired and made available to the state, then said highway shall be qualified for improvement and maintenance under the provisions of said Subsection 36 of Section 100-115, O. C. L. A.

In this connection the Engineer advised that it will be desirable, in view of this newly-designated state secondary highway, to rename the Woodburn-Sandy State Secondary Highway No. 161, inasmuch as the section between Estacada and Eagle Creek coincides with the newly-designated secondary highway. He suggested that the section between Woodburn and Estacada be renamed the Woodburn-Estacada Secondary State Highway No. 161 and that the section between Eagle Creek and Sandy be renamed the Eagle Creek-Sandy Secondary State Highway No. 172. The Commission approved the recommendations and by unanimous vote adopted the following resolution with regard thereto;

WHEREAS, on November 13, 1931, the Commission selected and designated as a secondary state highway, market roads in Marion and Clackamas Counties, then under the jurisdiction of the county courts of said counties, the description of said roads being as follows:

> Beginning at a point on the Pacific Highway East, approximately two miles north of Woodburn, and extending easterly along Market Road No. 57 to the Marion-Clackamas County line, and along Market Roads No. 32, No. 35, No. 33 and a portion of Market Roads No. 1 and No. 19 in Clackamas County, via Molalla, Colton, and Dover, to the Mount Hood Highway, a distance of approximately 38.7 miles,

which said market roads, upon their selection and designation as a secondary state highway, were identified in the records of the Highway Commission as the Woodburn-Sandy Secondary State Highway No. 161,

AND, WHEREAS, on March 24, 1947, the Commission designated as a secondary state highway a county road and a secondary state highway extending from a point 1.6 miles southeast of Estacada, northwesterly via Estacada, Eagle Creek, Barton, Carver, and Clackamas, to Milwaukie, a distance of 26.00 miles,

AND, WHEREAS, a portion of said secondary highway designated by the State Highway Commission on March 24, 1947, extending from a point 1.6 miles southeast of Estacada to a junction with the Woodburn-Sandy Secondary Highway at Estacada, was under the jurisdiction of the County Court of Clackamas County, and a section of county road extending from Eagle Creek via Barton, Carver, and Clackamas, to Milwaukie, was under the jurisdiction of the County Court of Clackamas County, and a section of said secondary highway extending from Estacada to Eagle Creek, was under the jurisdiction of the Commission,

AND, WHEREAS, on March 24, 1947, the Commission designated the entire route as Secondary State Highway No. 171, as one continuous route,

AND, WHEREAS, this designation covered a portion of the former route of the Woodburn-Sandy Secondary State Highway No. 161,

AND, WHEREAS, it is the judgment and the opinion of the Commission that the Woodburn-Sandy Secondary State Highway No. 161 should be changed and thereafter identified as the Woodburn-Estacada Secondary State Highway No. 161 and the Eagle Creek-Sandy Secondary State Highway No. 172,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting as follows:

1. That the route, location and description of the Clackamas Secondary State Highway No. 171 shall be and is described as follows:

Beginning at a point 1.6 miles southeast of Estacada, thence northwesterly via Estacada, Eagle Creek, Barton, Carver and Clackamas to Milwaukie, a distance of approximately 26.00 miles, net length approximately 25.00 miles.

2. That the route, location and description of the Woodburn-Estacada Secondary State Highway No. 161 shall be and is described as follows:

Beginning at a point on the Pacific Highway East, approximately two miles north of Woodburn and extending via Molalla, Colton, and Springwater to Estacada, a distance of 34.24 miles.

3. That the route, location and description of the Eagle Creek-Sandy Secondary Highway No. 172 shall be and is described as follows:

Beginning at Eagle Creek and extending northeasterly to the Mt. Hood Highway at Sandy, a distance of 6.65 miles.

3. That this resolution be entered in the minutes and records of the Commission as of the 24th day of March, 1947.

The Commission discussed with the Engineer the bids received earlier in the session for highway construction work and took the following action thereon by unanimous vote:

Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Hood River, Clackamas and Wasco Counties. This contract was awarded to the low bidder, J.N. & M.J. Conley, Portland.

The contract for replacement of the pier fender on the South Slough Bridge on the Cape Arago Secondary Highway, Coos County, was awarded to the low bidder, Coos Bay Dredging Company, Coos Bay.

Surfacing and oiling the Spitzenberg-Scappoose Section of the Pittsburg-Scappoose County Road, in Columbia County. The Commission deferred award of this contract pending approval by the Public Roads Administration and referred the bids received therefor to the Engineer with authority to award the contract to the low bidder when this condition has been satisfied.

Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County. Twelve-hundredths mile of grading and paving. The award of this contract was deferred by the Commission pending approval by the Public Roads Administration. The bids were referred to the Engineer with authority to award the contract to the low bidder when this condition has been satisfied.

Widening Reese Creek, Little Butte Creek and Antelope Creek Bridges on the Crater Lake Highway, in Jackson County. No bids were received by the

Commission for this work. The Engineer was authorized to readvertise the project for bids.

Painting Yaquina Bay Bridge on the Oregon Coast Highway at Newport, Lincoln County. The Commission awarded this contract to the Pacific Bridge Painting Company of San Francisco, California, the low bidder.

Hydraulic-dredged embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, Multnomah County. The Commission deferred the award of this contract pending approval by the Public Roads Administration and referred the bids received therefor to the Engineer with authority to award the contract to the low bidder when this condition is satisfied.

The Commission awarded to J. P. Brittan & Co. the contract for constructing a bridge across Buck Hollow Creek on the Sherars Bridge Secondary Highway, in Sherman County, the bid of this company being the low one received.

Construction of an earth dike on the Umatilla River Dike Project adjacent to the Boardman-Stanfield Highway near Stanfield, Umatilla County. The Commission deferred the award of this contract pending consumnation of condemnation suits which are now under way. The bids received therefor were referred to the Engineer with authority to award the contract to the low bidder when the condemnation action has been consumnated,

At 4:30 p.m. Chairman Banfield publicly announced the awards of contracts as follows:

"Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clackamas, Hood River, and Wasco Counties. The Commission received two bids for this work, the low one being that of J.N. & M.J. Conley, Portland, at $49,975. The other bid was that of P.B. Doherty & Son, Portland, at $51,195. The Commission has awarded the contract to the low bidder, J.N. & M.J. Conley.

"Replacement of a pier fender on South Slough Bridge on the Cape Arago Secondary Highway, in Coos County. Coos Bay Dredging Company, Coos Bay, submitted the low bid for this work at $18,991.10. Hillstrom Shipbuilding Co., No. Bend, submitted the only other bid at $20,741. The Commission has awarded the contract to the low bidder, Coos Bay Dredging Company, at its bid price.

"Surfacing and oiling the Spitzenberg-Scappoose Section of the Pittsburg-Scappoose County Road, in Columbia County. J.N. & M.J. Conley, Portland, submitted the low bid for this work at $56,682.90 based on the use of tar. They also submitted a bid of $56,744.90 based on the use of asphalt. P.B. Doherty & Son, Portland, submitted the next low bid at $57,126 based on the use of tar and $57,188 based on the use of asphalt. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract, based on the use of tar, to the low bidder, J.N. & M.J. Conley, when certain conditions have been satisfied.

"Grading and paving the Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County. Albert W. Denton, Vancouver, Washington, submitted the low bid for this work at $49,848. The next low bidder was Scheffel & Gilman, Medford, at $52,738. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Albert W. Denton, when certain conditions have been satisfied.

"Widening the Reese Creek, Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway, in Jackson County. The Commission received no bids for this work. The project is to be readvertised.

"Painting Yaquina Bay Bridge on the Oregon Coast Highway, at Newport. Pacific Bridge Painting Company, San Francisco, California, submitted the low bid for this work in the amount of $14,148.75. L.E. Snell, Albany, submitted the next low bid at $33,624. There was one higher bidder. The Commission has awarded the contract to the low bidder, Pacific Bridge Painting Company, at its bid price.

"Six and seven-hundredths miles of hydraulic-dredged embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County. Hydraulic Dredging Company, Ltd., Oakland, California, submitted the low bid for this work at $937,337 on the condition that it also receives the award of the contract for the adjoining forest highway project, for which bids were received on this date by the Public Roads Administration. Johnson Western Company, San Pedro, California, submitted the next low bid at $962,235 subject to the same condition. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of a bridge over Buck Hollow Creek on the Sherars Bridge Secondary Highway, in Sherman County. J.P. Brittan & Co., Portland, submitted the low bid for this work at $37,320. E.F. Philpott, Portland, submitted the next low bid at $39,990. There was one higher bidder. The Commission has awarded the contract to the low bidder, J.P. Brittan & Co. at its bid price.

"Umatilla River Dike Project adjacent to the Boardman-Stanfield Highway near Stanfield, Umatilla County. Loran Petro, Hermiston, submitted the low bid for this work at $7,290. Vernie Jarl, Gresham, submitted the next low bid at $7,425. There were 11 higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Loran Petro, when certain conditions have been satisfied."

The Engineer rendered a detailed report on equipment, including that on hand; the number and cost of different pieces of equipment received in 1947; the number, cost, and character of equipment now under order; and the number, cost, and character of additional equipment which should be purchased

this year based on minimum requirements. He pointed out that the Commission set up in its 1947 Budget an amount of $1,000,000 for this purpose, of which amount the Commission has authorized $600,000 for expenditure. He further stated that of this $600,000 approximately $576,000 has been obligated, leaving a balance of only $24,000 available for additional purchases. He asked the Commission to authorize and additional expenditure of $100,000 at this time, which would leave a balance of approximately $200,000 for future authorization considering that a saving of $120,000 has been made in connection with the purchase of Government surplus property. The Commission approved the request by unanimous vote.

The Engineer also reported on the work accomplished on city streets which are not on the state highway system, being work authorized by the Commission during 1946, totaling $43,868.45, of which $9,212 represents contributions by the cities under agreement. The Commission approved the report and ordered it filed.

The Commission had under consideration a letter from the Coos Bay-North Bend Rotary Club advising that at a recent meeting the Club had under discussion the naming of a state highway bridge in honor of the late C. B. McCullough, and as a result of discussion the Club adopted a resolution by unanimous vote favoring the naming of the Coos Bay Bridge on the Oregon Coast Highway the "C. B. McCullough Bridge" in honor of Mr. McCullough who designed and engineered the construction of this structure. In view of this letter the Commission decided to name this bridge in honor of Mr. McCullough. The Chief Counsel was instructed to prepare an appropriate form of resolution covering the matter for consideration by the Commission at its next meeting.

The Commission discussed briefly the Engineer's written report, dated March 17, 1947, with reference to the relocation of the Oregon Coast Highway between North Bend and Bandon via Cape Arago which previously was requested by the Seven Devils Road Association and others. Action on this matter was deferred by the Commission until the Legislature adjourns.

The Engineer submitted a written report on the request of the Benton-Linn Flood District for improvement of the Corvallis-Eastside Secondary Highway to prevent inundation of the highway and private property during flood periods of the Willamette River. (See report dated March 23, 1947, directed to the Oregon State Highway Commission, in general files, for details.) Briefly, the report is to the effect that no relief to flood conditions will be gained by replacing the fills and spillways on this highway by trestles of a length that is financially practical, that to raise the highway entirely above the flood water would require a causeway 13,000 feet long which is estimated to cost about $2,250,000. The condition referred to by the petitioners has existed for many years and is the same as when the road was designated a state highway more than 12 years ago. According to legal opinion the existing fills have been in place for so long a period that present conditions might legally be considered as prescriptive and any material change might entail unforeseen liability for the State Highway Department. In view of these reasons, and for additional reasons, the Engineer recommended that the request be denied. The Chief Counsel

concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer brought up for discussion a resolution from South Umpqua Grange, Days Creek, Oregon, concerning hazards existing on the Tiller-Trail Secondary Highway by reason of log-hauling traffic. He pointed out that the specific complaint is that logging trucks are often overloaded and dangerous to traffic. He advised that everything possible is being done by Weigh-masters to curb the overloading, a fair percentage of their time being spent at Canyonville weighing loads of logs which come off the Tiller-Trail Highway; moreover, a loadometer pit is being installed at Canyonville which will facilitate the weighing at this point. He gave as his thought that the accidents which occur on the Tiller-Trail Highway are due to improper driving, the records disclosing that during the six-year period from 1941 to 1946, of a total of 63 accidents that occurred 11 definitely involved log-hauling trucks. The Engineer also advised that log-hauling permits issued to cover operations on this road contain provision for control of logging trucks. In his estimation, if the operators respect and comply with the rules and regulations, there should be fewer accidents. He read aloud a written report from Mr. W. W. Stiffler, Assistant Maintenance Engineer, on this subject. In view of the report the Commission decided to take no action on the matter.

The Engineer reported briefly the estimated cost to construct the Hood River-Mosier Section of the Columbia River Highway, in Hood River and Wasco Counties, 7.28 miles in length. According to estimates revised to 1947 prices, he said, this work would cost about $2,192,500, including engineering and contingencies. The Commission took no action on the matter.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. on the following morning in the same room.

Portland, Oregon
March 25, 1947

The meeting reconvened at 9:00 a.m. in the auditorium of the Public Service Building with all Commissioners, the Engineer, the Chief Counsel, and the Secretary present.

Bids, as follows, were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:30 p.m.:

OREGON COAST HIGHWAY IN CURRY COUNTY
CLEAN AND PAINT BRIDGE OVER PISTOL RIVER AND BRIDGE OVER ELK CREEK

J. S. Morris Co., Berkeley, Calif.	$ 6,790.00
Tri-State Painting Co., Portland	9,800.00
R. L. Elfstrom, Salem	9,980.00

JOHN DAY-BURNS HIGHWAY IN HARNEY COUNTY
NORTH UNIT, GRANT COUNTY LINE-CROW FLAT SECTION

E. C. Hall Co., Portland	$296,913.00
P. B. Doherty & Son, Portland *	298,060.00
J. N. & M. J. Conley, Portland	303,414.25
Peter Kiewit Sons' Co., Longview, Wn.	359,396.80

* Bidder will accept only one project

THE DALLES-CALIFORNIA HIGHWAY IN JEFFERSON COUNTY
MADRAS SECTION

Babler Bros., Portland	$ 81,644.00
Rogers Constr. Co., Portland	93,005.00

SPRAGUE RIVER HIGHWAY IN KLAMATH COUNTY
CONSTRUCT THREE BRIDGES OVER SPRAGUE RIVER

Clifford A. Dunn, Klamath Falls	$159,128.00

CITY OF KLAMATH FALLS IN KLAMATH COUNTY
REMODEL BEARDSLEY BUILDING

Pinnniger & Watkins, Klamath Falls	$ 19,425.00

TERRITORIAL SECONDARY HIGHWAY IN LANE COUNTY
GILLESPIE CORNER-LORANE SECTION

	USING ASPHALT	USING TAR
D. F. McKenzie, Salem	$117,950.50	- - - - -
E. C. Hall Co., Portland	132,880.00	- - - - -
Del R. Beebe Constr. Co., Eugene	154,171.50	- - - - -

I. O. N. HIGHWAY IN MALHEUR COUNTY
JORDAN CREEK-ROCK CREEK ROCK PRODUCTION PROJECT

P. B. Doherty & Son, Portland *	$ 34,650.00
Oscar E. Joelson, Eugene	35,820.00

* Bidder will accept only one project

OLD OREGON TRAIL IN MALHEUR COUNTY
NYSSA (1ST STREET-7TH STREET) SECTION

Stanley & Ehlen, Boise, Idaho	(1)	(2)	$ 54,078.50
Warren Northwest Inc., Portland	(1)		87,087.50

(1) Bidder will not accept this project alone
(2) Bidder will make reduction of $1,000.00 if also awarded Ontario Project.

OLD OREGON TRAIL IN MALHEUR COUNTY
ONTARIO (S.W. 1ST STREET-S.W. 12TH STREET) SECTION

Stanley & Ehlen, Boise, Idaho *	$ 82,363.00
J. A. Terteling & Sons, Inc., Boise, Idaho *	101,012.22
Warren Northwest Inc., Portland *	121,263.00

* Bidder will not accept this project alone

COMBINATION BIDS FOR ABOVE TWO PROJECTS

(1) Nyssa (1st Street-7th Street) Section of the Old Oregon Trail
(2) Ontario (S.W. 1st Street-S.W. 12th Street) Section of the Old Oregon Trail

	(1)	(2)	Reduc.	Comb. Bid
Stanley & Ehlen	$54,078.50	$ 82,363.00	$1,000.00	$135,441.50
Warren Northwest Inc.,	87,087.50	121,263.00	- - - -	208,350.50
J. A. Terteling & Sons, Inc.,	- - - - -	101,012.22	- - - -	- - - - -

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
TROUTDALE-WAHKEENA CREEK SECTION

J.N. & M.J. Conley, Portland	$389,770.00
Leonard & Slate Oreg. Ltd., Portland	390,100.00
E. C. Hall Co., Portland	393,925.00
Guy F. Atkinson Co., Portland	486,197.00

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
CONSTRUCT CONCRETE BRIDGE OVER O.W. R.R. & N. CO. TRACKS AT BRIDAL VEIL

Guy F. Atkinson Co., Portland	$317,400.00

2.

HILLSBORO-CORNELIUS PASS COUNTY ROAD IN MULTNOMAH AND WASHINGTON COUNTIES
WEST UNION-CORNELIUS PASS SECTION

	USING ASPHALT	USING TAR
K. F. Jacobsen Co., Inc., Portland	$173,325.25	$173,291.25
Vernie Jarl, Gresham	173,447.75	- - - - -
John Havlik, Jr., Scappoose	179,950.00	- - - - -
Grimstad & Vanderveldt, Astoria	181,647.75	181,613.75
Babler Bros., Portland	184,686.50	- - - - -

C. T. Malcom & Co., Portland	210,448.50	210,275.50
Peter Kiewit Sons' Co., Longview, Wn.	215,418.75	- - - - -

OREGON COAST HIGHWAY IN TILLAMOOK COUNTY
CLEAN AND PAINT NECARNEY CREEK BRIDGE AND NEHALEM RIVER BRIDGE

Pacific Bridge Painting Co., San Francisco, Calif.	$ 9,951.50
J. S. Morris Co., Berkeley, Calif.	12,380.00
R. L. Elfstrom Co., Salem	12,989.00
L. E. Snell, Albany	20,117.00
Tri-State Painting Co., Portland	22,500.00

SUNSET HIGHWAY IN WASHINGTON COUNTY
BARNES ROAD-MULTNOMAH COUNTY LINE SECTION

	USING ASPHALT	USING TAR
Porter W. Yett, Portland	$724,752.00	- - - - -
Osberg Constr. Co. & Don L. Cooney Inc., Seattle, Wn.	775,528.50	- - - - -
E. C. Hall Co., Portland	776,430.08	- - - - -

The Commission had under discussion the adoption of a Minor Betterment Program for 1947 undertaking. The Engineer recalled that the Commission budgeted for such purposes the sum of $1,000,000 and up to the present time has approved orders totaling $555,187. He requested at this time approval of additional orders totaling $246,710, which would leave a balance of $198,103 unobligated and available for footpath construction and contingencies when desired. He submitted a summary of the projects proposed to take up the additional $246,710, as follows:

1.	Improve Shoulders	$19,800
2.	Traffic Control Installations	5,550
3.	Sight Post Installations	1,500
4.	Mail Box Post Installations	1,330
5.	Mile Post Installations	300
6.	Reinforce Base and Surface	37,400
7.	Widen Surface and Pavement, Round Corners, etc.	17,960
8.	Widen Roadbed	18,000
9.	Guard Rail Installation	2,500
10.	Construct Footpaths and Sidewalks	30,305
11.	Drainage Installations	28,100
12.	Miscellaneous	83,965
		$246,710

(*) FOOTNOTE:

For details with respect to each of the above items see statement of "PROPOSED MINOR BETTERMENT PROJECTS", dated March 24, 1947, in general files.

The Engineer pointed out that the item of $30,305 contained in the above summary for footpath and sidewalk construction, is in addition to the amount proposed for such purpose in the above mentioned unobligated balance of $198,103. Following discussion the Commission by unanimous vote approved all items in the above-listed program except Item No. 10, "Construct Footpaths and Sidewalks - - - $30,305", a decision with respect to which was deferred pending adjournment of the Legislature.

Chairman Banfield brought up for discussion a request from Mr. Paul Mumpower, Portland, for the right and privilege to use and occupy a tract of state-owned land located adjacent to the Upper Columbia River Highway near the east end of the Sandy River Bridge in connection with the rental of fish nets to the general public during the period when smelt are running in the Sandy River. He gave as his thought that it would be satisfactory to approve the request for such a short period of time if Mr. Mumpower will conduct his business in an approved manner and will clean up the premises when he is through with the property. The Commission voted unanimously to grant Mr. Mumpower this privilege on such basis and referred the matter to the Chief Counsel to prepare an appropriate form of permit to protect the state's interests.

Messrs. Ed. Reitmann, J. S. Burres, and George Kaseberg, Condon, came before the Commission in the interests of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway. They presented petitions signed by numerous residents of Sherman, Gilliam, Morrow and Wheeler Counties requesting the immediate improvement of such section. Chairman Banfield explained that the Commission has budgeted the sum of $102,000 of Federal Aid Secondary Highway monies for the improvement of a seven mile section of the East Cottonwood Grade, and it is proposed to contract the work either this fall or early next spring; also, that an additional sum of money has been authorized for an improvement west of the town of Condon; in fact, the Commission received bids in November, 1946, for construction of the section, but found it necessary to reject them because of right of way difficulties. This money, he said, is not going to be diverted to any other part of the state, but the proposed improvement cannot proceed until this right of way difficulty has been eliminated either by realignment of the highway or settlement with the property owner, Mr. Meyers.

Concerning the West Cottonwood Grade, Chairman Banfield advised

that the Commission now has this section under consideration, but because of the uncertainity of funds, is precluded from making a commitment thereto until the Legislature adjourns. He assured the delegation that the Commission has their project in mind and will do whatever it can to help them.

Mr. Robert P. Conklin, representing the Weyerhaeuser Timber Company, North Bend, was present and discussed with the Commission a proposal involving a change in the state highway improvement that is now under way at North Bend so as to provide off-street parking for cars of the Company's employees and to provide access to the Company's property from the highway. He exhibited a map showing what they have in mind and pointed out that it necessitates acquisition by the Company of a small triangular-shaped parcel of state-owned property on the east side of the highway between Delaware Avenue and Maryland Avenue Extended, containing 0.3 acre,. and a relocation of the Southern Pacific Company's railroad for a short distance. He mentioned that this matter has been discussed with the State Highway Engineer, and that the plan as indicated on the map is in conformity with the decision reached. The Engineer advised that by straightening the alignment of the railroad it would be possible to widen the highway pavement sufficiently to install traffic islands and left turn-out refuge lanes at points where the Company desires entrances to its property. He estimated the cost to provide such an improvement at about $10,000 and recommended it as an improvement over the present plan, construction of which is now under way. He pointed out, however, that the Public Roads Administration is concerned and its approval would have to be obtained before the plan could be made effective. Mr. Conklin was informed by Chairman Banfield that the Commission wishes to discuss this matter among themselves before making a decision and would give him an answer as soon as possible. Following the departure of Mr. Conklin discussion of the matter was resumed. At that time Commissioner Chandler recommended approval of the change, as being the best possible solution of the problem from the standpoint of the highway, the Weyerhaeuser Timber Company, and the railroad. Chairman Banfield and Commissioner Schaupp agreed to respect Commissioner Chandler's recommendation when the matter comes up for final decision. The Engineer was instructed to render a more complete report on the subject at the next meeting of the Commission, when final action will be taken.

The following persons representing the Brookings-Harbor Chamber of Commerce, Brookings, Oregon, came before the Commission with an offer to present to the state as a gift a small tract of ocean beach property at Brookings for State park purposes: Mrs. Mildred M. Byrne, Secretary; R.S. Perkins and Luther Tisdale, members. Mrs. Byrne headed the group. She advised that Mr. Elmer Bankus of Brookings, who is the owner of the property, is inclined to present the land to the state as a gift if the state wants it; otherwise, he is going to develop it commercially and in that case the public no longer will have access to the beach. She further stated that the property is now served by a private road which also would be made available to the public by Mr. Bankus, and she urged the Commission to take the area over as a state park because it is the only place within 100 miles where people can drive down to the beach. Messrs. Perkins and Tisdale presented additional arguments why the state should assume jurisdiction over this area. Chairman Banfield thanked the

group for its offer and stated that the Commission could not act on the matter at the present time because it is contrary to its policy to acquire park areas unless they are recommended by the State Parks Superintendent, who will be asked to investigate and report the matter. The Parks Superintendent was thereupon instructed to make such report.

The County Court of Umatilla County represented by County Judge J. H. Sturgis and County Commissioner William R. Meiners and County Road Master W. F. Brown came before the Commission regarding a proposed change in the Federal Aid Secondary Highway program involving the Adams-Thorn Hollow County Road. Judge Sturgis headed the group. He advised that the Adams-Thorn Hollow Road has been designated as a Federal Aid Secondary Highway and it so happens that it also is one of the roads for which the county has voted bond money. He advised that the county would prefer using its money to improve the road and that the state, in turn, use its Federal Aid Secondary money to improve the Helix-Holdman County Road, which is an important wheat-hauling road. The Engineer advised that while the Adams-Thorn Hollow Road is on the Federal Aid Secondary Highway System no money has been allocated to improve it, also, that the Helix-Holdman Road is not a Federal Aid Secondary Highway. Chairman Banfield explained the status of the Highway Commission's funds and particularly referred to prospects that the Legislature, which is now in session, may see fit to take away some of these funds for the benefit of the counties, the cities, and the State Police. Until the Legislature adjourns, he said, the Commission will not know how much money it is going to have at its disposal and until then the Commission can make no additional commitments. He added that the Commission is not particular which of the two roads under discussion it improves and it may develop later on that the Commission can approve the change requested, but nothing definite can be stated at this time. The Engineer was thereupon instructed to investigate the proposed exchange of roads and to report his findings at the next meeting.

A delegation from Willamina, consisting of H. A. Parrett, Mayor; Warren Engdahl, Councilman; and Roy Rhoades, Public Affairs Committee of the Willamina Kiwanis Club, came before the Commission and urged widening and improved drainage along the Salmon River Highway through their city. Mr. Parrett headed the group. He advised that the present highway is entirely too narrow to accomodate the traffic which uses it, particularly the four blocks between the east city limits and "D" Street, and urged the widening and drainage project as a necessary improvement. He also urged improvements to the bridge over Willamina Creek, which, he said, is narrow and entirely inadequate to take care of the large volume of logging traffic that crosses it daily. It was his thought that this is a state obligation because Main Street, the highway route, at no time ever was designated a city street, it being a county road until it was taken over by the state. Chairman Banfield explained the status of highway funds and the prospects of losing some of them by legislative action. If the Legislature does not take funds away from the State Highway Department, he said, and there are monies available, then the Highway Commission will cooperate in the improvement, but if the Legislature sees fit to give the counties and the cities additional shares of the state highway revenues, then the Commission will not be able to do many of the things it

would like, and the cities in that event will have to finance their own projects. He concluded the discussion by stating that the Commission cannot pass on the matter or make a definite commitment until it has the benefit of Engineering facts. The Engineer was thereupon instructed to make an investigation and report his findings at the next meeting.

Messrs. Max Rosen, Portland, and L. Nudelman, Oak Grove, were present and requested permission to fill in and landscape a small area of highway right of way in front of Mr. Rosen's establishment known as "Fireside Dinners" on the east side of US99E about one-half mile south of the town of Milwaukie, in order to stop the parking of cars on the highway and to give their premises a more attractive appearance. Mr. Nudelman was present as owner of the property on which this establishment is located. They stated their willingness to perform the work in conformity with the ideas of the Highway Department's Landscape Engineer. The Commission referred the matter to the Engineer for investigation and report at the next meeting.

A delegation from Harney County, consisting of Nelson B. Higgs, County Judge; A. A. Bardwell, Chairman of the Highway Committee of the Burns Chamber of Commerce; and R. M. Lowe, Member of the Burns City Council, was present regarding the highway projects that are scheduled for construction in the Commission's Three Year Postwar Program. Judge Higgs headed the group. He urged the Commission to expedite the contracting of the work involved so that grading in connection with the projects may be completed by this fall. He was informed by the Engineer that the present plan is to perform the grading work this year and the surfacing work next year.

Mr. Lowe inquired if the Commission has plans for improvement of the Sage Hen Hill Section of the Central Oregon Highway and was informed that no provision has been made for this work and cannot be made until the Commission knows definitely how much money will be available for projects of this kind.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

The County Court of Douglas County, represented by County Judge D. N. Busenbark and County Commissioner Lynn V. Beckley, came before the Commission and requested a change in the construction program for the Elkton-Sutherlin Secondary Highway. They explained that at the present time the program provides for improvement of this road from Elkton to Kellogg Bridge, but because of the increase in log-hauling traffic into Sutherlin, it is more important now that the south end of the road be improved, and they urged the Commission to change the program accordingly. The Engineer recommended approval of the request. The Commission by unanimous vote approved the recommendation subject to the condition that the change is approved by the Public Roads Administration.

In this connection the Engineer also requested approval of a change in the program for the reconstruction of the Oregon Coast Highway between Coquille and Coos Bay. He pointed out that the program, as presently prepared, provides for improvement of the Bunker Hill South Section, but the local people

feel that the section of most importance is between Manning Creek Slough and China Camp Marsh, in which he concurs. He recommended approval of the change. The Commission approved the recommendation by unanimous vote subject to further approval by the Public Roads Administration.

Judge Busenbark also requested the widening of a six mile section of the Tiller-Trail Secondary Highway. He urged the grading of this section even if the Commission cannot see its way clear to surface it. Chairman Banfield advised that the Forest Highway Program contains an item of $350,000, including state cooperation in the amount of $165,000, for widening and subgrade stabilization along a 5.8-mile section of this highway between Tiller and Elk Creek which is about all that can be done at the present time.

A delegation representing the City of Portland, consisting of William A. Bowes, Commissioner of Public Works; F. D. Fowler, Traffic Engineer; Ben R. Morrow, City Engineer; and William J. Weller, Transportation Engineer, was present and discussed with the Commission the question of improving traffic conditions along streets and highways which cross the Southern Pacific railroad tracks in Southeast Portland. Mr. Bowes headed the group. He advised that the City has plans to make studies for the improvement of these conditions and inquired as to the possibilities of securing state cooperation in the study of situations where mutual interests are affected. The Commission expressed a willingness to join in the studies in order to secure an overall picture of the conditions provided the state is not placed in the position of being obligated to cooperate financially in correcting them. The Engineer was authorized to join with the City in the studies insofar as they affect state highways.

Commissioner Bowes also inquired as to the status of the Sullivan's Gulch survey. He was informed by Chairman Banfield that the survey has been completed and that the Engineer and the Chief Counsel have been instructed to discuss the facts with the city and with the railroad company which is concerned, with a view of ascertaining the extent of cooperation that will be provided by such agencies if the project should be constructed. He added that the Commission is making no commitment whatsoever as to construction of the project, and that action to date is purely preliminary.

The County Court of Benton County, represented by Messrs. M. O. Mack and O. B. Kyle, County Commissioners, and L. C. Galloway, County Engineer, was present regarding the future disposition of the Alsea-Lobster Valley County Road. Mr. Mack headed the group. He read aloud and filed with the Commission a letter dated March 24, 1947, directed to the State Highway Commission by George I. McBee, County Judge, advising that the County Court is receptive to a better road for the people of Lobster Valley and that investigations reveal this could best be accomplished by taking over a private road owned by the Acme Lumber Company which has declared its willingness to cooperate if the state will designate the road a state secondary highway. Judge McBee also states in his letter that Benton County is anxious that the state take over the remaining mileage of this road and is willing to make any shift in road designations that might be necessary or beneficial. In support of the letter

Mr. Mack advised that the Lobster Valley Road is isolated and for that reason is a very expensive one for the county to maintain. It was his thought that the state could maintain it much cheaper and much better than the county as an extension of the present Alsea-Deadwood Secondary Highway. Following discussion, during which the delegation was informed that the Commission was not in position to give them a definite answer at this meeting, the matter was referred to the Engineer and the Chief Counsel for investigation and report.

A delegation from Reedsport headed by W. A. Burdick, Chairman, Roads Committee, Chamber of Commerce; and including Alden Paull, President, Chamber of Commerce; Cecil Bennett, City Manager; and Edgar Wilson, C.I.O. representative, came before the Commission and urged improvements to the Umpqua Highway between Reedsport and Scottsburg. Mr. Burdick advised that this road was constructed in 1927 on very poor alignment and with a very narrow roadbed which is entirely inadequate for present-date traffic, and as a result numerous accidents occur. He urged action by the Highway Commission to better the conditions and declared that the expense involved is fully justified from a safety standpoint. Mr. Paull confirmed and elaborated on the remarks of Mr. Burdick. He declared that there are many sharp turns in this road, that the shoulders adjacent to the pavement are too narrow and in some places there is no shoulder at all, and at other places the pavement is in close proximity to the edge of the bluff overlooking the river; moreover, there are places where it is almost impossible for two vehicles to pass. He urged widening and straightening the road to accomodate the heavy truck traffic which uses it. The Engineer advised that the distance between Reedsport and Scottsburg is about 17 miles, ten miles of which are along a rock bluff which would require heavy rock excavation. He estimated the cost to modernize the section comparable with the section between Elkton and Drain at $1,500,000. He admitted that the road is narrow and a dangerous one to travel but pointed out that no provision for its improvement has been made in the current highway program. Chairman Banfield concluded the discussion by stating that the Commission was not aware that the road was in such bad condition; however, it is not in a position financially at this time to make any commitment of funds to improve it, there being no unobligated funds available.

Mr. Burdick inquired as to the status of the improvement of the Umpqua Highway just east of the City of Reedsport, being a continuation of the improvement completed some years ago within the city limits. He alleged that the Commission some time ago promised this improvement, and the City would like to have this promise fulfilled as soon as possible. The Commission deferred action on this matter pending a search of the records for past commitment to this project.

Mr. Burdick then brought up for discussion the matter of installing platform scales on the highway in the vicinity of Reedsport for the accomodation of industries in this district. He advised that there are no suitable scale installations at the present time and that they are

badly needed. Mr. Russell Hubard, Reedsport, who was present, also spoke on this subject, advising that his son has a set of scales of 30,000 pounds capacity which would be available to the Commission in the event the Commission desired to purchase them for installation at this point. The Engineer advised that investigation reveals that scales in this locality are not particularly required from the state highway standpoint, in view of which the Commission denied the request.

A delegation from Redmond, consisting of Frank McCaffery, Frank Foster, M. L. Weigand, and R. Weigand, farmers of the Powell Butte District, was present and urged the oiling of a six-mile section of the Powell Butte Secondary State Highway from its junction with the Ochoco Highway to a point near the Crook-Deschutes County Line. Mr. N. L. Weigand headed the group. He advised that the present road is graded but not surfaced and is not adequate to carry the large tonnage of produce which is trucked to Redmond from this irrigated district. He alleged that there are approximately 30,000 tons of produce trucked out of this district annually to Redmond and urged the oiling of the road. The Engineer advised that this is a dirt road which is being maintained in the best possible manner under existing conditions and that no provision has been made to surface and oil it. He inquired why the project was not proposed by the Crook County Court when the postwar program was arranged and was informed that the County Court is not interested in it because the district's produce is trucked to Redmond rather than to Prineville. Chairman Banfield explained the Highway Commission's financial set up and advised that because of the limited amount of funds available the Commission cannot satisfy all of the requests that are made for highway improvements; however, the Engineer will be instructed to investigate the premises with regard to the possibility of improving the road, but no encouragement can be given for any work other than a continuation of the maintenance work now being done.

A delegation from Prineville headed by Dan E. Taylor, President of the Prineville-Crook County Chamber of Commerce, and including R. P. McRae, Mayor of Prineville, and C. C. McGlenn, Manager of the Prineville City Railroad, came before the Commission and urged the extension and construction of the Crooked River-Paulina Secondary Highway No. 380 easterly from its present terminus at Paulina to a connection with the John Day-Burns Hiwhway via Izee. In support of this request Mr. Taylor presented a letter dated March 25, 1947, directed to the Oregon State Highway Commission in which it is alleged that the area served by such road produces 40 percent of the total livestock raised in Crook County and that the ranchers are in desperate need of a year-round road over which to market their herds in a direct manner without the necessity of holding them over. Mr. Taylor elaborated on the request orally. Chairman Banfield advised that this is an entirely new road and that the Commission does not have enough money at its disposal to build new highways; in fact, there is not enough money available to finance roads on the present highway system, in view of which the Commission can offer no encouragement whatsoever. Commissioner Schaupp mentioned the bills now before the State Legislature which, if they pass, will take away from the Commission a considerable portion of state highway revenues, in which event the Commission will not be able to do much

new construction. Commissioner Chandler suggested that timber interests, in order to protect their investments, are going to be forced to build their own roads in cases where they are operating on a sustained-yield basis. Chairman Banfield concluded the discussion by suggesting the possibility of the district securing Federal Timber Access Road money. He advised that insofar as the State Highway Commission is concerned that is all the delegation can expect because the state simply hasn't the money available to do what they ask.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

The Commission awarded to J. S. Morris Co. Berkeley, California, the contract for cleaning and painting the bridges over Pistol River and Elk Creek on the Oregon Coast Highway, in Curry County.

All bids received for the grading, surfacing, and oiling of the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, Harney County, were rejected.

Also rejected were bids received for grading and surfacing and widening the Willow Creek Bridge on the Madras Section of The Dalles-California Highway, in Jefferson County; the bid received for construction of three bridges over the Sprague River on the Sprague River Highway, Klamath County, and that received for remodeling the Beardsley Building in the City of Klamath Falls.

The Commission awarded to D. F. McKenzie, Salem, the contract for regrading, surfacing, and oiling the Gillespie Corner-Lorane Section of the Territorial Secondary Highway, in Lane County, and awarded to P. B. Doherty & Son, the contract for the Jordan Creek-Rock Creek Rock Production Project on the I.O.N. Highway, in Malheur County.

The Commission also awarded to Stanley & Ahlen the contracts for grading and paving the Nyssa Section of the Old Oregon Trail and the Ontario Section of the Old Oregon Trail, in Malheur County, on the basis of its combination bid for both projects.

The Commission referred all bids for construction of rock toe slope, rock slope protection, roadbed topping, topsoiling and seeding on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County, to the Engineer with authority to award the contract to the low bidder J.N. & M.J. Conley, Portland, if the Public Roads Administration will concur therein.

Like action was taken by the Commission on the bid of Guy F. Atkinson Co., Portland, for the construction of a concrete bridge over the O.W. R.R. & N. Co. tracks at Bridal Veil on the Columbia River Highway, Multnomah County.

The Commission referred to the Engineer all bids received for the grading and bituminous macadam surfacing on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington

Counties, with authority to award this contract to the low bidder, K.F. Jacobsen Co., Inc., Portland, when right of way matters have been clarified.

The Commission awarded to the Pacific Bridge Painting Company the contract for cleaning and painting the Necarney Creek Bridge and the Nehalem River Bridge on the Oregon Coast Highway, in Tillamook County.

All bids received by the Commission for grading and paving the construction of two overcrossing structures on the Barnes Road-Multnomah County Line Section of the Sunset Highway, in Washington County, were referred to the Engineer with authority to award this contract to the low bidder, Porter W. Yett, if and when the Public Roads Administration concurs therein.

At 3:40 p.m. Chairman Banfield publicly announced the awards of contracts as follows:

"Cleaning and painting the bridges over Pistol River and Elk Creek on the Oregon Coast Highway, in Curry County. The Commission received three bids for this project, the low one being that of J.S. Morris Co., Berkeley, California, at $6,790. The next low bid was that of Tri-State Painting Co., Portland, at $9,800. The contract has been awarded to the low bidder, J.S. Morris Co., at its bid price.

"Grading, surfacing, and oiling the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County. E.C. Hall Co., Portland, submitted the low bid for this project in the amount of $296,913. P.B. Doherty & Son, Portland, submitted the next low bid in the amount of $298,060. There were two higher bidders. The Commission has rejected all bids.

"Grading and bituminous macadam surfacing and widening Willow Creek Bridge on the Madras Section of The Dalles-California Highway, in Jefferson County. Babler Bros., Portland, submitted the low bid for this work at $81,644. The only other bid submitted was that of Rogers Construction Co., Portland, at $93,005. The Commission has rejected both bids.

"Construction of three bridges over the Sprague River on the Sprague River Highway, in Klamath County. Clifford L. Dunn, Klamath Falls, submitted the only bid for this work in the amount of $159,128. The Commission has rejected this bid as being too high.

"Remodeling the Beardsley Building in the City of Klamath Falls. Pinniger & Watkins, Klamath Falls, submitted the only bid for this project in the amount of $19,425. The bid has been rejected.

"Grading, surfacing, and oiling on the Gillespie Corner-Lorane Section of the Territorial Secondary Highway, in Lane County. D.F. McKenzie, Salem, submitted the low bid for this work in the amount of $117,950.50 based on the use of asphalt. He submitted no bid based on the use of tar. E.C. Hall Co., Portland, submitted the next low bid in the amount of

$132,880 based on the use of asphalt. They submitted no bid using tar. There was one higher bidder. The Commission has awarded this contract to the low bidder, D.F. McKenzie, at his bid price of $117,950.50 using asphalt.

"Jordan Creek-Rock Creek Rock Production Project on the I.O.N. Highway, in Malheur County. P.B. Doherty & Son, Portland, submitted the low bid for this work in the amount of $34,650. Oscar E. Joelson, Eugene, submitted the only other bid in the amount of $35,820. The contract has been awarded to the low bidder, P.B. Doherty & Son, at their bid price.

"Grading and paving the Nyssa (1st Street-7th Street) Section of the Old Oregon Trail, in Malheur County. The low bid for this work was submitted by Stanley & Ehlen, Boise, Idaho, at $54,078.50. The bidder stated that he would not accept this project alone but if also awarded the contract for the Ontario pavement-widening project a lump sum reduction of $1,000 would be allowed in connection with the Nyssa project. Warren Northwest Inc., Portland, submitted the only other bid for the Nyssa project in the amount of $87,087.50. They qualified their bid by stating that they would not accept this project unless also awarded the contract for the Ontario project. The contract has been awarded to Stanley & Ehlen on the basis of their combination bid for both projects totaling $135,441.50.

"Pavement widening on the Ontario Section of the Old Oregon Trail, in Malheur County. Stanley & Ehlen, Boise, Idaho, submitted the low bid for this work in the amount of $82,363. J.A. Terteling & Sons, Inc., Boise, Idaho, submitted the next low bid in the amount of $101,012.22, Warren Northwest Inc., Portland, submitted the only other bid in the amount of $121,263. All three bidders qualified their bids by stating that they would not accept the award of this contract unless also awarded the contract for the Nyssa improvement. A study of the combination bids reveals that of Stanley & Ehlen to be low in the total amount of $135,441.50. The Commission has awarded the contract to Stanley & Ehlen on such basis.

"Rock toe construction, rock slope protection, roadbed topping, topsoiling, and seeding on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County. J.N. & M.J. Conley, Portland, submitted the low bid for this work in the sum of $389,770. Leonard & Slate Oreg. Ltd., Portland, submitted the next low bid in the sum of $390,100. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of a concrete bridge over the O.W. R.R. & N. Company tracks at Bridal Veil on the Columbia River Highway, Multnomah County. Guy F. Atkinson Co., Portland, submitted the only bid for this work in the sum of $317,400. The bid is satisfactory, but the Commission has referred it to the Engineer with authority to award the contract to this company when certain conditions have been satisfied.

"Grading and bituminous macadam surfacing and construction of a bridge over Rock Creek on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties. K. F. Jacobsen Co., Inc., Portland, submitted the low bid for this work in the sum of $173,325.25 based on the use of asphalt and $173,291.25 based on the use of tar. Vernie Jarl, Gresham, submitted the next low bid in the amount of $173,447.75 based on the use of asphalt. He submitted no bid based on the use of tar. There were seven higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract, based on the use of tar, to the low bidder, K. F. Jacobsen Co., Inc., when certain conditions have been satisfied.

"Cleaning and painting Necarney Creek and Nehalem River Bridges on the Oregon Coast Highway, in Tillamook County. Pacific Bridge Painting Co., San Francisco, California, submitted the low bid for this work in the sum of $9,951.50. J.S. Morris Co., Berkeley, California, submitted the next low bid in the sum of $12,380. There were three higher bidders. The Commission has awarded the contract to the low bidder, Pacific Bridge Painting Co., at its bid price.

"Grading and paving and construction of two overcrossing structures on the Barnes Road-Multnomah County Line Section of the Sunset Highway, in Washington County. Porter W. Yett, Portland, submitted the low bid for this work in the sum of $724,752 based on the use of asphalt. He submitted no bid based on the use of tar. Osberg Construction Co. & Don L. Cooney Inc., Seattle, Washington, submitted the next low bid in the sum of $775,528.50 based on the use of asphalt. They did not submit a bid based on the use of tar. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Porter W. Yett, when certain conditions have been satisfied."

Reconsideration was given by the Commission to the approval of the location survey reported by the Engineer on the previous day for the Ft. Hill Bridge Section of the Salmon River Highway, in Polk County. Following discussion and careful study of the detail maps presented in connection therewith the Commission approved such survey and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Ft. Hill Bridge Section of the Salmon River Highway, in Polk County, and in connection therewith to prepare a map showing the route and location of said section of highway and to file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, map and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Ft. Hill Bridge Section of the Salmon River Highway, in Polk County, together with the map, which for identification purposes bears the map file No. 6B-19-6, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of March, 1947.

The Commission had under discussion a letter from the Coos County Court requesting the oiling of the Bradley Lake Road at Bandon and also requesting the oiling of the road which extends from US101 to the town of Lakeside, both of which are county roads. The Commission denied the request.

There was presented to the Commission a request from the City of Hermiston for the raising of the highway grade between First Street and Third Street on Main Street (Hermiston Secondary Highway) in this town so as to permit the parallel parking of automobiles along the curb line, which is not possible under present conditions because the curbs are too high to permit the opening of car doors when they are parked. The Engineer advised that this would cost about $900 and recommended approval of the expenditure as a minor betterment project. The Commission approved the recommendation unanimously.

A petition was presented from residents of the town of Hermiston requesting the construction of a footpath along the east side of the highway now being constructed between Hermiston and Umatilla, northerly from Gladys Avenue to the north end of what is known as the Osberg Tract. The Engineer advised that the present highway contract provides for footpath construction 2,400 feet long on the east side of the highway from Gladys Avenue to a point about midway between the city limits and the north end of the Osberg Tract, which is about 550 feet south of the point to which the petitioners request that a footpath be constructed. He gave as his thought that such footpath construction is sufficient and recommended that the request for the additional improvement be denied. The Commission approved the recommendation.

A letter was presented from Commissioner Tom H. West, of the Board of

County Commissioners of Multnomah County, requesting the widening of North Vancouver Avenue (route of Vancouver Avenue Secondary Highway No. 122) from its junction with Union Avenue (Pacific Highway) southerly to a point about 200 feet north of the junction with the Columbia Slough Road, for either three or four lanes of traffic. Commissioner West alleges that the volume of traffic on this highway is very heavy and that the widening would be a material help in eliminating traffic congestion and accidents. The Engineer estimated the cost of the work at approximately $22,000 and advised that no provision has been made for this expense in the current highway program. The Commission denied the request pending adjournment of the Legislature to give it an opportunity to see how much money will be available for work of this nature.

The Engineer brought up for discussion a proposal from the City of Madras for the construction of curbs and gutters along The Dalles-California Highway through this town, which proposal provides that the city shall tear out the old sidewalks and reconstruct them to meet the grades established for the highway improvement provided the state will construct a concrete curb and gutter along two blocks and will construct a curb from "B" Street northerly to Willow Creek Bridge. The City will also, without cost to the state, cause the relocation or reconstruction of all water, gas, electric, or other utility conduits or poles within the highway or streets affected in conformity with requirements of the state. The Engineer advised that the construction program provides for an expenditure of $77,000 for highway improvement in Madras and that to do what the city is asking will cost about $1,000 additional, or, in other words, will increase the cost about 1.3 percent. He read aloud provisions of the "Option for Cooperative Construction Project" as signed by the Mayor and the Recorder of the City of Madras and recommended approval of the project. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion a report from the Engineer on the request of the City of Pilot Rock for state aid in the repair of a bridge located on a city street which is subjected to considerable heavy log hauling. The Engineer advised that the original estimate of cost to repair the structure was $1,220, and that the Highway Commission at the previous meeting authorized state cooperation on the basis of 20 percent city funds and 80 percent state funds; however, in designing the repairs it developed that the bridge was not strong enough to carry the heavy logging traffic. Moreover, the U.S. Engineers do not favor the placing of false work under the structure because of the possibility of debris collecting and blocking the stream channel. He further stated that the city now proposes to build an entirely new structure which is estimated to cost $4,180, and is asking the State Highway Commission to cooperate on the same basis that it agreed to cooperate on the repair of the old structure — 80 percent state, 20 percent city — which would mean that the state's contribution would amount to $3,344. Following discussion the Commission authorized cooperation to the extent of $2,500 of state funds.

The Engineer requested authority for expenditures for planting and maintenance work at the following points: Pacific Highway East in North Salem, $2,500; Pacific Highway at Springfield Junction, $3,000. Mr. Mark Astrup,

Assistant Parks Superintendent, was present and explained details. He advised that the amounts stated are book values only and that the shrubbery and tree growth they plan to use is now on hand at the Highway Department's nursery at Milwaukie, so the actual cost will be considerably less than that stated. Following discussion, the Commission approved the request by unanimous vote upon motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp.

The Commission had under discussion the approval of the plans for the cities of Bandon, Malin, and Richland for expenditure of 1944 State Tax Street Funds which they received in 1945. The Engineer advised that these cities have all complied with the legal requirements with respect to expenditure of the funds and that the plans have been examined and found satisfactory. He recommended approval by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Bandon	$1,403.34
Malin	747.79
Richland	355.03

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Bandon - 2nd Street N., 1st Street N., 3rd Street E., 11th Street, 4th Street W., June Street, Fillmore Avenue, Oregon Avenue

Malin - Market Street, Rosicky Avenue, 6th Street

Richland - Second Street, Third Street, Main Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 1 adopted by the City of Bandon, and approved by the State Highway Commission on August 31, 1945, shall be canceled, in accordance with the request of the City of Bandon on file in the records of the State Highway Department, and Resolution Form 1 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 25th day of March, 1947.

The Commission also had under discussion the approval of the plans of the following cities and towns for expenditure of State Tax Street Funds received by them in 1946 from 1945 revenues:

Aumsville	Coburg	Hubbard	Mitchell
Barlow	Cornelius	Huntington	Rockaway
Canyonville	Gaston	Ione	Scappoose
Carlton	Grants Pass	Island City	Sherwood
Chiloquin	Halsey	Lafayette	Weston
Clatskanie	Hines	Malin	Wheeler

The Engineer advised that these cities and towns also have complied with the legal requirements with respect to expenditure of the funds and that the plans for the improvements they propose to finance with the funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Aumsville	$ 261.35
Barlow	78.10
Canyonville	383.01
Carlton	1,447.94
Chiloquin	1,112.99
Clatskanie	1,069.42
Coburg	684.92
Cornelius	1,173.07
Gaston	500.17
Grants Pass	9,054.12
Halsey	458.11
Hines	1,016.86
Hubbard	581.28
Huntington	1,112.99
Ione	393.53
Island City	265.86
Lafayette	841.13
Malin	803.58
Mitchell	328.95
Rockaway	925.24
Scappoose	754.01
Sherwood	845.63
Weston	748.00
Wheeler	389.02

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Aumsville - All streets within the corporate limits of city

Barlow - Main Street, Second Street, Maple Street, First Street

Canyonville - Main Street, 2nd Street, 3rd Street

Carlton - Johnson Street, Jefferson Street, Madison Street, Monroe Street, W. Grant Street, W. Taft Street, Polk Street, N. 6th Street, N. 4th Street, N. 3rd Street, Park Street, Kutch Street, S. Scott Street, S. Cunningham Street

Chiloquin - Lalo Avenue, Wasco Avenue, 1st Avenue, 2nd Avenue, 3rd Avenue, also other unnamed streets shown on map attached to Form 3 adopted by the city

Clatskanie – 13th Street, 11th Street, 10th Street, 9th Street, 7th Street, 4th Street, 3rd Street, 2nd Street, Larch Street, Conyers Street, Nehalem Street, Tichenor Street, Bryant Street, Spring Street, Poplar Street

Coburg – VanDuyn Street, Harrison Street, Locust Street, Diamond Street, Mill Street, McKenzie Street, Delaney Street, Dixon Street, Coleman Street, Miller Street

Cornelius – Pine Street

Gaston – Church Street, Park Street

Grants Pass – Midland Avenue, West "A" Street, East "A" Street, East "D" Street, East "F" Street, Foundry Street, "M" Street, "N" Street, Highland Avenue, Booth Street, 2nd Street, 3rd Street, S. 7th Street, East Mill Street

Halsey – 4th Street W., 3rd Street W., 1st Street E., "D" Street E., "G" Street E., "G" Street W., "F" Street W., "H" Street W., "I" Street W.

Hines – Bennett Avenue, Pettybone Avenue, Barnes Avenue, Hanley Boulevard, W. Circle

Hubbard – "G" Street, 7th Street, 6th Street, "D" Street, "E" Street, Cook and Welch Streets, 5th Street, 4th Street, "F" Street, "C" Street, "A" Street, 2nd Street "J" Street

Huntington – Third Street West, Second Street West, First Street West, Lincoln Street, First Street East, Second Street East, Third Street East, Fifth Street East, Adams Street, Jefferson Street, Madison Street, Monroe Street, Fulton Street

Ione – Second Street, "H" Street

Island City "C" Street

Lafayette – 8th Street, Washington Street, 7th Street, 4th Street, 2nd Street, Madison Street

Malin – Market Street, Rosicky Avenue, 6th Street

Mitchell – Nelson Street, Rosenbaum Street, Folston Alley, High Street, also unnamed streets as shown on the map attached to Form 2 adopted by the city

Rockaway – Nehalem Avenue

Scappoose – West Street, 2nd Street, 3rd Street, Williams Avenue, 1st Street, Maple Avenue west from Columbia River Highway and south to county road

Sherwood – Washington Street, Wilsonville Road, Railroad Street, County road from Pine Street to city limits.

Weston – Depot Street, 2nd Street, Franklin Street, Poplar Street, Broad Street, Pomeroy Street, Washington Street, Mill Street

Wheeler – Gregory Street, Rorvik Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Barlow, and approved by the State Highway Commission on May 15, 1946, shall be canceled, in accordance with the request of the City of Barlow on file in the records of the State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor,

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 25th day of March, 1947.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting in February, 1947, the conditions of the awards having been satisfied:

Construction of reinforced concrete viaduct over Spencer Creek on the Oregon Coast Highway, in Lincoln County; bids received February 3, contract awarded February 20 to Archie R. Averill, the low bidder

Grading and paving Bond Street-Commercial Street Section of the Columbia River Highway in Astoria, Clatsop County; bids received February 4, contract awarded February 28 to Heavy Hauling Company, low bidder

Grading, paving, and bridge construction on the Sheridan Street-Bancroft Street Section of Front Avenue, Portland; bids received February 4, contract awarded February 20 to Kuckenbert Construction Company, low bidder

Widening west end of Ross Island Bridge on the Front Avenue Project, Multnomah County; bids received February 4, contract awarded February 20 to Kuckenberg Construction Company, low bidder

Motion was made by Commissioner Schaupp that the awards as reported by the Engineer be approved and confirmed. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

C. J. Montag & Sons, Contract No. 2737, for construction of bridges on the Steiwer Hill-Albany Section of the Pacific Highway East, in Marion and Linn Counties, requested an additional extension of time of 120 days, from March 31 to July 29, 1947, within which to complete this job. They alleged their failure to complete the project within the specified time limit was due to difficulties in securing reinforcing steel; also, that the Resident Engineer on the project would not permit the painting of structural steel until weather conditions are favorable. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the reasons given by the contractor for overrunning the time limit.

Struss & McCoy, Contract No. 2770, for the Redmond Rock Production Project on the McKenzie, The Dalles-California, Ochoco, and O'Neil Highways, in Crook and Deschutes Counties, requested an additional extension of time of 25 days, from March 15 to April 10, 1947, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit but advised that they would need a little more time to shape up the stockpiles after March 15. The Engineer advised that progress on this job has been slow because of many breakdowns in equipment and difficulties in securing repair parts. The state, he said, has incurred no appreciable loss because of the delay, for which reason he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote,

not, however, on the basis of the reasons given by the contractor for overrunning the time limit.

W. R. Grasle Company, Contract No. 2794, for installation of lighting system on the Interstate Bridge on US99 between Multnomah County, Oregon, and Clark County, Washington, requested an additional extension of time of 31 days, from February 28 to March 31, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to obtain delivery of luminaires. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, on the basis of the reasons given by the contractor for overrunning the time limit.

A. D. Ford & Son, Contract No. 2801, for construction of a grade separation structure on the Mountaindale Section of the Sunset Highway, in Washington County, requested an additional extension of time of 60 days, from March 15 to May 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing adequate and competent labor. The Engineer advised that the reasons given for overrunning the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the reasons given by the contractor for overrunning the time limit.

Porter W. Yett, Contract No. 2826, for pavement widening on the West Gresham Section of the Mt. Hood Highway, in Multnomah County, requested an additional extension of time of 88 days, from February 1 to June 1, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to orders received from the Engineer to defer construction of the asphaltic concrete pavement during inclement weather. The Engineer advised that the reason stated by the contractor for overrunning the time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, on the basis of the reason given by the contractor for overrunning the time limit.

The Engineer reported that Contract No. 2709 for furnishing crushed gravel in stockpiles on the Hendricks Bridge-Nimrod Section of the McKenzie Highway, in Lane County, and Contract No. 2821 for the Prineville Grade Separation Project on the Madras-Prineville Highway, in Crook County, have been completed according to the requirements of the contracts or modifications thereof and that the jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2821, with John A. Logan, for work on the Prineville Grade Separation on the Madras-Prineville Highway in Crook County; completed January 6, 1947;

Contract No. 2709, with J. S. Risley, for furnishing crushed gravel in stockpiles on the Hendricks Bridge-Nimrod Section of the McKenzie Highway in Lane County; Completed February 14, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the Engineer's letter dated March 20, 1947, being a report on his study of the cost of operating the Astoria-Megler Ferry during the first nine months under contract with Babbidge & Holt, Inc. The Engineer particularly pointed out that the expense to the state of operation during the nine-month period ending February 28, 1947, was about $1,500 less than the revenues received but does not take into account depreciation expense amounting to $16,875, so there really was a net deficit of the operation for the nine months of $15,312, which corresponds to a net loss for a year's operation of about $20,000. He also pointed out that a review of the contractor's books covering the same period discloses a considerable profit for the operation. He suggested, in view thereof, that the Commission authorize him to discuss the matter with the contractor with a view in mind of securing a reduction in the contract price so the state can be made whole, or nearly so, without increasing the toll charges. If such authority is granted, he said, he would report his findings to the Commission prior to its next meeting, when a decision could be reached whether to extend the present contract or to advertise for new bids. The Commission approved the suggestion by unanimous vote.

In this connection the Commission discussed the setting of a date for its next regular meeting and decided unanimously to hold such meeting in Portland on Tuesday, Wednesday, and Thursday, April 22, 23, and 24, 1947. Bids are to be received on only one day of this meeting. The other two days are to be reserved for discussion of highway problems. The Secretary was instructed to make the usual arrangements to hold the public meeting in the auditorium of the Public Service Building. The Commission also tentatively set Wednesday and Thursday, May 14 and 15, as the date for its next following meeting.

In the discussion of the Astoria-Megler Ferry matter the Engineer advised that a design is now being prepared for a ferry terminal at 17th and Commercial Streets, Astoria, on property deeded to the state by Clatsop County, and the city, in connection with which a study is being made of a method for control and handling of ferry traffic which requires the use of certain property owned by a Mr. Charles Swanson. Mr. Swanson, he said, conducts a service station business and mechanical repair shop in a building 100 feet long and 24 feet wide, which will have to be relocated on state-owned property about one-half block east of its present location. He recommended the acquisition of Mr. Swanson's property so as to provide the most practical and simple method of handling and directing traffic to and from the ferry landing. He estimated the cost to re-establish Mr. Swanson's business on the new location at $11,960 and the total cost of constructing a ferry terminal at about $5,000 and requested instructions from the Commission as to how to proceed. The matter was discussed at some length but action thereon was deferred by the Commission until a later time. The Engineer was instructed in the meantime to send each Commissioner a written report on the subject.

The Commission had under discussion a resolution from the Lincoln County Court requesting the designation as a state secondary highway of the road which extends from the Oregon Coast Highway to Devils Punch Bowl State Park, in Lincoln County. It was the thought of the Commission that this road should be placed on the State Secondary Highway System inasmuch as it is now being maintained by the state and is the main road which leads to the state park. The County Court's resolution was thereupon approved and the following resolution so designating this road was adopted by the Commission by unanimous vote upon motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp:

> WHEREAS, under the provisions of Title 100 O.C.L.A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and
>
> WHEREAS, the State Highway Commission, by mutual agreement with the Lincoln County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:
>
> 1. That the following described county road be, and the said

county road hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Otter Rock Secondary State Highway No. 182:

Beginning at mile post 145.13 of the existing Oregon Coast Highway and extending westerly 0.45 mile to the Devils Punch Bowl State Park, being First Street in Otter Rock Subdivision in Lincoln County, all in Section 32, T. 9 S., R. 11 W., W.M., 0.45 mile in length.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Title 100 O.C.L.A., Subsection 36, Section 115.

3. That this resolution be entered in the minutes of the meeting of the Highway Commission of March 25, 1947, and that the Secretary be and he hereby is instructed to deliver to the County Court of Lincoln County and to the County Clerk of Lincoln County duly certified copies thereof.

The Engineer reported that the plans for the proposed bridge across the Willamette Slough from the Lower Columbia River Highway to Sauvies Island, in Multnomah County, are completed. He requested authority to present the plans to the U.S. War Department for approval, that being required before a contract for construction of the structure can be awarded. The Commission approved the request by unanimous vote.

The Engineer brought up for discussion the advisability of designating "no parking" zones on the Oregon Coast Highway in front of the post office buildings in Nelscott, Taft, and Cutler City. He recommended approval of such zone designations. The Commission approved the recommendation and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, the Oregon Coast Highway, otherwise designated as U.S. Highway 101 as routed through the town of Nelscott, Lincoln County, passes in front of the U.S. Post Office and,

WHEREAS, it has been reported to the Highway Commission by Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U.S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area.

WHEREAS, it is the judgment of the Commission that every rea-

sonable and legitimate action should be taken having for its object the speeding of the movement of U.S. Mails, and

WHEREAS, it appears that Nelscott is an unincorporated town,

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office at Nelscott, Oregon, (As set forth on Highway Commission Drawing attached hereto and by this reference made a part hereof) be and the same hereby is declared to be a "No Parking" area and parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U.S. Mails. *

2. That the engineer hereby is instructed to erect and thereafter maintain in said area "No Parking" signs. He is further instructed to paint, in a conventional manner and color, the curb lines with the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission and correct copies thereof mailed to the Superintendent of State Police and to Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon.

FOOTNOTE:

* The drawing mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 15, under the heading "No Parking - Bus Stop Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, the Oregon Coast Highway, otherwise designated as U.S. Highway 101 as routed through the town of Taft, Lincoln County, passes in front of the U.S. Post Office and,

WHEREAS, it has been reported to the Highway Commission by Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U.S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area.

WHEREAS, it is the judgment of the Commission that every reason-

able and legitimate action should be taken having for its objective the speeding of the movement of U.S. Mails, and

WHEREAS, it appears that Taft is an unincorporated town,

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office at Taft, Oregon, (as set forth on Highway Commission Drawing attached hereto and by this reference made a part hereof) be and the same hereby is declared to be a "No Parking" area and parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U.S. Mails. *

2. That the Engineer hereby is instructed to erect and thereafter maintain in said area "No Parking" signs. He is further instructed to paint, in a conventional manner and color, the curb lines with the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission and correct copies thereof mailed to the Superintendent of State Police and to Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon.

FOOTNOTE:

* The drawing mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 16, under the heading "No Parking - Bus Stop Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, the Oregon Coast Highway, otherwise designated as U.S. Highway 101 as routed through the town of Cutler City, Lincoln County, passes in front of the U.S. Post Office and,

WHEREAS, it has been reported to the Highway Commission by Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U.S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area,

WHEREAS, it is the judgment of the Commission that every reasonable and legitimate action should be taken having for its object the speeding of the movement of U.S. Mails, and

WHEREAS, it appears that Cutler City is an unincorporated town.

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office at Cutler City, Oregon, (as set forth on Highway Commission Drawing attached hereto and by this reference made a part hereof) be and the same hereby is declared to be a "No Parking" area and parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U.S. Mails. *

2. That the Engineer hereby is instructed to erect and thereafter maintain in said area "No Parking" signs. He is further instructed to paint, in a conventional manner and color, the curb lines with the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission and correct copies thereof mailed to the Superintendent of State Police and to Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon.

FOOTNOTE:

* The drawing mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 17, under the heading "No Parking - Bus Stop Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Engineer also recommended the designation of a "No Parking - Bus Stop" area for a short distance on each side of the Pacific Highway at Springfield Junction so as to permit the stopping and loading of passenger busses at or adjacent to the curbs or right of way lines at these points and to decrease the hazards that exist. The Commission approved the recommendation and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, the Pacific Highway in part extends from Eugene to Cottage Grove and intersects with the McKenzie Highway at a junction in the vicinity of Springfield and near an area referred to as Glenwood and,

WHEREAS, this area is unincorporated but is heavily populated and the business district therein carries a heavy traffic load and,

WHEREAS, it has come to the attention of the Commission and the Commission now finds that the parking of motor vehicles on portions of

business sections of said area is a hazard and a menace to pedestrians and particularly those pedestrians who patronize or intend to patronize common carriers of passengers operated on the Pacific Highway and entering said highway and,

WHEREAS, the Commission has found that the prohibition of parking of motor vehicles in a designated area to permit the stopping and loading of common carriers at or adjacent to the curb or right of way lines decreases the hazard and menace to pedestrians as well as to motor vehicles.

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. The parking of motor vehicles on the Southerly side of the Pacific Highway for a distance of sixty-four feet (64') at the location set forth on the attached print be and the same hereby is prohibited. *

2. The Engineer is hereby directed to erect "No Parking" signs in the area above described and to mark such areas as "Bus Stop" or "Bus Loading" zones. The Engineer is further directed to do all necessary and proper painting to designate said "Bus Stop" zones.

3. This resolution shall be entered in the minutes of the Commission as of this 25th day of March, 1947.

FOOTNOTE:

* The print mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 18, under the heading "No Parking - Bus Stop Resolutions" and said print by this reference is made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, the Pacific Highway in part extends from Eugene to Cottage Grove and intersects with the McKenzie Highway at a junction in the vicinity of Springfield and near an area referred to as Glenwood and,

WHEREAS, this area is unincorporated but is heavily populated and the business district therein carries a heavy traffic load and,

WHEREAS, it has come to the attention of the Commission and the Commission now finds that the parking of motor vehicles on portions of business sections of said area is a hazard and a menace to pedestrians and particularly those pedestrians who patronize or intend to patronize common carriers of passengers operated on the Pacific Highway and entering said highway and,

WHEREAS, the Commission has found that the prohibition of parking of motor vehicles in a designated area to permit the stopping and loading of common carriers at or adjacent to the curb or right of way lines decreases the hazard and menace to pedestrians as well as to motor vehicles.

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively as follows:

1. The parking of motor vehicles on the Northerly side of the Pacific Highway for a distance of forty (40) feet at the location set forth on the attached print be and the same hereby is prohibited. *

2. The Engineer is hereby directed to erect "No Parking" signs in the area above described and to mark such areas as "Bus Stop" or "Bus Loading" zones. The Engineer is further directed to do all necessary and proper painting to designate said "Bus Stop" zones.

3. This resolution shall be entered in the minutes of the Commission as of this 25th day of March, 1947.

FOOTNOTE:

* The print mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 19, under the heading "No Parking - Bus Stop Resolutions" and said print by this reference is made a part of this minute entry to the same extent as if copied in full herein.

A letter was presented from the City of Hood River requesting the installation of "blinker" lights at the intersections of 9th Street and 13th Street with Oak Street (Columbia River Highway) in this city. The Engineer advised that this matter has been investigated by the Traffic Engineer who recommends the installation of a flashing beacon at the 9th Street intersection only. He advised that he concurs in the recommendation. The Commission approved the recommendation unanimously subject to the usual city cooperation.

The Engineer reported on the request from the City of Cascade Locks for the installation of push button pedestrian signals on the Columbia River Highway at three points in this city. He advised that this matter has been investigated by the Traffic Engineer who advises against the installation because there is no well-defined point along the highway where pedestrians concentrate in crossing the highway, and it is his belief that the hazards which exist can best be remedied by speed control. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed an offer from the Southern Pacific Company to pay 50 percent of the cost of installing a floodlight at the highway-

railway grade crossing on the Cascade Secondary Highway in the town of Liberal, Clackamas County. The Engineer recommended acceptance of the offer. The Commission approved the recommendation unanimously.

The Engineer reported that in conformity with telephonic authority given him by the Commission on February 11, 1947, he has arranged to purchase four additional warehouses at Camp Adair at a price of $165 each. Two of these, he said, are to be transported to the Salem Shops and the others are to be cut up into cabins for use at Government Camp, Warm Springs Junction, Odell Lake, and Necanicum Junction. The total cost to purchase, move, and re-erect the buildings, he said, is estimated at $17,000. The Commission approved the expenditure by unanimous vote.

The Engineer requested confirmation of the telephonic authority given him to submit offers to the War Assets Corporation for the purchase of 48,300 pounds of steel I beams stored at San Bernadino Depot at a price of $0.0255 per pound and one 150' span Baily Bridge, complete with launching gear, stored at the Pasco Engineer Depot, at .025 cents per pound. The Commission confirmed such offers by unanimous vote.

The Commission had under discussion the request from the Marion and Clackamas County Courts to purchase the old steel bridge now in use at Pudding River on US99E at Aurora when it has been replaced by the new structure now under contract. The Engineer advised that the old structure is narrow and not suitable for re-erection on any state highway. He recommended sale of the steel to the counties at the rate of five cents per pound or an approximate total of $6,195. The Commission approved the recommendation.

The Commission by unanimous vote confirmed the telephonic authority given the Engineer on March 8 to sell to the Gilbert Volunteer Fire Department, Portland, for the sum of $35, a fire siren salvaged from one of the buildings the Highway Department purchased at Camp Adair.

Letters were presented from the Gardiner Lumber Company and E.K. Wood Lumber Company requesting the installation of platform scales near Reedsport for the convenience of industries in that area. The Commission denied the request upon recommendation of the Engineer, who advised there is no apparent justification for the scale installation at this time.

The Engineer advised that the reduced load limits which the Commission ordered for certain state highways on February 4, 1947, no longer are necessary or desirable except on the northerly 10-mile section of the Alsea-Deadwood Secondary Highway, in Lane County. He recommended action by the Highway Commission lifting such reduced load limits on all of the highways covered by the order except that portion of the said Alsea-Deadwood Secondary Highway between Mile Post 10 and Mile Post 19.45. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, on the 4th day of February, 1947, at a meeting of the Oregon State Highway Commission, all members being present and participat-

ing, the said Commission passed and adopted a resolution reducing the maximum load limit on the following highways:

ALSEA STATE HIGHWAY NO. 27 from M.P. 7.50 to M.P. 28.08;

ALSEA-DEADWOOD SECONDARY STATE HIGHWAY NO. 201 from M.P. 0.00 to M.P. 19.45;

RICHARDSON-EUGENE SECONDARY STATE HIGHWAY NO. 220 from M.P. 11.94 to M.P. 36.57;

McKENZIE STATE HIGHWAY NO. 15 from M.P. 12.00 to M.P. 55.00;

HOOD RIVER SECONDARY STATE HIGHWAY NO. 281 from M.P. 11.72 to M.P. 17.80;

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed and the Commission hereby finds that it no longer is necessary or desirable to maintain the reduced load limit set out in said resolution, except insofar as it pertains to the ALSEA-DEADWOOD SECONDARY STATE HIGHWAY NO. 201 between M.P. 10.00 and M.P. 19.45.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the permissible load limit on the said highways be and the same hereby is rescinded and canceled, except on

that portion of the ALSEA-DEADWOOD SECONDARY HIGHWAY NO. 201 lying between M.P. 10.00 and M.P. 19.45, where the six (6) ton load limit ordered on February 4, 1947, shall be continued in effect,

and the maximum load limit permissible on said sections of said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of each county where said sections of said highways are located, and to the Superintendent of the Department of State Police for his information.

Dated this 25th day of March, 1947.

The Engineer brought up for discussion the advisability of prohibiting log hauling over the Sams Valley Secondary Highway between Dodge Bridge and Crater Lake Highway Junction. He advised that operators engaged in the truck hauling of logs over the Crater Lake Highway to Medford now detour over the Sams Valley Secondary Highway in order to by-pass Highway Department scales at

Agate Station. He pointed out that Dodge Bridge over the Rogue River on the secondary highway is none too strong, and incapable of carrying heavy loads of logs with safety. He recommended, in view thereof, that the Commission authorize the closing of this section of the highway to log-hauling traffic, which would safeguard the bridge and would force the truckers to the scales. The Commission approved the recommendation by unanimous vote and instructed the Secretary to ask the Public Utilities Commissioner to include an appropriate clause to that effect in all special carrier permits hereafter issued from his office.

The Engineer reported log-hauling violations committed by the following operators: Clarence Kyriss, Sweet Home; Frank H. Pearson, Springfield; and Stanford Norris, Dallas. The violation committed by Mr. Kyriss, he said, consisted of "laying out" in order to escape having his load weighed; however, this was to no avail because he was apprehended the following morning and upon being weighed was found to have an overload of 4,700 pounds. The violation of Mr. Pearson, he said, was a deliberate refusal to allow his load to be weighed by State Highway Department Weighmasters; also, according to the Weighmaster's report, this operator has caused considerable trouble in the past which includes an attempt to damage loadometers during the process of being weighed. Mr. Norris's violation, he said, also consisted of a definite refusal to allow his load to be weighed. He pointed out, however, that this is a first offense for Mr. Norris, who is a new operator. Following discussion, the Secretary was instructed to ask the Public Utilities Commissioner to cancel Mr. Pearson's special carrier P.U.C. permit. He was also instructed to write Messrs. Kyriss and Norris and ask them to appear before the Commission at its next meeting to show cause why their special carrier permits should not be canceled.

The Chief Counsel reported a request from Mr. J. H. Massey, Waldport, for permission to remove sand from the ocean beach south of the town of Yachats. He suggested, in view of the fact that there now is a bill before the Legislature concerning jurisdiction over the ocean beach, that action in this matter might be deferred until the Legislature adjourns. The Commission approved the suggestion.

A letter was presented from Mr. James A. McCaul, Jr., Portland, inquiring as to the possibility of securing a permit to operate a mobile kitchen on the ocean beach. The Commission considered it inadvisabile to allow such use of the ocean beach and thereupon ordered that the request be denied.

The Commission had under discussion the matter of permitting Mr. Arthur Muller, Tygh Valley, Oregon, to maintain gasoline pump islands on the edge of the highway right of way in front of his grocery store in Tygh Valley. The Engineer pointed out that it is strictly contrary to a long-established policy to allow encroachments of this kind and that Mr. Muller has been so informed but is proceeding to install his gasoline pumps on the right of way nevertheless. He pointed out that the alignment at this location is bad, and vehicles parked on the right of way to be serviced would create a hazard to other traffic. The Commission referred the matter to the Chief Counsel with

instructions to do what is necessary to clear the right of way of Mr. Muller's facilities.

The Engineer brought up for discussion the application of Mr. Michael R. Hanger, Portland, to construct an aerial tramway over U.S. Forest property near Bonneville. He said that the operation will not involve State Highway property except that provision would have to be made for access to the highway from the lower tramway terminal; however, objections to the tramway have been offered by the State Parks Superintendent who feels that the tramway will desecrate the landscape. The Commission deferred a decision in the matter pending further information which the Engineer was instructed to provide at the next meeting of the Commission.

The Commission had under discussion the matter of increasing the amount of the Highway Department Revolving Fund from $350,000 to $700,000 as has been authorized by the 1947 Legislature. The Commission approved such increase and by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp:

WHEREAS, by Section 100-126, O. C. L. A., as amended by Chapter 199, Oregon Laws 1943, provision is made for the creation of an emergency or revolving fund in the sum of $350,000.00; and

WHEREAS, pursuant to the provisions of said law said fund was set up in the full amount of $350,000.00 and the Highway Commission and State Highway Engineer have employed said fund for the purposes for which the fund was created; and

WHEREAS, by the enactment of Chapter 71, Oregon Laws 1947, the said revolving fund act was amended and by said amendment the revolving fund has been increased to the sum of $700,000.00; and

WHEREAS, it is the judgment of the Commission, on recommendation of the State Highway Engineer, that the full amount of $700,000.00 should be made available as a revolving or emergency fund so that pay rolls, travel expenses, compensation or payments for real property purchased or otherwise acquired, and all other emergency claims may be taken care of promptly and so as to make it possible for the Highway Department to take advantage of trade discounts in connection with the purchase of materials, equipment, or other articles; and

WHEREAS, based on matters herein set out, it is the opinion of the Commission that the best interests of the State will be promoted by making available to the State Highway Engineer under the provisions and requirements and within the meaning and purpose of said act a revolving or emergency fund in the total amount of $700,000.00; and

WHEREAS, it is provided by said Section 100-126, O. C. L. A., as amended by Chapter 199, Oregon Laws 1943, and as amended by Chapter 71,

Oregon Laws 1947, that the State Highway Engineer shall furnish a bond in such amount as the Commission may require, but such bond shall not be less than the sum of $200,000; and

WHEREAS, the records of the Commission disclose that prior to the enactment of Chapter 71, Oregon Laws 1947, the amount of such revolving fund was fixed by law at $350,000, and the record shows further that the Engineer furnished a corporate surety bond in the sum of $350,000, which said bond in connection with which the full premium has been paid is now in full force and effect and by its terms does not expire until the twenty-eighth day of February, 1950; and

WHEREAS, in the opinion of the Commission a bond in the sum of $350,000 is adequate as to amount and will be within the requirements of said statute;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the Secretary of State be and he is hereby respectfully requested to deliver a warrant on any funds belonging to the state highway fund in the sum of $700,000, which said warrant shall be drawn in favor of the State Highway Engineer, R. H. Baldock, and the funds represented thereby shall be by said Engineer, deposited with the State Treasurer and kept in a fund to be known as the revolving or emergency fund. Said fund shall be used and employed by the State Highway Commission and the State Highway Engineer for the purposes authorized by said act.

2. That if the sureties on said $350,000 bond attach to said bond a proper rider or obligation declaring and continuing said bond in full force and effect for all purposes within the meaning of Chapter 71, Oregon Laws, 1947, and providing and insuring that said bond shall be deemed a compliance with the provisions of said act, then no additional bond shall be required; but if such rider and obligation are not provided and attached to said bond, then a new bond shall be required of said Engineer, which said bond shall be in form satisfactory to the Commission and shall be in the sum of $250,000. Upon the execution and delivery of said new bond, then the bond now in effect may be terminated by the Commission as of the date of the new bond.

3. That the State Highway Engineer be and he hereby is directed to disburse the said revolving or emergency fund totaling $700,000.00 pursuant to and within the express or implied provisions of Section 100-126, O. C. L. A., as amended by Chapter 199, Oregon Laws, 1943, and as amended by Chapter 71, Oregon Laws, 1947.

4. That this resolution shall be entered in the minutes and records of the Commission and a duly certified copy thereof delivered by the Secretary of this Commission to Robert S. Farrell, Jr., Secretary of State.

A letter was presented from the Senate Roads and Highways Committee of the 44th Oregon State Legislature, now in session, recommending that the State Highway Department maintain a travel information bureau in the rotunda of the State Capitol Building with the approval and cooperation of the Secretary of State. The Chief Counsel gave as his opinion that the Commission will be within its statutory authority if it elects to do what is requested and recommended by this Committee. Following discussion motion was made by Commissioner Schaupp that the matter be referred to the Advisory Committee of the Travel and Information Department for recommendation. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Commission also discussed a letter from Mr. John A. Laing, Chairman of the Advisory Committee on Travel Matters, recommending that Mr. Carl Jordan, a member of the Travel and Information Department staff, be authorized to attend two travel shows conducted by the Pacific Northwest Tourist Association and sponsored by major newspapers in the midwestern population centers for the dissemination of booklets and travel information. The two shows under consideration, he said, are those sponsored by the Detroit News and the Chicago Daily News and will be conducted during the period April 9 to April 13 and April 19 through April 22, respectively. Travel expense for this endeavor, it was pointed out, estimated to be $375, was anticipated and is provided for in the current travel budget. The Engineer concurred in Mr. Laing's recommendation. The Commission approved the recommendation by unanimous vote.

A letter was presented from Mr. Roy H. Mills, Secretary, Oregon State Board of Control, advising that the Board of Control has authorized an increase in the salary of Mr. S. B. Gillette, Purchasing Agent, from $370 per month to $416 per month effective whenever the scale of salaries as set by the Civil Service Commission goes into effect. Mr. Mills asked the State Highway Commission to confirm the increase and to approve a division in the expense in the same proportion as Mr. Gillette's salary is now being paid, which is $60 by the State Board of Control and $310 by the State Highway Department. The Commission approved the arrangement by unanimous vote, effective March 1, 1947.

In this connection the question arose as to expense that is now being allowed field employees in connection with the conduct of their duties. The Engineer was instructed to report the facts to the Commission at its next meeting.

The Chief Counsel brought up for discussion matters pertaining to the platting of property abutting state highways or situate in the vicinity of state highways. He explained that throughout the state many plats and townsites are being opened up and dedicated along and adjacent to the routes of state highways, many of which in the future will require sidewalks, curbs, utility conduits, etc., within the area of the highway right of way, and as a result, a normal width right of way will become inadequate. He gave as his thought that the use of abutting land and the use of the highway right of way should be coordinated, particularly on newly-constructed sections, and suggested that a letter be directed to the county courts of the several counties calling this feature to their attention and suggesting that the courts call upon

the services of the Highway Commission and its engineers before approving plats of property abutting upon state highways. He read aloud a suggested letter to the county courts in conformity therewith. The Commission approved the letter by unanimous vote.

A letter was presented from Miss Leta Wheeler, Clerk of the Board of the Church of Christ at Pleasant Hill, Goshen, Oregon, regarding the re-establishing of a monument located adjacent to the Willamette Highway at Pleasant Hill which will have to be moved when the highway at this location is reconstructed. The Board suggests that the monument be moved to the church grounds and inquires whether or not the State Highway Department will approve such location. The Commission referred the matter to the Engineer for investigation and report.

The Assistant Counsel, Mr. George Neuner, reported on the status of discussions with the members of the Port Orford City Council regarding controversial items which have required postponement of the proposed improvement of the Oregon Coast Highway through this town. He advised that as a result of a visit to this city, as instructed by the Commission at the previous meeting, present difficulties have been eliminated and right of way options are now being secured. The Commission took no action in the matter.

The question whether or not to relocate the Wasco-Heppner Secondary Highway so as to avoid the property of R. A. Meyers west of Condon was brought up for discussion. The Engineer advised that a survey for a new location that would not involve Mr. Meyers' property has been completed. He exhibited a map showing the new location and the previously-adopted location and pointed out that the alignment of the new survey is poorer than the other. He also stated that while construction costs may be less along the new route, the cost of right of way will be greater. The Commission tentatively approved the new location pending a report as to how much the right of way along such new route will cost. The Chief Counsel was authorized and instructed to secure an estimate of cost of right of way on the new line and report such information back to the Commission together with the estimated cost of acquiring right of way on the other route. The Commission will then decide definitely which location to approve.

The Engineer reported receipt of a request from Mr. F. Woodrow Schnell for permission to construct an access driveway connecting with North Union Avenue (Pacific Highway) at a point opposite the old Peninsula Golf Course. The Engineer advised that Mr. Schnell has leased the property on the east side of Union Avenue from a Mr. Tony Fazzio that he contemplates operating a golf driving range at this location, and that he proposes to use the driveway as a public entrance to his place of business. It appears, also, that another person contemplates subdividing acreage which joins the Fazzio property on the south, and this party contemplates using the same driveway as an entrance to his property from the highway. He recommended that Mr. Schnell's request be denied because it would introduce a definite hazard to highway traffic. The Chief Counsel gave as his thought that the Commission should not allow the lives of people traveling the highway to be endangered and suggested two ways

to correct the situation — acquire additional-width right of way along the frontage of the Fazzio property, including the purchase of right of access, or condemning it if necessary, or seek to enjoin Mr. Schnell. The Engineer suggested the acquisition of additional right of way and the condemnation of the right of access. The Commission approved the recommendation unanimously and thereupon instructed the Engineer to make a survey to determine how much land is needed from Mr. Fazzio for the ultimate improvement of the highway at this location, and to furnish the Chief Counsel descriptions thereof to enable him to negotiate purchase of the property. The Chief Counsel was authorized to negotiate options for the right of way and for right of access to the highway when furnished descriptions, and to resort to condemnation, if necessary, in order to acquire the property.

The Engineer reported the need to establish a reduced speed limit for all traffic on the Alsea-Deadwood Secondary Highway between its junction with the Siuslaw Highway and a point about ten miles northerly therefrom, in Lane County. This road, he said, is narrow and crooked and is used to a considerable extent by log and lumber truckers who drive their trucks too fast for safety. He recommended adoption of a 15-miles-per-hour speed limit for this section. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: Alsea-Deadwood Secondary Highway (Lane County portion)

Highway number : 204 Route number:

Location of Termini			Established Speed
M.P. 0.00 (Jct. with the Siuslaw Highway)	to	M.P. 10.50 (Jct. with road to Prairie Mt.)	15 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission had under discussion a proposal of the City of Lebanon for a cooperative construction project involving the improvement of a number of city streets in this town. The Engineer read aloud provisions of the proposed plan. The Commission deferred action on the matter until its next meeting.

The Commission considered and signed agreements, etc., as follows:

Agreement with California Oregon Power Company covering reconstruction of its pole line facilities on the Pacific Highway between Glendale and Wolf Creek, in Josephine County.

Agreement with Umatilla Indian Reservation covering acquisition of a stockpile site on the reservation.

Rental agreement with Archie R. Averill for use of Highway Department buildings during construction of Spencer Creek Bridge on the Oregon Coast Highway, Lincoln County.

Rental agreement with L. D. Mars for lease of a Highway Department building in Astoria.

Lease from R. H. Lippert for a gravel pit and stockpile site on the Nyssa-Adrian Highway, Malheur County.

Agreement with . B. Garret, et ux., covering lease of a gravel bar on the Pacific Highway, in Douglas County.

Agreement with the S.P. & S. Railroad Company and contractor Porter W. Yett, providing for the purchase by the railroad company of a small portion of a state-owned quarry known as "Krueger" Quarry situate at the end of the Cornelius Pass Railroad Tunnel, in Washington County.

Agreement with M. A. Lynch covering application for purchase of land by him from State Reclamation Service whereby provision is made that the State Reclamation Service may reserve to the State of Oregon, through the Highway Commission, two tracts of land in NW1/4NE1/4, S, 21, T. 15 S., R. 13 E., .M., Deschutes County.

Bargain and Sale Deed conveying unto Evan Lum a four-foot strip of state property in Astoria situate in Lot 2, Block 10, McClure's Addition.

Voucher No. 4181 providing for $700,000 Revolving Fund.

The meeting adjourned at 5:00 p.m., following which the Commission motored to Salem and disposed of additional routine business enroute, all members of the Commission, the State Highway Engineer, and the Secretary being present.

The Commission discussed a letter from Mr. George S. Zimmerman, President, Yamhill Chamber of Commerce with further reference to the matter of designating a state secondary highway extending from the town of Yamhill to the City of McMinnville as an alternate route for the Tualatin Valley Highway between these points. Mr. Zimmerman requests an improvement similar to that on the Yamhill-Newberg Secondary State Highway. The Commission denied the request for reasons stated when this matter was discussed at the previous meeting, and instructed the Secretary to so inform Mr. Zimmerman.

Consideration was given by the Commission to the request from the City of Malin for oiling the Klamath Falls-Malin Highway from curb to curb through this town, particularly between Railroad Avenue and Rosicky Avenue. The Engineer estimated the cost of the work at $3,000 and recommended approval of it as a minor betterment project. The Commission approved the recommendation unanimously.

The Commission considered and denied a petition from the City Council of the City of Monroe requesting the improvement of the Pacific Highway West through their town as was contemplated by the former Highway Commission in 1930, there being no funds available for such improvement at the present time.

A letter was presented from the County Court of Coos County requesting approval of a cooperative plan for the construction of a bridge across the Coquille River at Bullards and an immediate investigation and survey as may be necessary to determine approximate costs. The Engineer estimated the cost of the structure at $375,000 and suggested approval of the project on the basis of

the county paying 50 percent and the state 50 percent of the expense when there is money available to finance the work. The Commission approved the recommendation unanimously.

The Secretary presented additional petitions forwarded by the Seven Devils Road Association, Coos County, and a resolution from the Ocean Lake Chamber of Commerce urging construction of a highway from Cape Arago to Bandon, including a bridge across the Coquille River at Bullards. The Commission denied the request because of lack of funds with which to finance such improvement, except that the bridge referred to will be built when funds are available to finance it if Coos County will pay 50 percent of the costs involved.

A petition was presented from citizens of Tillamook County for the construction of a cut-off highway extending from the Sunset Highway at Elsie down the North Fork of the Nehalem River to a junction with the Necanicum Highway at North Fork, Nehalem River Bridge. The Commission denied the request because of lack of funds with which to finance it and for the further reason that the Commission is now spending in this vicinity all of the money it can spare.

The Commission considered a letter from the Clatskanie Kiwanis Club, successors to the Clatskanie Chamber of Commerce, requesting construction of a sidewalk along the Columbia River Highway between the city proper and the S.P. & S. Depot in that town. Decision in the matter was deferred by the Commission until later. The Secretary was instructed to inform the Kiwanis Club that the Commission has taken the matter under advisement for further study.

Numerous communications were presented requesting a survey for the establishment of a proposed state highway extending along the western foothills of the Cascade Mountain Range between Oregon City and Eugene and further requesting construction of such highway at the earliest possible time. The Commission denied the request because of lack of funds.

A petition was presented from residents of Mallowa County requesting the early reconstruction of the Little Sheep Creek Hill Section of the Little Sheep Creek Secondary Highway. The Engineer recalled that the Commission on the previous day adopted the survey for this road, and advised that he plans to advertise the project for bids some time this summer.

The Commission confirmed the telephonic authority previously given the the Engineer to spend the sum of $1,200 for slope protection on the Miner Creek-Spencer Creek Section of the Oregon Coast Highway.

The Engineer reported log-hauling violations committed by the Coos Bay Lumber Company, Myrtle Point, Oregon. He advised that this company was a Class III operator in 1945 and also in 1946, but during the months of January and February 1947 violations increased to such an extent that it now is in the number one classification, 14.42 percent of their loads as weighed by the Weighmasters being in excess of the weight limits. He requested instructions.

The Commission deferred a decision in the matter pending information as to the locality in which the overweight loads originated. The Engineer was instructed to obtain such information and report back to the Commission at the next meeting.

The Engineer also reported receipt of a certificate from Mr. S. A. McLean, Surveyor for the American Bureau of Shipping, stating that he has examined the ferry boat "Tourist No. III" at Astoria and is recommending to the committee of the American Bureau of Shipping, New York, that this vessel is entitled to be classed with that society pending issuance of the classification certificate, and further advising that he considers the vessel to be seaworthy for river and harbor ferry service. The Commission ordered the certificate filed with the Highway Department records.

The Commission again discussed briefly the proposal of the Weyerhaeuser Timber Company for the off-street parking of the cars of the Company's employees at North Bend, which involves purchase by the Company of a small tract of state-owned land, the moving of a section of the Southern Pacific Company's tracks, and the widening and channelization of the Oregon Coast Highway in front of the Company's property. Commissioner Chandler again stated his approval of the plan as being basically sound and, in his estimation, the best manner in which to solve the problem.

There being no further business to come before the Commission at this time, the meeting adjourned at 6:45 p.m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1947	Subject
13819	Apr.22	Agenda discussed. No action taken because of lack of quorum.
	Apr.23	Parks. Parks Supt. reports on following:
		Rocky Creek Park. Purchase of 44 acres from Paul Baird.
13820		Decision deferred.
		Short Sand Beach Park. Proposed addition of 112 acres. Area not to be purchased.
		Painted Hills District. Proposed lease of park site from T.T Howard and R.R. Avery. Chief Counsel to report.
		Curry County. Proposed acquisition of ocean wayside tract
13821		near Brookings. Offer of Brookings-Harbor C. of C. declined.
		Wayside strips. Coos County. Coos Bay-Roseburg Hwy. Agreement with E.L. Clausen re myrtle tree tract approved.
		Silver Creek Falls Park. Request to dispense beer denied.
		Collier State Park. Construction of museum. Additional information ordered.
		Lincoln County. Oregon Coast Hwy. south of Seal Rock. Request of Turner Bond to purchase shell deposits denied.
		Lincoln County. Alsea Hwy. Removal of gravel from Alsea River.
13822		Chief Counsel and Engr. to confer with State Land Board.
		Umatilla County. Athena-Holdman Secdy. Hwy. Gerking School-Holdman Jct. Sec. 60-ft. R/W to be acquired.
		Multnomah County. Portland. Interstate Ave. Sale of land outside of r/w to P.T. Hobbs approved conditionally.
		Abandonment of sections of old hwy. r/w. Policy established
13823		Resolution adopted.
13824		Astoria ferry. Contract with Babbidge & Holt extended one year.
		Astoria ferry. Construction of new ferry landing. Decision deferred.
		Astoria ferry. Insurance. Renewal of fire and marine insurance.
13825		Engr. and Chief Counsel to report.
		Multnomah County. Columbia River Hwy. Operation of aerial tramway by M.R. Hanger. No action.
		Salem. Hwy. Dept. office space. Chairman to confer with Governor.
		Multnomah County. Portland. Jefferson-Columbia one-way street plan approved.
		Front Avenue-Harbor Drive signalization project not approved.
		Douglas County. Umpqua Hwy. Reedsport. No record of commitment for improvement.
13826		Crook County. Powell Butte Secdy. Hwy. Request for improvement on six-mile sec. south of jct. with Ochoco Hwy. denied.
		Clackamas County. Pacific Hwy. E. Request of Max Rosen to landscape r/w in front of "Fireside Dinners" granted.

Page	Date 1947	Subject
13826	Apr.23	Marion County. Pacific Hwy. E. Santiam River Bridge. Expenditure of $15,000 authorized for riprap work.
		Jackson County. Medford. Request for aid in repairing streets damaged by heavy truck traffic denied.
		Clackamas County. Eagle Creek-Sandy Secdy. Hwy. Sandy. Request to oil section of old route granted.
13827		Jefferson County. The Dalles-California Hwy. Construction of a bridge over North Unit, Main Line Canal authorized.
		Baker County. Request that road to Anthony Lake be kept open. Decision deferred.
		Washington County. Tualatin Valley Hwy. Hillsboro. Request for elimination of traffic hazard granted.
		Sherman County. Maryhill Ferry. C. T. Smith's request for surfacing new approach road denied.
		Wallowa County. Wallowa Lake Hwy. Minam Hill. Construction of
13828		guard fence. Engr. to investigate and handle.
		Wallowa County. Enterprise-Lewiston Hwy. Grading authorized.
		State Tax Street Funds. Resolution adopted.
13830		State Tax Street Funds. Resolution adopted.
13832		Marion County. Silverton. State aid in maintaining streets damaged by log hauling and in providing direct route through city for log traffic approved.
		Marion County. Pacific Hwy. E. Salem. Installation of three traffic signals. Report ordered.
		Awards. Engr.'s award of contracts confirmed.
13833		Surveys completed and accepted. Resolutions adopted.
13836		Extensions of time granted as follows: Contracts Nos. 2808 and 2841.
13837		Contracts completed and accepted as follows: Contracts Nos. 2794, 2808, 2826, 2841, and 2862. Resolution adopted.
		Wasco County. Sherars Bridge Secdy. Hwy. Buck Hollow Creek Bridge to be given to county when new structure completed.
13838		Baker County. Baker-Homestead Hwy. "Love" Bridge over Powder River to be given to county when new structure completed.
		"No Parking" Zone. Pacific Hwy. E. south of Hubbard. Zone established. Resolution adopted.
13839		"No Parking" Zone. Sundial Secdy. Hwy. Troutdale Airport. Engr. and Chief Counsel to investigate.
		Load Limit. Lane County. Alsea-Deadwood Secdy. Hwy. Legal lo
13840		limit restored. Resolution adopted.
		Clatsop County. Warrenton Secdy. Hwy. Skipanon River Bridge.
13841		Plans to be presented to War Department.
		Meeting date. May 14 and 15, and tentatively June 16 and 17 set for next two regular meetings.
		Travel and Information Dept. Advisory Committee. Re-appointment of M.R. Chessman as member. Attitude of Mr. Chessman to be determined.
		Wasco-Heppner Secdy. Hwy. West Cottonwood Sec. Improvement authorized.

Page	Date 1947	Subject
13841	Apr. 23	Douglas County. North Umpqua Co. Rd. Little River Bridge. Commission agrees to pay half of cost for new bridge.
13842		Linn County. Santiam Hwy. Lebanon. Cooperative improvement of Main and Park Streets approved.
		Hood River County. Col. River Hwy. Hood River. Permanent location. Engr. to report.
		Yamhill County. Bellevue-Hopewell Secdy. Hwy. Amity-Hopewell Sec. Improvement authorized.
		Sale of land. Pacific Hwy. Wolf Creek and Talent. Property sold to P.T. & T.
		Survey. Gilliam County. Wasco-Heppner Secdy. Hwy. west of Condon. New alignment approved. Resolution adopted.
13843		
13844		Klamath County. Klamath Falls-Malin Hwy. Klamath Falls-Merrill Sec. 80-ft r/w to be acquired.
		Klamath County. Lower Klamath Lake Secdy. Hwy. Midland-Mac's Store Sec. 60-ft. r/w approved.
		Accident prevention. Sight posts with reflector buttons. Engr to report.
		Wallowa County. Wallowa Lake Hwy. Minam Hill. Installation of sight posts. Engr. to investigate.
		Minor Betterment Program. Sidewalk construction. Engr. to present list of projects at next meeting.
		Lincoln County. Yachats. Removal of sand from ocean beach by J.H. Massey. Decision deferred.
		Log Hauling. Coos Bay Lumber Co. Overweight violations. No penalty to be imposed.
13845		
		Columbia River Hwy. Portland-East Sec. Plans for further development. Engr. to report.
		Sale of land. Lower Columbia Riv. Hwy. Scappoose. Charles A. Peters' purchase of state property. Engr. to report.
		Curry County. Oregon Coast Hwy. Gold Beach. City approves plans. Project to be expedited.
		Crook County. Ochoco Hwy. Marks Creek Sec. Construction urged. Included in Forest Hwy. Postwar Program.
		Forest Hwy. Postwar Program. Projects to be deferred until Fed. funds available. Letter to be sent to County Courts.
13846		J.M. Devers authorized to attend meeting of Right of Way Committee of American Assn. of State Hwy. Officials.
		R.H. Baldock authorized to attend meeting of Executive Committee of American Association of State Hwy. Officials.
		Permits. Trimming of trees and shrubs along state hwy. r/w. Policy adopted. D.M.S.'s to sign permits.
		Lincoln County. Oregon Coast Hwy. Depoe Bay. Exchange of properties with Sunset Investment Co. approved.
		Marion County. No. Santiam Hwy. Niagara-Detroit Sec. Additional contribution of $150,000 authorized.
13847		
		Wallowa County. Enterprise-Lewiston Hwy. State to finance grading. Surfacing to be financed with Forest Hwy. funds.

Page	Date 1947	Subject
13847	Apr. 23	Coos County. Coos Bay. Bunker Hill Addn. Request of A.C. Key to use and purchase land denied.
13848		Sale of land. Coos Bay. W. Bunker Hill Addn. Request of two servicemen to purchase land in Block 6 granted.
		Awards. Following contracts awarded on approval of P.R.A.: Troutdale-Wahkeena Cr. Sec. (embankment proj.) Troutdale-Wahkeena Cr. Sec. (topsoiling proj.) Bridge over O.W.R. & N. Co. tracks at Bridal Veil

		Meeting adjourned at 5:15 p.m.

Portland, Oregon
April 22, 1947

The regular meeting of the State Highway Commission scheduled to convene in the Imperial Hotel at 9:00 a.m. on this date was not held because of the lack of a quorum; however, the following were present at the appointed time and place;

T. H. Banfield, Chairman
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived on the following day. Commissioner Ben R. Chandler was excused from attending this meeting.

Matters appearing on the agenda were discussed in considerable detail, but no action was taken thereon.

The meeting adjourned at 3:45 p.m. to reconvene at 9:00 a.m. on the following day in the same room.

H. B. Glaisyer
Secretary

Portland, Oregon
April 23, 1947

The meeting of the Highway Commission reconvened at 9:00 a.m. in Room 715, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben R. Chandler was excused.

The State Parks Superintendent was present and reported on park matters as follows:

1. Proposed purchase of property owned by Paul Baird situate adjacent to the Oregon Coast Highway just south of Rocky Creek State Park, Lincoln County: The Parks Superintendent advised that this area consists of 44 acres and would make a fine addition to the existing park. The Commission deferred its decision in the matter pending

MAR 3 1947

definite information as to where the permanent highway is to be located in this vicinity and particularly until the question of acquiring right of way for a proposed revision of this highway across property owned by W. F. Badley at Otter Crest has been decided.

2. Proposed acquisition of 112 acres of land at Short Sand Beach State Park: The Parks Superintendent advised that this property is needed to protect the present park and to permit construction of a roadway leading to it. The Assistant Counsel, Mr. Meuner, advised that the property has been appraised at $1,700 and that the owner will not sell for less than $5,500. Chairman Banfield expressed the feeling that there will have to be a reduction in expenditures for parks and wayside areas in the future in direct ratio with reductions that will have to be made in highway construction expenditures because of the additional funds the Legislature has allotted to counties, cities, and the State Police from highway revenues. He further stated that he does not consider it proper to purchase and develop additional park areas while the State Highway Department is short of funds to finance road improvements. Commissioner Schaupp concurred, whereupon the Commission voted unanimously not to purchase this site.

3. Proposed acquisition for park purposes of a large area in the Painted Hills District, Wheeler County: The Parks Superintendent presented an offer from T. T. Howard and R. R. Avery to lease to the state 2,822 acres of land situate adjacent to the Ochoco Highway about 15 miles west of the town of Mitchell, said lease to be for a period of 50 years at an annual rental rate of $1 for the entire acreage. He advised that the owners wish to retain title to the area and to all of the oil and mineral rights, etc., and that they also wish to use the property for personal purposes except 15 acres located near the highway on a small stream known as Bridge Creek, which they want the state to develop for public park purposes; moreover, they are asking the state to construct for them four cattle guards at points they will designate. If necessary, he said, the owners will give the state a deed to the 15 acres but not for the balance. He estimated it would cost about $1,500 to develop the 15-acre tract. The Chief Counsel gave as his opinion that it would be better to acquire outright the 15-acre tract and include in the deed provisions for free access to the remaining area for the general public; also, that it would be better to lease the large area rather than purchase it so as to avoid public criticism if the land were taken off the tax rolls. The Commission deferred action in the matter pending further study by the Chief Counsel, who was instructed to report thereon at the next meeting of the Commission.

4. Proposed acquisition for park purposes of an ocean wayside tract near Brookings, Curry County: The Parks Superintendent advised that he has inspected this property, which, in his estimation, does not fit into the state parks picture, particularly since the state has two parks not far distant from this location and because of the amount of money it would take to develop it. He estimated the cost to put the area into

good working condition at about $3,000 and to improve the roadway leading to it at approximately $2,500. He recommended that the offer be declined. The Commission approved the recommendation unanimously and instructed the Secretary to convey the action to the Brookings-Harbor Chamber of Commerce by appropriate letter of thanks.

5. Proposed agreement with E. L. Clausen providing for preservation of a six-acre myrtle tree tract along the Coos Bay-Roseburg Highway, in Coos County: The Parks Superintendent advised that this agreement simply provides for the preservation of myrtle trees on Mr. Clausen's property and is in conformity with a previously-established policy of the Highway Commission. He recommended approval of the arrangement. The Commission approved the recommendation unanimously.

6. Request of W. W. Kelly to dispense beer in Silver Creek Falls State Park on July 5, 1947: The State Parks Superintendent advised that the 48th Seabee Organization plans to hold a reunion in this park on July 5 and in connection therewith Mr. Kelly has requested the privilege of dispensing beer to the members. He pointed out that such procedure is strictly contrary to the long-established policy of the Commission and recommended that the request be denied. The Commission approved the recommendation.

7. Suggestion of Mr. Alfred D. Collier for the construction of a museum in Collier State Park, Klamath County: The Parks Superintendent advised that a group in Klamath Falls is interested in establishing a museum in this park and has stated a willingness to contribute a considerable sum of money to finance permanent buildings when the time is proper, but in the meantime the group would like permission to establish some temporary buildings on the premises to house antique equipment. He inquired as to the pleasure of the Commission in the matter. Chairman Banfield expressed a desire for additional information and an opportunity to inspect the premises before acting. This was agreeable to Commissioner Schaupp, and it was so ordered.

The Chief Counsel reported a request from Mr. Turner Bond, Secretary, County Agricultural Conservation Association, Toledo, Oregon, for permission to appropriate some shell deposits adjacent to the Oregon Coast Highway just south of Seal Rock State Park, which he wants to use for liming purposes. He estimated that there are about 300 cubic yards in these deposits, and he advised that Mr. Bond has stated a willingness to pay about $2 per cubic yard for the material. The Commission denied the request by unanimous vote.

The Engineer brought up for discussion the matter of securing gravel materials from the Alsea River in the vicinity of the G. P. Hunter property, Lincoln County. He advised that this gravel is needed in connection with reconstruction of a four-mile forest highway section of the Alsea Highway by the Public Roads Administration and that application has been filed with the State Land Board for permission to take about 30,000 cubic yards of material from two bars in this river without the payment of royalty, the only alternative

source of material being a rock quarry about seven miles distant which would entail extra costs not less than $1.50 per cubic yard. He further stated that Mr. Hunter operates a small gravel plant nearby, and it appears that he now has, or has applied for, control of the gravel, and if such control is placed in his hands the probabilities are that the material would cost at least $1 per cubic yard more than if the control of the gravel were given to the State Highway Commission. The State Land Board, he said, is still considering the matter but up to the present time is still insistent that the state pay eight cents per cubic yard for the material taken from this source; however, its definite decision will not be reached until a meeting scheduled to be held on April 29. The Chief Counsel pointed out that, according to the statutes, the State Highway Department is not required to pay a royalty for the material taken from navigable streams because such material is not being used for commercial purposes. This matter was discussed at some length during which the Engineer and the Chief Counsel were instructed to follow it through to conclusion with the State Land Board.

The Commission had under discussion the width of right of way to be acquired for the Gerking School-Holdman Junction Section of the Athena-Holdman Secondary Highway. The Engineer advised that the present right of way is 60 feet wide, which is sufficient for this type of road because it is merely local in character and will not carry heavy traffic except during the wheat-hauling season. He recalled that the Umatilla County Court, a number of years ago, stated its preference for a minimum-width right of way for secondary highways through wheat county because of the difficulties of controlling obnoxious weeds on uncultivated land and for the further reason that there would be a saving of grain-raising acreage to the wheat farmers. He recommended approval of a 60-foot right of way for this section. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. Neuner, presented to the Commission an offer from P. T. Hobbs, Portland, to purchase a small parcel of state-owned land along Interstate Avenue in Portland, which property lies outside the standard-width highway right of way and is described as portions of Lots 10, 11, 12, and 13 of Block 2, Kenton. Mr. Hobbs offers to pay $750 for this area without right of access to the highway from the property because he has such access from an adjoining tract. The Assistant Counsel advised that the property is appraised at $1,500. The Commission unanimously authorized the sale of the property to Mr. Hobbs for the sum of $1,500 without right of access to the highway; however, agreed to sell the property to Mr. Hobbs for the sum of $750, without access, provided he will relinquish his right of access to the highway from his adjoining property.

The Commission had under discussion a joint report and recommendation from the Engineer and the Chief Counsel relative to the adoption of a policy concerning the abandonment of sections or portions of old highway right of way which are no longer of value for state highway purposes by reason of highway relocation. (See letter directed to Oregon State Highway Commission dated April 17, 1947, in general files for details.) As a result of discussion the Commission approved the report and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, because of limited finance during the period of early highway construction locations of highways were approved which, while they then met and satisfied the needs of motor transports then in use, are now quite inadequate to serve the type and character of vehicles and the volume of traffic now using public highways in the transportation of persons and property; and

WHEREAS, the financial limits which then controlled in a large measure decisions of the Highway Commission with respect to grade, alignment and other location factors controlled likewise the counties on which the financial obligation to procure and make available necessary rights of way was by law then imposed and which limited funds often impelled the use of existing county roads which had not been located nor had rights of way therefor been obtained consistent with highway locations now required for motor traffic; and

WHEREAS, it is now and for some time has been the purpose and objective of the Commission to conform wherever and whenever advisable the system of state highway to and with modern standards, and to that end it is deemed by the Commission to be in public interest that when major reconstruction of an existing highway is undertaken the element and factor of location be given prior and appropriate consideration; and

WHEREAS, it is provided by Chapter 272, Oregon Laws 1943, that, whenever the Highway Commission relocates or realigns a state highway or a section or sections thereof and by reason of such relocation or realignment there is eliminated from the original route of the highway a section along which persons are residing or in connection with which a community is served, said eliminated section shall be maintained by the Commission at State expense or shall be maintained by the county or by the State and the county on such terms and conditions as may be agreed upon; and

WHEREAS, it is deemed in public interest that the Commission declare its policy with respect to the provisions of such contract as may be entered into between the State and a county in which such relocated highway is located and the obligations which should be assumed by the parties;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority being present and affirmatively voting, as follows:

1. That when by reason of the relocation of a state highway or a section thereof there is eliminated from the relocated route a section upon which there are people living or there is a community served by said section or route, then said eliminated or abandoned section or sections shall be maintained at State expense by the State with the approval of the county court as a secondary highway, or by mutual agreement by the county involved and the State Highway Commission said abandoned or eliminated section may be taken over by the county and maintained as a county road, and the State shall select and adopt as a secondary highway a compensating mileage of county road.

2. Where the abandoned section or sections of said relocated highway are more or less minor in length and carry a small amount of traffic, then by agreement with the county said abandoned section or sections shall be taken over by the county and maintained as a county road.

3. That before action is taken by the Highway Commission with respect to any abandoned section or sections of a relocated state highway negotiations be opened with the county court for the purpose of working out and developing a mutual understanding and agreement, the prime purpose and objective of which agreement shall be the best interests of the State and the county involved.

4. That this resolution be entered in the minutes and records of the Commission as of April 23, 1947, and the Secretary of the Commission be instructed to mail to the county judge of each county court in the State or to the chairman of the board of county commissioners a certified copy of this resolution, and that the Secretary mail a like copy to the Public Roads Administration.

The Commission discussed matters pertaining to the ferry operation across the Columbia River between Astoria, Oregon, and Megler, Washington, including the question of renewing its contract with Babbidge & Holt for a period of one year, construction of a new ferry landing at the foot of 17th Street in Astoria, and the matter of renewing the fire and marine insurance now being carried on the ferry boats and landings.

With regard to the first item, the Engineer presented a letter from Babbidge & Holt stating their willingness to an extension of the present contract in accordance with its existing terms, and offering to reduce by five percent the amount of the gross monies that the state is required to pay them. The Engineer recommended acceptance of this offer and that the contract be extended for a one-year period subject to the deduction. The Commission approved the recommendation unanimously.

Concerning the construction of a new ferry landing at 17th and Commercial Streets in Astoria, the Engineer recalled details of his report to the Commission at the previous meeting on the need to acquire the Swanson property and to re-establish Mr. Swanson's business on an adjacent site in order to provide suitable accomodations for ferry patrons. Chairman Banfield expressed a desire to inspect the premises before taking final action in the matter, in view of which a decision was deferred until the next meeting.

Relative to the renewal of the fire and marine insurance now being carried on the ferry boats and the ferry landings, the Commission deferred its decision pending a report from the Engineer and the Chief Counsel as to the possibility of changing over the present insurance, which is written by

American companies, to that written by Lloyds of London. The Engineer was instructed to ascertain such information, together with information as to the cost of insurance written by Lloyds of London as compared with that written by American concerns. The Commission also authorized purchase of the new insurance through agents representing the Oregon Association of Insurance Agents.

The Commission had under consideration the application of Mr. M. R. Hanger, Portland, to operate an aerial tramway near the Columbia River Highway at Bonneville. The Engineer advised that investigation reveals that the tramway will neither extend over the highway nor encroach upon state highway property in any way, so the Highway Commission is not particularly concerned at the present time, although later on when the new highway is constructed at this point consideration will have to be given to the matter of providing access to the highway from the tramway terminal. In view of this report the Commission decided to take no action on the matter.

The Commission discussed briefly the matter of providing adequate office space for the State Highway Department in Salem but took no definite action thereon. It was agreed that Chairman Banfield would discuss the matter with Governor Earl Snell.

The Engineer submitted a written report on the cost of two projects in the City of Portland: (1) Channelization, paving, and signal installation in connection with the Jefferson-Columbia one-way street plan between S.W. 18th Street and Harbor Drive, exclusive of certain channelization and signal installation on Harbor Drive necessary in connection therewith, and (2) Signalization of 13 street intersections on Front Avenue and signalization of five intersections on Harbor Drive. He estimated the cost of the first of these projects at $78,660 and of the second at $43,266, for a total of $121,926. He advised that plans for these two improvements have been given very careful study by Mr. F. T. Fowler, Traffic Engineer of the City of Portland, who approves them from the city standpoint; and suggested, if the Commission also approves them, that he be authorized to negotiate with the City of Portland to pay half of the expense of construction. Following discussion the Commission unanimously approved the plans for the Jefferson-Columbia one-way street project and authorized the Engineer to negotiate a working agreement with the City of Portland covering payment of the expense on a 50-50 basis. The Commission definitely decided not to approve the plans of the Front Avenue-Harbor Drive project.

The Engineer also reported that, as ordered by the Commission at the previous meeting, a thorough search has been made of the Highway Department's records in Salem to ascertain whether or not the Commission at any previous time made a definite commitment to continue the improvement of the Umpqua Highway east from the City of Reedsport and that no record of such commitment can be found. The Secretary was instructed to convey such information to the delegation which appeared before the Commission at a previous meeting regarding this subject.

The Engineer reported on the request of a group of farmers residing in the Powell Butte District east of Bend for the improvement of the Powell Butte Secondary Highway from its junction with the Ochoco Highway southerly a distance of about six miles. He estimated the cost to oil the northerly three-mile portion at approximately $35,000 and to oil the entire unit at about $65,000. He pointed out that this work is not included in the construction program and no funds are immediately available for it. Chairman Banfield gave as his thought that the Commission should not make commitments for future work, except for projects of an emergency nature, until it knows how much money is going to be available for construction purposes and to match Federal Aid monies. Commissioner Schaupp concurred, whereupon the Commission voted unanimously not to approve this project.

The Engineer also reported on the request of Mr. Max Rosen for permission to fill in and landscape a small area of state highway right of way in front of his establishment known as "Fireside Dinners" which is located on the easterly side of US99E, a short distance south of the town of Milwaukie. He presented sketches prepared by the State Parks Department showing a suggested plan and recommended approval of the request if Mr. Rosen is willing to provide an improvement in accordance therewith. The Commission approved the recommendation and ordered that the matter be covered by appropriate agreement.

The Engineer requested authority to spend about $15,000 for riprap work at the north end of the Santiam River Bridge and at the overflow trestle, known as No. 7, south of this river. He advised that the riprap is urgently needed to protect the embankments at these locations before the next flood season to avoid damage to the highway by the flood waters. He recommended approval of the request and that the work be done under contract, since the contractor for the bridge construction is not interested in the project. The Commission approved the recommendation.

A letter was presented from the City of Medford inquiring as to the possibility of securing state aid in repairing city streets that are used by heavy truck traffic. The Commission considered this strictly a city obligation and thereupon decided not to contribute state funds thereto.

The Engineer reported a request from the City of Sandy for the improvement of the old route of the Eagle Creek-Sandy Secondary Highway within the city limits of Sandy, the maintenance of which will become an obligation of the city when construction of the new route is completed. He advised that the section referred to is 0.3 mile in length and at present is gravel surfaced. He estimated the cost to oil the section at $1,375, of which amount, he said, the city has stated a willingness to pay $837.50, which would leave a balance of $537.50 to be paid by the state. The volume of traffic that will use the road, he said, is sufficient to justify the expenditure, and he recommended approval of the project on the basis of the aforementioned cooperative set up, the work to be done by the state's contractor on the new route. The Commission approved the recommendation unanimously.

The Commission discussed a letter from the Engineer dated April 15, 1947, regarding the Commission's cooperative agreement with the U.S. Reclamation Service covering construction of four bridges over the North Unit, Main Line Canal, on The Dalles-California Highway in Jefferson County. According to this report three of the bridges have been constructed, but the fourth is located on a section of highway which is planned for reconstruction but for which no contract has been awarded. In view of the circumstances, the Reclamation Service is now asking the state to build this fourth bridge and has agreed to reimburse the state for one-half of the cost involved pursuant to the terms of the aforementioned agreement. The Engineer advised that this bridge is located on the Juniper Butte-Crooked River Section of The Dalles-California Highway, which is scheduled for construction during the third postwar year. He recommended approval of the Reclamation Service's request and that he be authorized to include this bridge construction in the contract for the highway work, inasmuch as it does not alter or change the state's obligation under the existing agreement. The Commission approved the recommendation unanimously and so ordered.

Communications were presented from Eastern Oregon College of Education and others requesting that the Anthony Lake road leading to the Anthony Lake winter recreational area, in Baker County, be kept open during the winter season for the benefit of winter sports enthusiasts. The Commission discussed this matter briefly but deferred action pending a conference with a delegation from the City of Baker which is scheduled to appear before the Commission on the following day.

The Engineer reported a request from the City of Hillsboro for action as may be necessary to eliminate a traffic hazard which the city alleges exists at the intersection of Tenth Street and Baseline Street on the Tualatin Valley Highway near the east city limits of Hillsboro. He advised that this matter has been investigated by the acting Traffic Engineer who recommends the installation of a traffic island and appropriate signs, all of which is estimated to cost about $1,550. He stated his concurrence in this recommendation. The Commission approved the recommendation unanimously.

The Secretary presented a letter from Captain C. T. Smith, owner of The Dalles Ferry Company, The Dalles, advising that he has completed a new concrete landing for the Maryhill Ferry, with a roadway connecting this landing with the old one, and inquiring whether or not the State Highway Department is sufficiently interested to hard-surface the new roadway. The Commission considered this a personal responsibility of Captain Smith and decided not to join in the expense.

Communications were presented from Mr. Owen T. Coffin, Publisher, Wallowa County Chieftain; Mr. Curtis E. Gould, Superintendent of Joseph Public Schools; Mr. Byron L. Henry, Publisher, The Herald, Joseph; and members of the Joseph High School Student Body, in each of which the State Highway Commission is requested to construct additional guard fence along the Minam Hill Grade Section of the Wallowa Lake Highway in order to provide greater safety for traffic and to minimize the occurence of accidents. The Engineer advised that,

in conformity with instructions previously given him by the Commission, additional sight posts with reflector buttons have been installed on this section which should serve the purpose. Chairman Banfield gave as his belief that all the Commission can do is to make certain that everything has been done to make this highway reasonably safe for the traveling public. Commissioner Schaupp concurred, whereupon the Engineer was instructed to personally investigate the matter and to do that which, in his estimation, is necessary to make this section of highway reasonably safe for public travel.

Letters were also presented from Mr. Owen T. Coffin, Publisher, Wallowa County Chieftain, and from the Joseph Chamber of Commerce, inquiring when the Highway Commission expects to complete construction of the remaining section of the Enterprise-Lewiston Highway at the Washington State Line. The Engineer advised that the grading of this section, which is estimated to cost about $150,000, is a Forest Highway Project under jurisdiction of the Public Roads Administration and that construction is being delayed because of failure of the Federal Government to provide funds to finance it. He pointed out that the state is obligated to surface the section, and suggested that it might be advisable, under the circumstances, for the state to finance the grading work with state money in order to expedite completion of this remaining link, inasmuch as construction of the Washington section now is under way. The question arose whether or not the Federal Government would give the state credit on some other job for state funds expended for the grading work. Mr. T. H. Davis, District Engineer of the Public Roads Administration, who was present, agreed to look into the matter. Chairman Banfield expressed himself in favor of using state funds to finance the grading work if such credit can be obtained from the Federal Government. He further stated that he has discussed the matter with Commissioner Chandler, who is of the same belief. Commissioner Schaupp expressed his approval on such basis, making the decision unanimous. (Discussion of this matter was resumed later in the day when Mr. W. H. Lynch, Division Engineer, Public Roads Administration, was present. Mr. Lynch agreed to recommend to his superiors a revision in the Forest Highway Program to provide for the grading work to be done by the state and the surfacing work by the Federal Government. He agreed to send the Commission a letter to that effect. Such letter was presented on the following day. The Commission accepted it and authorized the Engineer to advertise the grading work as a state-financed project for bids to be received at the earliest possible time.)

The Engineer reported that the following cities and town have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds which they received in 1947 from 1946 State Highway revenues:

Adams	Drain	Moro
Aurora	Grass Valley	Ontario
Barlow	Lakeview	Philomath
Brownsville	Maupin	Sublimity

He also reported that the plans proposed by the cities for improvements to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission

approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Adams	$ 338.95
Aurora	487.36
Barlow	104.29
Brownsville	1,925.39
Drain	1,197.35
Grass Valley	409.15
Lakeview	4,945.85
Maupin	535.50
Moro	619.74
Ontario	7,121.94
Philomath	1,756.92
Sublimity	561.57

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Adams - College Street

Aurora - 2nd Street, 3rd Street, 4th Street, Bobs Avenue, Main Street, Liberty Street, unnamed street leading from Liberty Street to the east city limits

Barlow - Main Street, Second Street, Maple Street and First Street

Brownsville - All city streets

Drain - Main Street North, East Hedrick Creek Street, "A" Street, 3rd Street, Elder Street, Payton Street, Date Street,

Grass Valley - Market Street, 2nd Street

Lakeview – "E" Street South, South Street, Third Street South, Fourth Street South, "H " Street, First Street North, Second Street North

Maupin – Grant Avenue, Dufur Avenue, 4th Street, 5th Street, 6th Street

Moro – First Street, Scott Street, Bidwell Street

Ontario – All uncoiled city streets

Philomath – "A" Street, "B" Street, "C" Street, "D" Street, "E" Street, "F" Street, "G" Street, "H" Street, "I" Street, "J" Street, "K" Street, "L" Street, "M" Street, "N" Street, North Street, College Street, South Street, 2nd Street South, 1st Street South, 3rd Street South, also unnamed streets as shown on map attached to Form 3

Sublimity – Broadway Street and unnamed streets as shown on map attached to Form 2

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 23rd day of April, 1947.

The Commission also approved the plans of the towns of Bonanza, Granite, and Haines for the expenditure of State Tax Street Funds which they received in 1946 from 1945 State Highway revenues upon advice from the Engineer that these towns have satisfied the legal requirements and that the plans have been examined and found satisfactory. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Bonanza	$ 349.97
Granite	129.17
Haines	566.26

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Bonanza – North Street, Market Street

Granite – Main Street, Center Street

Haines – Ash Street, Fifth Street, Cole Street, Wilcox Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 23rd day of April, 1947.

---

23 1947

Letters were presented from the City of Silverton requesting state aid in the repair of a portion of North Second Street, Silverton, which is being damaged by log-hauling traffic and further requesting state cooperation in providing a direct route for log-hauling traffic from the Victor Point district through Silverton that will avoid congested streets in the central part of the town. The Commission unanimously authorized an expenditure of a maximum sum of $2,500 in cooperation with the City of Silverton on this project.

The Commission discussed and deferred for future consideration a request from the City of Salem for the installation of traffic signals on North Capitol Street (Pacific Highway East) at intersections with three city streets — "D" Street, Market Street, and Fairgrounds Road — the cost, which is estimated at $10,000, to be shared equally by the city and the state. The Commission ordered an analysis and report on the subject.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meetings on February 4 and on March 24 and 25, 1947, the conditions of the awards having been satisfied:

Construction of the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway, Clackamas County; bids received February 4, contract awarded March 27, 1947, to R. A. Heintz - Construction, low bidder

Surfacing and oiling the Spitzenberg-Scappoose Section of the Pittsburg-Scappoose County Road, Columbia County; bids received March 24, contract awarded April 2, 1947, to J. N. & M. J. Conley, low bidder

Grading and paving the Ashland Section of the Pacific Highway, Jackson County; bids received March 24, contract awarded April 1, 1947, to Albert W. Denton, low bidder

Grading, paving, and construction of two overcrossing structures on the Barnes Road-Multnomah County Line Section of the Sunset Highway, Washington County; bids received March 25, contract awarded April 12, 1947, to Porter W. Yett, low bidder

Grading, surfacing, and construction of a bridge on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties; bids received March 25, contract awarded April 7, 1947, to K. F. Jacobsen Co., Inc., low bidder

Umatilla River Dike Project adjacent to the Boardman-Stanfield Highway near Stanfield, Umatilla County; bids received March 24, contract awarded April 19, 1947, to Loran Petro, low bidder

Hydraulic-dredged embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County; bids received March 24, contract awarded April 22, 1947, to Hydraulic Dredging Co., Ltd., low bidder

Rock toe, rock slope protection, roadbed topping, top-soiling and seeding on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County; bids received March 25, contract awarded April 22, 1947, to J. N. & M. J. Conley, low bidder

Construction of concrete bridge over O.W.RR & N. Co. tracks at Bridal Veil on the Columbia River Highway, in Multnomah County; bids received March 25, contract awarded April 22, 1947, to Guy F. Atkinson Co., the only bidder

Painting Yaquina Bay Bridge on the Oregon Coast Highway, in Lincoln County; bids received March 24, contract awarded April 7, 1947, to L. E. Snell, second low bidder

In connection with the contract for painting the Yaquina Bay Bridge, the Engineer explained that the Commission originally awarded this contract to Pacific Bridge Painting Company, the low bidder, at $14,148.75, but this contractor refused to accept the contract because the bid was far below those of the other bidders, and they preferred to pay the amount of the proposal bond, which was $707.44, rather than to stand the chance of losing several thousand dollars by accepting the contract. The re-award of the contract to Mr. Snell, he said, was upon telephonic authority granted by the Commission.

The Commission by unanimous vote confirmed the awards as reported.

The Commission had under consideration approval of location surveys as follows which were reported by the Engineer as completed:

South approach to City of Corvallis, Benton County

East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, Gilliam County

Miles Bridge-Baker Section of the Medical Springs Secondary Highway, Baker County

Gunnell Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, Josephine County

Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County

Gerking School-Holdman Junction Section of the Athena-Holdman Secondary Highway, Umatilla County

Mill Creek Section of the Pacific Highway in Eugene, Lane County

Each of said surveys was discussed at length, and the following action was taken:

(1) The Commission deferred approval of the survey for the Gunnell Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, in Josephine County, pending investigation by the Engineer to determine whether or not a house which is located on the alignment can be avoided.

(2) The Commission approved the survey of the Mill Creek Section of the Pacific Highway in Eugene, Lane County, on the condition that the state will in no way be obligated to contribute toward the construction of this project an amount in excess of that stated in its agreement with Lane County and the City of Eugene dated December 31, 1946.

(3) The Commission ordered hereafter that in submitting his recommendation to the Commission the Engineer shall state whether or not the survey is for a project that is included in the approved construction program and if so to state the year in which it is programmed for undertaking and the amount authorized to finance the work.

The remaining surveys were approved by the Commission without qualification. The following resolutions with regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

South approach to the City of Corvallis, Benton County

East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, Gilliam County

Miles Bridge-Baker Section of the Medical Springs Secondary Highway, Baker County

Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County

Gerking School-Holdman Junction Section of the Athena-Holdman Secondary Highway, Umatilla County,

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 5B-25-11, 6B-23-1, 6B-19-(11, 12, 13, & 14), 6B-19-8, and 6B-16-(17, 18, & 19), respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-third day of April, 1947.

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Mill Creek Section of the Pacific Highway in Eugene, Lane County, and in connection therewith to prepare a map showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively voting as follows:

1. That the survey of the above-mentioned section of state highway, together with the map, which for identification purposes bears the map file No. 1H-5-7, field notes and other engineering data submitted

by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That the approval and adoption of said survey and route shall in no wise alter the provisions of the project agreement heretofore executed by the State, Lane County, and the City of Eugene covering the highway-road-street project, which agreement bears the date December 31, 1946.

4. That this resolution be entered in the minutes and records of the Commission as of the twenty-third day of April, 1947.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Archie R. Averill, Contract No. 2802, for the construction of a bridge on the Pacific Highway at Junction City, requested an additional extension of time of 30 days, from April 1 to May 1, 1947, within which to complete this job. He gave as his reason for requesting the extension of time that more drying weather is needed for painting the handrail on the structure. The Engineer advised that the structure was completed within the time allowed under the previously-extended time limit, with the exception of painting the handrails which could not be done until suitable weather prevailed. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, for the reasons given by the contractor.

Harr & Horton, Contract No. 2841, for pavement widening on the Forest Grove Section of the Wilson River and Nehalem Secondary Highways, in Washington County, requested an additional extension of time of 90 days, from December 31, 1946, to March 31, 1947, within which to complete this job. They alleged that they were unable to complete the project within the previously-extended time limit because of adverse weather conditions. The Engineer advised that the reason given by the contractor for failure to complete the project within the previously-extended time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however on the basis of the contractor's statement.

The Engineer reported that Contracts Nos. 2794, 2808, 2826, 2841, and 2862 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2794, with W. R. Grasle Company, for lighting on the Interstate Bridge between Portland, Oregon, and Vancouver, Washington; completed March 24, 1947;

Contract No. 2808, with Archie R. Averill, for construction of a bridge at Junction City on the Pacific Highway, in Lane County; completed April 11, 1947;

Contract No. 2826, with Porter W. Yett, for pavement widening on the West Gresham Section of the Mt. Hood Highway, in Multnomah County; completed March 31, 1947;

Contract No. 2841, with Harr & Horton, for pavement widening on the Forest Grove (Main Street and College Way) Section of the Nehalem Secondary Highway, in Washington County; completed March 31, 1947;

Contract No. 2862, with A. H. Saxton & Sons, for furnishing crushed rock in stockpiles on the Birkenfeld-Washington County Line Section of the Nehalem Secondary Highway, in Columbia County; completed March 15, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under consideration a request from the County Court of Wasco County that the old bridge over Buck Hollow Creek on the Sherars Bridge Secondary Highway be given to the county for re-establishment on a county road when the new bridge at this point has been built. The Engineer advised that this is a light steel structure with a roadway width of only 15 feet, and that there is no place on the State Highway System where it can be used. He recommended that the bridge be given to the county without charge on the condition that the county will pay all costs of loading and transporting it. The Commission approved the recommendation by unanimous vote.

The Engineer presented a similar request from the Baker County Court that the old bridge over the Powder River known as "Love" Bridge" on the Baker-Homestead Highway be given to the county for re-establishment on a county road. He advised that this structure also is of light steel construction with a roadway width of 15 feet one inch and was designed originally for approximately a ten-ton load; also, that there is no place in the State Highway System where it can be used. He recommended that the structure be given to the county without charge subject to the condition that the county will pay all costs of loading, moving, and otherwise handling the structure after it has been dismantled by the state's contractor on the new bridge. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to the establishment of a "no parking at any time" zone on each side of the Pacific Highway East opposite the Rex Wrecking Yard and Auction Mart south of the town of Hubbard, Marion County. The Engineer advised that a serious traffic hazard exists at this location when activities are under way at the Auction Mart, particularly on Sundays when traffic on the highway amounts to as many as 8,500 vehicles, and the records show that 12 accidents have already occurred along this section. He recommended that parking be prohibited on both sides of the highway between Mile Post 31.64, at a place known as Playmore Park, southerly to Mile Post 31.91, a short distance south of the Auction Mart. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Pacific Highway East is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that a short distance outside the corporate limits of the City of Hubbard there is maintained an auto wrecking yard and an auction mart on real property abutting on said highway, which establishments on certain days of the week are patronized by a large number of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of the Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Pacific Highway East between Engineer's Station 940+90.3 and Engineer's Station 926+50.3 south of the City of Hubbard, in Marion County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of the Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time provide the degree of safety and convenience which in the opinion of the Commission should be provided the motoring public.

3. That the parking of motor vehicles on the right of way of said highway within said terminibe and the same hereby is prohibited.

4. That the Engineer be and he hereby is instructed to erect at the said termini, and at such points between said termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and the action of the Commission as here declared, "no parking at any time" signs.

5. That a copy of this resolution be sent to the owners and operators of said auto wrecking yard and said auction mart, and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the Commission as of the twenty-third day of April, 1947.

The Commission also considered the establishment of a "no parking" zone on each side of the Sundial Secondary Highway between Mile Post 0.57 and Mile Post 0.60 where airplanes cross in taking off and landing at the Troutdale Airport. The Commission decided unanimously not to establish such a zone at this place because there is no apparent highway hazard at this point and there is a question if the Commission has authority to prohibit parking of automobiles along the highway for the accomodation of low-flying planes. The Engineer and the Chief Counsel were instructed to ascertain what rights, if any, the aeronautical authorities have to control traffic at such locations.

The Engineer reported that the Alsea-Deadwood Secondary Highway No. 201, in Lane County, is now in such condition that the six-ton load limit which has been in effect on a portion of this road for some time no longer is required. He recommended, in view thereof, that the Commission take appropriate action to restore the legal load limit on this road. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, on the 4th day of February, 1947, at a meeting of the Oregon State Highway Commission, all members being present and participating, the said Commission passed and adopted a resolution reducing the maximum load limit on the following highways:

ALSEA STATE HIGHWAY NO. 27 from M.P. 7.50 to M.P. 28.08; ALSEA-DEADWOOD SECONDARY STATE HIGHWAY NO. 201 from M.P. 0.00 to M.P. 19.45; RICHARDSON-EUGENE SECONDARY STATE HIGHWAY NO. 220 from M.P. 11.94 to M.P. 36.57; McKENZIE STATE HIGHWAY NO. 15 from M.P. 12.00 to M.P. 55.00; HOOD RIVER SECONDARY STATE HIGHWAY NO. 281 from M.P. 11.72 to M.P. 17.80.

and

WHEREAS, on March 25, the said Commission rescinded and cancelled its action reducing the permissible load limit on the said highways except on

"that portion of the ALSEA-DEADWOOD SECONDARY HIGHWAY NO. 201 lying between M.P. 10.00 and M.P. 19.45, where the six (6) ton load limit ordered on February 4, 1947, shall be continued in effect,"

and

WHEREAS, subsequent to the passage of the said resolutions conditions have changed and the Commission now finds it no longer necessary or desirable to maintain the reduced load limit set out in the said resolutions for the section of the ALSEA-DEADWOOD SECONDARY HIGHWAY NO. 201 between M.P. 10.00 and M.P. 19.45.

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the permissible load limit on this section of highway be and hereby is rescinded and cancelled and the maximum load limit permissible on the said section of highway hereafter shall be the maximum limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished to the county clerk of Lane County in which the said section of highway is located and to the Superintendent of the Department of State Police for his information.

Dated this 23rd day of April, 1947.

The Engineer reported that the plans for the proposed bridge across the Skipanon River on the Warrenton Secondary Highway, in Warrenton, are completed. He requested authority to present the plans to the U.S. War

Department for approval, such approval being required before the contract for construction of a new bridge can be awarded. The Commission approved the request by unanimous vote.

The Commission discussed the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Wednesday and Thursday, May 14 and 15, 1947. The Commission also tentatively set Monday and Tuesday, June 16 and 17, for its regular meeting in June. The Secretary was instructed to make the usual arrangements for a place to hold these meetings.

The Commission had under discussion the re-appointment of Mr. M. R. Chessman, Astoria, former State Highway Commissioner, as a member of the Travel and Information Advisory Committee, of which Committee he formerly was a member. The Secretary was instructed to ascertain whether or not Mr. Chessman would accept such appointment.

The Commission had under discussion the written report of the Engineer dated February 27, 1947, on the Cottonwood Grade Sections of the Wasco-Heppner Secondary Highway, particularly the cost to improve the West Cottonwood Grade to provide reasonable safety for a number of years. The Engineer estimated that such a project, consisting of the improvement of a 16-foot roadbed on the present highway alignment with some wider sections at sharp turns and with passing zones every 400 or 500 feet, would cost about $50,000. The Commission unanimously approved the expenditure of such sum for this purpose with the understanding that the work will be done as a minor betterment project. (See Engineer's report, in general files, for details.)

The Commission also discussed the Engineer's written report dated March 10, 1947, on the request of Douglas County for state aid in the construction of a new bridge over Little River on the North Umpqua County Road, Douglas County. The Engineer estimated that the new structure would cost about $75,000, including the widening of the approach embankments, and advised that Douglas County has agreed to pay half of this expense, which would leave a balance of $37,500 to be paid by the state. He recommended approval of the County's request provided the County will agree in writing to pay half of the cost involved. The Commission approved the recommendation unanimously.

There was presented to the Commission an "Option for Cooperative Construction Project" in the City of Lebanon, being a proposal of the city for the improvement of Main Street (Santiam Highway) between Elmor Street and the crossing of the Lebanon-Santiam Canal about 140 feet south of the south city limits of Lebanon, also for the improvement of Park Street with connections to Main Street. The Engineer advised that the arrangement provides for the designation of Park Street as a one-way street for northbound traffic and for the designation of Main Street as a one-way street for southbound traffic. He submitted for the Commission's consideration a copy of the proposed arrangement bearing the signatures of the Mayor and the City Recorder of the City of Lebanon and advised that the estimated cost of the project is $125,000, of which amount the City will contribute $13,000, leaving a balance of $112,000 to be paid with state funds. He recommended approval of the arrangement and that he

be authorized to advertise the project for bids at the earliest opportunity in order to insure that the work will be completed this year. As a result of discussion, the Commission approved the arrangement and authorized the Engineer to proceed with the construction of the project in conformity therewith. The Secretary was authorized to accept the City's offer on behalf of the Commission.

The Commission considered as an item of unfinished business the adoption of a permanent location for the Columbia River Highway through the City of Hood River. The Chief Counsel advised that the County Court of Hood River County and the City Council of Hood River have satisfied the Commission's requirements with respect to such location. The Engineer advised that it is his intention to consult with the county and city officials in the near future with respect to the location. In view thereof, the Commission deferred action pending the Engineer's report on the subject.

The Engineer reported the results of further investigation and studies of the Bellevue-Hopewell Secondary Highway between Amity and Hopewell, the improvement of which was requested by a delegation from Amity on February 4, 1947. He recommended the improvement, which is estimated to cost about $25,000. The Commission approved the expenditure by unanimous vote and ordered the work performed as a minor betterment project.

The Commission had under consideration a request from the Pacific Telephone and Telegraph Company to purchase two tracts of state-owned land situate adjacent to the Pacific Highway, one being located near Wolf Creek, in Josephine County, and the other near the town of Talent, Jackson County, which properties the Company needs in connection with construction of a coaxial cable which it is installing between Portland and San Francisco. The Engineer recommended the sale of the entire tract at the Wolf Creek site for the sum of $25 but only the back part of the tract at the site near Talent for the sum of $150 without access to the highway. He explained that the latter tract is situate in the wye connection between the Pacific Highway and a county road and that the area at the apex will be needed at some future time in order to provide a proper highway connection. The Chief Counsel concurred in the recommendation and explained that the Company will spend about $50,000 at each site for building construction and its equipment installation. The Commission authorized the sale of the property as recommended.

The Commission had under discussion a written report from the Engineer dated March 20, 1947, regarding a proposed revision of the Wasco-Heppner Secondary State Highway west from the town of Condon, Gilliam County, and a report from the Assistant Counsel as to the cost of the right of way on the proposed new alignment as compared with the cost of right of way along the route of the survey that was approved by the Commission on October 29, 1946. The Assistant Counsel advised that Senator E. R. Fatland and Mr. R. A. Meyers, who objected to the alignment of the location previously adopted, are satisfied with the new location; moreover, all the other property owners along the route are satisfied with the new line, which avoids one railroad grade crossing. The right of way on the route, he said, will cost less than

$12,000 and is practically the same on both lines. The Engineer advised that there is very little difference in the cost of construction. He recommended approval of the new location. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County, and in connection therewith to prepare a map showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, map and other engineering data, it is the judgment of the Commission that the same should be approved and filed; and

WHEREAS, after further consideration the Commission has determined that the route indicated on the field survey as Route "B" is a more feasible route and is so planned as to be more compatible with public good and does less private injury than the route designated thereon as Route "A";

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of members being present and affirmatively voting as follows:

1. That the survey of the Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County, together with the map, which for identification purposes bears the map file No. 6B-21-8, field notes and other engineering data submitted by the Engineer hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said "B" line survey and location unless otherwise directed or ordered by the Commission.

3. That the previous location adopted by the Commission on October 29, 1946, by resolution, and herein referred to as Route "A", be and the same hereby is abandoned and said resolution and action by the Commission be and the same hereby is rescinded.

4. That this resolution be entered in the minutes and records of the Commission as of the twenty-third day of April, 1947.

Commissioner Schaupp reported on the question of width of right of way to be acquired for the Klamath Falls-Merrill Section of the Klamath Falls-Malin Highway in the vicinity of the USRS Canal crossing, which was referred to him and the Engineer at the previous meeting for recommendation. He advised that nothing less than right of way 80 feet wide should be acquired for this section, and he so recommended. The Engineer concurred in the recommendation. The recommendation was approved by Chairman Banfield, and it was so ordered.

Commissioner Schaupp also recommended a 60-foot wide right of way for the Midland-Mac's Store Section of the Lower Klamath Lake Secondary Highway, which matter also was referred to him and the Engineer at the previous meeting for recommendation. The Engineer concurred in the recommendation. Chairman Banfield approved the recommendation and it was so ordered.

The question of installing continuous lines of sight posts with reflector buttons on mountain grades as a general proposition to aid in the prevention of accidents was discussed briefly by the Commission. The Engineer recalled that he was instructed at the previous meeting to ascertain how other states handle situations of this kind, but he is not ready to report on the matter.

In this connection the matter of installing additional facilities on the Minam Hill Grade Section of the Wallowa Lake Highway was mentioned. The Engineer was instructed to personally investigate this matter and to take action as he may consider necessary to make the grade reasonably safe for traffic.

The Commission discussed adoption of a minor betterment program for footpath and sidewalk construction. Action thereon was deferred until the next meeting of the Commission. The Engineer was instructed to present at that time a list of projects that have been requested, which projects are to be outside the limits of incorporated cities and towns.

The Chief Counsel reported a request from Mr. J. H. Massey, Waldport, for permission to remove sand from the ocean beach south of the town of Yachats. He advised that the 1947 Legislature enacted a law with respect to use of the ocean beach will not become effective until some time in July. It was the thought of the Commission that action on this matter should be deferred until that time, and it was so ordered.

The Engineer reported on the log-hauling violations of the Coos Bay Lumber Company which was referred to him at the previous meeting to ascertain the locality in which the overweight loads originated. He advised that the Company's two principal operations are on Bone Mountain, adjacent to the Coos Bay-Roseburg Highway, and a location adjacent to the Oregon Coast Highway about four miles south of Bandon. The logs from the first-mentioned operation, he said, enter the Coos Bay-Roseburg Highway at a point about four miles east of the town of Remote and are truck-hauled to Coquille and are weighed on the scales at Myrtle Point enroute. Logs from the other operation enter

the Oregon Coast Highway about four miles south of Bandon and are truck-hauled to Coquille, being weighed at the Bandon scales enroute. He further stated that a review of the operations of this Company reveals that its experience rating for 1945 and 1946 was slightly below the state average and is satisfactory, although during the months of January and February 1947 violations increased, particularly with regard to the loads coming from the Bone Mountain area. Since February, he said, the Company's operations have been normal, in view of which he recommended that no penalty be imposed on the Company for the violations during the first two months of this year. The Commission approved the recommendation and so ordered.

A letter from County Commissioner R. W. Arens, Hood River County, requesting information concerning the plans of the Highway Commission for further development of the Columbia River Highway east of Portland was brought up for discussion, but action thereon was deferred pending a report from the Engineer, who was instructed to discuss the matter personally with Mr. Arens when he makes his visit to Hood River in the near future.

The Chief Counsel presented an application from a Mr. Charles A. Peters to purchase certain state-owned property lying between the old and new rights of way of the Lower Columbia River Highway a short distance south of the town of Scappoose. The matter was referred by the Commission to the Engineer for investigation and report. The thought was expressed, however, that it would be satisfactory to sell this property to Mr. Peters if it is of no value for state highway purposes.

The Secretary presented a resolution from the Gold Beach City Council whereby the City Council approves the plans of the State Highway Commission for improvement of the Oregon Coast Highway through their city and assures the Commission and its engineers that the Council will help, aid, and assist in every way possible to realize this improvement. The Chief Counsel advised that the controversy which existed between the people of this town regarding right of way has been settled, so this project can go forward as soon as the plans are ready and right of way matters disposed of. The Commission expressed satisfaction with the resolution and ordered that this project be expedited as much as possible.

A letter was presented from Mr. Asa W. Battles, County Judge of Crook County, Prineville, urging that the construction of the Marks Creek Section of the Ochoco Highway be expedited. The Secretary was instructed to inform Judge Battles of the status of highway finances and to bring to his attention that this project is in the Forest Highway Postway Program which is being delayed because Congress has not authorized funds to finance it, but the Commission expects the work to proceed as soon as funds are made available. The Commission also ordered that a similar letter be sent to the county courts of all of the counties, giving them the same general information and further stating that the State Highway Commission is not in position to advance state funds, so projects involving Federal aid must be deferred until Federal funds are released.

The Chief Counsel requested authority to attend a meeting of the Right of Way Committee of the American Association of State Highway Officials which is to be held in Chicago during May 7, 8, and 9, 1947. He advised that this is an important meeting and the expenses incident to his attendance will be paid by the Association. The Commission approved the request unanimously.

In this connection the Engineer advised that a meeting of the Executive Committee of the American Association of State Highway Officials, of which he is a member, is scheduled to be held in Washington, D. C. on June 24 and 25, 1947. He requested authority to attend this meeting at state expense. The Commission approved the request subject to concurrence by Governor Snell.

The Commission had under discussion the adoption of a policy with respect to the issuance of permits for the trimming of trees and shrubbery along state highway rights of way as is required in connection with the maintenance of public utility pole lines. The Engineer explained a procedure recommended by the State Parks Superintendent and advised that it has been studied and approved by the Chief Counsel as to legality, by the Commission's Secretary who is in charge of the issuance of permits, by the Maintenance Engineer, and by two Division Engineers. The Chief Counsel advised that Mr. Allan A. Smith, attorney for the Mountain States Power Company, Albany, has studied the procedure and has expressed himself as being perfectly satisfied with it. The Engineer exhibited specimen forms, as follows: (1) Application for Permit for Trimming of Trees for Utility Line Maintenance, (2) Permit for Trimming of Trees for Utility Line Maintenance, containing conditions and regulations, and (3) draft of a letter directed to all public utility companies requesting cooperation in carrying out the procedure. Following discussion the Commission voted unanimously approving the procedure as outlined on the condition that it meets with the approval of the utility companies. The District Maintenance Superintendents throughout the state were authorized to sign the permits on behalf of the Commission.

The Assistant Counsel, Mr. Neuner, brought up for discussion a right of way matter along the Oregon Coast Highway at Depoe Bay. It appears that the Sunset Investment Company, which owns property on the east side of the highway opposite Block 4 of Breakers Addition, has deeded to private parties portions of its holdings fronting on the highway, including a strip of highway right of way ten feet wide along this frontage, and in order to clarify the situation the Company has stated its willingness to quitclaim its title to this ten-foot strip if the Highway Commission will deed to the Company the area within the segment of the curve opposite Blocks 6 and 8 of Breakers Addition, which is located a short distance south of the other location, such segment to be outside the area included in a right of way 70 feet wide. He recommended approval of the transaction in order to clear up the difficulty and to provide a uniform-width right of way around the aforementioned curve. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the bids received by the Public Roads Administration for the construction of the Niagara-Detroit

Section of the North Santiam Highway. He advised that this project is divided in four units and that it has been advertised for bids on two different occasions, five bids being received the second time. The low bid, he said, is satisfactory, although for an amount considerably in excess of the original estimate and will require a contribution by the state of about $150,000 more than was originally anticipated, or a total of $450,000. He inquired as to the wishes of the Commission with respect thereto. Mr. W. H. Lynch, Division Engineer, Public Roads Administration, was present and advised that the Public Roads Administration is ready to award the contract for the three units as soon as approval of the award has been given by his superiors in Washington, D. C., but the fourth unit will have to wait until Congress provides additional funds; further, that they will then need the $300,000 that the state agreed to contribute under the original arrangement. He pointed out that if the Commission approves the additional contribution of $150,000, it would require a modification of the original agreement. Chairman Banfield stated that he is agreeable to the state contributing the additional $150,000; further, that he has discussed the matter with Commissioner Chandler, who also approved payment of the extra amount. Commissioner Schaupp concurred, making the decision unanimous. The Engineer was thereupon instructed to convey such information to Mr. Lynch by letter.

The Commission also discussed with Mr. Lynch, matters pertaining to the completion of the Forest Highway project on the Enterprise-Lewiston Highway, in Wallowa County. Chairman Banfield briefly outlined the action taken by the Commission previously at this meeting whereby the Commission agreed to perform the grading work as a state-financed project if the Federal Government would contribute Forest Highway funds in an equal amount for other work. Mr. Lynch explained that the Forest Highway Program contains an item of $150,000 for grading this section, but work cannot proceed until Federal funds are released. He gave as his thought that the original program could be modified to provide that the state would do the grading work and the Public Roads Administration the surfacing because the probabilities are that additional Forest Highway funds will be available when needed for the surfacing work. In the further discussion of the matter Chairman Banfield stated that all the Commission is asking is that the Federal Government authorize an expenditure for surfacing equal to that which the Commission will spend for the grading work on this section. Mr. Lynch agreed to send the Commission a letter stating that if the state will do the grading work he will recommend to his superiors that the 1947 Forest Highway Program be revised to provide a like sum for surfacing this unit. (Such letter was filed with the Commission on the following day and was accepted by the Commission. The Engineer was authorized to advertise the grading job at once.)

The Engineer reported an inquiry from a Mr. A. C. Key, of A. C. Key and Co., real estate firm, Coos Bay, concerning three parcels of state-owned property in the Bunker Hill District of Coos Bay. One of these tracts consists of right of way of the Oregon Coast Highway at the east end of the Coalbank Slough Bridge. It appears that Mr. Key's Company, which is operating a sawmill, wants to pile lumber on that portion of the right of way which is outside the normal right of way width. The second property is situate on the south side of

the highway a short distance east of the first-mentioned tract and consists of a number of lots at the north end of Block 12, West Bunker Hill Addition. The third tract consists of that portion of state-owned property in Block 6 of Bunker Hill Addition outside the limits of the standard-width right of way. The Engineer recommended denial of Mr. Key's request for the stockpiling of lumber on the first-mentioned tract and also that the Commission do not sell to Mr. Key the second-mentioned tract because it is needed for state highway purposes. As to the tract located in Block 6, Bunker Hill Addition, he advised that an offer previously has been received from two young servicemen to pay $2,000 for the same. The tract, he said, is of no particular value for state highway purposes and he recommended acceptance of this offer with restricted access to the highway. He advised that he has discussed this matter with Commissioner Chandler, who expressed himself in concurrence with these recommendations. The Assistant Counsel, Mr. DeSousa, advised that the Highway Commission paid only $312 for the property located in Block 6, Bunker Hill Addition, and gave as his thought that the offer of $2,000 is a very good one, and the Commission should accept it if it is willing to dispose of the property. Following discussion the Commission approved the Engineer's recommendation by unanimous vote.

The Engineer reported that the Public Roads Administration has approved the award of the contracts for the following projects in Multnomah County: Hydraulic-dredged embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway; rock toe, rock slope protection, roadbed topping and topsoiling and seeding on this section of the Columbia River Highway; and construction of a concrete bridge over the O.W. R.R. & N. Co. tracks at Bridal Veil on the Columbia River Highway. Lack of approval by the Public Roads Administration, he said, was the only reason the awards were not made earlier. He advised that, in conformity with authority previously granted him by the Commission, he has awarded these contracts to the low bidder in each instance. The Commission confirmed the awards by unanimous vote.

The Commission discussed matters pertaining to the proposed Mill Creek project in Eugene which is proposed for construction as a cooperative project between the city, Lane County, and the state. Chairman Banfield inquired as to what is being done about acquiring right of way. He raised the question as to the advisability of purchasing right of way in the face of increasing costs which will obligate the Commission to construct the project. He was informed by the Chief Counsel that options only are being taken at this time and that negotiations for the options should be completed before the Commission is ready to contract the work. He further stated that, according to the present arrangement, the city and the county have definite amounts to contribute toward the entire cost so if the right of way costs exceed the amounts available from the city and the county, then it would be up to the state to pay the difference. Chairman Banfield stated that he did not believe the Highway Commission should authorize the taking of bids for future construction work unless all matters pertaining thereto, including right of way, are clear. He asked the Chief Counsel to render a report on the status of right of way acquisitions pertaining to the current construction program so the Commission can authorize condemnation if necessary.

In this connection the Engineer exhibited a model of the proposed improvement in Eugene, which was discussed at considerable length. The question arose whether or not truck traffic will follow the new route if and when it is constructed. It was the thought of the Commission that a letter should be obtained from the City Council stating that it will adopt an order routing truck traffic over the new route if it is built, and that the city should also adopt an appropriate ordinance approving grade changes and establishment of new grade lines where necessary as a precedent to the award of the contract. This was tentatively approved by the Commission, but definite action thereon was deferred until the next meeting. The Engineer was instructed to submit a detailed written report on the subject project in the meantime.

The Assistant Counsel, Mr. J. W. DeSouza, brought up for discussion the matter of the sale of timber on a tract of Indian Tribal land in Klamath County that is being acquired as a source of gravel for use in connection with the state highway project at Chiloquin. He advised that the land and the timber is costing the state about $6,000, but he believed there is a market for the timber at the rate of $10 per M-FBM and suggested that he be authorized to negotiate with some of the loggers in the vicinity for the sale of the same. The Commission authorized the negotiations by unanimous vote.

The Assistant Counsel, Mr. DeSouza, requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with the offer that he recommended for each parcel. After careful consideration of the individual items the Commission approved the offers and the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed,

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

VALLEY JUNCTION-FORT HILL SECTION, SALMON RIVER HIGHWAY

12668-	Turnidge, Earl A. Material Borrow Option expires July 28, 1947				
	0.286 acre	LUMP SUM	$ 300.00	$ 300.00	Benson
12667-	Harris, W. W. Borrow Pit				
	0.81 acre at $600.00		486.00		
	4-room old house		214.00		
	160 foot drilled well at $5.00		800.00	1,500.00	"
12669-	Ray, Eben and Alice Ray Right of Way Option expires September 18, 1947				
	0.29 acre at $200.00		58.00		
	29 rods fence at $2.00		58.00		
	Crop loss allowance		10.00	126.00	"
	Private access - Sta. 32+00 North side				
13560-	Ray, Eben Gravel Borrow Lease				
	2 year lease - gravel - 5¢ cu. yd. taking approximately 5,000 cu. yds.				"
12672-	Ray, Freda Right of Way Option expires September 20, 1947				
	2.58 acres at $200.00		516.00		
	Fencing, 110 rods at $2 rod		220.00

DRY CREEK-DETROIT SECTION OF THE NORTH SANTIAM HIGHWAY		
12548	Theron C. Hoover, et ux Amend resolution of August 6, 1946, to include restriction of access.	

Following careful consideration of the individual items the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts,

forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Floyd Gregory, et al., which property is located in Lot 8, Section 7, Township 11 South, Range 10 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 13612, which property is being acquired for right of way purposes in connection with the Corvallis-Newport Highway; *

Real property owned by the Samuel Hizen estate, which property is located in the Lancaster Subdivision in the southwest quarter (SW¼) of the northwest quarter (NW¼) of Section 10, Township 4 South, Range 21 East, W.M., Gilliam County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13617, which property is being acquired for right of way purposes in connection with the Wasco-Heppner Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

APR 23 1947

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-third day of April, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 74, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto,

and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by J. F. Oldham, et ux., which property is located in the southeast quarter (SE¼) of Section 34 and the Daniel McVey D.L.C. No. 82, Township 17 South, Range 3 West, W.M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 13065, which property is being acquired for right of way purposes in connection with the Pacific Highway; *

Real property owned by Earl Gillanders, which property is located in the southeast quarter (SE¼) of the northwest quarter (NW¼) of Section 10, Township 2 North, Range 32 East, W.M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 12678, which property is being acquired for right of way purposes in connection with the Old Oregon Trail; *

Real property owned by Union Oil Company of California, which property is located in Lots 1, 2, and 18, Block 46, Reservation Addition to Pendleton, in Section 10, Township 2 North, Range 32 East, W.M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 12682, which property is being acquired for right of way purposes in connection with the Old Oregon Trail. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-third day of April, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 74, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the highway designated and identified in the records of the Highway Commission as the Albany-Lyons Secondary State Highway No. 211 is a part of the state highway system and as such is under the control and jurisdiction of the Highway Commission and the Commission is responsible for the location, construction, reconstruction, and maintenance of said highway; and

WHEREAS, the State has acquired for the purpose of procuring therefrom rock, sand, gravel, and other mineral aggregate, which materials are to be used in connection with the construction, repair, and improvement of said highway, a tract of land generally described as being located in the southwest quarter (SW¼) of Section 35, Township 10 South, Range 2 West, W.M., Linn County, Oregon; and

WHEREAS, it is necessary to acquire an easement for a hauling road over and across the property of Arthur Hoffman, which hauling road when acquired and constructed will connect the said quarry with the said highway; and

WHEREAS, the real property sought to be acquired for the purpose of constructing and maintaining thereon a hauling road is described as follows:

A parcel of land lying in the southeast quarter (SE¼) of Section 35, Township 10 South, Range 2 West, W.M., Linn County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by those certain deeds to Arthur Hoffman recorded in Book 101, Page 243, and Book 133, Page 529, of Linn County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable feet in width on each side of the center line of the quarry access road as said road has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 6+37.25 to Station 30+28.0, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 6+37.25, opposite and 20 feet distant from which point the northerly line of the said strip of land intersects the west line of said property; said point also being 2395.3 feet north and 23.4 feet east of the south quarter corner of Section 35, Township 10 South, Range 2 West, W.M.; thence South 87° 41' East a distance of 324.67 feet; thence on a 716.19 foot radius curve right (the long chord of which bears South 78° 21' 30" East 231.79 feet) a distance of 232.81 feet; thence South 69° 03' 30" East a distance of 951.34 feet; thence on a 572.96 foot radius curve left (the long chord of which bears South 79° 31' 30" East 208.38 feet) a distance of 209.55 feet; thence East 82.22 feet; thence on a 100 foot radius curve right (the long chord of which bears South 45° 00' East 141.42 feet) a distance of 157.08 feet; thence South 433.08 feet to Engineer's center line Station 30+28.0, opposite and 80 feet distant from which station the westerly line of said strip of land coincides with the northerly line of the county road to Scio.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on Northerly and Easterly Side of Center Line	Width on Southerly and Westerly Side of Center Line
6+37.25	to 11+94.73	60 feet	30 feet	30 feet
11+94.73	to 27+63.0	40 feet	20 feet	20 feet
27+63	to 29+03.0	Taper 40 to 100 feet	20 feet	Taper 20 to 80 feet
29+03	to 30+28.0	100 feet	20 feet	80 feet

The parcel of land to which this description applies contains 2.63 acres.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the real property above described is necessary for the purpose of constructing thereover a hauling road over which to transport materials from the quarry site owned by the State to the Albany-Lyons Secondary State Highway;

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made the necessary survey and prepare the necessary description for the purpose of locating on the ground and defining the area to be acquired and furnish the Commission's Chief Counsel with a copy of said description, which said description shall be used in the preparation of any deed or other instrument in connection with the acquisition of said property, whether said property be acquired by purchase, agreement, or by the exercise of the power of eminent domain;

3. That in the acquisition of said property a permanent easement rather than fee title shall be taken;

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire a permanent easement over and across said parcel of real property;

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner;

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-third day of April, 1947.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1, U.S. Route No. 99) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Johns-Wolf Creek Section, and for the purpose

of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the property hereinafter described is needed and required for right of way purposes in connection with the construction and maintenance of the section of the Pacific Highway known and designated as the Johns-Wolf Creek Section, which said property is owned by William J. Easton and Jean Easton, husband and wife, and is particularly described as follows:

A parcel of land lying in Tract 23 of Wolf Creek Orchard Tracts in the southwest quarter (SW¼) of the southwest quarter (SW¼) of Section 14, Township 33 South, Range 6 West, W.M., Josephine County, Oregon; the said parcel being all that portion of the owner's property included in a strip of land of variable width and being all of said tract lying between the southerly right of way line of the Southern Pacific Company and a line 100 feet distant southerly of and parallel to the relocated center line of the Pacific Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 666+75.3 to Station 670+13.8, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 666+75.3, opposite and 57 feet distant northerly from which point is the northeast corner of said Tract 23; said point being 1888 feet

south and 370 feet east of the west quarter corner of Section 14, Township 33 South, Range 6 West, W.M.; thence on the arc of a 2291.8 foot radius curve right (the long chord of which bears South 69° 24' 00" West 338.14 feet) a distance of 338.5 feet to Engineer's center line Station 670+13.8, opposite and 53 feet distant northerly from which station is the northwest corner of said Tract 23.

The parcel of land to which this description applies contains 1.18 acres, of which 0.30 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.88 acre lies outside of the existing right of way.

2. That the section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury.

3. The Commission does hereby further find and declare that, in addition to the acquisition of the real property above described, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property herein described and the highway which is to be constructed thereover, except an access for non-commercial purposes of a width not to exceed twenty-five feet on the south side of the highway at Engineer's Station 670+00.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department the necessary and an adequate description of said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto except an access for non-commercial purposes, of a width not to exceed twenty-five feet, on the south side of the highway at Engineer's Station 670+00, and in the event that no satisfactory agreement can be reached then it is hereby further ordered that the

said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto except the above mentioned non-commercial access at Engineer's Station 670+00.

6. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-third day of April, 1947.

WHEREAS, heretofore, to wit: on the sixth day of August, 1946, the Commission adopted a resolution finding and declaring the acquisition of certain real property owned by Theron C. Hoover, et al., necessary in connection with highway construction, and in and by said resolution authorized and directed the Commission's Chief Counsel to institute and prosecute condemnation proceedings for the acquisition of said property in the event the property could not be acquired by agreement; and

WHEREAS, since the adoption of said resolution it has been determined that it is advisable and in the interests of the traveling public that, in addition to acquiring fee title to the real property described in said resolution, there be acquired the defendants' right of access from their abutting property to the North Santiam Highway and all right of access from said highway to said abutting property, except a private access (hereby defined as the right to enter and leave the highway by the grantors, their heirs and assigns, for any purpose other than a commercial use of the adjoining property which caters to, invites, solicits from, or is dependent upon the users of the highway) on the northerly side of the highway at Highway Engineer's Station 14+00; and

WHEREAS, it is the judgment and opinion of the Commission that said resolution should be amended so as to provide for and authorize the acquisition of all rights of access from the owners' abutting property to the real property described in said resolution of August 6, 1946, and all rights of access from said property described in said resolution to said abutting property, except said private access at Station 14+00;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That said original resolution be amended and that by said amendment the Commission's Counsel be and he hereby is authorized and directed to acquire all right of access to and from the real property described in said resolution of August 6, 1946, under file No. 12548, belonging to Theron C. Hoover, et al., in addition to the acquisition of the real property described in said resolution, except there shall be provided a private access, as above defined, on the northerly side of the North Santiam Highway at Highway Engineer's Station 1400.

2. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-third day of April, 1947.

The Engineer brought up for discussion the proposal of the Weyerhaeuser Timber Company to provide off-street parking accomodations for the cars of its employees at North Bend. He exhibited a map showing the plan, which, he said, was prepared as the result of a number of conferences between Company officials and himself, and read aloud a letter dated April 21, 1947, from Mr. Robert P. Conklin, Company representative, North Bend, with regard thereto. He recommended approval of the plan, which, he said, also meets with the approval of Commissioner Ben R. Chandler. He pointed out that the plan provides for purchase by the state from the Company of a small tract of land, containing approximately one-half acre, for the sum of $2,300 and the sale of a small tract of state-owned land to the Company for the sum of $3,500. It also provides that the state shall assume the expense of moving a short section of the Southern Pacific Company tracks and that the Company shall pay the cost of additional railroad track shifting as may be required. The entire cost to the state, he said, would be about $10,000. He declared that the improvement will not be for the benefit of the Weyerhaeuser Timber Company alone but will also serve other industries in that vicinity. Following discussion of details, Chairman Banfield expressed his approval of the project if approved by the Commission's Chief Counsel. Commissioner Schaupp also stated his approval if legal matters pertaining thereto are clear.

The Engineer reported on the request of the County Court of Benton County for an extension of the Alsea-Deadwood Secondary Highway into the Lobster Valley district of Benton County which involves taking over as a state secondary highway the private timber road of the Acme Timber Company. He read aloud a letter by Mr. Oscar Cutler, Engineer, County and City Relations, dated April 19, 1947, on the subject, in which it was pointed out that the Acme Timber Company has expended on its road the sum of approximately $10,000 and has already collected in tolls for the use of its road approximately $16,000; further, that the existing county road into Lobster Valley from the end of the state secondary highway is very narrow and crooked and that to improve it in a manner satisfactory for log-hauling traffic would cost about $30,000. He recommended that the county court's request be denied. Chairman

Banfield gave as his thought that the Commission should not place any more roads, either county or private, on the State Secondary Highway System at this time. Commissioner Schaupp expressed himself similarly, whereupon it was so ordered.

The Commission had under discussion matters pertaining to the construction of bridges involving the use of structural steel. It was brought out that steel for certain types of construction is readily available, especially plate steel for girders, but not for other types. The Commission also was informed that the Public Roads Administration will authorize the contracting of steel bridge construction if assured that steel is obtainable. The Mill Creek Bridge on the Warm Springs Highway, in Wasco County, was mentioned in the discussion. It was recalled that bids for the building of this structure were received at one time and were rejected because of unavailability of materials. The Commission authorized the Engineer to re-advertise this project for bids to be received at the June meeting.

Commissioner Schaupp brought up for discussion a proposal by certain citizens of Klamath Falls for the establishment of a state park between Bonanza and Malin, Klamath County. He advised that a park now exists at this location, and Hon. Henry Semon, State Representative, Klamath Falls, has expressed a willingness to purchase this tract and present it to the state as a gift for park purposes in honor of his son who was killed in World War II, if the Commission will accept it. He spoke in favor of accepting Mr. Semon's offer. Chairman Banfield expressed himself similarly subject to a favorable recommendation from the State Parks Superintendent, who was instructed to inspect the property and to report his findings at the next meeting.

The Commission recessed at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

Messrs. M. L. Rutherford and C. A. Bennett, Enterprise, and George Dawson, Joseph, Oregon, appeared before the Commission in the interests of the Enterprise-Lewiston Highway. Mr. Rutherford was the principal spokesman. They inquired as to the plans of the Commission for completion of the remaining link, 0.88 mile in length, at the Oregon-Washington State line. Chairman Banfield explained that grading work on this project is programmed for performance as a Forest Highway project under the supervision of the Public Roads Administration; however, Forest Highway funds with which the work was to be financed are not available at the present time, so the work has been delayed. The Commission, he said, is obligated to complete the project, and in order to expedite it has tendered a proposition to the Government authorities whereby the state will perform the grading work and the Government will spend an equal amount of Forest Highway money for surfacing, and if this arrangement materializes, the project will be advertised immediately for bids. The Engineer advised that, if necessary right of way has been obtained, it might be possible to receive bids for the work at the June meeting of the Commission.

Mr. Dawson brought up for discussion the improvement of the Little Sheep Creek Secondary Highway east of Joseph. He advised that a super highway is not particularly needed, but the improvement of the present road will satisfy

the local people, who are not adverse to the easing off of some of the sharp turns through the valley section but do object to revisions along straight lines because that would interfere with their irrigation systems. There are no objections at all, he said, to the improvement planned for the section east of the valley. Chairman Banfield explained that while this highway may not be of much importance today it may become important in the future, and the Commission must of necessity bear that in mind in the study of the project and in acquiring right of way. Responding thereto Mr. Dawson advised that he personally is very much satisfied with the plan of the Commission for this project as presently prepared.

Mr. Dawson also brought up for discussion the matter of installing additional sight posts along the Minam Hill Grade Section of the Wallowa Lake Highway. He expressed satisfaction with the improvement already made but gave as his thought that the installation of a few more posts would be very beneficial. He was informed by Chairman Banfield that it would cost about $30,000,000 to install guard fence at all dangerous points throughout the state; further, that the Commission cannot finance such a program and believes that it is fulfilling its duty when it provides reasonable safety measures for the traveling public. He added that the Commission is not unmindful of the need for additional guard fence and sight post installations, but it simply does not have the funds with which to finance them.

The Engineer reported on the request of the City of Willamina for widening and improving the drainage along the Salmon River Highway through this town, also requesting improvement of a bridge over Willamina Creek at the West city limits. He advised that this matter has been investigated by Division Engineer F. D. Eason who estimates the cost of the improvement, exclusive of the bridge work, at approximately $40,000. He recommended that action on this matter be deferred because there are no funds immediately available to finance the work and because there are other projects of a similar nature that have priority; moreover, ultimately the Salmon River Highway will be rerouted so that this particular section no longer will be a part thereof. The Commission voted unanimously to hold this project in abeyance until it is known definitely how much money will be available to finance projects of this kind.

The Engineer brought up for discussion Section 11 of the Federal Highway Act pertaining to the construction of aircraft landing fields, runways, etc., which requires approval by the State Highway Commission before they are constructed. He particularly pointed out that the Civil Aeronautics Administration has requested a 15-foot clearance over highways for airplanes. He gave as his considered opinion that such clearance is entirely too low and that everything possible should be done to secure a much greater clearance in order to protect highway traffic. The Commission concurred in the viewpoint of the Engineer and instructed him and the Chief Counsel to render a protest against such a low clearance and to extend their best efforts to provide as high a clearance as it is possible to obtain in order to secure the highest degree of safety to highway traffic.

The Engineer also brought up for discussion the proposed improvement of the Oregon Coast Highway at Otter Crest, Lincoln County. He advised that the original relocation at this point passes through property owned by Mr. W. F. Badley, who does not wish to sell the area between the new location and the present highway, and in view thereof, the Engineer suggested another location nearer the present road where the grade line would be approximately 58 feet lower than the other. He exhibited a map showing the proposed line and advised that if the Commission approves it it will be necessary to make another relocation survey between Otter Crest Summit and Otter Rock so an estimate of cost of right of way can be made. The Commission ordered a detailed report on the situation at the next meeting of the Commission. Such report is to include an estimate of cost of constructing the highway on such alignment, as compared with the cost to construct it on the previously-proposed alignment, including the daylighting of the curve at the summit so as to provide an unobstructed view at such point.

The meeting adjourned at 3:00 p.m. to reconvene on the following morning in the auditorium of the Public Service Building, following which the Commission personally inspected North Vancouver Avenue and N. E. Union Avenue between the north city limits of Portland and the Interstate Bridge with respect to the following:

(1) Request of Anderson Bros. for additional access to North Vancouver Avenue from their place of business on the west side of this street;

(2) Widening of North Vancouver Avenue as requested by Mr. Tom H. West, member of the Board of County Commissioners, Multnomah County;

(3) Question of allowing access to N. E. Union Avenue from property owned by Mr. Tony Fazzio on the east side of this highway.

As the result of this inspection the Commission decided unanimously not to allow Anderson Bros. the additional access desired unless they secure a court order permitting such access, it appearing that they now have satisfactory access for their purposes. The Commission reached no decision with respect to the widening of North Vancouver Avenue as requested by the Board of County Commissioners.

With regard to allowing access to N. E. Union from the Fazzio property, the Engineer submitted a plan for service road construction along both sides of this thoroughfare with right of access to the highway at Gertz Road on the south and Bridgeton Road on the north. This plan, he said, involves the widening of N. E. Union Avenue and the construction of traffic interchanges at both highway entrances, which will take about five years to complete. He estimated the cost to construct the service roads at $100,000 and the cost of right of way at $25,000. The Commission deferred action on the matter until later and instructed the Engineer to submit a written report on the subject

covering legal as well as engineering features. (The Engineer and the Chief Counsel submitted a joint recommendation regarding the Fazzio matter on the following day. See ahead for details.)

Portland, Oregon
April 24, 1947

The State Highway Commission reconvened in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben R. Chandler was excused.

Bids as follows for highway construction and for the building of a new ferry for operation across the Columbia River at Astoria were opened and read in conformity with previously-published notices, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

ALSEA AND ALSEA-DEADWOOD HIGHWAYS IN BENTON COUNTY
ALSEA ROCK PRODUCTION PROJECT

The Commission, by unanimous vote, approved the minutes of the meeting held on March 24 and 25, 1947.

The following letter was presented from W. H. Lynch, Division Engineer, Public Roads Administration, with regard to modifying the 1947 Forest Highway Program so as to provide that grading of the remaining section of the Enterprise-Lewiston Highway, 0.88 mile in length, which is a Federal obligation as the program is presently prepared, shall be performed by the state as a state project in order to expedite the work:

"April 23, 1947

Mr. R. H. Baldock
State Highway Engineer
Salem, Oregon

Dear Mr. Baldock:

The Oregon State forest highway program for the fiscal year 1947 included $150,000.00 for grading 0.88 miles of the Flora Enterprise Highway, Project 38-E. Since forest highway appropriations have not been made so as to permit the early contracting of this Unit by Public Roads and since it is desirable that the work be undertaken as soon as possible we will agree to the State assuming this grading obligation with the understanding that we will agree to recommending revision of the 1947 program to provide a like sum ($150,000) for surfacing of, or otherwise improving other sections of the same highway within the limits of the forest highway system. This program will be initiated if and when funds are in prospect and it can be determined and agreed where such funds can best be expended.

The above agreement has been discussed with the National Forest Service and that service has authorized us to advise you that it will concur in such a recommendation.

Very truly yours,
/s/ W. H. Lynch
W. H. LYNCH
Division Engineer"

E4 1947

The Commission considered that this letter satisfied the requirements for this project as expressed previously at this meeting and thereupon unanimously approved the arrangement outlined therein. The Engineer was authorized and instructed to inform Mr. Lynch by letter of the action taken. He was also authorized and instructed to advertise the grading work for bids to be received at the earliest possible time.

The Commission discussed matters pertaining to State Highway Department finances, particularly a statement prepared by the Engineer and the Chief Counsel with regard thereto wherein it was disclosed how adversly Highway Department revenues are affected by laws enacted by the 1947 Legislature increasing the amount of payments to the counties, the cities, and the State Police Department; also, in which it was disclosed how the Forest Highway Program is affected by reason of failure of the Congress to appropriate funds to finance Forest Highway projects. The statement follows:

"STATEMENT OF THE OREGON STATE HIGHWAY
COMMISSION TO BE SENT TO THE COUNTIES
OF OREGON

Approximately two years ago the State Highway Commission selected the highway construction program for the first three years of the postwar period, based upon the 1944 Federal Road Act and regulations pertaining thereto. This act made available to the State of Oregon approximately $21,000,000 of federal funds to be matched by approximately $15,000,000 state funds, making a total of $36,000,000 for the three years, or $12,000,000 per year for the building of primary federal aid highways, secondary federal aid highways and urban projects on the primary highway system. At the same time the Highway Commission, acting jointly with the Forest Service and the Public Roads Administration, tentatively selected forest highway projects for the same period. The Commission endeavored to give each section of the State a fair and equitable share of the total of the road funds available so as to promote the economy of the entire state.

In consequence some of the counties received more of the primary federal aid funds, others more of the secondary or urban funds, while still others received more of the forest highway funds. The forest highway funds, were, of course, limited to those counties having highways traversing the national forests. It now develops that the economy axe of the present Congress has fallen on the forest highway funds and there is grave danger of there being such small appropriations made that the construction of the postwar forest highway program will be materially delayed. This gravely concerns the Commission because it will throw out of balance the postwar road program, a circumstance which is beyond the reach of the Highway Commission to remedy.

The amount of forest highway funds authorized for the entire nation by the 1944 Road Act was $25,000,000 per year, for each of the postwar years. Congress has thus far appropriated but $4,500,000 of the first

year's money. The present reduced budget calls for $11,300,000 more, or a total of only $15,800,000 of the first year's money. There is thus appropriated only $15,000,000 of a total $75,000,000 authorized for the three-year period. Unless the Congress materially increases these appropriations for the forest highway program, the forest highway program in Oregon will be delayed far beyond the three-year postwar period. As far as Oregon is concerned, Oregon's share of each year's appropriation of forest highway funds will be $3,300,000. In addition, Oregon received $2,250,000 of forest highway funds which had been previously appropriated but frozen during the war years.

The United States Government owns the forest lands, on which no taxes are paid, and from which material revenues from the sale of timber are received. It would appear that in equity and justice Congress should appropriate sufficient funds to carry on this needed program. The forest highway projects are a portion of the state highway program in Oregon. The work is intimately connected with the road projects the State Highway Commission is contracting. If these projects are materially delayed, it will be impossible to open up some of the roads on which the Highway Commission is expending large sums of money."

Following discussion the Commission approved the statement as prepared and ordered that it be given to the press to dispense to the general public. The following resolution pertaining to this subject was unanimously adopted by the Commission, and a copy of the same was ordered sent to the county court of each of the several counties for its information:

WHEREAS, with full confidence that highway revenues, which by law accrue from motor vehicle and transport fees, gas tax charges and other highway excise taxes, penalties and fines, would throughout the biennium of 1947-1949 be available to the Commission and be subject to commitments made in the performance of its official duties, the Commission, after a state-wide inspection of highway needs and after extended conferences with major cities and all counties of the State, prepared and adopted, in cooperation with the Public Roads Administration, a postwar program which consists of highway, road and street projects representing all sections and all counties of the State; and

WHEREAS, said post war program was composed and adopted in conformance to and in compliance with the provisions of the Federal Aid Highway Act of 1944 and the rules and regulations promulgated thereunder and was done so that the State of Oregon might qualify for and receive its allotted portion of funds made available by said Federal Aid Highway Act; and

WHEREAS, said post war program has been approved by the Public Roads Administration and many of the projects named therein are now under contract, and it was the purpose of the Commission to proceed in an orderly and businesslike manner to place under contract the remaining projects set up in said post war program; and

WHEREAS, by the enactment of House Bill No. 283 there has been taken from state highway revenues and placed under the control of counties approximately $2,217,000 covering the years of 1947 and 1948, and by House Bill No. 476 there has been taken away from control of the Commission and placed under the control of cities the approximate sum of $1,173,000 covering the years of 1947 and 1948, and by House Bill No. 514 there has been taken from the control of the Commission and placed under the control of the Department of State Police the sum of $1,249,178 over and above the sum set up in the Governor's budget item for such purpose; and

WHEREAS, the total amount by which the Commission's available funds have been depleted by reason of said legislation exceeds the sum of $4,600,000; and

WHEREAS, funds made available to the State by the Federal Government require that said funds be matched by state funds and therefore the extent by which state funds are diminished by said legislation or otherwise will to that extent impair the State's ability to match future allotments of Federal funds which may be offered the State of Oregon, and thereby the State may sustain a loss in the amount of tendered but unmatched Federal funds; and

WHEREAS, because of the foregoing facts and conditions and the resulting reduction in highway revenues, it is necessary that, before new commitments are made or other obligations assumed, a complete survey be made of available revenues, and assumed and unassumed obligations, both with respect to said post war program and all other normal and unforeseen highway problems and requirements;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, a majority of its members being present and affirmatively voting, that, for the purpose of insuring continued administration of highway affairs consistent with policies and practices heretofore adopted by the Commission, it is deemed in the interest of the public that the following policies and principles of procedure be defined and applied to the administration and disbursement of highway funds during the immediate future:

1. That a complete study and survey be made of all post war projects which as yet have not been placed under contract, and a tabulation of the estimated cost of such projects prepared for study by the Commission.

2. That a complete statement of the total amount of highway revenues or funds subject to disposition by the Commission during the years 1947 and 1948 be prepared and made available for Commission study.

3. That in computing possible or anticipated highway revenues subject to control of the Commission no account be made or consideration given to possible additional revenues which may accrue by reason of the

so-called "truck bill", which is House Bill No. 175, for the reason that said bill does not become effective before January 1, 1948, and for the further reason that amounts of funds arising by or under the provisions of said bill are now incapable of ascertainment or sound estimation.

4. That no surveys be authorized or made with respect to projects not covered by or in the post war program until the Commission has had opportunity to study all commitments heretofore made and all known and ascertained revenues.

5. That with respect to post war projects and non post war projects all rights of way be procured and all settlements completed before the project is submitted under a call for competitive bids.

6. That until a complete examination has been made by the Commission of its heretofore adopted post war program and a check has been made of all projects now under contract, the amount of funds involved, the progress made and the amounts needed to complete such projects, no new jobs shall be undertaken until post war projects have been completed or have progressed to a stage where it can be definitely determined that new obligations will not impair or retard the completion of post war projects.

7. That the total cost of necessary rights of way, including necessary quarry, gravel or other material sites, shall be an essential item of consideration when a project is before the Commission for approval.

8. Believing that funds allocated to cities under House Bill No. 476 should be adequate to take care of all necessary sidewalk construction, it shall be the policy of the Commission to employ highway funds for sidewalk construction only in cities and towns which do not share in the benefits afforded by House Bill No. 476.

9. That before highway funds are employed by the Commission for the purpose of cooperating with cities or counties the city or county involved shall be required to establish to the satisfaction of the Highway Commission that highway funds received by it have been used and are being used in strict compliance with the terms of the act by which such funds are allocated and in strict conformance with the requirements of the Constitution.

10. That funds allocated for park and roadside acquisition and development shall be reduced in proportion to general highway income reductions.

11. That the Secretary is hereby instructed to advise all delegations requesting a hearing before the Commission with respect to new projects of the restrictions imposed by new legislation and the Commission's policy.

12. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of April, 1947.

---

24 [illegible]

A delegation from Prineville came before the Commission and urged improvements to the O'Neil State Secondary Highway. This delegation was headed by Mr. C. W. Goodnight and included Messrs. Geo. Barrett and H. H. Schmidt. They presented a petition signed by numerous land owners and taxpayers residing in the area served by this road requesting that it be surfaced and oiled from its intersection with the Ochoco Highway, near Prineville, to the end of the oild section near O'Neil, in Crook County. They also presented a letter from Mr. Carl Gover, Branch Manager, The Oregonian, Prineville, stating that he is forced to discontinue delivering papers along this road because of its condition. In support of the petition Mr. Goodnight advised that the present road is narrow and crooked, and in places is only wide enough for one-way traffic which makes it difficult for traffic to pass. He particularly mentioned one short section about 300 yards long, flanked on one side by a rock bluff and on the other by a ditch, which should be given immediate attention. Mr. Barrett and Mr. Schmidt also spoke in behalf of the improvement.

The Engineer advised that this road is on the Federal Aid Secondary Highway System, but no money has been set up to improve it in the Three Year Postwar Program. He estimated that it would cost about $450,000 to do the work requested. He further advised that the Commission's budget for 1947 contains an item of $4,000 for extraordinary maintenance and minor betterment on this road and an additional sum of $1,800 for new culverts, gravel, and ditching. Chairman Banfield advised that the Highway Commission has no unobligated funds at the present time that could be allocated to this road, inasmuch as it is the present plan of the Commission to complete the projects that are now in the adopted construction program before approving others; however, the Commission will have the Engineer check into the short section mentioned to see what can be done to help the situation at that point, but the Commission cannot promise anything other than that. The Engineer was thereupon instructed to make such investigation and to report his findings.

Mr. Stanford Norris, log hauler, Dallas, came before the Commission by request to show cause why his log-hauling permit should not be canceled for violation of the rules and regulations covering his operations. Chairman Banfield recited the violations as reported by the Chief Weighmaster, which included transportation of overweight loads, laying out, refusal to allow his loads to be weighed, and verbally abusing weighmasters. Mr. Norris denied the allegations, advising that a mistake has been made. Weighmasters Charles W. Dunn and Jack H. Holman, who were present, read aloud their field notes on the subject. Chairman Banfield advised Mr. Norris that the weighmasters represent the State Highway Commission in connection with matters of this kind. They are simply acting on instructions from the Commission, he said, and if Mr. Norris will not abide by the rules and regulations, then he will be barred from the use of the highways. He further advised that the Commission will not cancel Mr. Norris's permit for past offenses, but he warned Mr. Norris to be cooperative in the future; otherwise his P.U.C. plates will be taken up permanently. The Engineer and the Secretary were authorized and instructed to cancel Mr. Norris's permit in the event of an additional violation of the rules and regulations by Mr. Norris.

Mr. Clarence Kyriss, log hauler, Sweet Home, was present at the request of the Commission to give reasons why his log-hauling permit should not be canceled for violation of the rules and regulations. Chairman Banfield explained the violations, which included overloading, laying out, refusal to allow his load to be weighed, and verbally abusing weighmasters. Mr. Kyriss admitted certain charges and denied others; however, he agreed to comply with the regulations henceforth. He was cautioned by Chairman Banfield to comply with the rules or suffer the penalty of having his permit permanently canceled. He was allowed to continue his operations on such condition.

In this connection the Engineer read aloud a letter from Mr. Frank Pearson, log hauler, Springfield, with regard to the cancellation of his permit for truck-hauling logs over state highways, which permit was canceled by the Commission at the previous meeting for violations of the rules and regulations. In his letter Mr. Pearson expresses a sincere desire to comply with the legal requirements as well as with the rules and regulations promulgated by the Public Utilities Commissioner. In view thereof the Engineer recommended reinstatement of the permit. The Commission approved the recommendation.

A delegation from Gresham, consisting of Dr. H. H. Hughes, Mayor, and H. E. Barr, Councilman, was present and urged the continuation of the improvement of Powell Boulevard (Mt. Hood Highway) which was contracted by the Commission in 1946. They asked that this improvement be extended some three blocks in order to eliminate a bottleneck condition at a point where the highway now narrows down from a four-lane street to a two-lane street. They asked for the improvement as a safety proposition and advised that the city does not have funds to finance the work on its own account. The Commission referred the matter to the Engineer for investigation and report.

The following persons, representing the Baker County Chamber of Commerce appeared before the Commission and urgently requested that the Anthony Lake Road be kept open during the winter season for the benefit of winter sports enthusiasts: Austin Dunn, attorney, Baker; D. G. Smithpeter, groceryman, Baker; Sid Johnson, representing Eastern Oregon College of Education, La Grande; George M. Henderson, President, Pacific Northwest Ski Association, Portland; and Warde Erwin, President, Oregon Inter Sports Association, Portland. Mr. Dunn headed the group. The Engineer advised that this road, up to the U.S. Forest Boundary, is a Federal Secondary Highway and is now kept open by the state up to that point. The last five miles of the road, he said, are within the National Forest and come under the jurisdiction of the U.S. Forest Service. He estimated that it would cost between $8,000 and $10,000 annually to do what the delegation requests. Chairman Banfield advised that the Highway Commission is not in position financially to do what is requested. He added that the Commission is not unfriendly to the project, but it simply does not have the money to spare for the purpose. W. H. Lynch, Division Engineer, Public Roads Administration, advised that because of the economy movement now in progress, neither the Public Roads Administration nor the U.S. Forest Service has money to spend for this purpose. The request was thereupon denied.

A delegation from Astoria, consisting of County Judge Guy Boyinton, Clatsop County; James Convill, City Manager; Paul Kearney, County Sheriff; and Dr. Orval Eaton, Mayor of Astoria, was present regarding the Astoria-Megler Ferry and construction of a bridge across the mouth of the Columbia River. Judge Boyington headed the group. He pointed out the need for additional ferry service, advising that the service now being rendered is inadequate to take care of the traffic which uses it. He mentioned that it might be necessary to construct a bridge across the river but gave as his opinion that augmenting the ferry service would be a much more economic solution of the problem. Chairman Banfield advised that a bridge at this point would cost a large sum of money which the Commission could not finance. He mentioned the fishnet problem in connection with the ferry operation and advised that while the Commission is not unmindful of the fishing business and does not want to cause any trouble it cannot disrupt the ferry service in order to accomodate the fishermen because highway traffic must be taken care of. He was assured by Judge Boyington that the people feel the same way about the matter.

Mr Convill inquired as to the plans of the Commission for construction of a new ferry boat and was informed by Chairman Banfield that the Commission is not in position to give him an answer today, but he anticipated the answer could be given in about thirty days.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

A delegation from Yachats, representing the Yachats Chamber of Commerce and consisting of V. P. Mitchell, Chairman, Roads and Parks Committee; Frank Hansen, member; and R. D. Lytle, member, came before the Commission in the interests of the Yachats River Road. Mr. Lytle headed the group. He advised that this road is in extremely bad condition, being narrow and crooked and entirely incapable of handling the traffic which it carries. He declared that there are five lumber mills located on the road, each with a daily capacity of 150,000 board feet; moreover, private cars and schoolbuses have to operate over the road. At the present time there is no safe place for these vehicles to pass so one of them has to back for a quarter of a mile or so, which is not only inconvenient, but unsafe. He alleged that Lincoln County will maintain the road if the Highway Commission will place it in a good condition, and that unless the road is hard-surfaced this summer it will be impassable this winter. Chairman Banfield advised that this matter has been investigated by the Engineer who estimates that it will cost about $200,000 to fix it up properly. The Commission, he said, does not have unobligated money to spare for the work. He explained the status of the Commission's finances and suggested that the delegation take its problem to the Lincoln County Court, inasmuch as the road is a county road under county jurisdiction. This concluded the conference.

Mr. James W. Ford, Gardiner, appeared before the Commission regarding sidewalk construction along the Oregon Coast Highway through the town of Gardiner. He gave as his understanding that the Highway Commission plans to improve the highway through this town this year in conformity with arrangements

made in 1941, before war was declared, and urged, in view thereof, that the Commission include the sidewalk construction in the improvement. He further stated that he has been informed the Commission will not build sidewalks, so the people will have to build their own, which about 95 percent of the people in Gardiner are willing to do if the Commission will approve the project; however, others feel that the state should build the walks because of an agreement to that effect when they gave slope easements to the state to accomodate the highway improvement. He inquired what the Highway Commission is willing to do in the matter. He was informed by Chairman Banfield that the Commission is not in position to act today, but there are possibilities that some adjustment could be made when the Commission knows how much money it is going to have to spend for purposes of this kind. He pointed out that other communities have been required to build their own sidewalks; however, the matter will be referred to the Engineer and the Chief Counsel for investigation and report. When the Commission has acted on the report, he said, Mr. Ford would be advised. The Engineer and the Chief Counsel were thereupon instructed to render such a report.

A delegation from Wallowa County, consisting of Curtis Gould, Superintendent of Schools, Joseph; Byron Henry, Publisher of the Joseph Herald; and Dwight Thorsen, representing Wallowa Valley Stages, Inc., Joseph, came before the Commission and urged additional guard fence construction along the Minam Hill Grade Section of the Wallowa Lake Highway. They were informed by Chairman Banfield that the Commission has already instructed the Engineer to personally investigate conditions at this point and to do what he considers is right and proper to provide reasonable safety for the general traveling public. Members of the delegation expressed their appreciation for such consideration. The Engineer was instructed to contact this group when he makes the inspection.

The Commission discussed with the Engineer the bids received at the morning session for highway and ferry construction with the following results by unanimous vote:

No bids were received for the Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton County. The Engineer was authorized to re-advertise the project.

Construction of the Milwaukie-Estacada Section of the Clackamas Secondary Highway, Clackamas County. The Commission awarded this contract to the low bidder, Warren Northwest, Inc., Portland.

Construction of a ferry boat for operation across the mouth of the Columbia River at Astoria, Clatsop County. The award of this contract was deferred pending further discussion.

Oiling the Millican-Brothers Section of the Central Oregon Highway, Deschutes County. This contract was awarded to the low bidder, Babler Bros.

Grading, surfacing, and oiling the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County. The Commis-

sion deferred the award of this contract pending approval by the Public Roads Administration. The bids were referred to the Engineer to award the contract to the low bidder when this condition is satisfied.

Widening the Reese Creek, Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway, in Jackson County. Bids for this project were referred to the Engineer with authority to award the contract to the low bidder if and when the Public Roads Administration approves it.

Grading and bituminous macadam surfacing on the Madras Section of The Dalles-California Highway, in Jefferson County. This contract was awarded to the low bidder, Albert W. Denton.

Installation of a concealed irrigation system on the Springfield Junction Section of the Pacific and McKenzie Highways, Lane County. The contract was awarded to the low bidder.

The Commission rejected all bids received for regrading and bituminous macadam surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County.

The Commission awarded to Tom Lillebo, the low bidder, the contract for construction of a pile trestle bridge over Depot Slough on the Corvallis-Newport Highway, in Lincoln County.

The bids for construction of a Howe truss bridge over Crabtree Creek near Bohemian Hall on the Richardson Gap County Road, in Linn County, were referred to the County Court of Linn County for further handling, inasmuch as this is a county project which was advertised by the Commission as a courtesy to the Linn County Court.

Construction of the Milton-Washington State Line Section of the Oregon-Washington Highway, Umatilla County. Bids for this project were submitted in combination with bids for the construction of four bridges on this highway at Milton. E. C. Hall Co., Portland, submitted the low combination bid. The Commission referred the bids to the Engineer with authority to award the contract to this bidder if and when approved by the Public Roads Administration.

Re-oiling the Minam-Wallowa Lake Section of the Wallowa Lake and Joseph-Wallowa Lake Highways and on the Hurricane Creek County Road, Wallowa County. The Commission awarded this contract to the low bidder.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton County. The Commission received no bids for this project. It has authorized the Engineer to re-advertise the project for bids to be received at a later meeting.

"Grade widening and paving on the Milwaukie-Estacada Section of the Clackamas Secondary Highway, Clackamas County. Warren Northwest, Inc., Portland, submitted the low bid for this project at $421,548.22. Parker-Schram Co., Portland, submitted the next low bid at $452,366. There were three higher bidders. The Commission has awarded this contract to the low bidder, Warren Northwest, Inc., at its bid price.

"Construct, furnish, and deliver a single screw, 660 H.P., steel hull Diesel ferry for operation across the Columbia River at Astoria, Clatsop County. The low bidder for this project was Albina Engine and Machine Works, Portland at $430,323. Northwest Marine Iron Works, Portland, submitted the only other bid in the amount of $576,694. The Commission has deferred action on the award of this contract until later.

"Re-oiling Millican-Brothers Section of the Central Oregon Highway, in Deschutes County. Babler Bros., Portland, submitted the low bid for this work in the amount of $168,775. E. C. Hall Co., Portland, submitted the next low bid at $170,374. There was one higher bidder. The Commission has awarded the contract to the low bidder, Babler Bros., at their bid price.

"Grading, surfacing, and oiling the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County. E. C. Hall Co., Portland, submitted the low bid for this work in the amount of $296,913. The only other bid submitted was that of J. N. & M. J. Conley, Portland, at $302,797. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Widening the Reese Creek , Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway, in Jackson County. R. H. Jones, Hillsboro, submitted the low bid for this work in the amount of $87,230. The second low bid was submitted by E. F. and W. H. Philpott, Portland, at $88,710. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, R. H. Jones, when certain conditions have been satisfied.

"Grading and bituminous macadam surfacing, and widening the Willow Creek Bridge, on the Madras Section of The Dalles-California Highway, in Jefferson County. The Commission received two bids for this work, the low one being that of Albert W. Denton, Portland at $59,974. The other was submitted by Babler Bros., Portland, at $62,994. The contract has been awarded to the low bidder, Albert W. Denton, at his bid price.

"Installation of a concealed irrigation system on the Springfield Junction Section of the Pacific and McKenzie Highways, Lane County. C. S. Whitcomb Co., Portland, submitted the low bid for this work at $1,069. Western Golf Course Supply Company, Portland, submitted the next low bid at $1,185. There was one higher bidder. The Commission has awarded the contract to C. S. Whitcomb Co., at its bid price.

"Regrading and bituminous macadam surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. The Commission received nine bids for this work, all of which have been rejected. The project will be re-advertised.

"Construct a pile trestle bridge over Depot Slough on the Corvallis-Newport Highway, in Lincoln County. Tom Lillebo, Reedsport, submitted the low bid for this work in the amount of $19,279. The next low bidder was Del R. Beebe Construction Co. and Werner & Jeske, Eugene, at $26,074.30. There were two higher bids. This contract has been awarded to the low bidder, Tom Lillebo, at his bid price.

"Construct a Howe truss bridge and approach spans over Crabtree Creek near Bohemian Hall on the Richardson Gap County Road, in Linn County. The Commission received three bids for this project. Lindstrom Bros., Portland, submitted the low bid at $33,990. The next low bidder was Geo. E. Berry, Beaverton, at $37,655. The other bid was submitted by Del R. Beebe Construction Co. and Werner & Jeske, Eugene, at $42,578.65. This being a county project, which was advertised simply as a courtesy on behalf of the County Court of Linn County, the bids received have all been referred to the County Court for further handling.

"Pavement resurfacing, grading, and bituminous macadam surfacing on the Milton-Washington State Line Section of the Oregon-Washington Highway, in Umatilla County. Babler Bros., Portland submitted the low bid for this work in the amount of $271,602. E. C. Hall Co., Portland, submitted the next low bid in the amount of $274,067.50. There were three higher bidders. Contractors were informed that they could submit combination bids for this project and construction of four bridges on this highway at Milton, in connection with which the following bids were received: E. C. Hall Co., Portland, submitted the low bid at $117,072. They stated that they would not accept the award of this project at this figure unless also awarded the contract for the grading and paving work. C. J. Montag & Sons, Portland, submitted the next low bid at $133,512.50. They also stated that they would not accept the award of this contract unless also awarded the grading and paving contract. There were two higher bidders. Considering both projects, the low combination bid was that of E. C. Hall Co., Portland, at $391,139.50. Babler Bros., Portland, was the second low combination bidder at $431,559.50. The Commission has referred the bids for both projects to the Engineer with authority to award the contract to the low combination bidder, E. C. Hall Co., at its bid price when certain conditions have been satisfied.

"Re-oiling on the Minam-Wallowa Lake Section of the Wallowa Lake and Joseph-Wallowa Lake Highways and on the Hurricam Creek County Road, in Wallowa County. J. C. Compton Co., McMinnville, submitted the low bid at $25,964. The second low bid was submitted by Pendleton Sand & Gravel Co., Pendleton, at $26,760. There were three higher bids. The Commission has awarded this contract to the low bidder, J. C. Compton Co., at its bid price."

Reconsideration was given by the Commission to the bids received for construction of a new ferry for use in connection with the Columbia River operation between Astoria, Oregon, and Megler, Washington. In the discussion of the matter it was brought out that the specifications do not provide for a minimum speed guarantee. Chairman Banfield stated his opposition to the award of the contract without a guarantee of at least 10 knots per hour. He stated his willingness to accept the contract if assured of obtaining the speed guarantee that was originally contemplated and which feature was the basis of the design of the ferry boat. Commissioner Schaupp declared himself similarly, whereupon the Commission decided unanimously to defer the award of this contract pending satisfaction of this feature and a report from the Engineer giving a chronological outline of requirements, etc. Such report is to be rendered at the next meeting of the Commission.

Commissioner Schaupp brought up for discussion matters pertaining to the proposed improvement of N. E. Union Avenue, Portland, where it fronts on the property of Tony Fazzio. A joint recommendation of the Engineer and the Chief Counsel with respect thereto, as follows, was read aloud:

"April 24, 1947

Oregon State Highway Commission

Gentlemen:

The undersigned make the following report and recommendation with respect to the situation involving North Union Avenue which was inspected by the Commission last evening:

The rapid increase in traffic on North Union Avenue, a portion of U. S. 99E, together with the increasing development in the use of the land adjacent thereto, has caused a traffic problem which requires careful attention. It is, therefore, recommended that immediate study be made of the design required to modernize the highway and to safeguard traffic between the Portland city limits and the Interstate Bridge, including the right of way needed to obtain this objective.

In the meantime, the request for access to this highway as made by Tony Fazzio should be, in our opinion, denied because of the hazard to the public such access would bring. We furthermore recommend that immediate steps be taken to negotiate for the needed right of way on the east side of Union Avenue between the Bridgeton Road and the Gertz Road through the Fazzio and other properties, including the necessary space for a service road between said points. We suggest that in the negotiations for right of way access rights be sought and that authority be given for commitments for the building of the said service road. It is further recommended that as soon as possible right of way negotiations, including the necessary areas for service roads, be undertaken on the west side of Union Avenue between Bridgeton Road and Gertz Road.

Very truly yours,

/s/ R. H. Baldock
R. H. Baldock

/s/ J. M. Devers
J. M. Devers"

24 . 47

Commissioner Schaupp moved adoption of the recommendation. The motion was seconded by Chairman Banfield, who declared it carried by unanimous vote.

The Assistant Counsel, Mr. Neuner, reported a request from the Twin Harbors Lumber Company, Grants Pass, for permission to construct and operate a private logging road approach to the Pacific Highway between Wales and Glendale Junction, Josephine County, where the Commission proposes to restrict right of access from property abutting this highway. He advised that the Company is cutting timber from a tract nearby and transports the logs to its mill at Glendale, and the roadway is necessary in connection with such operation; also, that the Company's operations at this point are expected to last only about two years. He gave as his thought that it would be better to issue the Company a permit for the two-year duration rather than give them permanent access to the highway at this point, and he so recommended. The Commission approved the recommendation and thereupon signed the permit in duplicate.

The Commission discussed briefly matters pertaining to bills that were enacted into law by the 1947 Legislative Assembly concerning functions and activities of the State Highway Department. The Chief Counsel was instructed to study these bills carefully and to advise the Commission whether or not, in his opinion, allocation of additional highway funds to the counties, the cities, and the State Police Department can be considered as diversion of highway funds and how the carrying out of these laws will affect Federal funds and requirements. He was instructed to analyze these carefully and to report his findings to the Commission with his recommendation so the Commission will be fully informed and in position to act, if it considers it advisable, to secure a declaratory judgment against the enforcement of the acts.

The Commission considered and signed agreements, etc., as follows:

Agreement with the City of Sutherlin covering installation of flashing beacons at certain intersections in Sutherlin.

Agreement with Irene B. Wiggins, Leland R. Wiggins and Robert W. Wiggins covering operation of a boat concession in the new Wallowa Lake State Park, Wallowa, County.

Bargain and Sale Deed conveying unto Byron G. Steevens a portion of stockpile site property at Crescent, in Klamath County.

Bargain and Sale Deed conveying unto Eben Ray and Alice Ray a parcel of land containing 5.9 acres in Crook County, which property was acquired from Joseph Manceau, et ux.

Bargain and Sale Deed conveying to The Pacific Telephone and Telegraph Company a parcel of land near Talent, in Jackson County, upon which to construct a repeater station.

Bargain and Sale Deed conveying unto The Pacific Telephone and Telegraph Company a parcel of land near Wolf Creek, in Josephine County, upon which to construct a repeater station.

Bargain and Sale Deed conveying unto Sunset Investment Co. a small parcel of land within the originally-dedicated right of way in Depoe Bay in exchange for a quitclaim deed to a 10-foot strip of land a short distance north thereof, ownership of which has been in dispute. Also included is acknowledgement by Sunset Investment Co. of the east right of way line on the tangent south of Depoe Bay.

Permit agreement with Twin Harbors Lumber Co. covering use of logging road approach to Pacific Highway between Azalea and Wolf Creek where the state has control of access. Expiration date is January 1, 1953.

License from the U.S. Bureau of Reclamation allowing the state to take gravel from land northwest of Hereford, in Baker County. Expires January 1, 1957.

Lease from Gold Ray Realty Co. covering about 0.98 acre of land located along the Pacific Highway near Tolo, Jackson County.

Project agreement with P.R.A. to cover statewide planning project No. HPS-1 (8) and approving the sum of $106,252 as P.R.A. share.

Contract No. 2877, with J. N. & M. J. Conley; Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways.

Contract No. 2880, with J. P. Brittan and Company; construct bridge over Buck Hollow Creek on Sherars Bridge Secondary Highway.

Contract No. 2881, with D. F. McKenzie; Gillespie Corner-Lorane Section of the Territorial Secondary Highway.

Contract No. 2882, with P. B. Doherty and Son; Jordan Creek-Rock Creek Rock Production Project on the I.O.N. Highway.

Contract No. 2884, with Stanley & Ehlen; Nyssa (1st St.-7th St.) Section of the Old Oregon Trail.

Contract No. 2885, with Stanley & Ehlen; Ontario (S.W. 1st St.-S.W. 12th St.) Section of the Old Oregon Trail.

Contract No. 2886, with Pacific Bridge Painting Company; Necarney Creek and Nehalem River Bridges on the Oregon Coast Highway.

Contract No. 2887, with R. A. Heintz-Construction; Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway.

Contract No. 2888, with Albert W. Denton; Ashland (Water St.-Oak St.) Section of the Pacific Highway.

Contract No. 2889, with J. N. & M. J. Conley; Spitzenberg-Scappoose Section of the Pittsburg-Scappoose County Road.

Contract No. 2890, with L. E. Snell; painting Yaquina Bay Bridge on the Oregon Coast Highway.

Contract No. 2891, with K. F. Jacobsen & Co., Inc.; West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road.

Contract No. 2892, with Porter W. Yett; Barnes Road-Multnomah County Line Section of the Sunset Highway.

There being no further business to come before the Commission at this time the meeting adjourned at 4:00 p.m.

T H Banfield
Chairman

[illegible]
State Highway Engineer

[illegible]
Commissioner

[illegible]
Secretary

Portland, Oregon
May 14, 1947

The State Highway Commission met in regular session at 9:00 a.m. in Room 715, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben R. Chandler was excused from attending this meeting.

The Engineer brought up for discussion the per diem allowance to be paid field employees for extra living expenses incurred in traveling to new work assignments and while on work assignments away from regular headquarters. He read aloud a proposed circular letter on the subject. This was discussed at some length, but action thereon was deferred by the Commission until later in the session. (This matter was reconsidered the following day, at which time it was referred back to the Engineer to rewrite the letter with certain changes for approval of the Commission at its next meeting. It was understood that the arrangement as finally adopted would be retroactive to May 1, 1947. See ahead for additional paragraph.)

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on an offer from Hon. Henry Semon, Klamath Falls, to present to the state, as a gift for park purposes, certain property situate between Bonanza and Malin, Klamath County. He advised that he has inspected this property, and in consultation with Commissioner Schaupp he has ascertained that Mr. Frank Howard, who owns most of the acreage, is not very anxious to sell; and it appears that he is going to ask between $400 and $500 per acre for the property, if he sells at all. As the matter now stands, he said, it is up to Mr. Howard to make the next move. The Commission considered the price of $400 per acre too high for the property, however deferred definite action on the matter pending receipt of Mr. Howard's final offer.

The Assistant Counsel, Mr. DeSouza, requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the offer that he recommended be made for each tract. After careful consideration the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FOSTER-KENT BEND SECTION OF SOUTH SANTIAM HIGHWAY		
13335	Leonard E. Thornbrough, et ux.	$650.00

After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites,

stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for right of way purposes in connection with the Santiam Highway, which real property is owned by Leonard E. Thornbrough and Lucy A. Thornbrough, husband and wife, isidentified in the records of the Highway Commission as file R 13335, and is more particularly described as follows:

A parcel of land lying in Government Lot 3 ($NE\frac{1}{4}$ of the $SW\frac{1}{4}$) of Section 26, Township 13 South, Range 1 East, W. M., Linn County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Leonard E. Thornbrough and Lucy A. Thornbrough recorded in Book 176, Page 70, of Linn County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable width lying on the southerly side of the center line of the Santiam Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 1001+38.2 to Station 1007+94.5, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 1001+38.2, at which point the center of said highway intersects the center line of the county road lying westerly of said property; said point being 65.3 feet south and 655.9 feet west of the center of Section 26, Township 13 South, Range 1 East, W. M.; thence North 86° 08' 30" East a distance of 230.9 feet; thence on a spiral curve right (the long chord of which bears North 87° 28' 30" East 399.92

feet) a distance of 400 feet; thence on a 2864.8 feet radius curve right (the long chord of which bears South 89° 36' 30" East 25.4 feet) a distance of 25.4 feet to Engineer's center line Station 1007+94.5, opposite and 70 feet distant from which station the southerly line of said strip of land intersects the north and south center line of said Section 26,

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Width on Southerly Side of Center Line
1001+38.2	to	1003+69.1	50 feet
1003+69.1	to	1007+94.5	70 feet

The parcel of land to which this description applies contains 0.88 acre, of which 0.42 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.46 acre lies outside of the existing right of way.

2. That the Commission does hereby find and declare that the said described parcel of real property is required for the specific purpose hereinabove set forth, and the said property is being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department the necessary and an adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners of said real property and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to said parcel of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the fourteenth day of May, 1947.

The Assistant Counsel, Mr. Neuner, recalled that the Commission at the previous meeting authorized condemnation, if necessary, to secure a waiver of access to the Sunset Highway from property owned by Mr. Joseph Peterkort and, in connection therewith, approved an offer of $1,000 in condemnation. He advised that, due to uncertainities, the customary resolution was not inserted in the minutes of that meeting. He asked the Commission to confirm the previous action. The Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS , by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

13914

WHEREAS, the Highway Commission is authorized by law, when acquiring real property for right of way purposes, to acquire fee title to the real property sought to be acquired, or any interest therein, and the Commission is also authorized, when acquiring real property for such purpose, to acquire all right of access from abutting property to the highway proposed to be constructed; and

WHEREAS, the State is now engaged in the construction of a highway known as the Sunset Highway, on which highway the Commission has heretofore, by resolution duly and regularly adopted and made a part of its official records, authorized the acquisition of all right of access from abutting lands to said highway and the right of way thereof; and

WHEREAS, the Commission has heretofore acquired by agreement with the owners the property hereinafter described for the purpose of constructing a portion of the Sunset Highway, the real property acquired for such purpose being described as follows, to wit:

Parcel No. 1

A parcel of land lying in the southeast quarter ($SE\frac{1}{4}$) of Section 3 and southwest quarter ($SW\frac{1}{4}$) of Section 2, Township 1 South, Range 1 West, W. M., Washington County, Oregon, and being a portion of the following described property:

That tract of land which was conveyed by that certain deed to Joseph Peterkort and Bertha A. Peterkort, recorded in Book 150, Page 270 of Washington County Record of Deeds; the said parcel being described as follows: Beginning at the intersection of the southerly right of way line of the Sunset Highway and the northerly right of way line of Barnes Road, said point being 81.32 feet southerly from (when measured at right angles to) the located center line of said highway at Engineer's Station 3179+34.2, said point also being2159.1 feet north and 2474.2 feet west of the northwest corner of the A. Hart D. L. C. #60, thence north 38° 34' west along the northerly right of way line of the Barnes Road, a distance of 90.9 feet, thence north 61° 50' 30" west, parallel to and 115 feet southerly from said highway center line, a distance of 942.6 feet to the west line of said Peterkort property, thence north 0° 55' west, a distance of 6.32 feet, thence south 63° 24' 30" east along the southerly right of way line of the Sunset Highway, a distance of 1030.5 feet to the point of beginning, containing 0.427 acres.

Parcel No. 2

A parcel of land lying in the Southeast quarter ($SE\frac{1}{4}$) of Section 3 and Southwest quarter ($SW\frac{1}{4}$) of Section 2, Township 1 South, Range 1 West, W. M., Washington County, Oregon, and being a portion of the following described property:

That tract of land which was conveyed by that certain deed to Joseph Peterkort and Bertha A. Peterkort, recorded in Book 150, Page 270 of Washington County Record of Deeds, the said parcel being described as follows: Beginning at a point which is 115 feet southerly from (when measured at right angles to) the located center line of the Sunset Highway at Engineer's Station 3178+48.9, said point being the point of intersection of the southerly line of Parcel 1 and the northerly right of way line of Barnes Road, said point also being 2169.3 feet north and 2564.5 feet west of the northwest corner of the A. W. Hart D. L. C. #60; thence north 83° 34' west along the northerly right of way of the Barnes Road, a distance of 160.26 feet, thence north 28° 09' 30" east a distance of 59.33 feet to the southerly line of Parcel 1, thence south 61° 50' 30" east along said southerly line, a distance of 148.9 feet to the point of beginning, containing 0.101 acres.

Parcel No. 3

A parcel of land, being a portion of the following described property: The East half (E½) of Section 3, Twp. 1 South, Range 1 West, W. M., Washington County, Oregon, and being a portion of that tract of land which was conveyed by those certain deeds to Wm. M. Daniels, and recorded in Volume 73, Page 21 and Volume 127, Page 493 of Washington County Record of Deeds. The said parcel being all that portion of the foregoing described property included in a strip of land of variable width on each side of the center line of the Wolf Creek Highway (now Sunset Highway) as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 3146+66.7 to Station 3168+71.5; which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 3146+66.7, opposite and 50 feet distant from which point the northerly line of the said strip of land intersects the center line of Barnes Road; said point being 609.1 feet north and 2337.3 feet west of the east quarter corner of Section 3, Twp. 1 South, Range 1 West, W. M.; thence along said center line South 61° 50' 30" East a distance of 2204.8 feet to Engineer's center line Station 3168+71.5 opposite and 50 feet distant from which station the southerly line of said strip of land intersects the east line of said property.

The widths in feet of the strip of land above referred to are as follows:

Station	to	Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
3146+66.7	to	3154+78.8	Variable	50	Tapering from 50 ft. on the left to 135 ft. on the right
3154+78.8	to	3163+00	100	50	50
3163+00	to	3165+00	110	60	50
3165+00	to	3168+71.5	100	50	50

The parcel of land to which this description applies contains approximately 4.90 acres, of which 0.52 acres lie within the existing right of way; net new area 4.38 acres.

and

WHEREAS, Joseph Peterkort and Bertha A. Peterkort are the owners of the real property abutting the Sunset Highway on the north from approximately Station 3283+46 to approximately Station 3146+66.7 and abutting said highway on the south from Station 3169+07.1 to approximately Station 3176+88.6; and

WHEREAS, it is the judgment of the Commission that the right of access to the Sunset Highway from the real property abutting said highway on the north between approximately Station 3283+46 and approximately Station 3146+66.7 and abutting said highway on the south between Station 3169+07.1 and approximately Station 3176+88.6 should be acquired except at such places as may hereinafter be designated;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority of the members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that all right of access to the Sunset Highway from the real property abutting said highway on the north between approximately Station 3283+46 and approximately Station 3146+66.7 and abutting said highway on the south between Station 3169+07.1 and approximately Station 3176+88.6 should be acquired and all access from said abutting property to said highway restricted and prohibited, except that a private access (hereby defined as the right to enter and leave the highway by the grantors, their heirs and assigns, for any purpose other than a commercial use of the adjoining property which caters to, invites, solicits from, or is dependent upon the users of the highway) for the use and benefit of the said owners or their heirs and assigns may be permitted and established on the north side of the highway at State Highway Engineer's Station 3148+50, a like access on the north side of the highway at Station 3160+00, a like access

on the north side of the highway at Station 3168+50, and a like access on the north side of the highway at Station 3177+80, and that a like access may be permitted and established on the south side of the highway at Station 3169+25 and a like access on the south side of the highway at Station 3173+30, each of said accesses to be of a width not to exceed twenty-five feet, and that, in addition, one crossing for farm purposes, not to exceed twenty-five feet in width, may be provided from Station 3168+50 on the north side of the Sunset Highway to Station 3169+25 on the south side of the highway;

2. That except such access as is defined about in paragraph 1 all access to the Sunset Highway from the land or real property abutting said highway and described in a deed from Emily Hubbard, unmarried, to Joseph Peterkort and Bertha A. Peterkort, husband and wife, recorded in Volume 150, page 270a, of the Deed Records of Washington County, Oregon, and also in a deed from The United States National Bank of Portland (Oregon), a corporation, to Joseph Peterkort and Bertha A. Peterkort, husband and wife, recorded in Volume 252, page 101, of the Deed Records of Washington County, Oregon, shall be acquired and vested in the public;

3. That if such relinquishment and waiver of access cannot be acquired by purchase or agreement, then J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is authorized to institute and prosecute to a final determination such action or proceedings as may be necessary to acquire and vest in the public the said access rights;

4. That, in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said access rights, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said access rights as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

5. That this resolution be entered in full in the minutes and records of this Commission as of the fourteenth day of May, 1947.

The Assistant Counsel brought up for discussion and instructions the claim of Gates and Sons, house movers, for extra compensation in connection with a contract that was awarded to them for moving a building from right of way of the Alsea Highway as is required in connection with the acquisition of right of way for a Forest Highway project at this location. He advised that the specifications called for a certain yardage of material to be removed, but it is apparent that a mistake was made in the computation because actually they moved 1,289 cubic yards of material more than was con-

templated, and they are now asking payment for the extra yardage at $1.42 per cubic yard, which is the price they bid for such item. He recommended payment of the claim. The Chief Counsel concurred therein, advising that the state is obligated to pay the extra amount. The Commission approved the recommendation unanimously.

The Assistant Counsel presented the offer of Mr. Carl Walther to purchase some state-owned property adjacent to the Oregon Coast Highway near the Dorchester House, Lincoln County. He advised that in acquiring a ten foot strip along this section for widening the highway it was necessary in one instance to purchase the entire holdings of one of the property owners, for which the sum of $3,000 was paid. Mr. Walther, he says, wants to acquire the area outside the standard-width right of way and has offered to pay the sum of $3,000 for it, which means that the state is obtaining the right of way free of cost. He recommended acceptance of the offer. The Commission approved the recommendation and the following day signed the deed conveying the property to Mr. Walther.

The Assistant Counsel also brought up for discussion the matter of acquiring right of way for the Klamath Falls-Malin Highway at a point where this highway crosses South 6th Street, Klamath Falls. He advised that Balsiger Brothers, who own property at this intersection, have plans to subdivide it and are anxious to know just how much of their property is required by the state. He requested authority to negotiate purchases of right of way at this location. The Engineer advised that the original plan was to construct a grade separation structure at this location, but he believes now that a satisfactory solution can be worked out without going to that expense, if the intersection is properly channelized with, perhaps, the installation of traffic signal lights if that is deemed necessary. He pointed out that when this matter was previously under discussion the Commission approved the highway alignment, but held in abeyance the matter of constructing the traffic separation structure. Commissioner Schaupp gave as his thought that the grade crossing of these two highways would be satisfactory if the traveling public is properly protected as suggested by the Engineer. Chairman Banfield also expressed his approval of a grade crossing.

The question of right of way width was then discussed and, as a result thereof, the Commission unanimously authorized negotiations on a basis of right of way 200 feet wide along this section, with sufficient additional width at the intersection to provide for the proper channelization of traffic at this point.

The Commission had under consideration the matter of authorizing deductions from State Highway Department payrolls to pay the cost of group insurance coverage for the families of State Highway Department employees. The Assistant Counsel advised that the deductions will be made from the amount due the individual employees only if they voluntarily request that the deductions be made and not otherwise. The Commission voted unanimously to permit such deductions on the condition that the state will pay nothing whatsoever toward the cost of such insurance coverage.

The Chief Counsel reported on a request of Commander J. F. Staniunas U. S. Navy, Resident Officer in Charge of Construction Work, in Astoria, that the state quitclaim to Clatsop County for reconveyance to the U. S. Navy certain property belonging to the state in the vacated subdivision known as Van Dusen's, Astoria. He advised that the City of Astoria and Clatsop County have vacated this subdivision to permit construction of quarters for officers and enlisted men stationed at Tongue Point Naval Station, and it appears that the State Highway Department, by such vacation, acquired title to a portion of Date Street, so in order to avoid complications and to clear up the title, the state's interests will have to be conveyed in the manner above stated. The Engineer advised that the property is located on sliding ground, and there are possibilities that the state might assume certain obligations and be responsible for damage if additional slides occurred, in view of which, it might be advisable to retain the area under state ownership, although, he added, he would have no objection whatever if title can be transferred without the state assuming any further obligation or responsibility. The Chief Counsel advised that the transfer could be made without the state assuming such obligation. The Commission thereupon voted unanimously to deed the property to Clatsop County as requested, subject to that condition.

The Engineer and the Chief Counsel reported results of conferences with officials of the City of Portland regarding the proposed Sullivan's Gulch Highway. They advised that they were unable to arrive at any definite arrangement with respect to details, but there appeared to be three main points or issues where agreement must be reached between the Commission and the City before the project can go ahead -- (1) Is the route to be approved and adopted as a state highway and street artery and thereafter constructed? (2) In what respect and in what amount shall the city contribute toward the project? (3) From what source will the city procure funds to meet its part of the financial obligation? The matter was discussed at considerable length, and as a result thereof the Commission instructed the Engineer and the Chief Counsel to continue discussions with the city officials and with officials of the railroad company which is involved, without making any definite commitments to spend any money at any specific time, and to ascertain, if possible, how much the city is willing to contribute toward the cost of the project. These discussions are to be of a preliminary nature. The Engineer and the Chief Counsel were authorized to agree tentatively with the city on the financing of right of way on the same basis that right of way for the Front Avenue project was acquired -- 60 percent city, 40 percent state. They are to render a joint report on the subject when the conferences have been completed.

The Engineer presented a written report on equipment, showing that on hand at the beginning of the year, equipment purchased during the period January 1 to May 1, 1947, that on order, and the estimated cost to purchase additional equipment that will be needed this year. He pointed out that the Highway Department has received, or has on order, equipment costing $692,948, which takes up practically the full amount of the $700,000 which the Commission heretofore authorized for this purpose. He estimated the cost of additional equipment that will be needed in the near future at $100,000 and requested authority to make additional purchases to that amount, which will

bring the total authorization up to $800,000 and would leave an unauthorized balance of $200,000 remaining out of the $1,000,000 set up in the 1947 budget for the purchase of equipment. (See written report, in general files, for details.) The Commission, by unanimous vote, authorized an additional expenditure of $100,000 for this purpose with the express understanding that this is all that will be authorized for the year 1947.

A letter was presented from Mr. Chester K. Sterrett, Manager, Industries Department, Portland Chamber of Commerce, inquiring whether or not the State Highway Commission will contribute additional state funds in the amount of $500 to assist in payment of a deficit of $7,000 which, from present indications, will accrue in connection with the cooperative mapping project of the Portland Area that is being conducted under the auspices of the U. S. Coast and Geodetic Survey and for which the Portland Chamber of Commerce is acting as coordinating supervisor. The Engineer advised that when this survey was started in 1945 the Commission authorized a contribution of $2,500 of state highway funds in cooperation because the information gained would be of inestimable value for state highway purposes. He recommended approval of the additional expenditure which he considered justified because of the benefits that the state would receive. The Chief Counsel advised that the Commission has authority to spend, and is justified in spending, highway funds for such purposes if the state will be benefited. Motion was made by Commissioner Schaupp that the additional contribution of $500 be allowed. Chairman Banfield seconded the motion, and it was so ordered.

The Commission had under discussion matters pertaining to construction of a new ferry boat for operation across the Columbia River at Astoria, bids for which were received by the Commission at the previous meeting. It was recalled that the Commission at that time deferred the award of the contract pending assurance from the low bidder, Albina Engine and Machine Works, guaranteeing a ten-knot speed for this boat. The Engineer advised that he has discussed this matter with Mr. Hussa, of the Albina Engine and Machine Works, who states that he can furnish such a guaranty provided a larger engine is installed. The Engineer read aloud a letter from Mr. Hussa on this subject in which he advised that for an additional sum of $28,000 over and above the amount of his bid submitted on April 24, 1947, he will install an 800-horsepower engine which will furnish a ten-knot speed at 350 rpm, increasing the total amount of the bid to $458,323. (See letter, in general files, for details.)

The Engineer also read aloud a letter from L. S. Baier & Associates, Portland, dated May 13, 1947, which offers to furnish a reconverted mine sweeper for the sum of $260,000. (See letter, in general files, for details.) He questioned the advisability of purchasing a boat of this type because of the danger in operating it during rough weather, particularly on the Washington side of the river. Chairman Banfield gave as his thought that the Commission is not justified in taking such a boat in lieu of one that is built to specifications.

The Engineer brought into the discussion the matter of a ferry landing for the ferry operation. He advised that the Commission is now using the private landing of Captain F. B. Elfving, who has stated his willingness to extend his present agreement with the Highway Commission if the Commission will pay him extra compensation in the amount of taxes that are assessed against the property by the City of Astoria and by Clatsop County. He pointed out that to provide a new state-owned landing at the proposed location at the end of 17th Street would cost about $150,000 and suggested an arrangement with Mr. Elfving for the extended use of his property.

Chairman Banfield expressed himself in favor of awarding the contract for the new ferry boat construction to the Albina Engine and Machine Works on the basis of its original bid and its letter guaranteeing a ten-knot speed, on the condition that the Commission can obtain at least a two-year extension of its agreement with Mr. Elfving to operate the ferry out of the present ferry terminal, in other words, if such agreement with Mr. Elfving can be extended from June 1948, when the present agreement terminates, to July 1950. He suggested that the Commission should have assurance, in writing, from the City of Astoria, Clatsop County, and Captain Elfving that this plan is satisfactory before the Commission enters into a contract for the construction of the new ferry boat. Commissioner Schaupp expressed himself similarly, whereupon the Commission decided definitely to proceed on such basis. The Chief Counsel was instructed to prepare letters for execution by the City of Astoria, Clatsop County, and the Astoria-North Beach Ferry Company along the line suggested. These were ordered sent to Astoria by special messenger in order that final action on the matter may be taken by the Commission on the following day. (This matter was reconsidered by the Commission on the following day, at which time letters were presented from the county, the city, and the ferry company agreeing to the Highway Commission's plans. The Commission considered that the communications satisfied its requirements and thereupon referred the bids to the Engineer with authority to award the contract to the low bidder, Albina Engine and Machine Works, at its bid price of $430,323, submitted on April 24, supplemented by its letter of May 12, 1947, guaranteeing a speed of ten knots per hour.)

The Commission discussed a request from the City of Bend for state cooperation in the improvement of Galveston Avenue (Century Drive Secondary Highway) between Harmon Boulevard and West 14th Street. The Engineer advised that the property owners will pay for construction of curbs and grading work and construction of an additional ten feet of pavement, and all that the state is being asked to do is to place a seal coat on the pavement, which he estimated would cost about $1,000. He recommended the expenditure. The Commission approved the recommendation unanimously.

The Engineer reported receipt of a letter from the Croft Lily Grower Association, Harbor, Oregon, requesting the construction of a vehicular turnout on the Oregon Coast Highway about one mile south of the town of Harbor where the Association has erected a granite memorial honoring the late Sidney Croft, who was the originator of the Croft Easter Lily. He estimated that such widening work would cost about $40 and recommended approval of the expenditure. The Commission approved the recommendation.

A letter was presented from Mrs. Lewis Erickson, Coos Bay, Oregon, urging the improvement of a road which extends from Catching Slough to Roseburg via the hamlets of Summer and Fairview. The Commission denied the request because of lack of funds with which to finance such an improvement at this time.

The Engineer reported that the cities of Athena and Troutdale have satisfied the legal requirements with respect to the expenditure of 1945 State Tax Street Funds which they received in 1946 and that the plans for the improvements to be financed with such funds have been examined and found satisfactory. He recommended, in view thereof, approval of the plans by the State Highway Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Athena	$770.53
Troutdale	316.92

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Athena - Adams Street, 6th Street, College Street, 2nd Street, Darwin Street, 5th Street

Troutdale - Killin Street, Benton Street, Garfield Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the require-

ments of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 14th day of May, 1947.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1946 State Tax Street Funds that they received in 1947:

Aumsville	Manzanita	Stanfield
Donald	Mosier	Talent
Halfway	Nehalem	Wasco
Joseph	Rockaway	Wheeler
Lafayette	Rogue River	Yoncalla

He advised that the plans proposed for the expenditure of the funds have been examined and found satisfactory and recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Aumsville	$ 348.98
Donald	373.04
Halfway	834.34
Joseph	1,189.33
Lafayette	1,123.14
Manzanita	439.23
Mosier	433.21
Nehalem	495.39
Rockaway	1,235.46
Rogue River	950.66
Stanfield	1,135.18
Talent	764.14
Wasco	607.70
Wheeler	519.45
Yoncalla	758.12

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Aumsville - All city streets

Donald - Cone Street, Criswell Street, Feller Street, Williams Street, Oak Street, Ross Street, Ehlen Street, Mathieus Road, Donald Street

Halfway - Bell Street, Dawson Street, Church Street, Center Street

Joseph - 2nd Street, 3rd Street, 6th Street, East Street

Lafayette - 8th Street from ½ block north and 1 block west of Washington Street to Madison Street, 6th Street from Washington Street to Bridge Street, Washington Street from 1st Street to 6th Street, 2nd Street from Washington Street to Madison Street, 5th Street from Jefferson Street to Monroe Street, Jackson Street from 5th Street to 7th Street, 5th Street from Jackson Street to Wilson Street, Wilson Street from 5th Street to 7th Street, 7th Street easterly from Jackson Street to city limits, Monroe Street from 6th Street to 3rd Street

Manzanita - Manzanita Avenue, 4th Street, 5th Street

Mosier - Washington Street, 3rd Avenue

Nehalem - Tohls Avenue, 9th Street, "I" Street

Rockaway - Pacific Avenue, Lakeside Drive, Myrtle Avenue, Ocean Avenue, Owen Avenue, Nehalem Avenue, Park Street, Elizabeth Street, Avenue "B", Avenue "C", Edison Avenue

Rogue River - Pine Street, Broadway Street, School Street, First Street, Main Street, County Road

Stanfield - Taft Avenue, Wood Avenue, Dunne Street, Sherman Street

Talent - Gibson Street, "I" Street through to Wagner Avenue

Wasco - Beginning at a point 40 feet east of the intersection of Clark and Davis Streets, thence east on Davis Street to a point 103 feet west of the intersection of Davis and McPherson Streets, thence east a distance of 145 feet more or less to intersect the center line of McPherson Street

Wheeler - Street intersection between Gregory and Rorvick Streets, extending back 150 feet from the state highway

Yoncalla - 1st Street, 2nd Street, Applegate Avenue, 3rd Street 4th Street, "A" Street, "B" Street, "C" Street, "D" Street unnamed street running north from Applegate Avenue to city limits

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 14th day of May, 1947.

A letter was presented from the City of Coos Bay requesting that a traffic light of proper type, with appropriate signs, be installed at the intersection of Central Avenue (Empire-Marshfield Secondary Highway) and 14th Street, being at a point where the highway curves to the right, as an aid in the prevention of accidents that frequently occur at this intersection. The Engineer recommended the installation of a flashing beacon at this point at an estimated cost of about $250. He advised that he has discussed this with Commissioner Chandler who approves such traffic light at this point. The Commission approved the recommendation unanimously on the condition that the City of Coos Bay will adopt an ordinance requiring traffic from side streets to come to a stop before entering this intersection.

In this connection the Engineer advised that the city is also desirous of rerouting truck traffic on Central Avenue so as to avoid the business district and the traffic congestion therein. They propose, he said, to reroute traffic that enters this district from the north over Commercial Avenue from Broadway to 4th, thence to Central, and to route traffic that enters the district from the south via Elrod and 4th Streets to Central. The city also inquires whether or not the state will assume a part of the expense of improving these new routes. Chairman Banfield gave as his thought that this is strictly a city proposition; however, action on the matter was deferred by the Commission until Commission Chandler is present.

The Engineer also advised that the City Council has offered the suggestion that the state, in acquiring right of way for highway improvements through the city of Coos Bay, procure right of way 100 feet wide wherever possible and feasible. The Engineer explained that for the most part the right of way now being acquired is only 80 feet wide. The Commission deferred a decision in this matter until Commissioner Chandler is present.

The Commission had under discussion a cooperative agreement with the Southern Pacific Company for the installation of flood lights at the railroad grade crossing of the Beaverton-Aurora Secondary Highway between the town of Tualatin and the Boones Ferry Road, in Washington County. The Engineer recommended approval of this installation, which he estimated would cost a total of $300, on the condition that the railroad company would pay half the expense of the original installation and of the operation and maintenance of the lights. The Commission approved the recommendation unanimously. The agreement pertaining thereto was signed by the Commission on the following day.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Engineer reported that in conformity with authority previously granted him by the Commission he has awarded the following contracts, bids for which were received by the Commission on April 24, 1947, the conditions of the awards having been satisfied:

Widening Reese Creek, Little Butte Creek, and Antelope Creek Bridges on the Crater Lake Highway, Jackson County; contract awarded May 2, 1947, to R. H. Jones, low bidder.

Grading, surfacing and oiling the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, Harney County; contract awarded May 1, 1947, to E. C. Hall Co., low bidder.

Asphaltic concrete pavement resurfacing and bituminous macadam surfacing on the Milton-Washington State Line Section of the Oregon-Washington Highway, Umatilla County; contract awarded May 1, 1947, to E. C. Hall Co., low combination bidder.

Construction of four bridges on Oregon-Washington Highway, at Milton, Umatilla County; contract awarded May 1, 1947, to E. C. Hall Co., low combination bidder.

The Commission confirmed the awards as reported.

The Engineer submitted for the Commission's approval survey data for the Gunnell Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, Josephine County. He recalled that this matter was presented to the Commission at the previous meeting but was referred back to him for additional information concerning the building located on the proposed alignment. He advised that the house is an old structure, is unpainted, and is valued at not to exceed $500; moreover, it is estimated that it can be moved for about $150. He recommended approval of the highway location as planned because it is located on high ground, will avoid moving right of way fences, the destruction of a barn lot on the opposite side of the highway, and will provide a better connection with a county road nearby. In the discussion of the matter it appeared that the house is located on high ground especially desirable for a building site, which will be destroyed for such purposes if the highway is constructed in such location. The Commission questioned the advisability of adopting such a location in view thereof, and rereferred the matter to the Engineer for further investigation and report at the next meeting.

Struss & McCoy, Contract No. 2770, for furnishing crushed gravel in stockpiles for the Redmond Rock Production Project on the McKenzie, The Dalles-California, the Ochoco, and the O'Neil Highways, in Crook and Deschutes Counties, requested an additional extension of time of five days from April 10 to April 15, 1947, within which to complete this job. They gave no reasons for overrunning the previously-extended time limit. The Engineer advised that progress has been slow on this project because of many breakdowns and difficulty in obtaining parts, but that the state has not incurred any appreciable loss because of this delay. He recommended approval of the request without penalty. The Commission approved the recommendation, not, however, on the basis of the contractor's statements.

A. D. Ford & Son, Contract No. 2800, for construction of the Vadis Overcrossing on the Sunset Highway, in Washington County, requested an additional extension of time of 90 days, from April 30 to August 1, 1947, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to inability to secure labor experienced in cement work. The Engineer advised that the reason given by the contractor for overrunning the time limit is substantially correct, and he recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statement.

The Engineer reported that Contract No. 2770 for furnishing crushed gravel in stockpiles on the Redmond Section of the McKenzie, The Dalles-California, Ochoco, and O'Neil Highways, in Crook and Deschutes Counties, has been completed according to the requirements of the contract or modification thereof and that said job is now ready for acceptance. The following resolution accepting the above project was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contract for the construction of a state highway project has been completed according to the terms and provisions of the contract, and that said job is now ready for acceptance:

Contract No. 2770 with Struss & McCoy for furnishing crushed gravel in stockpiles on the Redmond Section of the McKenzie, The Dalles-California, Ochoco and O'Neil Highways, in Crook and Deschutes Counties; completed April 15, 1947;

THEREFORE, BE IT RESOLVED that the work covered by said state highway contract for the construction of said state highway project be declared completed according to the terms of the respective contract, and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Commission had under discussion the appointment of Mr. Merle R. Chessman, former State Highway Commissioner, as a member of the Advisory Committee on Travel and Informational Matters. The Secretary presented a letter from Mr. Chessman stating his willingness to accept such an appointment if the Commission desires him to act in such capacity. Chairman Banfield and Commissioner Schaupp expressed themselves as pleased to have Mr. Chessman on this Committee and thereupon unanimously approved the appointment. The Secretary was instructed to notify Mr. Chessman of the action taken.

The Engineer brought up for discussion the matter of rescinding the action taken by the Commission during the wartime period establishing a 35-miles-per-hour speed zone along US99W through Camp Adair, particularly between Mile Post 74.10 and Mile Post 77.80. He advised that there no longer is need for such reduced speed limit and recommended appropriate action by the Commission to restore legal speeds along this section. The Commission approved the recommendation and, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, as a part of the war emergency, and upon the request of the military authorities, the Commission, on September 24, 1945, adopted a resolution establishing a 35-mile speed limit between Mile Post 74.10 and 77.80 on the Pacific Highway West; and

WHEREAS, the war emergency has ended and the Commission's Engineer has recommended that no reduced speed limit is necessary within said section.

NOW, THEREFORE, based upon the engineering and traffic investigation and upon the finding and determination of the Commission with respect thereto, the Com ission does hereby order that the resolution of September 24, 1945, fixing 35 miles as an established speed on Pacific Highway West between Mile Post 74.10 and Mile Post 77.80 be and the same hereby is rescinded.

Letters were presented from the City of Hillsboro and the Washington County Court suggesting action by the State Highway Commission to prohibit the truck-hauling of logs, poles, and/or piling over state highways during Saturday afternoons, Sundays, holidays, and during the hours of darkness, particularly on state highways leading to the coast, in order to safeguard other traffic of which there is a large volume during those periods. The Commission approved the suggestion by unanimous vote and instructed the Chief Counsel to prepare an appropriate resolution covering the matter. (The resolution was prepared and adopted by the Commission on the following day. See ahead for resolution.)

The Commission had under discussion a letter from Mr. Charles H. Reynolds, La Grande, inquiring, in behalf of the Union County Historical Society, whether the State Highway Department has any funds available that could be used for signing roads other than state or federal highways within Union County that the Society wishes to name after pioneers in order to preserve historical names. The Secretary was instructed to inform Mr. Reynolds that, while the Commission is in favor of spending state highway funds for such signing along state highway routes, it does not have funds that could be applied to maintain signs on other roads.

The Engineer presented a request from the C. D. Johnson Lumber Corporation for an easement over and across a portion of the right of way of the Oregon Coast Highway at the south end of the Yaquina Bay Bridge, Lincoln County, on which to construct a piling trestle footwalk for the convenience of workmen who are to be employed loading ships which the company expects to moore in Yaquina Bay a short distance upstream from the highway bridge. He also said that the company is asking authority for the workmen to park their automobiles on state property at the paved turn-around on the downstream side of the bridge structure. He read aloud a letter from the State Parks Superintendent offering no objections to such use of the state's property, subject to certain restrictions and conditions. As a result of discussion the Commission approved the request as a general proposition but deferred a definite decision relative thereto pending receipt of additional information as to the Corporation's plans, which the Engineer was instructed to report at the next meeting of the Commission. In the event the final plans meet

with the approval of the Engineer and the Chief Counsel, then the Commission will consider granting to the Corporation a revokable permit to occupy the state's property, which permit shall contain provisions to amply protect the state's interests.

A letter was presented from Mr. M. W. Skipworth, Attorney, Coos Bay, complaining of the noise created by heavy-duty trucks operating without mufflers in the business district of the City of Coos Bay, and asking that something be done to curb the disturbance. It was the thought of the Commission that this is a matter that is the proper function of the local police authorities. The letter was referred to the Chief Counsel to so inform Mr. Skipworth.

The Commission discussed the taking of formal action naming the Coos Bay Bridge on the Oregon Coast Highway the "C. B. McCullough Bridge" in honor of the late C. B. McCullough, former Bridge Engineer and Assistant State Highway Engineer, who designed it. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, C. B. McCullough gave of the fifty-nine years allotted to him for his use and disposal in this world twenty-seven of those years to the State of Oregon, during which time he, through his creative genius and because of his love for Oregon, her inviting streams, challenging mountains, and bewildering forests, built a collection of bridges which are the pride of the State and the admiration of all who have been and who will in the years to come be permitted to use and enjoy them; and

WHEREAS, his genius, and constructive public service, symbolized as they are in the imposing structures conceived, designed, and built during his life in Oregon, will endure so long as men travel Oregon's highways and cross the streams his structures span; and

WHEREAS, there have been expressed and recorded by the people of Oregon a desire and a recommendation that, in appreciation of the great contribution made by C. B. McCullough, as an engineer, a citizen, a friend, and a builder, not alone to the people of Oregon but to the entire nation, the bridge -- his bridge -- which spans Coos Bay, be designated and for all time known as the C. B. McCullough Bridge.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION:

1. That, in recognition and in appreciation of the great service which Mr. McCullough rendered the people of Oregon while serving as Bridge Engineer for the Oregon State Highway Commission, the bridge which spans Coos Bay in Coos County, Oregon, and which was planned and designed by him and constructed under his guiding genius, be and the said bridge hereby is designated and shall hereafter be known as the C. B. McCullough Bridge.

2. That a plaque made of appropriate material shall be prepared and permanently placed in an appropriate spot on said bridge, on which plaque there shall be carved the following:

McCULLOUGH BRIDGE

DEDICATED TO THE MEMORY

OF

CONDE BALCOM McCULLOUGH

WHOSE GENIUS AND INSPIRATION ARE

MANIFEST IN THE DESIGN OF THIS

BRIDGE AND MANY OTHER OREGON

BRIDGES DURING HIS PERIOD OF

SERVICE AS BRIDGE ENGINEER

AND ASSISTANT STATE HIGHWAY

ENGINEER, 1919 TO 1946

3. That, because of the faithful service rendered Oregon State College by Mr. McCullough while he served the institution as a member of its faculty, the College be requested to conduct appropriate ceremony in connection with the naming of the bridge and the placing thereon of the plaque.

4. That the Secretary to the Commission be instructed to mail to the President of said College a copy of this resolution.

5. That this resolution be entered in the minutes and records of the Commission as of the 14th day of May, 1947.

The Commission had under discussion the setting of a date for its next regular meeting and decided unanimously to hold such meeting in Portland on Monday and Tuesday, June 16 and 17, 1947. The Secretary was instructed to make the usual arrangements for the meeting place.

The Commission also discussed a date for its meeting in July and decided tentatively to hold such meeting on Tuesday and Wednesday, July 22 and 23, 1947, depending on whether or not Commissioner Chandler can be present at that time.

The Engineer reported briefly results of his conference with the members of the Hood River City Council and the County Court of Hood River County with respect to the adoption of a permanent location for the Columbia River Highway through the City of Hood River. He advised that the members of the City Council and the County Court expressed themselves unqualifiedly in behalf of the location proposed by the State Highway Commission and that it is his intention to submit a written report on the subject for consideration by the Commission at its next meeting.

In this connection Chairman Banfield requested that such report should show how this project, including the section immediately west of the City of Hood River, can be broken down into units to facilitate construction since funds are not available to do all of the work simultaneously. An overall picture of the work to be done from year to year until final completion and the minimum amount of work that can be accomplished in order to secure value from the investment. It was also the Commission's thought that the program when finally arranged should be brought to the attention of the Hood River City Council and the County Court of Hood River County for their information, and that an agreement, in writing, should be reached with such agencies before construction is started, and it was so ordered.

The request of Mr. Tom H. West, member of the Board of County Commissioners, Multnomah County, for widening North Vancouver Avenue from Union Avenue Junction south to Columbia Slough Road was discussed by the Commission. Chairman Banfield gave as his thought, after inspecting the premises, that the present roadway facilities are satisfactory to accomodate the traffic from the Portland Meadows Race Track, and, in his estimation, there is no apparent need to widen the highway between the race track road entrance and Columbia Slough Bridge. Commissioner Schaupp expressed himself similarly. In view thereof and of reports from the Engineer and the Chief Counsel, the Commission decided that the widening of Vancouver Avenue should be held up until such time as there is more apparent need for the improvement, and it was so ordered.

In this connection the Engineer pointed out that the present connection between Denver Avenue and Schmeer Road is abrupt and hazardous. The Board of County Commissioners, he said, is desirous of improving the condition by easing the turn and has asked the State Highway Department to join in the expense. He estimated that the state's share of the cost would not exceed $1,000 and recommended approval of the expenditure. The Commission approved the recommendation unanimously.

The Commission had under discussion a request from Mr. J. H. Massey, Waldport, for permission to remove sand from the ocean beach south of Yachats and a letter from Mr. C. S. Bagley, of the Delake Sand & Gravel Co., for per-

mission to take like materials from the beach at Delake. The Chief Counsel advised that the 1947 Legislature enacted a law which has a bearing on this subject, which law becomes effective in July of this year. He suggested, therefore, that the Commission defer a decision in the matter until that time. The Commission unanimously approved the suggestion.

In the further discussion of this matter the question arose who will secure the benefits of amounts paid for the sand that is taken from the beach, the State Land Board or the State Highway Commission. The Chief Counsel was instructed to discuss this matter with the attorney for the State Land Board and report the results thereof.

The Engineer reported the results of investigations concerning the request of the Official Board of the Church of Christ of Pleasant Hill that the pioneer monument now located adjacent to the highway at Pleasant Hill, which will have to be moved when the new highway is built, be re-established on the church grounds nearby. He advised that this monument consists of a replica of Elijah Bristow's cabin fireplace in guise of a drinking fountain and that the stones that were used were taken from the demolished fireplace. Elijah Bristow, he said, was a pioneer of 1846 who erected the first cabin in Lane County at Pleasant Hill and also organized the first church. He also was an officer in the Army during the Civil War and distinguished himself under Andrew Jackson at Teledaga; moreover, his sons were prominent in early Oregon history. He recommended, in view of these findings, that the fireplace be moved about 25 feet south to a location on this new highway right of way, and that a textboard be placed with the monument giving historic facts. He estimated the cost of moving it at $400. The Commission approved the recommendation unanimously, subject to concurrence by the committee which was appointed to advise on historic matters.

The Commission discussed a proposal of the City of Salem for the installation of traffic signals at three intersections on North Capitol Street, Salem, particularly at "D" Street, Market Street, and Fairgrounds Road. The Engineer estimated the cost of such installation at $10,000, of which amount, he said, the City of Salem has agreed to pay $5,000. Because of shortage of funds the Commission found it necessary to deny the request unless the Engineer can advise some very good reason why these signals should be installed.

The Engineer reported on the inquiry of County Commissioner R. W. Arens, Hood River County, as to the plans of the State Highway Commission for the future development of the Columbia River Highway east of Portland. He advised that, as previously instructed by the Commission, he has discussed this matter personally with Mr. Arens who expressed his satisfaction with the Commission's plans for this project. The Commission took no action.

The Commission discussed matters pertaining to the proposed rerouting of the Pacific Highway in the City of Eugene, being a cooperative project with the City of Eugene and Lane County, but deferred a definite decision with respect thereto until its next meeting. The Engineer and the Chief Counsel were instructed to report more fully on the matter at that time.

The Engineer reported on the request of the City of Gresham for additional improvements to the Mt. Hood Highway in Gresham in order to eliminate what they allege is a bottleneck condition which exists at the end of the section that was improved in 1946. Among other things, he advised that preliminary investigations indicate that the permanent highway will by-pass the section that the city wants improved, so the widening thereof as requested will be of no particular benefit from the state highway standpoint. In view of this report the Commission denied the request.

The Commission had under discussion a letter from Mr. J. R. Frum, Assistant Vice President, Crown Zellerbach Corporation, advising that the City of Canby wishes to maintain city "welcome" signs on the company's privately-owned structure which crosses over the Pacific Highway East just north of Canby, and requesting the attitude of the Highway Commission relative thereto. The Engineer pointed out that this structure is located within the wye connection between two railroad grade crossings; also, that the volume of traffic on this highway is large. It was his thought that the maintenance of these signs on the overhead structure would have a tendency to attract the attention of people traveling the highway and would invite accidents. The Commission concurred in the viewpoint of the Engineer and thereupon instructed the Secretary to inform Mr. Frum that the Commission could not approve the maintenance of the signs on this structure.

The Engineer reported a request from the City of Scappoose for the establishment of a "no parking" zone in front of the post office in that city and for establishment of two bus stops on the Lower Columbia River Highway in this city; also, the establishment of a log truck by-pass route via Williams Avenue and Second Street so as to take the logging trucks off the highway through the business district, and for authority to use certain state-owned land on the east side of the highway just north of Columbia Avenue for the off-street parking of automobiles.

In the discussion of the establishment of the log truck by-pass, the Commission could see no advantages to be gained from the state highway standpoint by establishing such by-pass route and accordingly refused to join with the city in the establishment of the route; moreover, the Commission considered that such matter is a local responsibility. The Secretary was instructed to advise the city accordingly and to state further that the Commission would offer no objections if the city elected to establish such by-pass on its own account.

As to the use of the state land for the off-street parking of automobiles the Commission considered that it would be unwise to allow the use of the property for such purpose because the business houses in Scappoose are all on the opposite side of the highway from such tract, and people who use the parking area would be obligated to cross this heavily-traveled highway in the face of highway traffic, and accidents very likely would occur. It was the thought of the Commission that a suitable location on the opposite side of the highway could be found. The request was thereupon denied, and the Secretary was instructed to inform the city accordingly.

The Engineer recommended approval of the city's request for the establishment of bus stops and a "no parking" zone in front of the post office The Commission approved the recommendation and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, the Columbia River Highway, (US30), passes through the City of Scappoose, Oregon, and

WHEREAS, said City is incorporated, is heavily populated and the business district therein congested with traffic, and

WHEREAS, it has come to the attention of the Commission and the Commission now finds that parking of motor vehicles on portions of the business area of said City is a hazard and menace to pedestrians, and particularly those pedestrians who patronize or intend to patronize common carriers of passengers operating on said highway, and

WHEREAS, the Commission has found that the prohibition of parking of motor vehicles in a sufficient area to permit the stopping and loading of common carriers at or adjacent to the curb or right of way lines will decrease the hazard and menace of motor vehicles to pedestrians,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of members being present and voting affirmatively, as follows:

1. That the parking of motor vehicles on the westerly side of the said Columbia River Highway for a distance of 50 feet southerly from a point located 36 feet south from the south curb line on Columbia Avenue in said City be and the same hereby is prohibited.

2. That the parking of motor vehicles on the easterly side of the said Columbia River Highway for a distance of 50 feet northerly from a point 4 feet north from the north line of Columbia Avenue in said City be and the same hereby is prohibited.

3. That the State Highway Engineer be and he hereby is directed to erect "no parking" signs in the areas above described, and to mark such areas as bus stops or bus loading zones. That the Engineer is further directed to do all necessary and proper painting to denote the zones above established.

4. This resolution shall be entered in the minutes and records of the Commission as of the 14th day of May, 1947.

WHEREAS, it has been represented by Fred H. Twohy, Chief Clerk of the Railway Mail Service, Portland, Oregon, that the parking of cars on the Lower Columbia River Highway in front of the entrance to the post office at Scappoose, Oregon, causes inconvenience to and interference with the movement of United States mails, and to remedy such situation this Commission has been requested to designate the highway in front of said post office as a "No Parking" area; and

WHEREAS, it is the opinion of this Commission that every reasonable and legitimate action should be taken which has for its purpose a speeding of the movement of United States mails, and this Commission is therefore of the opinion that parking in front of the post office entrance at said place should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of members being present and voting affirmatively, as follows:

1. That the entire area immediately in front of the post office at Scappoose, Oregon, be and said area hereby is declared closed to the parking of vehicles.

2. That the Engineer be and he hereby is instructed to install and thereafter maintain at points in front of said post office entrance where they will best serve the purpose of this resolution appropriate signs designating said area as a "No Parking" area and that in addition to such signs the curb line in front of said building be appropriately painted.

3. That this resolution be entered in the minutes and records of this Commission as of May 14th, 1947, and a certified copy thereof mailed to Mr. Fred H. Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, a certified copy to the City of Scappoose, and a like copy to the Superintendent of State Police.

The Commission had under discussion the selection of highways for Group I and Group II classifications to be used in connection with the issuance of permits under the so-called "big truck bill" which was enacted into law by the 1947 Legislature. It was pointed out that outstanding permits which were issued under wartime authority expire on July 1, 1947, and because of improvements that have been made in the highway system since the original Group I and Group II Highways were designated, it will be necessary to reclassify them for use in connection with these permits. Action on this matter was deferred by the Commission for consideration when Commissioner Ben R. Chandler is present. In the meantime the Chief Counsel was instructed to arrange with the State Police to honor outstanding permits of this type until new permits can be issued, which it is anticipated will be accomplished by August 1, 1947.

The Engineer reported the log-hauling violations committed by Elmer Claude High, Warrenton, involving overloading, laying out to avoid being weighed, talking abusively to weighmasters, and attempting to bribe the weighmaster. He also reported on log-hauling violations committed by Eugene Francis Gallagher, Lebanon, who operates under the name of Shamrock Logging Company. Mr. Gallagher's violations consist of overloading, by-passing the scales, and laying out in order to evade weighing. These matters were discussed at some length, but action thereon was deferred by the Commission until the following day. The Commission ordered that the weighmasters involved in both of these cases be present at that time to explain details. (This matter was reconsidered on the following day when the weighmasters were present and as a result of discussion the Commission ordered that a warning letter be sent to Mr. High to the effect that his permit would be permanently canceled if he does not comply with the rules and regulations. The Commission instructed the Secretary to request Mr. Gallagher to be present at the next meeting of the Commission to show cause why his permit should not be canceled. See ahead for additional paragraph.)

The Engineer submitted in writing a status report on highway finances showing comparisons between program allotments and contract authorizations for contracted projects in the Three Year Federal Aid and State Construction Programs. (See copy of report dated May 10, 1947, in general files for details.) He advised that he did not have sufficient time to prepare an accurate report for this meeting, but it is his intention to make a thorough analysis of the financial set up and to render such report at the earliest opportunity. As the result of discussion of this matter the Commission instructed the Engineer to re-arrange the program so as to fit the monies available by eliminating certain projects, if necessary, and by shortening others where practicable so as to avoid overruns and to include such information in his report on this subject.

The Engineer also brought up for discussion and recommended certain revisions in the State Construction Program by including therein certain projects that have been authorized by the Commission subsequent to the adoption of the original program by increasing allotments authorized by the Commission on other projects, and by eliminating five projects which apparently will have to be definitely abandoned. He presented a list of the revisions. Action on the matter was deferred until Commissioner Chandler is present.

The Engineer also submitted a report on the status of the minor betterment work authorizations for 1947. (See report dated May 9, 1947, in general files for details.) The Commission took no action on this report.

The Commission had under discussion the Engineer's written report dated May 13, 1947, with respect to unexpended balances of prewar Federal Aid funds. The Engineer advised that in order to induce the states to undertake the early advance planning of projects for postwar construction, the Federal Government, in 1943, authorized the states to use unexpended balances of such funds which were then available to finance survey and planning work, and under the authorization the Commission approved a survey program for 82 projects

which were estimated to cost $506,000, of which amount $314,000 represents Federal funds. Some of these surveys, he said, have been completed and others are under way, but of the total, 14 are for projects which were not included in the Three Year Construction Program. These surveys, he said, are estimated to cost $93,000. He suggested, in order that the Federal Aid money for surveys may not be tied up indefinitely and in order to avoid confusion in the collection of Federal Aid monies, that it would be advisable to eliminate these 14 surveys from the Program, together with additional surveys for which the state has not as yet received reimbursement from the Federal Government, totaling $381,000, and that such sum be expended for projects included in the State Construction Program. He suggested the following:

Project	Estimated Cost	Federal Share
Tyee Road-Sutherlin - surfacing	$100,000	$ 60,000
East Unit, Sams Valley Highway - grading and surfacing	$100,000	$ 60,000
Fremont Jct. - Muddy Creek Sec., Warner Valley Sec. Hwy. - grading and surfacing	$181,000	$110,000
TOTAL	$381,230	

This transfer, he said, would leave only $84,000 of Federal monies remaining to be collected on the survey program which could be readily accomplished because the surveys are completed; however, it would be necessary for the Commission to authorize the transfer of the three construction projects from the State Construction Program to the 1943 Federal Aid Secondary Highway Program with the understanding that a corresponding reduction would be made in the amount of the Federal Aid to be claimed in connection with the Federal Aid Survey Program. Following discussion, the Commission voted unanimously to retain the above-mentioned Warner Valley Secondary Highway project in the State Construction Program. Action on the other two projects was deferred for consideration when Commissioner Chandler is present.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon
May 15, 1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben H. Chandler was excused from attending this meeting.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p.m. in the same room:

ALSEA AND ALSEA-DEADWOOD HIGHWAYS IN BENTON AND LINCOLN COUNTIES
ALSEA ROCK PRODUCTION PROJECT

Oscar E. Joelson, Eugene	$ 52,800.00

MT. HOOD AND WAPINITIA HIGHWAYS IN CLACKAMAS AND WASCO COUNTIES
SANDY-WAPINITIA JUNCTION-CLEAR CREEK REOILING PROJECT

Pendleton Sand & Gravel Co., Pendleton	$ 43,983.25
Babler Bros., Portland	45,589.00
Harr & Horton, Portland	46,908.40
R. O. Dail, Portland	49,333.00
J. C. Compton Co., McMinnville	51,306.25
Edwin C. Gerber, Oregon City	51,883.00

SPRAGUE RIVER HIGHWAY IN KLAMATH COUNTY
CONSTRUCT THREE BRIDGES OVER SPRAGUE RIVER

No bids received

OREGON COAST HIGHWAY IN LINCOLN COUNTY
WALDPORT SECTION

No bids received

OREGON COAST HIGHWAY IN LINCOLN COUNTY
MINER CREEK-AGATE BEACH SECTION

	USING ASPHALT	USING TAR
Loyd Calkin, Ocean Lake (1)	$152.208.50	- - - - -

ENTERPRISE-LEWISTON HIGHWAY IN WALLOWA COUNTY
NORTH UNIT, WASHINGTON STATE LINE-BUFORD CREEK SECTION

Natt McDougall Co., Portland	$142,606.50
J. C. Papin, Baker	147,500.00
C. E. Oneal, Ellensburg, Wn.	149,051.30
Strong & MacDonald, Tacoma, Wn.	153,210.00

A group representing the St. Johns Businessmens Association appeared before the Commission and urged a survey for an access road leading from the Tualatin Valley to the St. Johns Bridge. This group was headed by Mr. E. F. Doyle and included Messrs. J. S. Galloway, Art Ames, and Matt Phil. Mr. Doyle explained that they are asking for a survey at this time to determine the feasibility of such a project with a view of getting it placed on the construction program at some future time. He urged such a road from the standpoint of diverting traffic from the business center of Portland. Chairman Banfield explained the status of the Commission's finances and the method used by the Commission in selecting projects for its construction program. He further advised that the Commission can give the group no encouragement for their project but will take it under advisement and may authorize the Engineer to make a reconnaissance survey later on if funds can be spared to finance it and an engineering crew is available.

The Commission by unanimous vote approved the minutes of the meeting held on April 22, 23 and 24, 1947.

The Commission resumed discussion of the matter of compensating field employees for expenses incurred while away from headquarters, which matter was first discussed on the previous day. Certain changes were suggested in the Engineer's letter on this subject. These were approved by the Commission and the Engineer was instructed to rewrite the letter and to present it to the Commission for final action at its next meeting, it being understood that whatever action is taken will be retroactive to May 1, 1947.

1947

The Commission discussed the matter of renewing the fire and marine insurance that is now carried on the ferry boats and the ferry terminals at Astoria, Oregon, and Megler, Washington. The Engineer advised that, as instructed by the Commission at the previous meeting, he has requested figures as to the cost to purchase such insurance from Lloyds of London so a comparison can be made with the cost of renewing the present insurance in the American companies which wrote it; however, as yet he has been unable to get any definite information, although indications are that it will be forthcoming within the next few days. He pointed out that the present insurance expires on June 1, 1947. This matter was discussed at considerable length, and, as a result thereof, the Commission instructed the Engineer to contact each Commissioner by telephone as soon as he has received the rates, at which time he will be given final instructions.

In this connection the Commission also discussed the matter of reporting accidents involving the ferry operation. The Commission ordered that hereafter the operators of the ferries should report conditions in writing and make additional reports in writing when the conditions have been remedied, in order to avoid possible misunderstandings later on.

The Commission resumed discussion of the log-hauling violations committed by Elmer Claude High, action on which was deferred from the previous day. Mr. Kelley J. Stanard, Weighmaster, was present and explained details. Following discussion, and in response to Chairman Banfield's request, Mr. Stanard recommended that a strong letter be sent to Mr. High, bringing to his attention the violations which caused his record to be brought to the attention of the Commission and warning him that a repetition of any of these offenses will result in the permanent cancellation of his P.U.C. permit. The Commission adopted the recommendation by unanimous vote, and so ordered.

Mr. George Davis, Weighmaster, was present regarding the log-hauling violations of Eugene Francis Gallagher, dba Shamrock Logging Company. He explained details with respect to these violations and declared that Mr. Gallagher is a consistent violator and troublemaker and should be penalized in some manner. As the result of discussion the Commission ordered that Mr. Gallagher be requested to appear before the Commission at its next meeting to show cause why his permit should not be canceled.

The Engineer requested authority from the Commission to advertise for sale the old ferry "North Beach" formerly used in connection with ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington. The question arose whether or not it would be a benefit to retain the engine in this ferry boat for future use. As the result of a full discussion of this matter the Commission authorized the taking of alternate bids for the sale of the ferry boat with and without the engine. A decision with respect to the sale of the engine will be made when the bids are studied.

The Commission recessed for luncheon at 11:45 a.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission discussed with the Engineer the bids received at the morning session, and the following action was taken by unanimous vote:

No bids were received for the following projects; the Engineer was authorized to re-advertise them for bids at a later date: Construction of three bridges over Sprague River on the Sprague River Highway, in Klamath County. Grade widening and bituminous macadam surfacing on the Waldport Section of the Oregon Coast Highway, in Lincoln County.

The Commission rejected the bids received for the following projects: Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton and Lincoln Counties. Grading and paving the Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah and Washington Counties.

The Commission accepted the bids for the following projects and awarded the contracts to the low bidder in each instance: Re-oiling Sandy-Wapinitia Junction-Clear Creek Section of the Mt. Hood and Wapinitia Highways, in Clackamas and Wasco Counties. Construction of a bridge over Trask River on the Netarts Secondary Highway, in Tillamook County. Grading, slide removal and roadbed finishing on the North Unit, Washington State Line-Buford Creek Section of the Enterprise-Lewiston Highway, in Wallowa County.

The Commission referred to the Engineer the bids for the following projects with authority to award the contracts to the low bidder in each instance when certain conditions have been satisfied: Regrading and bituminous macadam surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. Grading and bituminous macadam surfacing on the Ft. Hill Section of the Salmon River Highway, Polk County. Construction of a bridge over South Yamhill River on the Salmon River Highway near Valley Junction in Polk County. In the discussion of these last two projects the Commission considered the combination bids submitted therefor and the qualifying statements of the several contractors. As a result thereof, the Commission declared Lindstrom Bros., Portland, the low bidder for the bridge project and Stevenson Construction Co., Salem, the low bidder for the grading and surfacing project. The Engineer was instructed to take this into consideration in making the awards.

The Commission also discussed the bids received on April 24, 1947, for the construction of a ferry boat for operation across the Columbia River between Astoria, Oregon, and Megler, Washington, together with the supplemental offer of the Albina Engine and Machine Works agreeing to furnish a ferry boat with a guaranteed speed of 10 knots per hour if allowed extra compensation in the amount of $28,000. The Engineer presented letters from the City of Astoria, Clatsop County Court, and Captain F. B. Elfving, expressing agreement with the plans of the Commission with respect to construction of a new ferry terminal in Astoria. The Commission considered that these letters satisfy its requirements and thereupon accepted the bid and supplemental offer of the Albina Engine and Machine Works for construction of the new ferry boat. The Engineer was authorized to award this contract to the Albina Engine and Machine Works on the basis of its said bid submitted April 24, 1947, as supplemented by its

letter of May 12, 1947, guaranteeing a speed of 10 knots per hour, totaling $458,323.

At 2:30 p.m. Chairman Banfield publicly announced the awards as follows:

"Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton and Lincoln Counties. The Commission received only one bid for this project, being that of Oscar E. Joelson, Eugene, at $52,800. The bid has been rejected.

"Recoiling a 44.13 miles section of the Sandy-Wapinitia Junction-Clear Creek Section of the Mt. Hood and Wapinitia Highways, in Clackamas and Wasco Counties. Pendleton Sand and Gravel Co., Pendleton, submitted the low bid for this work at $43,983.25. The next low bid was that submitted by Babler Bros., Portland, at $45,589. There were four higher bidders. The Commission has awarded this contract to the low bidder, Pendleton Sand and Gravel Co., at its bid price.

"The Commission received no bids for construction of three bridges over the Sprague River on the Sprague River Highway, in Klamath County.

"The Commission received no bids for grade widening and bituminous macadam surfacing on the Waldport Section of the Oregon Coast Highway, in Lincoln County.

"Regrading and bituminous macadam surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. Loyd Calkins, Oceanlake, submitted the low bid for this project in the amount of $152,208.50, based on the use of asphalt. Mr. Calkins qualified his bid by stating that he would accept the award of only one contract at this letting. The second low bid was submitted by J. S. Risley, Milwaukie, at $157,709.50, based on the use of asphalt. There were six higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and paving the Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah and Washington Counties. Parker-Schram Co., Portland, submitted the low bid for this project in the amount of $236,675.00. Porter W. Yett, Portland, submitted the next low bid in the amount of $241,682.50. The third low, and only other, bid was that of Warren Northwest, Inc., Portland, at $251,482.50. All of these bids were submitted on the basis of using asphalt. The Commission considers the bids too high and has rejected them.

"Construction of a 100-foot steel pony truss span on concrete piers over the Trask River on the Netarts Secondary Highway near Tillamook, Tillamook County. Bids were received for two alternates -- (A) concrete slab deck (B) treated wood deck with concrete wearing surface. VaDare Construction Company, Portland, submitted the low bid for

this project based on Alternate (A) in the amount of $101,120. They submitted no bid on Alternate (B). They stated that they would not accept more than one project upon which they submitted bids at this letting. Tom Lillebo, Reedsport, submitted the next low, and only other, bid in the amount of $120,698 based on Alternate (A). He also submitted no bid on Alternate (B). The Commission has awarded this contract to the low bidder, VaDare Construction Co., at its bid price.

"Grading and bituminous macadam surfacing on the Ft. Hill Section of the Salmon River Highway, Polk County. Stevenson Construction Co., Salem, submitted the low bid for this work in the amount of $46,341, based on the use of asphalt. Loyd Calkins, Oceanlake, submitted the next low bid in the amount of $46,378, using asphalt. There were five higher bidders. Bids submitted for this project were considered in combination with bids received for the construction of the bridge over the South Yamhill River at this point. VaDare Construction Co., Portland, submitted the low bid for the bridge project at $56,700. This Company qualified its bid by stating that it would accept the award of only one contract at this letting. Because it has already been awarded the contract for the construction of the Trask River Bridge near Tillamook, the bid for the South Yamhill River Bridge Project cannot be considered. C. J. Montag & Son, Portland, submitted the second low bid for the bridge project in the amount of $60,130. They qualified their bid by stating that they would not accept this project unless also awarded the contract for the Ft. Hill Grading and Surfacing Project. Lindstrom Bros., Portland, submitted the third low bid, without qualifications, at $60,880. There were three higher bidders. A study of the bids for both projects reveals that the combination bids of Stevenson Construction Co. at $46,341, for the grading and surfacing project, and of Lindstrom Bros., at $60,880, for the bridge job, to be the lowest combination bid received. The Commission therefore has referred the bids to the Engineer with authority to award the contract for the grading and surfacing project to Stevenson Construction Company and to award the contract for the bridge project to Lindstrom Bros. on the basis of its combination bid for these two contracts, when certain conditions have been satisfied.

"Grading, slide removal, and roadbed finishing on the North Unit, Washington State Line-Buford Creek Section of the Enterprise-Lewiston Highway, in Wallowa County. Natt McDougall Co., Portland, submitted the low bid for this job in the amount of $142,606.50. J. C. Papin, Baker, submitted the next low bid in the amount of $147,500. There were two higher bidders. The Commission has awarded this contract to the low bidder, Natt McDougall Co., at its bid price."

Chairman Banfield also publicly announced the action taken by the Commission on the bids received on April 24, 1947, for construction of a ferry boat for operation across the Columbia River at Astoria. He advised that the proposal submitted by Albina Engine and Machine Works, as supplemented by the offer contained in its subsequent letter of May 12, 1947, guaranteeing

a ten-knot speed for this boat if allowed extra compensation, has been accepted by the Commission, which has referred the bids to the Engineer with authority to award the contract to the Albina Engine and Machine Works on such basis.

The Engineer reported the refusal of contractor C. J. Eldon to perform the work required of him in connection with Contract No. 2792, Waldport Rock Production Project on the Oregon Coast and Alsea Highways, which was awarded to him by the Commission on April 4, 1946, as the result of competitive bidding. Mr. Eldon, he said, alleges that there is not sufficient rock to fulfill the requirements from the sources specified by the state; also that he has already spent $7,000 in connection with this contract, which he now wants canceled, and wants to be reimbursed for this expense. The Engineer further advised that a certain logging contractor, who is operating in the vicinity, is interested in the matter and would like to take over Mr. Eldon's contract at his bid price because he considers that the sources specified by the state contain plenty of rock to satisfy the requirements. The Engineer suggested that the Commission declare Mr. Eldon in default and authorize arrangements for the work to be done by this logging contractor. As a result of considerable discussion the Commission referred the matter back to the Engineer and the Chief Counsel to follow through if the Chief Counsel determines that by his actions Mr. Eldon should be declared in default. The Chief Counsel was instructed to communicate his findings to the Commission by telephone, at which time he will be given further instructions. The Engineer was instructed to direct a letter to the members of the Commission setting forth facts in detail in order to comply with the provisions of the contract with respect to situations of this kind.

Responding to instructions of the Commission on the previous day, the Chief Counsel presented for the Commission's consideration a form of resolution prohibiting the truck-hauling of logs, poles, and/or piling over state highways during Saturday afternoons, Sundays, holidays, and during hours of darkness. The Commission adopted the resolution, as follows, by unanimous vote, and instructed the Secretary to send a certified copy of it to the Public Utilities Commissioner with a request that it be put into immediate effect:

> WHEREAS, in response to a request made by the Public Utilities Commissioner within the meaning and provisions of Section 115-513, O. C. L. A., the Highway Commission submitted in writing recommendations and suggestions which in the opinion of the Commission should be imposed on special carriers when permits are issued to such carriers by the Public Utilities Commissioner for the hauling of logs, poles, and/or piling by motor vehicles over State highways; and
>
> WHEREAS, it has been brought to the attention of the Commission that in some instances such carriers are operating over State highways on Sundays, Saturdays, holidays, and during the hours of darkness; and

WHEREAS, it is the opinion of the Commission, based upon a record of highway accidents and on the advice of its Engineer, that in addition to the imposition of the recommendations and suggestions heretofore made to the Public Utilities Commissioner, there should be imposed, for the best interests of the general public, restrictions which will prohibit the hauling of logs, poles, and/or piling on State highways on Sundays, Saturdays, holidays, and during the hours of darkness.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, a majority of its members being present and voting affirmatively, as follows:

1. That the Commission does hereby find and declare, based upon accident records, public complaint, and the advice of its Engineer, the hauling of logs, poles, and/or piling on State highways on Sundays, Saturdays, holidays, and during the hours of darkness, creates an unnecessary hazard and inconvenience to the motoring public, and therefore, in the opinion of the Commission restrictions should be imposed on special carriers operating over State highways for the transportation of logs, poles, and/or piling prohibiting the use of highways for such purpose at such times.

2. That the Highway Commission does hereby respectfully suggest and recommend to the Public Utilities Commissioner that in addition to recommendations and suggestions heretofore made, there be incorporated in permits issued to special carriers operating on State highways for the transportation of logs, poles, and/or piling, a provision, condition, and restriction, that no such operation shall take place on Sundays, Saturday afternoons, holidays, or between sunset and sunrise.

3. That the particular holidays to which this restriction should be applied are the following: New Years Day, Memorial Day, Independence Day, Labor Day, Armistice Day, Thanksgiving Day, and Christmas Day; and whenever any of said holidays fall on Sunday, then the following Monday shall be deemed the holiday.

4. That this resolution be entered in the minutes and records of the Commission as of May fifteen, and that the Secretary be instructed to deliver a certified copy of this resolution to the Public Utilities Commissioner and a like copy to the Superintendent of State Police.

The Engineer reported on the proposed revision of the Oregon Coast Highway at Otter Crest, Lincoln County. He estimated the cost to construct on the alignment originally proposed, which is 0.59 mile in length, at $166,000, and the cost to acquire right of way along such line, together with the land lying between this location and the existing highway, at $50,000, making a total of $216,000; and the cost to construct on a revised alignment nearer

the existing highway, 0.71 mile in length, at $210,500. The right of way on such revised alignment, he said, is estimated to cost $5,000, for a total of $215,500. Chairman Benfield gave as his thought, in view of this information, that the highway should be built on the originally-proposed alignment and that the state should acquire the land lying between such location and the existing highway, by condemnation if necessary, so as to preserve an unobstructed view of the ocean at this point. If such property cannot be acquired at reasonable cost, he said, then the Commission still has the prerogative of building on the alternate line if it so desires. Commissioner Schaupp expressed his concurrence in Chairman Benfield's viewpoint in the matter. The Commission made it clear that, in considering this matter now, it is making no commitment whatsoever as to construction of the project but is simply trying to arrange the right of way.

Mr. T. M. Davis, District Engineer of the Public Roads Administration, who was present, stated a preference for the "upper" or originally-proposed line for this improvement, however, he added that the Public Roads Administration will not object to the "lower" or alternate line if right of way for the other is too costly. He also stated that the Public Roads Administration would not want the ocean view obstructed if the Commission finally decides to construct on the upper line. The Commission deferred a decision in the matter until its next meeting and instructed the Engineer and the Chief Counsel to report at such meeting the details as to the advantages of the originally-proposed line over the other.

In the discussion of this matter the question arose whether the "upper" or originally-proposed line passes through the residence of Mr. Badley who owns the land on this point. The Engineer advised that it does take in Mr. Badley's house, and he did not believe that the line could be revised to miss it. He was instructed by the Commission to give the matter further study and if possible to revise the alignment so as not to require this building to be disturbed.

The Engineer reported numerous requests for a reduced speed limit on the Junction City-Eugene Secondary Highway between the north city limits of Eugene and Ferndale Drive near Santa Clara, a distance of about three and one-half miles. He advised that this matter has been investigated by the Traffic Engineer, who recommends the establishment of a 40-miles-per-hour speed limit for this section, in which recommendation he concurs. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: .....Junction City - Eugene Highway.....

Highway number: .....223.....Route number: .....----.....

Location of Termini	Established speed
M.P. 9.36 Ferndale Drive to M.P. 12.65 (Eugene City Limits)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission considered, approved, and signed the following agreements, etc.:

Agreement with City of Corvallis covering installation and maintenance of two flashing beacons, one at Third and "A" and one at Third and Van Buren Streets, in Corvallis.

Agreement with Lincoln County covering abandonment of certain portions of the Siletz River-Newport Section of the Oregon Coast Highway, in Lincoln County.

Agreement with the Southern Pacific Company covering installation of flood lights at the railroad crossing of the Beaverton-Aurora Secondary Highway, near Tualatin, Washington County.

Amended agreement with City of Portland providing for use of city-state-owned property along Harbor Drive as a guest center.

Supplemental cooperative agreement with U.S. War Dept., Public Roads Administration, and U.S. Forest Service, covering relocation of North Santiam Highway around Detroit Damsite.

Compromise settlement agreement with Mr. and Mrs. E. H. Kelly, Prineville, covering acquisition of right of way for the Marks Creek-Summit Section of the Ochoco Highway, in Crook County.

Ground lease for stockpile site from W. W. Goode, et ux., located adjacent to the Pacific Highway at the junction with the Territorial Highway in the vicinity of Anlauf.

Project agreement No. FI-138 (4), with P.R.A., covering Johns-Wolf Creek Section of the Pacific Highway, Douglas and Josephine Counties.

Project agreement No. F -180 (22), with P.R.A., covering Circle Bridge-Summit Section of the Sunset Highway, Washington County.

Project Agreement No. F-186 (11), with P.R.A., covering Davies-North Plains Section of the Sunset Highway, Washington County.

Quitclaim deed conveying to K. E. Hamblin, F. I. Bristol, F. M. DeNeffe and L. E. Bufton, and the Silica Products Oregon Limited a parcel of land on the Eugene-Swisshome Highway, in Lane County, providing for return of properties taken through error in deed.

Bargain and sale deed conveying to P. T. Hobbs a parcel of land in Lots 10, 11, 12, and 13, Block 2, Kenton, Portland, providing for no access to N. Interstate Avenue.

Bargain and sale deed conveying to J. W. Ring and Clair E. Terry a parcel of land in Lots 5, 6, 7, and 8, Block 6 of Bunker Hill Addition in Coos Bay, Coos County.

Bargain and sale deed conveying to Carl Walther Lot 15, Block 15, Braemar Addition to Oceanlake, Lincoln County.

There being no further business to come before the Commission at this time the meeting adjourned at 3:00 p.m.

T H Banfield
Chairman

State Highway Engineer

A W Schaupp
Commissioner

H B Glaisyer
Secretary

Portland, Oregon
June 16, 1947

The State Highway Commission met in regular session at 9:00 a.m. in Room 715, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben R. Chandler was excused from attending this meeting.

1947

The State Parks Superintendent was present and reported on the following matters:

1. Offer of Mr. Arthur Hallgarth, Elgin, Oregon, to present to the state as a gift for park purposes 25 acres of land adjacent to the Weston-Elgin Secondary Highway about two miles west of Elgin. The Parks Superintendent advised that this tract consists of a strip of varying width extending along the highway for a considerable distance, and while it is a very fine tract and is suitable for recreational purposes, it does not fit into the state parks picture but is more in the nature of a park which should be under the control of either Wallowa County or the City of Elgin. In the discussion that followed the thought was expressed by the Commission that it should not promiscuously approve the acquisition, by donation or otherwise, of tracts for the State Parks System, because when once acquired the public expects the state to develop and maintain them, whereas sufficient funds are not available to finance the work, and it was so ordered. With regard to Mr. Hallgarth's offer the Commission ordered that a letter be directed to him thanking him for his generosity and advising him of the reasons why the Commission cannot accept the gift. It was also ordered that the suggestion be made to Mr. Hallgarth that he present the property to the City of Elgin or to Wallowa County so as to insure its preservation for the purpose he has in mind.

In this connection the State Parks Superintendent was instructed hereafter not to present to the Commission for approval as additions to the State Parks System any tract or offer unless he definitely intends to recommend its acquisition as a part of the State Parks System.

2. Proposed acquisition of park area in the Painted Hills District adjacent to the Ochoco Highway about 15 miles west of Mitchell, Wheeler County. The Commission's Chief Counsel reported on this matter on behalf of the State Parks Superintendent. He advised that, in conformity with instructions given him by the Commission at its April meeting, he prepared a form of deed to effect transfer of title from L. T. Howard to the state of the small tract containing 13.2 acres, embodying the ideas of the Commission as expressed at that time, and that this deed is now in the hands of the owners for acceptance and execution. He anticipated favorable action by the owners. The Commission approved the report and authorized the State Parks Superintendent to spend $1,500 for development of this tract if and when the transfer of title is completed.

3. Proposed park between Poe Valley and Lost River, Klamath County. The Parks Superintendent advised that there is nothing in particular to report on this matter except that he is still waiting for a final offer by Mr. Frank Z. Howard, Klamath Falls, who owns the tract. Commissioner Schaupp advised that it has not been possible to secure satisfactory settlement with Mr. Howard, in view of which he suggested that the matter be deleted from future agendas. Chairman Benfield concurred, and it was so ordered.

4. Report on operations of a concession at Vista House, Crown Point, on the Columbia River Highway, Multnomah County. At the request of the State Parks Superintendent the Secretary read aloud a report from Mr. Jack Flaucher, concessionnaire at this place, which reveals that during the period April 12 to May 31, 1947, his gross intake was $8,798.95, of which amount 10½, or $946.53, is payable to the state as per agreement. The Commission approved the report.

5. Betterment work in Catherine Creek State Park. The State Parks Superintendent requested authority to spend the sum of $200 for the removal of some old buildings in this park as a betterment proposition. He advised that there are sufficient funds set up in his budget to take care of this item. The Commission approved the request.

6. Reimbursement to J. A. Casey for expenditure of personal funds for improvements in Casey State Park. The Parks Superintendent advised that Mr. Casey spent a considerable amount of his own personal funds for development of this park as a "squatter" prior to the time that the area was acquired by the state, when he was appointed caretaker of the premises. He is now retiring as caretaker because of the State Retirement Law, and he is requesting reimbursement to the extent of $500 for improvements to the caretaker's house. He further stated that Mr. Casey has never been reimbursed for this expense, and he recommended payment of the claim, which represents only a small part of the amount that Mr. Casey invested in the park. The Commission approved the recommendation unanimously and ordered that a bill of sale be secured from Mr. Casey for the building.

The Chief Counsel reported the results of a condemnation case for the acquisition of wayside property containing 3.3 acres of land owned by E. C. Newall, et al, on the west side of the Oregon Coast Highway about six miles south of Newport. He advised that the jury in the case returned a verdict in the amount of $4,000, which is $240 above the state's high appraisal. He recommended acceptance of this verdict and acquisition of the property at the amount thereof, particularly because this is a key tract and will complet the wayside development in this area. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. DeSouza, requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended for each tract. Following careful consideration of each item the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the high ways hereinafter designated, it is and has been necessary to acquire prop erty for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers of bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

---

FOOTNOTE:

* Item 13627. The Commission approved purchase, from Mr. Charles Taylor, of a maintenance site, on the Hermiston Section of the Old Oregon Trail, for the sum of $1,200 as a result of a report rendered by the Engineer in support thereof, however, ordered that hereafter, in purchases of this kind, evidence supporting the acquisition shall be placed on the face of the resolution.

In the discussion of the foregoing resolution, the Commission also considered options secured for right of way needed for the proposed three-party project in Eugene. Action on these options was deferred by the Commission until negotiations have been completed for all the right of way required, it appearing to the Commission that the right of way is going to cost considerably more than was first contemplated and that the entire cost of the project to the state will greatly exceed the amount that the state agreed to contribute.

The Commission also discussed the matter of acquiring right of way from Jewell Bowman for the Steiwer Hill-Albany Section of the Pacific Highway East, Linn County, including waiver of access. The discussion revealed that this right of way is being acquired for a service road and that there are a number of other parcels involved. In view thereof, the Commission deferred action until all of the options have been obtained. The Engineer was instructed to render a complete report at the next meeting on the service road matter.

The Assistant Counsel, Mr. DeSouza, also requested authority to condemn certain properties that are needed for various highway improvements. He submitted a list of such properties, together with the amount that he recommended be offered for each tract, as follows:

		Recommended Offer
SHEEP CREEK HILL SECTION OF LITTLE SHEEP CREEK SECONDARY HIGHWAY		
13402	Harley Tucker	$450.00
LEBANON SECTION OF SANTIAM HIGHWAY		
13459	Mountain States Power Company and Crown Zellerbach Corporation	$125.00

(Con't)

		Recommended Offer
JOHNS-GLENDALE JUNCTION SECTION OF THE PACIFIC HIGHWAY		
12188	John Oldenberg, et al.	$4,100.00
CRANE-PRINCETON SECTION OF THE DIAMOND VALLEY SECONDARY HIGHWAY		
12823	Carrie Thompson	350.00
12824	O. E. Thompson	150.00
12805	B. E. Duncan	25.00
12815	Oregon & Western Colonization Co. and Harney Valley Farms, Inc.	75.00
13790	G. A. White	550.00

Following careful consideration, the Commission approved the recommendation and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach of hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1, U.S. Route No. 99) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Johns-Glendale Junction Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, be it and it hereby is resolved by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the property hereinafter described as Parcels Nos. 1 and 4 is needed and required for right of way purposes in connection with the construction and maintenance of the section of the Pacific Highway known and designated as the Johns-Glendale Junction Section; that the property hereinafter described as Parcel No. 2 is needed and required as a source for the acquisition and manufacture of roadbuilding materials; and that the property hereinafter described as Parcel No. 3 is needed and required as an approach or hauling road from the Pacific Highway to the source of materials described as Parcel No. 2, which said parcels of property are owned by John Oldenberg, et al., and are particularly described as follows:

Parcel No. 1 (Right of Way)

A parcel of land lying in the west one-half ($W\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 14, Township 32 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Oldenberg, Louis Oldenberg, George Oldenberg, Barend Oldenberg, Gerritt Oldenberg, William Oldenberg and Rena Vandermullen recorded in Book 88, Page 513, of Douglas County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 220 feet in width, 120 feet on the westerly side and 100 feet on the easterly side of the center line of the Pacific Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 81+34.87 to Station 88+81.15, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 81+34.87, opposite and 120 feet distant from which point the westerl. line of the said strip of land intersects a north and south line of said property; said point being 789.25 feet south and 263.98 feet east of the north quarter corner of Section 14, Township 32 South, Range 5 West, W. M.; thence South 29° 05' West a distance of 746.28 feet to Engineer's center line Station 88+81.15, opposite and 100 feet distant from which station the easterly line of said strip of land intersects the westerly line of said property.

The parcel of land to which this description applies contains 1.77 acres.

Parcel No. 2 (RoadBuilding Material Site)

A parcel of land lying in the southwest quarter ($SW\frac{1}{4}$) of the northwest quarter of Section 13 and the southeast quarter ($SE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 14, Township 32 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Oldenberg, Louis Oldenberg, George Older berg, Barend Oldenberg, Gerritt Oldenberg, William Oldenberg, and Rena Vandermullen recorded in Book 88, Page 513, of Douglas County Record of Deeds, the said parcel being described as follows:

Beginning at a point which is the southeast corner of said property, said point being 5.8 feet north and 396 feet west of the east quarter corner of Section 14, Township 32 South, Range 5 West, W.M.; thence along the easterly line of said property North 30° 28' East a distance of 781.4 feet and North 41° 17' East a distance of 70 feet; thence North 38° 55' West a distance of 42 feet; thence South 42° 43' 30" West a distance of 578.2 feet; thence South 39° 05' West a dis-

tance of 425.7 feet to the south line of said property; thence South 89° 10' East along the south line of said property a distance of 244.7 feet to the point of beginning.

The parcel of land to which this description applies contains 2.60 acres.

Parcel No. 3 (Hauling Road)

A parcel of land lying in the northeast quarter (NE¼) of Section 14, Township 32 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Oldenberg, Louis Oldenberg, George Oldenberg, Barend Oldenberg, Gerritt Oldenberg, William Oldenberg, and Rena Vandermullen recorded in Book 88, Page 513, of Douglas County Record of Deeds, the said parcel being described as follows:

A strip of land 30 feet in width, said strip of land being 15 feet on each side of the following described center line: beginning at a point on the proposed easterly right of way line of the Pacific Highway as said highway has been relocated over and across said property, said point being 100 feet distant easterly from (when measured at right angles to) the relocated center line of the Pacific Highway at Engineer's Station 85+15.86, said point also being 1170.8 feet south and 166.1 feet east of the north quarter corner of Section 14, Township 32 South, Range 5 West, W. M.; thence South 89° 48' East a distance of 1504.9 feet; thence South 36° 56' 30" East a distance of 727.2 feet; thence South 49° 08' 30" East a distance of 543.5 feet to a point on the northwesterly line of the proposed gravel bar site.

The parcel of land to which this description applies contains 1.91 acres.

Parcel No. 4 (Right of Way)

A parcel of land lying in the west half (W½) of the northeast quarter (NE¼) of Section 14, Township 32 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Oldenberg, Louis Oldenberg, George Oldenberg, Barend Oldenberg, Gerritt Oldenberg, William Oldenberg, and Rena Vandermullen recorded in Book 88, Page 513, of Douglas County Record of Deeds; the said parcel being all of that portion of the foregoing described property included in a strip of land 60 feet in width, which strip lies between the existing highway and Parcel 1 herein described, the southwesterly line of said strip being the southwesterly line of that tract of land which was conveyed by that certain deed to W. O. Condray recorded in Book 101, Page 379, of Douglas County Record of Deeds.

The parcel of land to which this description applies contains 0.01 acre.

2. That the section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury.

3. The Commission does hereby further find and declare that, in addition to the acquisition of the real property above described, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property herein described as Parcel No. 1 and the highway which is to be constructed thereover, except that a private access (hereby defined as the right to enter and leave the highway by the grantors, their heirs and assigns, for any purpose other than a commercial use of the adjoining property which caters to, invites, solicits from, or is dependent upon the users of the highway) for the use and benefit of the said owners or their heirs and assigns may be permitted and established on the east side of the highway at State Highway Engineer's Station 88+00, said access to be of a width of not to exceed twenty-five feet.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access to Parcel No. 1 except the above mentioned private access at Station 88+00, and in the event that no satisfactory agreement can be reached then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access to Parcel No. 1 except the above mentioned private access at Engineers Station 88+00.

6. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the sixteenth day of June, 1947.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifi-

cally set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Carrie Thompson, which property is located in the south half ($S\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) and the southeast quarter ($SE\frac{1}{4}$) of Section 13, Township 26 South, Range 33 East, and in Lot 2 of Section 18, Township 26 South, Range 34 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 12823, which property is being acquired for right of way purposes in connection with the Diamond Valley Secondary Highway; *

Real property owned by Oron E. Thompson, which property is located in Lot 3, Section 18, Township 26 South, Range 34 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3, and is further identified in the records of the Highway Commission as file R 12824, Parcel No. 2 being acquired for right of way purposes and Parcel No. 3 being acquired for procuring therefrom roadbuilding materials in connection with the Diamond Valley Secondary Highway; *

Real property owned by B. E. Duncan, which property is located in Lot 8 in the northeast quarter ($NE\frac{1}{4}$) of Section 12, Township 25 South, Range 33 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 12805, which property is being acquired for right of way purposes in connection with the Diamond Valley Secondar. Highway; *

Real property owned by Oregon and Western Colonization Company and Harney Valley Farms, Incorporated, which property is located in the west half ($W\frac{1}{2}$) of Section 31, Township 25 South, Range 34 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 12815, which property is being acquired for right of way purposes in connection with the Diamond Valley Secondary Highway; *

Real property owned by G. A. White, which property is located in the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 12 and the northeast quarter ($NE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 13, Township 26 South, Range 33 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 13790, which property is being acquired for right of way purposes in connection with the Diamond Valley Secondary Highway; *

Real property owned by Mountain States Power Company and Crown Zellerbach Corporation, which property is located in the City of Lebanon, Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 7 and 8, and is further identified in the records of the Highway Commission as file R 13459, which property is being acquired for right of way purposes in connection with the Santiam Highway; *

Real property owned by Harley Tucker, which property is located in Lots 1, 2, and 3 in Section 5, and the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 4, Township 3 South, Range 46 East, W. M., and the southwest quarter ($SW\frac{1}{4}$) and the southeast quarter ($SE\frac{1}{4}$) and the southeast quarter ($SE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 33, Township 2 South, Range 46 East, W. M., Wallowa County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as file R 13402, which property is being acquired for right of way purposes in connection with the Little Sheep Creek Secondary Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the sixteenth day of June, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 76, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission also discussed the matter of condemning property needed from Wilbur F. Badley for the proposed revision of the Oregon Coast Highway at Otter Crest, Lincoln County, but deferred action thereon until later in the session. (See ahead for further details.)

The Assistant Counsel, Mr. DeSouza, presented to the Commission the application of Mr. Robert C. Hogan, Prineville, to exchange a parcel of land containing 2.5 acres for 4.85 acres of state-owned land and a hauling road containing 0.4 acre which were acquired by the Commission from the Federal Land Bank of Spokane, in Crook County. He explained that Mr. Hogan desires to construct a golf course and the property which he wishes to secure from the Commission would be valuable for such purpose. The property which the state owns contains about 35,000 cubic yards of gravel, and there is more gravel in the new site, in addition to which there will be a shorter haul in the transportation of materials. After consideration the Commission unanimously approved the exchange.

The Chief Counsel submitted a written opinion with respect to the authority of the State Land Board to charge and collect royalty on sand and gravel when moved from the beds of navigable streams and used in the construction of highways, whether that construction work be done by the state with its own forces or under contract by private parties. (See letter directed to the Oregon State Highway Commission and dated June 5, 1947, in general

files for details.) Briefly, this opinion is to the effect that the Legislature has not conferred on the State Land Board authority to require the State Highway Commission to pay such royalty. The Chief Counsel advised that he has discussed this matter with the Attorney General, who is in agreement with this opinion, and that he has also discussed the matter with the Clerk of the State Land Board, who wants to secure the Attorney General's opinion before taking any action. The Commission took no action on the matter.

The Chief Counsel brought up for discussion the matter of closing a number of city streets in Klamath Falls where they intersect with the Klamath Falls-Malin Highway. He read aloud a letter from the city attorney suggesting the adoption of resolutions by the Highway Commission and the city to effect such closures, of which there are 24. The matter was discussed at some length, during which the question arose whether or not entrance to the highway at these points should be definitely prohibited. Suggestion was also made that it might be satisfactory to require all traffic to come to a stop before entering this highway and to allow only right-hand turns when entering. Chairman Banfield expressed himself in favor of "deadending" these streets and allowing no traffic to enter the highway from them, as a matter of principle and to avoid deviating from established policy. It was also pointed out in the discussion that to allow entrance to the highway at these points would cause a hazardous condition because of the volume of highway traffic. As a result of this discussion the Commission voted unanimously to "deadend" the streets. The following resolution with regard thereto was adopted by the Commission by unanimous vote with the understanding that the City of Klamath Falls would pay any costs that might be incurred as the result of such action:

> WHEREAS , the Highway Commission heretofore found and declared that in its opinion the streets which lead into, through and out of the corporate limits of Klamath Falls, over which streets the Highway Commission has routed State highway traffic leading from The Dalles-California Highway to the northerly city limits, to the easterly part of the city and to points on the Klamath Falls-Lakeview Highway and the Klamath Falls-Malin Highway, do not afford or make possible the construction of a modern highway adequate for the needs of existing and potential traffic, and
>
> WHEREAS, the Commission has heretofore selected and adopted a new route and proposes to construct and maintain thereover a highway of modern design, which in the judgment of the Commission will better serve present and future traffic needs and will promote the development of the city, and in all respects will more nearly conform to standards of highway construction approved by the Public Roads Administration, and
>
> WHEREAS, the City of Klamath Falls and Klamath County have in writing recognized the need for better highway and street facilities and accomodations to serve existing and potential traffic moving into, through and out of said city, and said city and county have expressed a desire to cooperate with the State in the accomplishment of a more modern transportation artery, and

WHEREAS, the route adopted by the Highway Commission over which to construct a modern thoroughfare intersects several existing streets of said City of Klamath Falls, and

WHEREAS, for the purpose of constructing said highway the State has acquired title to real properties necessary for right of way uses, and

WHEREAS, the character, volume and destination of traffic, which will in the opinion of the Commission use said highway, is such as to warrant the imposition of restrictions and controls on traffic entering at grade said new highway from existing streets, and

WHEREAS, a thorough investigation of traffic conditions and of physical surroundings has been made by the Commission, a study of which conditions has lead to the finding and conclusion that certain intersecting and intersected streets should be closed or deadended at the point where such street or streets intersect said new highway right of way and parkway, and

WHEREAS, the area or section of said city through which said new highway has been located is predominantly residential; now, therefore

BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the Commission does hereby find and declare that traffic conditions within and in the vicinity of Klamath Falls are such as to warrant and require the location and construction of a highway over a route which, under conditions which prevail, will make possible the construction of a highway which will provide needed convenience, safety and other accomodations for the motoring public.

2. That it is the purpose of the Highway Commission to construct and thereafter maintain on the route heretofore selected and adopted by the Commission, a highway of modern design, which route is generally defined as extending from a point which connects with the Klamath Falls-Lakeview Highway at or near Engineer's Station 226+00 and extends thence northwesterly over the most direct and feasible route to a connection with The Dalles-California Highway at or near Engineer's Station 78+00.

3. That after a study and investigation of traffic needs, giving due consideration to the volume, character and destination of traffic in said city and surrounding area, it is the judgment of the Commission and the Commission does hereby find and declare that the streets hereinafter enumerated should be closed or deadended at the point where said streets intersect or are intersected by the said proposed highway right of way and parkway.

4. The Commission does further find and declare that the closing or deadending of said streets at said points of intersection is necessary in order to provide safety for the general public, and does find and declare that the closing or deadending of said streets at said points of intersection will contribute to a more expeditious and more orderly movement of traffic.

5. That a certified copy of this resolution be delivered to the municipal authorities of the City of Klamath Falls and that said city, through its officers, be requested to initiate, comply with and conform to all existing city ordinances or charter provisions pertaining to the closing or deadending of said streets in said city, and that upon the completion of such procedure, the municipal authorities of the said city be requested to enter into a formal agreement with the State Highway Commission as provided for in Chapter 448, Laws of 1943.

6. That upon satisfactory showing by the municipal authorities of said city that the city has conformed to and complied with the provisions of said Chapter 448, Laws of 1943, the Commission's Chief Counsel be and he hereby is instructed to confer with the legal adviser of the City of Klamath Falls and together work out a mutual agreement within the meaning and purpose of said Chapter 448, Oregon Laws 1943, for execution by the municipal authorities of said city and the State of Oregon, by and through its State Highway Commission, covering the closing and deadending of the streets herein enumerated.

7. That the streets which intersect or are intersected by the said proposed highway, and which streets it is now proposed and contemplated be closed and deadended at the points of intersection, are the following:

VanNess Avenue	Earle Street
Hawthorn Street	Alameda Avenue
Lexington Avenue	Dolores Avenue
Henry Street	Erie Street
Lowell Street	Hillside Avenue
Lawrence Street	Herbert Street
Painter Street	Bond Street
Delmoro Street	Henderson Street
LeRoy Street	Laguna Street
Fremont Street	Sheldon Street
Manzanita Street	Wandling Street
Melrose Street	Henry Street
	Williams Avenue

That this resolution be entered in the minutes and records of the Commission as of the 16th day of June, 1947, and a duly certified copy of the same delivered to the Mayor of the City of Klamath Falls, a like certified copy delivered to the County Judge of Klamath County and a like certified copy delivered to the Public Roads Administration.

The Commission had under discussion a letter from the Chief Counsel dated June 6, 1947, concerning the inquiry of Hon. George Rossman, Chief Justice of the Oregon Supreme Court, as to the plans of the Commission for rerouting heavy traffic off North Capitol Street, Salem; also offering objections to the installation of a stop-and-go traffic signal at the intersection of North Capitol Street with "D" Street, in Salem, as proposed by the Salem City Council. It was the thought of the Commission that the matter of rerouting heavy traffic off North Capitol Street is the responsibility of the City of Salem, which has police power to enforce any ruling that it wishes to make, and the Commission ordered that Judge Rossman be so informed. The Commission deferred action on the matter of installing the traffic signal at the intersection of Capitol and "D" Streets until the following day when a delegation from Salem is to appear regarding such matter. (See ahead for final decision.)

The Chief Counsel brought up for discussion the law enacted by the 1947 Legislature which vests in the Highway Commission authority to establish a department or division known as the "State Parks Division"; also, in which the Commission is authorized to appoint a State Parks Superintendent and to promulgate rules and regulations covering the entire State Parks Department. The Commission deferred action on this matter until Commissioner Chandler is present.

The Chief Counsel reported that, in conformity with instructions giv him by the Commission, he has directed a letter to the U. S. Aeronautics Administration and to the Oregon State Board of Aeronautics with respect to the proposal of the U. S. Civil Aeronautics Administration to establish a minimum elevation of 15 feet for airplanes operating over public highways, in which letter he pointed out that the Commission is very definitely of the opinion that the operation of aircraft so close to the ground elevation where public highways are involved creates a hazard which should not be approved in any respect; also, in which he advises that the Highway Commission is of the definite opinion that provision should be made whereby airplanes are not, under any circumstances, to be flown over a public highway at an elevation of less than 30 feet. The Chief Counsel further advised that he has received a reply to this letter in which the Civil Aeronautics Authority states a willingness to consider revising its requirements in that respect if the 15-foot minimum clearance is objectionable to the State Highway Commission and will endeavor to work out a satisfactory solution. Following discussion, the Commission instructed the Chief Counsel to again inform the Civil Aeronautics Authorities that the State Highway Commission cannot agree to a 15-foot minimum clearance for such operations.

Consideration was given by the Commission to a report from the Chief Counsel regarding the encroachment of service station facilities belonging to Mr. Arthur Muller on The Dalles-California Highway at the town of Tygh Valley. It appears from the report that Mr. Muller's buildings burned and that he has replaced them on original foundations, notwithstanding that encroachment on the highway is involved and that he has been warned not to do so. In the discussion the question arose as to the hazard that would be created if the facilities were allowed to remain in such location. The matter was referred back to the Engineer for investigation and report at the next meeting.

The Chief Counsel presented the claim of Mr. and Mrs. C. S. Oslund for damages incurred by them in June 1946 on the Old Oregon Trail near Baker when their automobile was involved in an accident with equipment belonging to the State Highway Department, resulting in personal injury and property loss to the Oslunds. The Chief Counsel explained the details and gave as his opinion that the Highway Department is not liable in view of the circumstances of the case. He recommended that the claim be denied. The Commission unanimously approved the recommendation in view of the conditions and instructed the Chief Counsel to inform Mr. Oslund that the Commission does not feel it has any responsibility in the matter and, therefore, it cannot assume a liability belonging to someone else.

The Commission discussed a report from the Engineer concerning the burning of sawdust adjacent to the Columbia River Highway near Mile Post 93 by The Dalles Lumber Company. The smoke from the Company's operations drifts across the highway and obscures traffic vision, causing hazardous conditions. The Chief Counsel advised that he has already notified the Company of the hazard that its burning operations are causing to highway traffic and that it will be the Company's sole responsibility in the event an accident occurs. He was instructed by the Commission to again notify the Company if the condition is not corrected.

The Engineer reported the cost to purchase fire and marine insurance for the Astoria-Megler Ferry operation from Lloyds of London as compared with that furnished by American companies, as previously ordered by the Commission. He advised that the quotation received from Lloyds of London is $9,248.50 and that received from American companies is $9,173.75. He further reported that, in conformity with telephonic authority granted him by the Commission on May 23, he has ordered renewal of the former insurance in the American companies. He asked the Commission to confirm the action. The Commission by unanimous vote approved purchase of the insurance as reported.

In this connection the Engineer also reported on the cost to increase the amounts of the insurance coverage on hulls and machinery for the ferries "Tourist II" and "Tourist III", the present evaluations of these two vessels being far below the present replacement cost of each. He pointed out that the present coverage is $200,000 on each vessel, and advised that it can be raised to $500,000 on each vessel for an extra premium of $450, which would be paid by the State and the ferry contractor on a 50-50 basis. He recommended purchase of the extra insurance when the insurance now in force expires. The Commission approved the recommendation unanimously.

The Engineer reported on the request of the Umatilla County Court for an exchange of roads in the Federal Aid Secondary Highway System. It appears that the Adams-Thorn Hollow Road is now included in the Federal Aid Secondary Highway System, although no money has been set up to improve it, and that it also is included in the Umatilla County road-improvement program which the County plans to finance with money provided through the sale of bonds, whereas no such provision has been made for the improvement of the Helix-Holdman Junction County Road which the County also wants improved. It

also appears that the Helix-Holdman Junction Road is primarily a wheat hauling road and the County Court will be satisfied with an improved roadway 16 feet wide. The report was discussed at some length, but action on the matter was deferred until the next meeting. The Engineer was instructed to render a more detailed report at that time on the cost to improve the Helix-Holdman Junction Road.

The Engineer exhibited at this time a model of the proposed improvement of the Otter Crest Section of the Oregon Coast Highway. This was discussed by the Commission from the right of way and construction standpoints, but action thereon was deferred until later in the session. (See details ahead.)

The Engineer reported on the request presented by a delegation from Prineville at the meeting on April 22, 1947, for improvements to the O'Neil Secondary Highway, particularly short sections thereof where the delegation alleges hazardous conditions obtain. He advised that the worst conditions can be eliminated by the improvement of five short sections which will cost about $5,000, and recommended the expenditure. The Commission approved the recommendation unanimously.

The Commission also considered a report from the Engineer on the request of Charles A. Peters, Portland, to purchase part of the old right of way of the Columbia River Highway near Scappoose, being a section where the highway has been realigned. He advised that the matter has been investigated, and, in his opinion, the property should be retained by the Highway Department as a maintenance-material stockpile site since it is the only good site available in this vicinity. He recommended that the property not be sold to Mr. Peters. The Commission approved the recommendation.

In this connection it was pointed out by the Chief Counsel that Mr. Peters' primary reason for wanting to purchase the property was to keep people from dumping rubbish at this location and to prevent the parking of automobiles on the old roadway. The Commission instructed the Engineer to erect appropriate signs prohibiting the dumping of rubbish and to investigate the matter of installing gates at each end of the old road to keep out trespassers.

The Commission discussed the Engineer's letter dated May 28, 1947, being a report relative to construction projects built by State Highway Department forces. According to this report, there have been only three instances in recent years where state highway forces have performed work that was originally intended to be contracted and for which bids were received by the Commission, they being isolated projects which apparently did not interest contractors. The Engineer pointed out that a considerable saving in cost was effected; however, he explained that he is not recommending state force work as a general procedure because, in his estimation, the contract system has proven more satisfactory and has resulted, generally, in lower costs. The Commission took no action on the report.

The Commission also discussed a letter from the Engineer dated May 24, 1947, being a supplemental report on the request of the City of Salem for state aid in installing traffic signals at three street intersections on North Capitol Street (US99E), Salem. It was the thought of the Commission, duly expressed, that the state's cooperation in signal installation within the corporate limits of any city or town should be limited to locations that are state highway intersections and that in those instances the installation expense should be paid solely with state funds, and it was so ordered.

The matter of adoption of a survey for the proposed realignment of the Oregon Coast Highway at Otter Crest was discussed, being a resumption of the discussion begun earlier in the session. The Engineer advised that, as a result of further investigations, it has been found that by using a 12-degree curve in the alignment at the summit it would be possible to make an adequate connection to the present overlook and parking place; however, it would not be possible to avoid moving the residence of Mr. Badley, the owner of the property, although it would leave relatively level land above the highway for the relocation of his buildings. It was his thought that this plan would lessen the right of way cost, since it would eliminate Mr. Badley's contention that his business would be ruinted by the construction of a higher overlook, and that construction costs would be less than were the highway constructed either on the original plan or on the first-proposed alternate; also, that such alignment is an improvement over the original relocation from a scenic standpoint. He recommended adoption of this revised plan. Following considerable discussion, the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution approving the survey for such revised location:

> WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the Otter Crest Section of the Oregon Coast Highway, in Lincoln County, and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and
>
> WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and
>
> WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of members being present and affirmatively voting as follows:

1. That the survey of the Otter Crest Section of the Oregon Coast Highway, in Lincoln County, together with the map, which for identification purposes bears the map file No. 5B-8-3, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the sixteenth day of June, 1947.

The Commission then discussed the matter of acquiring the necessary right of way from Mr. Badley. The Chief Counsel was instructed to negotiate for the right of way and, if he is unable to reach a satisfactory settlement by so doing, to acquire the property by condemnation. He was further instructed to consult with the members of the Commission by telephone with respect to the amount that he should offer for the property in condemnation if necessary to take the matter into court. The following resolution authorizing condemnation of the property was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the Highway Commission by the provisions of Section 100-115, O. C. L. A., is authorized to select, establish, designate, construct, and maintain a system of state highways within the State of Oregon and is authorized to relocate, change, and realign said highways, or sections thereof; and

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway and/or for the

development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the section of the Oregon Coast Highway, which highway is otherwise identified as State Highway No. 9, extending from Rocky Creek to Wade Creek is in the opinion of the Commission inadequate as to alignment, curvature, design, grade, and other elements and factors to serve the needs of the motoring public, and the Commission is of the further opinion that said section of said highway should be relocated, realigned, redesigned, and reconstructed, to the end that a more modern thoroughfare may be made possible; and

WHEREAS, the State now owns, has developed, and is maintaining for public use, enjoyment, and convenience a park area known as Otter Crest Park, which said area and park are now reached and served by the said highway; and

WHEREAS, in response to instructions given by the State Highway Commission, the State Highway Engineer made or caused to be made a survey for the purpose of fixing and determining the relocation of said section of said highway and fixing and determining the area to be employed for park purposes, which said survey, both as to highway location and park, was submitted to and approved and adopted by the Commission; and

WHEREAS, it is the opinion of the Commission that said section of said highway should be relocated and constructed on and along the route and location fixed and defined by said survey and that the area described as park area should be acquired and developed for park or recreational uses;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, a majority of the members thereof being present and voting affirmatively, as follows:

1. That the Commission does hereby find and declare that it is necessary, in the interests of the general public, that the section of said Oregon Coast Highway which begins at Rocky Creek and ends at Wade Creek be relocated and realigned, and that said section of said highway be reconstructed along the route and location fixed and defined in said survey;

2. That the Commission does hereby further find and declare that the real property described on the attached sheets and designated as Parcel No. 1 is necessary for the proper location, construction, and maintenance of said section of said highway; *

3. That the real property described on the attached sheets and designated as Parcel No. 2 is necessary for the development and maintenance of a public park and recreational area and for the parking of automobiles; *

4. That the Commission does hereby further find and declare that the acquisition of both of said parcels of real property is necessary for the accomplishment of the purposes heretofore set forth;

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

6. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property;

7. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said properties described on the attached sheets, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners; *

8. That this resolution be entered in full in the minutes and records of this Commission as of the sixteenth day of June, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this

resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 77, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Engineer reported the results of the taking of bids in Salem on June 9, 1947, for the purchase of three buildings, one being located in Astoria, another on the Sunset Highway in Washington County, and the third on the Cornelius Pass Road in Multnomah County. He advised that only one bid was received for the building in Astoria, being that of Sigurd A. Edison at $300; that two bids were received for the purchase of the building on the Sunset Highway, being those of Robert K. Arrowsmith, Portland, at $100, and J. A. Muehle, Portland, at $1.97; however, no bids were received for the purchase of the building on the Cornelius Pass Road. The estimated value of the Astoria building, he said, is $300 and that of the building on the Sunset Highway, $150. He recommended acceptance of the high bid for each of these two buildings. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote. As to the building on the Cornelius Pass Road, the Chief Counsel requested, and the Commission approved, private negotiations for its sale.

The Secretary reported results of a search of the records for commitments relative to sidewalk construction along the Oregon Coast Highway in the town of Gardiner. He advised that a thorough search had been made in the Commission minutes and in the Right of Way Department records for any commitment that may have been made previously by the Commission, and only one can be found, that being a commitment made in connection with the securing of right of way from B. A. and Edna B. Surfling and Ellis J. Dolan, who own the only general merchandise store in the town and who are the sole distributors in this locality for Union Oil Company Products. The Chief Counsel requested an opportunity to discuss this sidewalk matter with James W. Ford, who appeared before the Commission at the April meeting with regard thereto, before the Commission takes final action whether or not to construct sidewalks, to secure his reaction in the event no sidewalks are constructed. The Commission approved the request and instructed the Chief Counsel and the Engineer to make a recommendation at that time.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The matter of securing cement needed for highway construction work was discussed by the Commission, it having been reported that contractors are having difficulties in completing their contracts within the specified time limits because of slow deliveries of this material. Chairman Banfield reported information received from the Oregon Portland Cement Company that it is in

position to furnish cement to highway contractors without delay, and, in the opinion of his informant, the reason why contractors are unable to secure cement is because, for the most part, they place their orders with out-of-state concerns which are unable to fill them expeditiously. The Commission instructed the Engineer to pass this information on to the contractors by letter.

The Engineer brought up for discussion the advisability of extending the Adrian-Caldwell Secondary Highway N o. 454 a distance of about three-quarters of a mile where this road parallels the Oregon-Idaho state line. He explained that the road is now located exactly on the state boundary line, one-half of it being in the State of Oregon and the other half in the State of Idaho. The portion of the road, he said, which lies wholly within the State of Idaho has been oiled for many years, and the State of Idaho has agreed to pay one-half the cost of oiling the three-quarter-mile section now under discussion if the State of Oregon will pay the balance. He gave as his thought, inasmuch as this road is isolated from Malheur County roads, being located in the only Oregon township which lies east of the Snake River, that it would be advisable to extend and improve the road as suggested, and, accordingly, he requested permission to negotiate with Malheur County with respect to including the road in the State Secondary Highway System and with the Idaho highway officials relative to the division of the cost to construct and maintain the road as a joint undertaking. He estimated that the total cost would not exceed $10,000 and recommended approval of the project by the Commission. The Commission approved the project by unanimous vote on the condition that the State of Idaho will pay one-half the expense of construction and maintenance. The Chief Counsel was instructed to prepare an appropriate agreement covering the matter in the event that satisfactory arrangements can be made with Malheur County and the State of Idaho.

The Engineer requested an increase of $200,000 in the amount budgeted for expenditure in 1947 for the purchase of rock and gravel for use in maintenance and betterment operations. He advised that, contrary to assumptions when the budget was prepared, material purchased from commercial operators is costing as much as 25 percent more than was estimated, and, in addition thereto, in order to effect savings, more material is being stockpiled in connection with construction projects than was anticipated. Following discussion the Commission voted unanimously to increase the amount of the budget as requested.

The Engineer also requested authority to increase the amounts budgeted for 1947 for certain items, as follows:

Purchase and betterment of equipment	$104,000
District Maintenance Superintendence	$ 20,000

He explained that the amount originally budgeted for the purchase and betterment of equipment included $200,000 for a new ferry boat at Astoria which actually is costing the state $458,323, leaving a deficit of $258,000, which he suggested could be made up by applying the $200,000 balance that is contained in the budget for purchase of other equipment, the expenditure of

which is unauthorized by the Commission to date, and by increasing the budgeted amount to make up the difference and an allowance of 10 percent for engineering and contingencies, making a total budget increase of $104,000. He further explained that the extra amount of $20,000 needed for district maintenance superintendence is to cover increases in rates of pay that have been granted subsequent to adoption of the original budget. It was the thought of the Commission that expense incident to the purchase of the new ferry should be kept entirely separate from the other equipment purchases, and accordingly, it was ordered by the Commission that a special account be set up for this purpose which would include only the actual cost of the ferry boat as contracted, the cost of designing the boat as per arrangements with Mr. L. R. Hussa of the Albina Engine and Machine Works, Inc., and the cost of inspections by the American Bureau of Shipping. The Commission approved increasing the budget in an amount sufficient to accomplish this purpose without decreasing the amount of $800,000 heretofore authorized for the purchase of other equipment. The Commission, by unanimous vote, also authorized increasing the budget in the amount of $20,000 for district maintenance superintendence as requested by the Engineer.

The Commission discussed and denied a request from the Wallowa School Board for widening the pavement on the Wallowa Lake Highway in front of their school house, it appearing from the report of the Engineer that if the city would require parallel parking along this street, which is now 40 feet wide from curb to curb, it would serve the purpose better and would provide greater safety to the public than a pavement 50 feet wide with angular parking; moreover, there are no funds available to finance the widening project, which is estimated to cost about $2,700.

In this connection the matter of requiring all cities and towns to adopt parallel parking ordinances was discussed by the Commission. The Chief Counsel advised that the Commission has authority to state the manner in which cars shall be parked along city streets that are state highway routes and to specify parallel parking if it so desires and if safety requires such type of parking. The Commission referred the matter to the Engineer and the Chief Counsel to commence action as may be necessary to secure the adoption of parallel parking ordinances in all cities and towns.

The Commission discussed a report from the Engineer on the request from the City of Oceanlake for the improvement of Raymond Street in that town from its junction with the Oregon Coast Highway to the beach. It appears that this street is about 800 feet in length and is the only street over which the public has access to the beach from the highway. The Engineer estimated the cost of the project at about $6,600. He pointed out that the city's share of state highway revenues for this year is $1,117.13 and that next year its allotment under the new law enacted by the 1947 Legislature will be $2,234.26. The Commission denied the request.

The Commission also considered and denied the request of O. C. Stanwood, Newport, for the designation and improvement as a state highway of a water-grade route between Newport and Toledo. The Commission ordered that Mr. Stanwood be informed that the Commission does not have funds avail-

able to finance such a project; moreover, a program has already been prepared and is now under way which takes up all available funds, and the Commission cannot consider commitments to new projects until this program has been completed.

A letter was presented from the City of Vale requesting the oiling of Washington Street throughout its entire length as an alternate highway route for truck traffic. The Commission referred this letter to the Chief Counsel with instructions to inform the city that the 1947 Legislature set aside the sum of $250,000 of State Tax Street Funds to be used by the State Highway Commission to finance the improvement of city streets which are not state highway routes and that the Commission will consider the request of the City of Vale along with others when setting up a program for the expenditure of such funds, but that is all the Commission can do.

The Engineer reported that the cities of Elgin, Jefferson, Jordan Valley, and Juntura have satisfied the legal requirements with respect to the expenditure of 1945 State Tax Street Funds which they received in 1946 and that the plans for the projects which these cities propose to finance with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Elgin -	$1,497.50
Jefferson - - - - - - - - - - - - - - - - - - -	719.46
Jordan Valley - - - - - - - - - - - - - - - - -	411.55
Juntura -	250.84

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Elgin - Grace Street, Fir Street, Pine Street, Elgin Street, Spruce Street, Elm Street

Jefferson - Third Street, Union Street

Jordan Valley - Blackaby Street, Oregon Avenue

Juntura - Hildah Street, Frances Street, 3rd Street, 6th Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3, previously adopted by the City of Jefferson, and approved by the State Highway Commission on April 4, 1946, shall be canceled, in accordance with the request of the City of Jefferson on file in the records of the State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the sixteenth day of June, 1947.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947 and that the plans for the several improvements proposed to be financed with such funds have been examined and found satisfactory:

Banks	Condon	Fairview	Lonerock
Boardman	Dufur	Florence	North Powder
Cascade Locks	Eagle Point	Gervais	Scio
Columbia City	Estacada	Ione	Yamhill

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Banks	$ 495.39
Boardman	220.62
Cascade Locks	1,409.95
Columbia City	655.84
Condon	1,716.81
Dufur	786.20
Eagle Point	904.53
Estacada	1,349.78
Fairview	611.71
Florence	1,213.40
Gervais	665.86
Ione	525.47
Lonerock	92.26
North Powder	754.11
Scio	703.97
Yamhill	838.35

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Banks - Wilkes Avenue, Parmley Street, Woodman Street

Boardman - Main Street

Cascade Locks - Edgewater Drive, Watts Avenue, First Street from Hazel Street to River Street, 6th Street, 5th Street 4th Street, 3rd Street, 1st Street, Moody Street, Water Street, Leavens Street, River Street, Hazel Street, also un-named streets as shown on map attached to Form 3

Columbia City - "I" Street

Condon - West Side: First three blocks of 3rd Street from Main, first three blocks of Well Street from Main, all of Frazier Street, all of Walnut Street, first four blocks of Gilliam Street West to East, all of Summit Street, all of Spring Street, first 3½ blocks of Court Street from Main, all of Bayard Street, first two blocks of Pennoyer from Main, first two blocks of Trimble from Main, Potter Street from Gilliam to Frazier, from 2nd all of Lincoln, Church Street from Trimble to Spring, Church Street from Summit to Walnut, Oregon Street from Pennoyer to Court, Oregon Street from Spring to Summit, Oregon Street from Gilliam to Well Street, Washington between Walnut and Gilliam. East Side: Gilliam Street from Main to Washington, Summit Street from Ward to East Street, Spring Street from Main to Washington, Ward Street from Spring to Gilliam, East Street from Spring to Walnut, Washington Street from Heppner Highway to Spring, Gilliam Street from Jefferson to McKinley, Summit Street from Jefferson to McKinley, Jefferson Street from Heppner Highway to Pennoyer, Jefferson Street from Spring to Summit, McKinley from Summit to Gilliam

Dufur - N. 4th Street, N. 2nd Street, N. 1st Street, Court Street, Klinger Street

Eagle Point - Hamilton Avenue

Estacada - 2nd Street, 5th Street, Zobrist Street

Fairview - All streets within city limits

Florence - Adams Street, 5th Street

Gervais - 5th Street

Ione - Second Street, "H" Street

Lonerock - "D" and 4th Streets, "C" and 4th Streets, 3rd and "C" Streets, 3rd and "B" Streets

North Powder -"G" Street (Also "E" Street, if funds permit)

Scio - West Street, Wheeler Street, Main Street, Mill Street Smith Street, North Street

Yamhill - First Street, Elm Street, Laurel Street, Olive Street, Third Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and record of the Commission the Secretary shall thereafter mail to the proper office in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the sixteenth day of June, 1947.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

Grading and bituminous macadam surfacing on the Ft. Hill Section of the Salmon River Highway, Polk County; bids received May 15, contract awarded May 20 to Stevenson Construction Co., low bidder

Construction of a bridge over the South Yamhill River on the Salmon River Highway near Valley Junction; bids received May 15, contract awarded May 20 to Lindstrom Bros., low bidder

Grading and bituminous macadam surfacing on the Miner Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County; bids received May 15, contract awarded June 9 to Loyd Calkins, low bidder

Constructing, furnishing, and delivering a ferry boat for use across the Columbia River at Astoria; original bids received April 24, supplemental offer received May 12, contract awarded May 22 to Albina Engine and Machine Works, Inc., on basis of original bid and supplemental offer

The Commission by unanimous vote approved the awards of these contracts as reported.

The Engineer presented for the Commission's approval surveys completed for the following improvements:

(1) Gunnel Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, Josephine County

(2) Cascade Locks-Mosier Section of the Columbia River Highway, Hood River County

Action on the Gunnel Road-Robertson Bridge survey was deferred by the Commission until the next meeting because of the possibilities of a change being requested by the Public Roads Administration. The Commission approved the Cascade Locks-Mosier survey and by unanimous vote adopted the following resolution with regard thereto, it being understood that by so doing the Commission is making no commitment whatsoever as to construction of this section:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the Cascade Locks-Mosier Section of the Columbia River Highway, in Hood River and Wasco Counties, and in connection therewith to prepare a map showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Cascade Locks-Mosier Section of the Columbia River Highway, in Hood River and Wasco Counties, together with the map, which for identification purposes bears the map file No. 6B-24-12, field notes, and other engineering data submitted by the Engineer hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the sixteenth day of June, 1947.

The Commission had under discussion the matter of extending the time limit for completion of highway contracts in cases where contractors fail to complete their work within the specified time limit. In the discussion Chairman Banfield pointed out that the Commission, during the wartime

period, followed the Engineer's recommendation in every instance and approved, without penalty, all requests for additional time within which to complete jo particularly because labor and materials were difficult to obtain; however, th conditions which prompted such consideration have changed and, in his estimation, the Commission should be more strict and should inflict penalties unless contractors can give some extremely good reason for failure to complete their work within the designated period. Mr. W. H. Lynch, Division Engineer, Public Roads Administration, was present and expressed as his opinion that the Commission should be more strict in passing on requests for extensions of time. The matter was discussed at some length, and as a result thereof the Commission instructed the Engineer to send an appropriate notice to all the contractors that hereafter they will be expected to complete their projects within the tim limit specified in their contracts and if they do not do so the Commission wil penalize them as provided for in the contract provisions, unless a very good reason is given for overrunning the specified time limit. The requests for extensions of time which were to be considered by the Commission at this time were referred back to the Engineer for additional information and report on th following day.

The Commission had under discussion the matter of establishing a 40-hour week for the State Highway Department employees in conformity with the ruling of the Civil Service Commission, and in connection therewith had the benefit of a letter from the Chief Counsel to Chairman Banfield, dated June 7, 1947, and a letter from the State Highway Engineer directed to the Oregon State Highway Commission, dated June 7, 1947. Briefly, the Chief Counsel gave as his opinion that "1. The Civil Service Commission cannot say to the Highway Commission that its offices shall be open five days a week. 2. The Civil Service Commission cannot say to the Highway Commission that its offices shall remain open five days a week with a skeleton group Saturday forenoon. 3. The Civil Service Commission can prepare a compensation plan predicated on a forty hour week. 4. If employees are paid on the basis of a compensation plan approved by the Civil Service Commission and are required to work more than forty hours a week, they may request pay for the hours in excess of forty hours. 5. The adoption of a forty-hour week with skeleton crews for Saturday forenoon is a matter of policy which I believe should be determined by the Legislature, and if not determined by the Legislature, may be determined by the Governor and the several administrative branches of State government." The Engineer pointed out in his letter that the Civil Service Commission has authorized longer work weeks for certain state highway operations because of their seasonal nature, requiring extra hours of work. Such authority, he said has been granted for a 44-hour week for section maintenance crews, Park Department field crews, equipment shop crews and Sign Department crews, and a 48-hour week for traffic line crews, paving plant and oiling crews, bridge crews, extra gang crews, drawbridge operation crews, ferry operation crews, and shop watchmen. He added that a 40-hour week was fixed for all other State Highway Department employees. He recommended adoption of such schedule for all employees of the State Highway Department, except, perhaps, those in the Travel and Information Department, which might require a skeleton crew to operate on Saturday mornings. (See copies of the letters of the Chief Counsel and the Engineer in the general files for details.) This matter was discussed at considerable length, and as a result thereof, the Commission referred it back

to the Engineer and the Chief Counsel to place in effect in conformity with their best judgment, it being strictly understood, however, that no extra pay will be allowed for overtime work.

The Commission also discussed the adoption of a regulation relating to the per diem allowance for the field engineering crews. The Engineer presented a circular letter which he had prepared on this subject in conformity with ideas expressed by the Commission at the previous meeting. The Commission approved the latter by unanimous vote, it appearing to the Commission that it covers the situation satisfactorily. (See circular letter No. 501 in general files for details.)

Mr. Charles H. Reynolds, La Grande, President, Old Oregon Trail Association, came before the Commission with regard to the Elgin-Boswell Section of the Wallowa Lake Highway. He particularly referred to a petition of residents of this vicinity objecting to the realignment of the highway as proposed by the state and in this connection advised that subsequent inquiry reveals that all but two of the petitioners misunderstood the meaning of the petition when they signed, but now all but the two referred to are in favor of the improvement as planned; moreover, the La Grande Chamber of Commerce favors the new route and desires the Highway Commission to overrule the objections and proceed as originally planned. He was informed that the matter would be taken under advisement. (See minute entry on following day for the Commission's final decision with respect to this matter.)

Mr. Reynolds also suggested the construction of more four-lane highways and bridges, which he considered a necessity because of the increase in traffic volume, and the sale of bonds in the next couple of years to finance the work, if necessary. Chairman Banfield pointed out that the 1947 Legislature authorized an Interim Committee to study the highway situation as a whole, and he suggested that it would be proper for Mr. Reynolds and his associates to bring the matter to the attention of the Committee members. Mr. Reynolds agreed to do that.

The Engineer presented a communication from Mr. Harry S. Schenk, Deputy Secretary of State, with regard to the transmittal of certain statistical data relating to motor vehicle accidents, the coding and analyzing of which is now performed by the Highway Department Traffic Engineer. He advised that it will be necessary to employ three additional clerks to keep the reports up to date and to increase the budget in the amount of $4,000 to pay the expense involved, making a total budgeted amount of $30,250. He urgently requested approval of this increase. The Chief Counsel advised that the Secretary of State is required by law to perform this function, and if he does it, the cost involved will be paid out of state highway funds before they are turned over to the State Highway Department. It was his thought, in view of the fact that state highway funds will be used to finance the proposition regardless of who does the work, that it would be performed better and cheaper if done by the State Highway Department. The members of the Commission expressed themselves as not being in favor of spending state highway funds for this purpose; however, in view of the fact that the law requires the statistics to be kept, voted unanimously in favor of the project and authorized an increase in the budget for this item in the amount recommended by the Engineer.

The Commission had under discussion the matter of designating reduced speed zones at the following locations:

(1) Pacific Highway East just north of Eugene

(2) Sunset-Tualatin Valley Highway between Portland and Beaverton

(3) Pacific Highway East north of Albany

Action on this matter was deferred by the Commission until Commissioner Chandler is present. The Engineer was instructed to render a detailed report, in writing, with respect to each location prior to the Commission's next meeting.

A request was presented from Fire Chief Roble, of the City of Salem, for the installation of a traffic signal on State Street (ORE222) at its intersection with 18th Street, which is near one of the city's fire stations. The Engineer estimated the cost of such installation at $200. The Commission denied the request, it being considered purely a city matter.

The Commission also considered a request from the City of Yamhill for the installation of a traffic signal at the intersection of two state highways in this town --- Maple Street (ORE29) and Main Street (ORE151). The Engineer recommended approval of this installation, which he estimated would cost about $200, on the condition that the City of Yamhill will pay for the electrical energy to operate the signal. The Commission approved the recommendation unanimously.

A request was presented from the City of Nehalem for the establishment of a "no parking" zone on the Oregon Coast Highway in front of the Nehalem Post Office. The Engineer recommended approval of this request as being in accordance with established policy. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Oregon Coast Highway, otherwise designated as U.S. Highway 101, as routed through the City of Nehalem, Tillamook County, passes in front of the U. S. Post Office and,

WHEREAS, it has been reported to the Highway Commission by George Wright, mail carrier, that the parking of motor vehicles in front of said Post Office seriously interferes with the movement of U. S. Mails and the Commission has therefore been requested to designate and establish the highway frontage in front of said Post Office as a "No Parking" area, and

WHEREAS, it is the judgment of the Commission that every reasonable and legitimate action should be taken having for its object the speeding of the movement of U. S. Mails.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of members being present and voting affirmatively as follows:

1. That the highway area in front of the Post Office in the City of Nehalem, Oregon, (as set forth on Highway Commission Drawing attached hereto, and by this reference made a part hereof) be and the same hereby is declared a "No Parking" area and parking of motor vehicles within said area is prohibited provided that this prohibition shall not apply to motor vehicles operated by the United States or its contractors and engaged in the carrying of U. S. Mails. *

2. That the Engineer hereby is instructed to erect and thereafter maintain in said area "No Parking" signs. He is further instructed to paint, in a conventional manner and color, the curb lines with the limits of the "No Parking" area.

3. That this resolution be entered in the minutes and records of the Commission as of the sixteenth day of June, 1947, and duly certified copies thereof mailed to the Superintendent of State Police, Fred Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, and George Wright, Mail Carrier, Nehalem.

FOOTNOTE:

* The drawing mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 22, under the heading "No Parking - Bus Stop Resolutions" and said drawing by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Engineer requested authority to re-arrange the system of stop signs at the intersection of Columbia Boulevard and N.E. Killingsworth Avenue, in Portland. He advised that the greater volume of traffic entering this intersection comes from N.E. Killingsworth Street, which is a by-pass route for US30, but, according to the present arrangement of signs, this traffic is required to stop before entering the intersection, whereas traffic from Columbia Boulevard enters the intersection without stopping. It was his thought that the signs should be reversed, and he so recommended. The Commission approved the recommendation.

The Commission discussed the form of resolution prepared by the Chief Counsel with respect to the granting of special permits for movements over state highways of vehicle combinations weighing in excess of the statutory weight limits and having an overall length of 60 feet. The Chief Counsel advised that this resolution was prepared in conformity with instructions of the Commission at the previous meeting, and its purpose is to legalize, until

September 1, 1947, such operations that are now covered by permits expiring on July 1, 1947. Following discussion the Commission approved the resolution by unanimous vote, as follows:

WHEREAS, because of war and other emergencies and because of road conditions the Oregon Legislature when in session in 1943 enacted Chapter 266, Oregon Laws 1943, by which the Highway Commission, with the approval of the Governor, was authorized to issue permits for the movement over state highways of vehicles or combination of vehicles having a length and combined and gross weight in excess of all statutory limitations. which act by its terms expired on July 1, 1945, and permits issued thereunder likewise automatically expired as of said date; and

WHEREAS, the Legislature, when in session in 1945, by the enactment of Chapter 88, Oregon Laws 1945, extended the life of said 1943 act and made the expiration date thereof July 1, 1947; and

WHEREAS, within the meaning and purpose of said acts the Highway Commission, with the approval of the Governor, issued approximately 3,000 permits, all of which by virtue of said 1945 act and the provisions of said permits will expire on July 1, 1947; and

WHEREAS, the Legislature when in session in 1947 enacted Chapter 156, Oregon Laws 1947, by which the Highway Commission is authorized to issue new permits or re-issue permits issued pursuant to said Chapter 266, Oregon Laws 1943, as amended by Chapter 88, Oregon Laws 1945, and make the termination or expiration date of the same subject to the order and discretion of the Highway Commission; and

WHEREAS, all permittees now holding permits issued pursuant to Chapter 88, Oregon Laws 1945, have applied for permits under the provisions of Chapter 156, Oregon Laws 1947, which applications will, so far as is known to the Commission at this time, be granted, and permits in proper form issued, but because of the large number of such applications and because of an acute shortage of clerical help it is quite impossible to prepare and execute permits for all of such applicants before September 1, 1947; and

WHEREAS, the transportation of property for hire over the highways of the State will, through no fault of the operators, be serious impaired and the public seriously inconvenienced if those engaged in the transportation of property by motor vehicle are denied the right to use the public highways until permits can be issued under the provisions of said act of 1947; and

WHEREAS, it is the opinion of the Commission that public welfare will be served and the public highways will in nowise be unnecessarily impaired if holders of permits issued under Chapter 88, Oregon Laws 1945, but which expire July 1, 1947, are permitted to use the state highways until new permits are prepared, executed and delivered by the Commission to those whose applications are now pending;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority being present and affirmatively voting, as follows:

1. That in so far as the Commission has authority so to do it hereby is ordered that all permits heretofore issued by the Commission under the terms and authority of Chapter 266, Oregon Laws 1943, as amended by Chapter 88, Oregon Laws 1945, be and the same shall be deemed to be valid until applications by said permittees, which applications are now pending before the Highway Commission, have been considered and allowed and appropriate permits issued to the respective applicants, but no such permit shall be deemed valid in any event after September 1, 1947.

2. That the Secretary to the Commission be and he hereby is authorized and directed to prepare and issue at the earliest possible date and deliver to all applicants whose applications are now pending before the Commission and to all who subsequent to July 5, 1947, make application in approved form for permits under said Chapter 156, Oregon Laws 1947, a permit in form heretofore approved by this Commission.

3. That certified copies of this resolution be delivered to the Superintendent of State Police in sufficient number to serve his purpose and meet his requirements with respect to members of the State Police.

4. That a certified copy of certified copies of this resolution be delivered to the Public Utilities Commissioner for such use and purpose as the same may serve.

5. That the Superintendent of State Police be and he hereby respectfully is requested to cooperate with the Highway Commission in its effort to conform to and with the terms of said Chapter 156, Oregon Laws 1947, and in so doing give full faith and credit to the validity of permits which expire by operation of law and by the terms of said permits on July 1, 1947.

6. That the Secretary of the Commission is hereby directed to keep the Superintendent of State Police and the Public Utilities Commissioner fully informed and advised with respect to the issuance of new permits and the dates upon which, and the parties to whom, such permits are or have been issued.

7. That the issuance of a permit under the terms and provisions of Chapter 156, Oregon Laws 1947, shall operate automatically to cancel and terminate in the hands of the permittee any permit issued under the provisions of said Chapter 266, Oregon Laws 1943, as amended by Chapter 88, Oregon Laws, 1945.

8. That all permits issued under the provisions of Chapter 156, Oregon Laws 1947, shall contain a direct clause, condition and provision that said permits may for cause or at the option of the Commission be terminated by order of the Commission.

9. That this resolution be entered in the minutes and records of the Commission as of June 16, 1947.

In this connection the matter of reclassifying highways under the Group I and Group II headings as now listed in special permits was also discussed. Action on this matter was deferred until the next meeting of the Commission. The Engineer was instructed to present at that time a list of the highways under each classification as originally classified and a list as revised to fit present-day conditions.

The Commission discussed and ordered filed an anonymous letter from "An Oregon Motorist", Medford, Oregon, suggesting that the Commission's order prohibiting the truck-hauling of logs over state highways during Saturday afternoons, Sundays, Holidays, and during the hours of darkness be extended to include all loaded trucks.

The Commission discussed the application of Mr. Louis Zeman to truck haul logs over the Mt. Hood Highway from Mile Post 61.33, at Barlow Pass, to the City of Hood River, involving a section between Barlow Pass and Mile Post 69.90, near Newton Creek, where such operations have heretofore been prohibited by the Commission. The Engineer advised that the Commission, on February 4, 1947, authorized the truck-hauling of logs over this highway between Mile Post 69.90 and Hood River under certain conditions. He recommended that Mr. Zeman's application for this privilege over the extra distance to Barlow Pass be denied because there is no evidence of need for the cutting of timber beyond Newton Creek; moreover, that portion of the highway is altogether too narrow, crooked and weak to withstand movements of this kind. The Commission approved the recommendation and ordered that Mr. Zeman be so informed.

The Commission also discussed the application of the Peninsula Fuel and Lumber Company, Portland, to truck-haul logs over the Columbia River Highway from Springdale to the Company's plant at Vancouver Avenue and Columbia Boulevard, Portland, the loads not to exceed 50 feet overall in length. It was brought out in the discussion that the Commission, for many years, has prohibited the truck-hauling of logs on this highway as protection to the large volume of other traffic the road carries. The Commission deferred a decision in the matter until the following day. The Engineer was instructed, in the meantime, to ascertain the extent of the Company's operations and report to the Commission. (The matter was reconsidered on the following day when the Engineer presented the information requested. As a result thereof, the Commission authorized the granting of the permit.)

The Secretary reported the desirability for the Commission to authorize additional employees to sign special permits, particularly Mr. John R. Stout, recently appointed Office Engineer in the Division Office in Bend, replacing Mr. S. P. Jones, who has been transferred to other work; Mr. J. L. Hudson, in the Portland Division Office; and Mr. C. G. Lammers, in the Salem Office. The Commission approved the granting of such authority to these employees and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore, to wit: on the twenty-fourth day of October, 1944, approved and adopted a resolution by which the Commission approved and adopted certain forms of permits as the forms to be used when permits are issued under the provisions of Section 115-393, O. C. L. A.; and

WHEREAS, in and by said resolution the Commission named certain state highway employees, to each of whom the Commission gave authority to sign permits issued on either of the forms identified and approved in said resolution; and

WHEREAS, it now appears that by the naming of additional employes and by vesting in them authority to sign such permits the business of the Commission can be more expeditiously disposed of and the public interests better served;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, a majority of the members being present and voting affirmatively, as follows:

1. That the following state highway employes:

Mr. John R. Stout, Office Engineer, Bend Division Office
Mr. J. L. Hudson, Assistant Permit Supervisor, Portland
Mr. C. G. Lammers, Assistant Permit Supervisor, Salem

hereby are authorized to sign permits for the movement over state highways of motor vehicles, articles or things when such movements and such vehicles come within the purview, purpose and meaning of Section 115-393, O. C. L. A., and within the purpose and meaning of the Commission as disclosed and declared in said resolution adopted October 24, 1944.

2. That all of the instructions, requirements and provisions set out in said resolution of October 24, 1944, shall apply to and control the action of the employes herein named.

3. No permit shall be issued by any of said employes unless and until all of the facts have been communicated to the State Highway Engineer and to the Secretary of the Commission, and the issuance of such permit has been approved by them.

4. No permit shall be issued by any of the persons named herein or by any of the persons named in said resolution of October 24, 1944, unless and until adequate insurance has been exacted from the applicant for the protection of the members of the Commission and the member of the general public.

5. None of the persons named herein and none of the persons named in the said resolution of October 24, 1944, may issue a permit on any form other than one of the forms heretofore approved.

6. This resolution shall modify and supplement the resolution of October 24, 1944, to the extent and in the manner herein set out and not otherwise.

7. This resolution shall be entered in the minutes and records of the Commission as of June 16, 1947.

The Commission by unanimous vote also canceled the authority heretofore given S. Paul Jones and Ralph Eggstaff to sign permits on behalf of the Commission, Mr. Jones having been transferred to other work where such authority is not required and Mr. Eggstaff having severed his connections with the State Highway Department.

The Commission discussed a complaint from the Douglas County Pomona Grange concerning the hazards that are being created by the Western States Lumber Company and the Universal Lumber Company on the Pacific Highway south of Sutherlin and Roseburg, respectively, by the burning of sawdust, the smoke from which drifts across the highway, obliterating clear vision. The Commission referred the complaint to the Chief Counsel with instructions to notify the two lumber companies that the Commission is holding them responsible for accidents which may occur as the result of their operations.

The Commission considered and ordered filed a letter from Hon. Willard Marks, Albany, expressing personal appreciation and the appreciation of the Albany Rotary Club for the courtesies extended to them by the Commission with respect to their request to construct a Sea Scout building on state highway property adjoining Waverly Lake, Albany. According to the information received the project has been abandoned.

A letter was presented from Rodney W. Tripp, President, Albany Timber Carnival, requesting permission to maintain a permanent float 30 feet by 40 feet in dimension on Waverly Lake for use annually in connection with their Timber Carnival which is held during the Independence Day holiday. The Commission denied the request as a permanent proposition, however, authorized the maintenance of the float this year only.

The Commission discussed an inquiry from C. E. Francis, Portland, as to the plans of the Commission for highway improvements between Clay and Market Streets, extending from Harbor Drive to Canyon Road, Portland, such information being necessary in connection with the building of a new automobile plant for the Olsen-Francis Company at this location. The Commission ordered that Mr. Francis be informed that the Highway Commission has no plans whatsoever for an improvement at this location.

A resolution was presented from the County Court of Lane County requesting the Commission's approval of certain additions to the County's market road system. The Chief Counsel explained briefly certain features of the old market road law and gave as his opinion that, since this law was changed, it

no longer is necessary for the Highway Commission to give its approval to such designations, that being strictly a County Court matter. In view of this information the Commission decided not to take action on the resolution and ordered that the County Court be advised accordingly.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the Public Service Building.

Portland, Oregon
June 17, 1947

The meeting of the Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner Ben R. Chandler was excused from attending this meeting.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

ALSEA AND ALSEA-DEADWOOD HIGHWAYS IN BENTON AND LINCOLN COUNTIES
ALSEA ROCK PRODUCTION PROJECT

L. R. Kauffman, Wecoma	$44,990.00
E. C. Swaggart, Eugene	45,320.00
Oscar E. Joelson, Eugene	47,580.00
A. H. Saxton & Sons, Corvallis	47,950.00
Ramsay Constr. Co., Corvallis	49,145.00

WASCO-HEPPNER HIGHWAY IN GILLIAM COUNTY
HAY CREEK-CONDON SECTION

Vernie Jarl, Gresham	$147,333.00
J. S. Risley, Milwaukie	159,510.00
A. H. Saxton & Sons, Corvallis *	162,239.50
E. C. Hall Co., Portland	173,987.00

* Bidder will accept only one grading and surfacing project.

LOWER KLAMATH SECONDARY HIGHWAY IN KLAMATH COUNTY
LOWER KLAMATH LAKE SECTION

F. L. Somers, Klamath Falls	$169,754.00
Rogers Constr. Co., Portland	181,886.00

McKENZIE HIGHWAY IN LANE COUNTY
SPRINGFIELD JUNCTION-TURNAROUND SECTION

Werner & Jeuke, Eugene	$ 8,981.00
Del R. Beebe Constr. Co., Eugene	11,440.00
Miller & Strong, Inc., Eugene	12,315.00
C. T. Malcom & Co., Portland	13,970.00

ALBANY-LYONS SECONDARY HIGHWAY IN LINN COUNTY
CRABTREE CREEK-SCIO SECTION

	USING ASPHALT	USING TAR
Vernie Jarl, Gresham	$132,353.00	- - - - -
A. H. Saxton & Sons, Corvallis *	141,012.00	- - - - -

SUNSET HIGHWAY IN WASHINGTON COUNTY
CONSTRUCT RAILROAD GRADE SEPARATION STRUCTURE

Birkemeier & Saremal, Portland	$ 35,390.00
Don L. Cooney Inc., Seattle, Wn.	36,081.50
Del R. Beebe Constr. Co., Eugene	36,850.00
Lockyear & White, Inc., Seattle, Wn.	39,425.00

The following persons, representing the Southern Pacific Company, were present in regard to the leasing of certain state-owned property adjacent to the Pacific Highway near the overcrossing of the Southern Pacific

tracks in the northwestern part of Eugene: Franck C. McCulloch, Attorney; A. Y. Alcorn, Assistant General Freight Agent; F. A. Bartlett, Assistant District Engineer; and Alfred Corbetts, Assistant Attorney. Mr. McCulloch headed the group. He explained the desires of the Southern Pacific Company to construct a spur railroad track across the state's property to facilitate the rendering of service to prospective industries to be located there. The Engineer advised that this property is being held by the State Highway Commission for future use in connection with the improvement of the highway and that it is planned to secure some 17,000 cubic yards of topsoil material from this particular place, so, in his estimation, if the Commission should decide to grant the railroad company's request, it should be on the basis that the Company will make arrangements for the state to obtain the same amount of material from another source when it needs it and will reimburse the state for the extra expense in transporting the material from the new site; in other words, that the state is made entirely whole. The matter was discussed at considerable length and was referred to the Engineer and the Chief Counsel for recommendation. (Discussion of the matter was resumed during the afternoon session, at which time the Commission approved the granting of this privilege to the railroad company on the condition that the railroad company will make the State of Oregon whole.)

The Commission by unanimous vote approved the minutes of the meeting held on May 14 and 15, 1947.

A delegation from Bend and vicinity, representing the Central Oregon Chamber of Commerce, appeared before the Commission in the interests of the Warm Springs Highway. The group was headed by Mr. Howard Turner, President, and included M. J. Lynch, Chairman, Road Committee and former State Highway Commissioner, Redmond; Bob Wilson, representing the Warm Springs Lumber Company; H. J. Doolittle, District Road Engineer for the Indian Service; Mr. Cutler, representing the Consolidated Freightways; Howard J. Steib, Manager, Bend Chamber of Commerce; and Guy Wade, Secretary of the Central Oregon Chamber of Commerce. Mr. Lynch was principal spokesman. He recited the history of this road, dating back to 1932, and urged the Commission to place the remaining link between Warm Springs Agency and the Wapinitia Highway Junction under contract at the earliest possible time so the people can secure the benefits of a 30-mile reduction in the distance from Central Oregon to Portland and reduced costs of freight haul. Others speaking in behalf of the project were Messrs. Wilson, Doolittle, Cutler, Steib, and Wade.

Chairman Banfield advised that the Highway Commission also is much interested in completion of this road. He pointed out that the work is programmed as an early priority job, but is being held up because Congress has made no provision for Forest Highway Funds to finance the section within the National Forest. State highway funds to finance the state portion of the work, he said, are available and will be used for the purpose intended just as soon as the Commission can see its way clear to proceed. He also pointed out that the Highway Commission at one time advertised for bids for construction of the Mill Creek Bridge and received a satisfactory bid but had to reject it because of Federal requirements. The Engineer

pointed out that the uncompleted section was 32 miles long, of which 25 miles is state work and seven miles Forest Highway work. All of the grading work, he said, has been completed on the state's portion, and the Commission, if it so desired, could secure bids for surfacing and oiling this section. Commissioner Schaupp expressed himself in favor of contracting the work as soon as possible as he could see no reason for holding up the work while money is available to pay for it. Chairman Banfield indicated a similar attitude, however, advised that the Commission will discuss the matter with the Engineer and the Chief Counsel and see what can be done. He assured the delegation that the state money set up for this project will not be transferred to any other project.

Following departure of the group the matter was further discussed and as a result thereof the Commission instructed the Engineer to advertise for bids to be received at its August meeting for all of the state work, including the Mill Creek Bridge if conditions are satisfactory.

County Judge J. N. Wilson, Sherman County, and Mr. Bert Geer, representing Captain C. T. Smith, owner of the Maryhill Ferry, came before the Commission regarding the road leading from the Columbia River Highway to the Maryhill Ferry landing. Judge Wilson stated that this is a county road, but the County has no use for it. He asked the State Highway Commission to take it over for future maintenance, alleging that the County is not in position financially to carry this obligation. Mr. Geer gave as his thought that it is the state's responsibility; moreover, the state is justified in maintaining the road because it forms a link in US97. Judge Wilson concurred. Chairman Banfield pointed out that this matter previously had been discussed by the Highway Commission as the result of a request from Captain Smith, but was denied, the road not being a state highway and therefore not eligible for improvement with state money; moreover, the ferry operation at this point is privately owned, and, according to the Chief Counsel and the Engineer, the state is not responsible to maintain a roadway leading to a private enterprise. He expressed regrets that the Commission cannot do what they ask.

Messrs. A. L. Greenwalt, President, and Walter Meacham, Secretary, of The Oregon Council of the Old Oregon Trail Association, and Mr. A. B. Wells Manager of the Tourist and Convention Committee of the Portland Chamber of Commerce, appeared before the Commission in regard to erection of historical markers along Oregon Highways. Mr. Wells advised that the Chamber of Commerce had received many requests for road markers, and tourists are particularly desirous of knowing where the historic spots are located and something of their background. He urged the erection of many such markers. Mr. Meacham reported receipt of a letter from the Sons and Daughters of Idaho Pioneers asking cooperation from the State of Oregon in placing such a marker on the site of Olds Ferry, which is one of the oldest ferries used by pioneers in crossing the Snake River. He said that the state now maintains a marker at this point which is too small and does not tell the story about this historic spot. Mr. Greenwalt also urged favorable consideration of this matter.

Chairman Banfield advised that the Highway Commission would try to work out some sort of a program for historical markers but pointed out that nothing could be done immediately, inasmuch as it requires considerable thought, and when a marker is erected the Commission wants to be sure it is correctly placed and that it contains correct wording and information. This concluded the conference. (The matter was reconsidered by the Commission later in the session, at which time the Chief Counsel quoted the law with regard to placing markers along the Old Oregon Trail. The Commission took the matter under advisement.)

Mr. Eugene Francis Gallagher, log hauler, dba Shamrock Logging Company, Lebanon, was present at the Commission's request to show cause why his log-hauling permit should not be canceled because of violations of the provisions thereof which include by-passing the Highway Department scales and refusing to allow his loads to be weighed by state weighmasters. Mr. Gallagher stated that he could not deny his violations but he would try hereafter to cooperate fully with the State Highway Commission. Mr. Loran Spaulding, Chief Weighmaster, who was present, presented the record of Mr. Gallagher's violations and commented that Mr. Gallagher has not shown a very cooperative spirit in his dealings with the state weighmasters. Mr. George Davis, Weighmaster, who was also present, advised that, in his estimation, Mr. Gallagher could comply with the requirements if he wanted to. Weighmasters R. W. White and C. R. Kliever also were present and confirmed the remarks of Mr. Spaulding and Mr. Davis and gave further details. Mr. Gallagher presented a letter indicating what his future attitude is to be with respect to this matter. The letter was not acceptable to the Commission, and Mr. Gallagher was instructed to submit a more definite statement in writing. He was also advised by Chairman Banfield that the Commission will not cancel his permit for past offenses but will do so for another offense.

Mr. John Leon Lamar, log hauler, Scappoose, was present at the Commission's request to show cause why his P.U.C. permit should not be canceled for violations of the requirements, particularly for transporting overweight loads and loads wider and higher than the law allows, and for not having sufficient binder chains on his loads. Chairman Banfield explained the nature of the violations in general. The details of the violations were explained by the Chief Weighmaster, Mr. Loran Spaulding. Mr. Lamar stated that he has been in the log-hauling business for about 20 years, and this is the first time that he has ever been apprehended for violating the rules. He further stated that he could not judge the weight of logs and that there are no state scales available to weigh the loads. He was informed by Chairman Banfield that if he desires to continue the truck-hauling of logs over state highways he will have to keep his loads within the prescribed limits as to weights, dimensions, etc.; otherwise, his permit will be canceled on a permanent basis; further, that the Commission will not order the cancellation of his permit for past offenses if he will submit a letter stating his intentions hereafter to comply fully with the requirements.

Mr. Lloyd J. Allen, log hauler, dba Allen Logging Company, Scappoose, was present at the Commission's request regarding weight violations committed by him in connection with his operations on the Lower Columbia River Highway in the vicinity of Cornelius Pass. Chairman Banfield explained briefly the nature of the violations, which consisted of transporting loads weighing far in excess of allowable weights, one in particular weighing 102,990 pounds, being 31,590 pounds in excess of that permissable. Mr. Allen advised that he has been hauling in this vicinity since 1936 and during that time has been weighed by the state weighmasters on only one occasion; moreover, he has had only one accident. He considered that he had a pretty good record. State Weighmasters Clarence L. Frey and Charles W. Dunn, who were present, gave details with respect to Mr. Allen's operations and pointed out the hazard that is created on the place where Mr. Allen's loads cross the Columbia River Highway. In the discussion, Chairman Banfield advised Mr. Allen that if he wishes to continue to truck-haul logs over state highways he must abide by the law and comply strictly with the rules and regulations; otherwise his P.U.C. permit will be canceled on a permanent basis. Mr. Allen was also told to submit a statement, in writing, as to what his intentions are with respect to his future conduct.

A large delegation, consisting of 35 people from Newport and Toledo, came before the Commission in the interests of the Corvallis-Newport Highway. The group was headed by Mr. Theo S. Stansbie, hotel owner and Mayor of Toledo, and included the following: L. G. English, District Attorney; Robert E. Collins, Lincoln County Recorder and Clerk; Geo. Mellun, Lincoln County Fire Warden; Frank Coleman, furniture company; C. K. Crosno, real estate; Karl H. Daniels, Western Union; Mel G. Hammernus, confectionery; Kenneth H. Hayden, hardware company; Kurt Kiesow, title and trust company; B. F. Updike, real estate; Frank M. Woodson, Woodson Motor Co.; Jos. P. Maher, title and trust company; M. E. Clark, sanitary collection; A. M. Cannon, of the C. D. Johnson Lumber Co.; a Mr. McDaniels, Ford garage; and Adrian Wilson, trucker, all of Toledo; and Lincoln County Judge F. E. Gilkey; M. E. Skriver, Mayor of Newport Leo Brayton, City Recorder; Ed Hay, Assistant Lincoln County Assessor; Glen Snyder, Newport City Councilman; W. H. Osborn, Lincoln County Assessor; W. E. Wilkinson, Newport City Councilman and President, Chamber of Commerce; Dudley Turnacliff, Yacquina Bay Fish Co.; Johnnie Gidzvish, Columbia River Packers Assoc.; Mr. and Mrs. Barney Ehrlich, furniture company; A. L. Gardiner, of the Gardiner Electric; Mr. and Mrs. L. G. Gardiner, cottage owners; and A. M. Lara cottage owner, all of Newport; and D. B. Ambler, Lincoln County Engineer, Waldport.

Mr. Stansbie read aloud a letter directed to the Highway Commission by F. E. Gilkey, County Judge of Lincoln County, in which Judge Gilkey recalls the early history of the road and points out that its improvement was one of the projects requested by the County Court for the Highway Commission's Postwa Construction Program, also, in which he points out that the alignment and grad of this highway is particularly in need of correction because of the increase in traffic and the large accident frequency. Judge Gilkey also urges improvement of the highway from the standpoint of attracting the people who now drive to the coast over other routes in order to avoid discomforts and dangers in driving over such a crooked road; moreover, the straightening of the road will

greatly reduce the cost of heavy hauling in their district. Mr. Stansbie stated that Judge Gilkey's letter expresses the attitude of the delegation. He also read aloud a letter from the Secretary of State concerning accidents that have occurred in the Toledo-Newport Section. It appears from this information that the accident rate in this vicinity is 11 percent, compared with five percent for the state as a whole.

Chairman Banfield expressed the attitude of the Commission by stating that the Commission realizes the Corvallis-Newport Highway is not a first class road; however, the Commission is doing the best it can to make corrections with the monies available; but, there is not enough to finance all of the projects which are in that category. In the meantime, the people must realize the hazardous conditions and be more careful in their driving. Chairman Banfield also stated that because of the Commission's finances no promises or commitments can be made for any future highway work; in fact, there is a question if there is going to be enough money to finance all the projects that are in the program as presently prepared; however, the Commission will keep the project in mind for future consideration.

Mr. Stansbie then asked the Commission to consider rerouting this highway between Toledo and Newport so as to avoid excessive grades and curvature now obtaining on the present route. He was informed by Chairman Banfield that the Commission is not in position at the present time to consider such a project but will obtain a report from the Engineer, although no promise or commitment can be made as to construction. The Engineer was thereupon authorized and instructed to make a reconnaissance survey of the project.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 1:30 p.m. with the same persons present and participating.

The Chief Counsel brought up for discussion the application of Kuckenberg Construction Company to continue the use of certain state-owned land situate adjacent to the North Santiam Highway at the town of Niagara during the progress of its highway construction at that place under contract with the Public Roads Administration. He advised that such occupancy of the land will not interfere with the highway or hurt the land in any way for future use by the state. He recommended approval of the request. The Engineer concurred therein and the Commission approved the recommendation unanimously.

The Chief Counsel also brought up for discussion the condemnation action against Mrs. Eloise Van Slatte to acquire right of way needed for the improvement of the Umatilla Dam-Hermiston Section of the Old Oregon Trail, at the junction of this highway with the Columbia River Highway near the town of Umatilla. He advised that, subsequent to the filing of the condemnation action, Mrs. Van Slatte instituted a trespass suit and demanded payment of $10,000 from the state for such trespass. As a result of negotiations, he said, a reasonable agreement has been reached with Mrs. Van Slatte whereby both actions will be dismissed upon payment to her of the sum of $3,250. He recommended approval of the settlement by the Commission. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. Neuner, reported a negotiated settlement of the condemnation case against Etienne C. Ureel for right of way needed for the improvement of the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County. He pointed out that the Commission authorized an offer of $600 in this case and that Mr. Ureel will now settle for the sum of $675. He recommended payment of such sum in order to avoid completing the condemnation proceedings. The Commission approved the recommendation and so ordered.

A letter was presented from the County Court of Marion County, giving as its understanding that the Highway Commission has for sale an old bridge, now stored at Baker, which formerly spanned the Burnt River on the Old Oregon Trail, and offering to purchase this steel at the rate of five cents per pound. The Engineer advised that this old bridge is of no value for state highway purposes and recommended acceptance of the County Court's offer. The Commission approved the recommendation by unanimous vote on the condition that the County Court of Baker County does not want the bridge.

A letter was presented from Mr. Chriss Lee, Baker, Oregon, requesting permission to pump water from a gravel pit owned by the State Highway Commission adjacent to the Old Oregon Trail near the town of Haines, for irrigation purposes. The Engineer advised that this accumulation of water is from Sand Creek which flows through the pit, and, in his estimation, there are no objections from the highway standpoint to allowing Mr. Lee to use it if he wants to. He pointed out, however, that the Commission considered a similar request from other individuals in June 1944 and denied it because of objections from residents of the town of Haines who use the pit for fishing. Ch airman Banfield expressed himself in favor of granting this request if the state's interests are properly protected and if the taking of the water will not jeopardize irrigation by lowering the water table. The matter was referred to the Chief Counsel to handle.

The Commission resumed discussion of the request of the Southern Pacific Company for an easement to construct a railroad spur track across state highway property in the north part of Eugene. The Engineer again explained the situation, advising that present plans are to obtain some 17,000 cubic yards of topsoil material from this property for use in connection with the state highway improvement at this location at some future time; however, he recommended approval of the Company's request on the condition that the state is made whole in the transaction --- that the railroad company will arrange for the state to obtain an equal amount of like material from some other source and will pay the extra cost to haul this material from the new site to the highway. Following discussion the Commission approved the recommendation unanimously and referred the entire matter to the Engineer and the Chief Counsel to handle the details.

Consideration was given by the Commission to the approval and execution of an amendatory agreement with Clackamas County covering the relocation of the Woodburn-Sandy Secondary Highway so as to exclude a small portion of the old highway route which was covered by the original agreement by mistake. The Chief Counsel suggested that the decision in this matter be deferred until consummation of certain condemnation cases which are now under way. The Commission approved the suggestion and so ordered.

The Secretary presented a letter from Hon. A. L. Strand, President, Oregon State College, accepting the responsibility for conducting ceremonies in connection with the naming of the Coos Bay Bridge in honor of the late C. B. McCullough. The Commission deferred action on this matter until Commissioner Chandler is present. It was the thought of the Commission, however, that the date for the ceremonies should be set by President Strand. The matter was referred to the Chief Counsel to follow up.

The Commission discussed the date for its next regular meeting and decided unanimously to hold such meeting on Monday and Tuesday, July 21 and 22, in Portland. The Secretary was instructed to make arrangements for a meeting place.

The Engineer and the Chief Counsel reported briefly on the status of acquiring right of way for improvement of the Pacific Highway across land owned by W. H. Gonyea between Eugene and Goshen. It appears that Mr. Gonyea has a one-half mile frontage on the highway and that the state needs about eight acres of his property. The owner will not waive complete access to the highway but will sell the acreage needed by the state for $1,000 if allowed direct access to his residence building, and will give the right of way without cost if allowed commercial access at each end of his property, which he will need for a commercial enterprise he is establishing. The Assistant Counsel, Mr. George Neuner, suggested that the Commission's decision should be based on the Commission's plan for the entire project rather than solely on acquisition of Mr. Gonyea's property. The Commission approved the suggestion and instructed the Engineer to render a report at the next meeting in conformity therewith.

A delegation from Salem, consisting of Messrs. David O'Hara and Dan Fry, Councilmen; Keith Brown, President, Salem Chamber of Commerce; and Lynn Smith, representing the Traffic and Tourist Committee of the Chamber of Commerce, was present regarding the installation of traffic signals on North Capitol Street. Mr. O'Hara headed the group. He explained that signals are needed at three points --- "D" Street, Market Street, and Fairgrounds Road --- the most important of which is the one at Fairgrounds Road in the Hollywood Business District where there is a multitude of pedestrian traffic as well as vehicular traffic. He also said that the "D" Street signal is the least important of the three, and if the Commission is unwilling to cooperate in such installation, then the city will pay the entire cost with city funds if the Commission will authorize the signal to be installed at this location. Chairman Banfield advised that the Commission feels that the responsibility for the installation of such signals at points where city streets intersect state highways belongs to the cities and that the state's responsibility extends only to the intersection of state highway routes. The Commission, he said, does not wish to control such situations at street intersections or to take away from the city any of the rights that belong to it. He advised that the Commission will join with the city on a 50-50 basis on the installation of the signal at the Fairgrounds Road intersection as a trial proposition and on the condition that if the signal does not prove satisfactory it will be the sole responsibility of the city to provide a solution for its traffic problem and to make such adjustments as may be necessary to obtain the desired results. He explained that there is a question in the mind of the Engineer

whether or not the signal will prove satisfactory because he feels that it will cause interference to some extent with the free movement of traffic on Capitol Street. The delegation accepted the Commission's decision and declared its purpose and intention to cooperate with the Commission in every way. The Commission ordered this matter covered by appropriate agreement between the city and the state.

Mr. O'Hara also brought up for discussion the matter of designating a route for logging trucks through Salem. He was informed by Chairman Banfield that the Commission considers the regulating and control of all traffic on city streets to be strictly a city responsibility and that the Commission cares not to assume any of the city's police powers or functions.

A delegation from Seaside, representing the City Council and consisting of Councilmen Geo. S. Gray, R. L. Smith, and V. Y. Davis, appeared before the Commission concerning the designation of a logging truck highway by-pass in Seaside. Mr. Gray headed the group. He advised that logging trucks now operate on the main highway through the business district of this town and suggested, in order to relieve the congestion at this point, the re-routing of such traffic along Roosevelt Drive; also, that any improvements which may be required on the new route be financed with a portion of the $250,000 of State Tax Street Funds which the 1947 Legislature placed at the disposal of the Highway Commission for expenditure. This matter was discussed at some length, during which Chairman Banfield advised that the improvement of Roosevelt Drive as a state highway route is a project for a long time in the future and that the Highway Commission is not in position, at this time, because of lack of funds, to give it consideration; however, the Commission will have the Engineer make investigations to see just what is required and how much it will cost to put it in satisfactory condition for log hauling. Unless it is a very simple proposition, requiring a small expenditure, he said, the Commission is not in position to consider it under present conditions.

Mr. Smith advised that industrial development along this route is being held up pending a decision with respect to this highway. Chairman Banfield repeated that the project is for a long time in the future and that the Commission feels it should not commit future Highway Commissions to any particular undertaking. He also said that the present Commission was considerably interested in the project sometime ago when it was first discussed and when there was a feeling that the right of way matter could be worked out with the railroad company, but that could not be done so the matter was dropped.

Mr. Gray then brought up the matter of leasing to the Gas-Heat, Inc. a Butane dealer in Seaside, a small tract of state-owned land at the south end of the Necanicum River Bridge near the junction of the highway and Roosevelt Drive. This property adjoins the Standard Oil Company's property at this point and is conveniently located for the dealer's use. He also said that the Gas-Heat, Inc., now leases a small adjoining tract from the railroad company but needs the state's property to fill out its holdings. This matter was referred to the Engineer for investigation and report at the next meeting.

Messrs. C. J. Kendall, Attorney, and Dean Johnson, President, representing the C. D. Johnson Lumber Corporation, Toledo, Oregon, came before the Commission in regard to the leasing of a narrow strip of state-owned property at the south end of Yaquina Bay Bridge, Newport, on which to construct a trestle for the benefit of the company's employees who have to walk from the place where they park their cars at the bridge-end to a place which the company is developing as a moorage for ships when loading lumber. The Commission approved the request by unanimous vote subject to certain conditions set forth in the Engineer's report on this subject as presented at the previous meeting and provided the state is not put to any expense in connection therewith.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work and took the following action thereon:

The contract for the Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton and Lincoln Counties, was awarded to the low bidder, L. R. Kauffman. The contract for grading and paving the Springfield Junction-Turnaround Section of the McKenzie Highway, in Lane County, was awarded to Werner & Jeske, low bidder.

The award of the contract for grading, surfacing, and oiling the Hay Creek-Condon Section of the Wasco-Heppner Highway, in Gilliam County, was deferred pending settlement of right of way matters. The bids for this project were referred to the Engineer with authority to award the contract to the low bidder, Vernie Jarl, when this condition has been satisfied. The award of the contract for grading, surfacing, and oiling the Lower Klamath Lake Section of the Lower Klamath Secondary Highway, in Klamath County, was deferred pending approval by the Public Roads Administration. The bids for this project were referred to the Engineer with authority to award the contract to the low bidder when this condition is satisfied.

The award of the contracts for the following projects were also deferred pending satisfaction of certain conditions, and the bids were referred to the Engineer with authority to award the contract to the low bidder in each instance when these conditions have been satisfied: Grading, surfacing, and oiling the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway, in Linn County; bituminous macadam widening on the Foster Section of the Santiam Highway, in Linn County; and construction of a railroad grade separation structure on the Sunset Highway near Orenco, in Washington County.

At 3:00 p.m. Chairman Benfield publicly announced the awards, as follows:

"Alsea Rock Production Project on the Alsea and Alsea-Deadwood Highways, in Benton and Lincoln Counties. The Commission received five bids for this project, the low one being that of L. R. Kauffman, Wecoma, at $44,990. E. C. Swaggart, Eugene, submitted the next low bid in the amount of $45,320. The Commission has awarded this contract to the low bidder, L. R. Kauffman.

"Grading, surfacing, and oiling on the Hay Creek-Condon Section of the Wasco-Heppner Highway, in Gilliam County. Vernie Jarl, Gresham, submitted the low bid for this work at $147,333. The next low bid was submitted by J. S. Risley, Milwaukie, at $159,510. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading, surfacing, and oiling the Lower Klamath Lake Section of the Lower Klamath Secondary Highway, Klamath County. F. L. Somers, Klamath Falls, submitted the low bid for this work at $169,754. The next low, and only other, bid was submitted by Rogers Construction Co., Portland, at $181,886. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and paving the Springfield Junction-Turnaround Section of the McKenzie Highway, in Lane County. The low bid for this work was submitted by Werner & Jeske, Eugene, at $8,981. Del R. Beebe Construction Co., Eugene, submitted the next low bid in the amount of $11,440. The Commission has awarded this contract to the low bidder, Werner & Jeske.

"Grading, surfacing, and oiling the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway, Linn County. The Commission received six bids for this job, the low one being that submitted by Vernie Jarl, Gresham, at $132,353, based on the use of asphalt. A. H. Saxton & Sons, Corvallis, submitted the next low bid in the amount of $141,012, using asphalt. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Bituminous macadam widening on the Foster Section of the Santiam Highway, Linn County. Frank M. Parsons, Forest Grove, submitted the low bid at $27,923, based on the use of asphalt. Stevenson Construction Co., Salem, submitted the next low bid in the amount of $31,446, based on the use of asphalt. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of a railroad grade separation structure on the Sunset Highway about one and one-half miles north of Orenco, Washington County. Birkemeier & Saremal, Portland, submitted the low bid for this work in the amount of $35,390. Don L. Cooney Inc., Seattle, Washington, submitted the next low bid in the amount of $36,081.50. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied."

The Chief Counsel reported on matters pertaining to the proposed Sullivan's Gulch Highway through East Portland. He advised that the City Council has adopted a resolution with respect to this matter, and he read aloud the provisions thereof. It appeared to the Commission that this resolution contains provisions that are beyond what the Commission had discussed, particularly the features concerning the proposed improvement east of the city limits. As a result of considerable discussion, the Commission instructed the Chief Counsel to list in one, two, three order, the things that the state will be obligated to do under the provisions of this resolution and report this information back to the Commission. He was also instructed to prepare a tentative form of agreement between the city and the state setting forth the things the state is obligated to do and the things the city is obligated to do in connection with this improvement and to make it clear in this agreement that the state is not making any commitment whatsoever as to construction of the project. This tentative draft is to be submitted to the Commission for its approval and then to the city to ascertain its reaction. The Engineer was instructed to report to the Commission a suggested program for construction by units with a statement as to the cost of each unit and the number of years it will take to complete the entire project.

The Commission discussed briefly the request of the St. Johns Businessmens Association for a survey for an access road leading from the Tualatin Valley to the St. Johns Bridge, Portland, which request was presented by a delegation at the previous meeting. The Commission by unanimous vote authorized the Engineer to make a reconnaissance survey of such project.

The Engineer submitted written reports on the following subjects:

(1) Retirement of superannuated employees;

(2) Present status of postwar construction programs (Federal Aid and State) and status of State Highway Commission finances;

(3) Application of a new law enacted by the 1947 Legislature relative to the payment of part of the state highway funds to the cities, particularly the provision thereof which allocates $250,000 of such funds to the State Highway Commission for expenditure.

The Commission deferred discussion of these matters until its next meeting.

A request was presented from Mrs. Viola Epplett for the installation of a traffic signal on the Tualatin Valley Highway at the town of Aloha. The Engineer advised that this matter has been investigated by the Acting Traffic Engineer who estimates it would cost about $3,420 to properly signalize this place, and the expense would have to be paid entirely with state highway funds because Aloha is an unincorporated town. The Commission denied the request.

A letter was presented from Mr. James Landye, lawyer, Portland, renewing a previous request for the installation of a stop and go signal at the top of Canyon Road (Sunset Highway) where this highway intersects a county road at a place known as Sylvan. The Acting Traffic Engineer, Mr. F. B. Crandall, was present and explained the details of the situation. It was recalled that the Commission, some time ago, had a similar request under discussion and at that time agreed to the installation on the condition that Multnomah County would contribute 50 percent of the cost involved. The Engineer advised that the Board of County Commissioners of Multnomah County has not definitely agreed to assume any part of this expense. The Commission ordered that Mr. Landye be informed of the action previously taken by the Commission on this matter.

The Commission resumed discussion of the request of the Peninsula Fuel and Lumber Company, Portland, to truck-haul logs over the Columbia River Highway from Springdale to its plant located at Vancouver Avenue and Columbia Boulevard, Portland. The Engineer reported that, in conformity with instructions from the Commission on the previous day, he has inquired of the Peninsula Fuel and Lumber Company as to its operations and finds that the Company has about five million feet of second-growth fir to transport from this location; that the Company will operate three trucks, each of which will make three round trips daily; that the overall length of the equipment and load will not exceed 48 feet; and that its operations will extend for a period of about six months. He recommended granting the permit. The Commission approved the recommendation.

The Engineer also reported on violations committed by Ellis McMasters Blachly, Oregon, in connection with his operations in the truck-hauling of logs over the Siuslaw Highway between Swiss Home and Mapleton. It appears that the main violation is laying out for the purpose of evading weighmasters and the weighing of his loads. It appeared to the Commission that the evidence submitted is not sufficient to justify the cancellation of Mr. McMaster's permits, inasmuch as the weighmasters did not remain on duty until the loads were moved so they could weigh them; however, the Commission ordered that Mr. McMasters be informed that the Highway Commission is aware of his tactics and that a continuation of them will require his appearance before the Commission to show cause why his permit should not be canceled. The Commission also ordered that the weighmasters be instructed, hereafter, in cases of this kind, to "wait out" a load and remain on duty until the load is weighed, or, if that is impossible, to carefully scale the load and compute the weight.

The Engineer presented a letter from Col. O. E. Walsh, District Engineer, U.S. War Department, transmitting a copy of the Interstate Commerce Commission's report on the abandonment of the Southern Pacific Company's railroad in connection with the proposed dam and highway construction at Detroit (North Santiam Highway). He pointed out that, according to this report, a certificate of abandonment will be issued effective on the date the Oregon State Highway Commission and the Public Roads Administration declare the highway, which is yet to be constructed, is open to traffic. Col. Walsh requests that when the relocated North Santiam Highway is open to traffic such information be certified to the Interstate Commerce Commission. The Commission authorized the Engineer to furnish such certificate at the proper time.

Commissioner Schaupp brought up for discussion the matter of constructing a fence along South Sixth Street, Klamath Falls, at the Klamath County Fairgrounds as requested by the County Court. The matter was referred to the Engineer for a report.

The Commission resumed discussion of the proposed improvement of the Wallowa Lake Highway between Elgin and Boswell, which was first discussed when Mr. Charles H. Reynolds, President of the Old Oregon Trail Association, appeared before the Commission on the previous day. The Engineer exhibited a map showing the original alignment of this highway and the proposed permanent location and particularly pointed out the place where two of the property owners object to the abandonment of the present highway, being where a watering trough is located. Other than these two objections to the new location, he said, the people are satisfied. He recommended that the Commission proceed with this project as originally planned. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp which was seconded by Chairman Banfield.

The Engineer reported that, in conformity with instructions by the Commission on the previous day, he has reviewed the requests from a number of the contractors who have asked for extensions of time within which to complete their work and that he can see no reason for changing his reports with respect thereto. He then presented, and the Commission considered, the following requests for extensions of time:

C. J. Eldon, Contract No. 2773, for construction of a trestle bridge over McKay Creek on the Wolf Creek Highway (Sunset Highway), in Washington County, requested an additional extension of time of 60 days, from April 30 to June 30, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to delays encountered in securing necessary materials which resulted in postponement of the work until a time when the weather and the condition of the approaches to the bridge were such that it was impossible to deliver machinery and supplies. The Engineer advised that the reasons given by the contractor are substantially correct and that the cause of the delay was beyond the control of the contractor. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was submitted from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statement.

Berke Bros., Contract No. 2790, for grading the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County, requested an extension of time of 121 days, from May 31 to October 1, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to a shortage of labor and to the fact that "from about November 15 to May 1 along the Oregon coast the climate is too wet to operate heavy construction equipment, and that period is entirely lost to the contractor." The

Engineer recommended that this extension of time be granted without penalty on the condition that the grading work is completed in sections as speedily as possible so as to clear portions for the surfacing contractor by July 1 and that all roadbed grading is completed by August 15. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

Angelo A. Doveri, Contract No. 2809, for widening the bridge over the Altamont Canal on The Dalles-California Highway at Klamath Falls, requested an extension of time of 214 days, from April 30 to November 30, 1947, within which to complete this job. Mr. Doveri gave the following reasons for failure to complete the project within the specified time limit: "Water was turned into the canal before the concrete beams and sidewalk surfaces were finished. It is not convenient to do this work until the water is drained from the canal. This should be some time in October". The Engineer advised that the reason given by the contractor for overrunning the time limit is correct and recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statement.

J. C. Papin, Contract No. 2810, for grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway, in Baker County, requested an additional extension of time of 122 days, from May 31 to September 30, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions and to suspension of work during the winter months as ordered by the Engineer. The Engineer recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statement.

Berke Bros., Contract No. 2830, for construction of the Oneonta Borrow Pit Project on the Upper Columbia River Highway, in Multnomah County, requested an additional extension of time of 161 days, from January 30 to July 1, 1947, within which to complete this job. They gave as their reason for failure to complete the project within the specified time limit "additional work authorized by Project Authorization". The Engineer recommended approval of the request and that the extension of time be granted without penalty. The Commission approved the recommendation.

Philpott & Buckingham, Contract No. 2833, for reconstructing a bridge over Mill Creek on the Dallas-Coast Highway, in Polk County, requested an additional extension of time of 30 days, from May 31 to June 30, 1947, within which to complete this job. The advised that all work required under the contract was completed prior to the expiration of the previously-extended time limit with the exception of some painting and concrete finishing work but gave no reason for failure to complete such work within the specified time limit. The Engineer advised that the

bridge approaches were finished and the new bridge put into use on May 17 and that the time extension needed now is to complete the painting work and clean up the premises. He recommended approval of the request and that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statement.

The Engineer reported that Contracts Nos. 2771, 2785, 2786, 2797, 2799, 2801, 2804, 2830, 2833, 2834, 2855, and 2900 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2771, with O. C. Yocom Co., for grading and bituminous macadam surfacing on the Buell and Salt Creek-Dolph Corner Section of the Dallas-Coast Highway in Polk County, completed May 21, 1947.

Contract No. 2785, with Newport, Kern & Kibbe, for regrading and oil-mat surfacing on the Lexington-South Springs Section of the Lexington-Echo Secondary Highway in Morrow County, completed May 27, 1947.

Contract No. 2786, with Newport, Kern & Kibbe, for regrading and oil-mat surfacing on the South Springs-Umatilla County Line Section of the Lexington-Echo Secondary Highway in Morrow County, completed May 27, 1947.

Contract No. 2797, with R. A. Heintz-Construction, for grading on the Spring Creek Hill-Lobert Section of The Dalles-California Highway in Klamath County, completed May 27, 1947.

Contract No. 2799, with Warren Northwest, Inc., for grading and paving on the Klamath Falls-USRS Canal Section of the Klamath Falls-Lakeview Highway in Klamath County, completed June 3, 1947.

Contract No. 2801, with A. D. Ford & Son, for construction of the Mountaindale Overcrossing structure on the Mountaindale Section of the Sunset (Wolf Creek) Highway in Washington County, completed May 15, 1947.

Contract No. 2804, with K. F. Jacobsen & Co., Inc., and J. R. Taggart, for regrading and oil-mat surfacing on the Burns-Lawen Section of the Burns-Crane Highway in Harney County, completed June 5, 1947.

Contract No. 2830, with Berke Bros., for excavating on the Oneonta Borrow Pit Section of the Columbia River Highway in Multnomah County, completed May 3, 1947.

Contract No. 2833, with Philpott & Buckingham, for reconstruction of the bridge over Mill Creek on the Dallas-Coast Highway in Polk County, completed June 7, 1947.

Contract No. 2834, with T. W. Thomas, for grading, surfacing and oiling on the Cline Falls-Tumalo Section of the Cline Falls Secondary Highway in Deschutes County, completed May 23, 1947.

Contract No. 2855, with Edlefsen-Weygandt Co., for grading and paving on the Jantzen Beach Section of the Pacific Highway East in Multnomah County, completed May 27, 1947.

Contract No. 2900, with O. S. Whitcomb Co., for installing irrigation system on the Springfield Junction Section of the Pacific and McKenzie Highways in Lane County, completed May 27, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

In this connection the Commission also considered acceptance of Contract No. 2822, awarded to Warren Northwest, Inc., for pavement widening on the Woodburn Section of the Pacific Highway East and the Hillsboro-Silverton Highway, in Marion County. With respect to this job the question arose whether or not the state is paying the contractor for work performed this year to correct imperfections in work that was supposed to have been satisfactorily completed last fall; in other words, is the state paying the contractor an extra amount by reason of the contractor's failure to do a satisfactory job before the winter season set in. The Engineer was instructed to check the records with regard thereto and to report back to the Commission at its next meeting. He was also instructed by the Commission hereafter to stop all work during the winter months in order to avoid extra expense that might be incurred if a contractor is allowed to continue operations under adverse weather conditions.

The Commission had under discussion agreements, etcs., covering various highway matters, as follows:

Agreement with Southern Pacific Company covering encroachment of the North Santiam Highway on railroad property between Gates and Idanha, Marion County.

Agreement with City of Sandy covering improvement of the former route of the Eagle Creek-Sandy Secondary Highway, in Sandy.

Agreement with City of Pilot Rock covering construction of a bridge over Birch Creek on Cherry Street, in Pilot Rock.

Agreement with City of Burns providing for rerouting the Burns-Crane Highway within the city limits.

Agreement with City of Amity providing for certain highway and street improvements in Amity.

Agreement with City of Coos Bay providing for the installation of a flashing traffic signal at Central Avenue and 14th Street, in Coos Bay.

Agreement with City of Corvallis relative to improving a section of Harrison Street as a temporary route of the Pacific Highway West.

Agreement with Ralph W. Potter, et al., covering removal of a cattlepass structure at M.P. 36.45 on the John Day Highway, in Gilliam County.

Bargain and sale deed conveying unto James H. Imbrie 0.72 acre of land adjacent to the Sunset Highway, in Washington County.

Bill of sale covering the transfer to The Pacific Telephone and Telegraph Co. of certain poles and fixtures formerly owned by Postal Telegraph-Cable Co. on the Pacific Highway between Medford and Roseburg.

Project agreements with the Public Roads Administration covering the following projects:

Scholls-Newberg Secondary Highway
Ashland Project
Mazama Junction-Lobert Section
Astoria (Bond St.-Commercial St.) Section
West Union-Cornelius Pass Project.
North Plains-Multnomah County Line Section
Gardiner Ranch-Multnomah County Line Section
Dry Creek-Monument Project
Hope-Derry Ranch Section
Umatilla Dam-Hermiston Project
Cove-Union Project
Tygh Valley-Deschutes River Project
Hardman Hill Project

The Commission approved and signed all this material with the exception of the agreement with the City of Burns covering the relocation of a short section of the Burns-Crane Highway within the city limits. The question arose whether or not this revision had previously been authorized by the Commission. In the discussion it developed that the contract for the construction work involved is completed, in view of which the Commission questioned the necessity to execute the agreement. The matter was referred to the Chief Counsel for investigation and advice.

There being no further business to come before the Commission at this time the meeting adjourned at 4:30 p.m.

T H Banfield
Chairman

State Highway Engineer

A W Schaupp
Commissioner

H B Glaisyer
Secretary

Portland, Oregon
July 21, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused from attending this meeting.

1947

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Cost to prepare restaurant, store building, and dormitory in Silver Creek Falls State Park for occupancy and operation by concessionaire. The Parks Superintendent advised that the repairs have cost more than was originally anticipated due to moving into the area and remodeling an old CCC building for use as a dormitory for employees of the concessionaire. He pointed out that the Commission heretofore authorized an expenditure of $9,190 for this purpose, but the total obligated amount to date is $16,218.40. He asked the Commission to approve an increase in the amount of the difference, or $7,028.40. The Commission approved the request by unanimous vote.

In this connection the Parks Superintendent advised that the revenues accruing to the State Highway Department during the month of June 1947 by reason of this concession amounted to $92.06.

2. Report on revenues from sale of concession in Vista House at Crown Point. The Parks Superintendent advised that the total receipts for the months of April, May, and June 1947 as reported by the concessionaire, amounted to $21,474.05 and that there has been paid into the State Highway Fund, according to agreement, for this period the sum of $2,298.27. The Commission approved the report.

3. Report on attendance in state parks during the holiday period July 4, 5, and 6, 1947. The Parks Superintendent reported a total of 34,632 cars visiting state parks during this period representing 107,640 people. The Commission ordered the report submitted to the individual members of the Commission in writing.

The Assistant Counsel, Mr. DeSouza, requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended for each parcel. Following careful consideration the Commission approved the request and the offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

10859-	Caswell, Albert T. and Nancy C. Haggen 9,500 sq. ft. at $1.26 plus per sq. ft.	$12,000.00	$12,000.00	McCallister

FOOTNOTE:

* The items appearing under the heading "Roseburg-Dixonville Section of the North Umpqua Highway" in the foregoing resolution were approved by the Commission upon assurance by the Assistant Counsel that all of these parcels lie outside the city limits of the City of Roseburg. The Commission could recall no agreement with the City of Roseburg concerning the acquisition of right of way within the city limits and declared its intention not to spend state funds for right of way in such location.

The Assistant Counsel, Mr. DeSouza, also requested authority to condemn certain parcels of real property that are needed as right of way for the Roseburg-Dixonville Section of the North Umpqua Highway, in Douglas County, which properties, he said, lie outside of the city borders. He presented a list of such properties, together with the offer that he recommended in connection with each tract, as follows:

ROSEBURG-DIXONVILLE SECTION OF THE NORTH UMPQUA HIGHWAY

		Recommended Offer
File 13250	Lena I. Denn	$ 500.00
File 13254	M. T. Dawson	2,500.00
File 13246A	Todd Building Company	4,000.00
File 13264C	Everett P. Vincent	100.00
File 13967	James C. Hall and Ellen C. Hall	175.00
File 13263	Boyer Estate	200.00

Following careful consideration of the individual items the Commission approved the request and the offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for right of way uses;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for right of way and other highway purposes in connection with the construction and other improvement of the Roseburg-Diamonville Section of the North Umpqua Highway, to wit:

Real property owned by Alma M. Lovelace and Ross Lovelace, which Everett P. Vincent has contracted to purchase, which property is located in Lot 11, Deer Creek Orchard Tracts, Plat A, in Section 23, Township 27 South, Range 5 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheet as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 13264C; and *

Real property owned by Fred Beyer, et al., which property is located in the Southwest quarter of the Southeast quarter of Section 15, Township 27 South, Range 5 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheet as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13263. *

2. That the Commission does hereby find and declare that each and all of the said described parcels of real property is and are necessary and acquisition of the same by the State is required for the specific purpose hereinabove set forth, and the said properties are being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of July, 1947.

FOOTNOTE:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 78, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Commission's Chief Counsel, Mr. J. M. Devers, reported that an option had been taken on real property needed as right of way for the North Santiam Highway but since that time a Mr. Ford M. Converse and his wife Edith C. Converse, who are not parties to the option, have acquired full title to the property, rendering of no value the option heretofore received and necessitating acquisition of the property through condemnation. He requested authority to institute special condemnation proceedings and recommended an offer of $50 to the Converses in connection therewith. The Commission approved the request and the recommended offer and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land described on the attached sheet is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property described on the attached sheet is necessary for right of way purposes in connection with the North Santiam Highway, which real property is owned by Ford M. Converse and Edith C. Converse, husband and wife, and is identified in the records of the Highway Commission as file R 12561. *

2. That the Commission does hereby find and declare that the said parcel of real property described on the attached sheet is required for the specific purpose hereinabove set forth, and the said property is being acquired for the express and specific purpose in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department the necessary and an adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners of said real property and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to said parcel of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may

be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of July, 1947.

FOOTNOTE:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 79, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Assistant Counsel requested instructions relative to the moving of buildings from right of way of The Dalles-California Highway in the town of Crescent. He advised that the former Highway Commission authorized the acquisition of right of way for a proposed improvement of this highway and that the options which were obtained contained provision for the state to move the buildings. The highway improvement, he said, is not included in the current construction program; nevertheless, the owners of the buildings are desirous of having the buildings set back to the proper location, which is estimated to cost about $18,000. It was the thought of the Commission that the moving of the buildings should be postponed until such time as the Commission is ready to proceed with the construction of the highway improvement, and it was so ordered.

The Assistant Counsel brought up for discussion the matter of acquiring 23 acres of Government-owned land in the Camp Adair area as an enlargement to Helmick State Park. He advised that the present park contains only five acres of land and that the State Parks Superintendent would like to have it enlarged by the addition of the extra acreage, which he thought could be acquired for a nominal sum. He further advised that the Government fixes the price to be paid for the property and because the time set for acceptance is short it would be convenient, if the Commission approves purchase of the tract, if the Commission's Secretary were authorized to sign the necessary papers in behalf of the Commission. The State Parks Superintendent, who was present, urged favorable consideration of the request, explaining that the additional acreage is needed to round out this state park, which is a very popular one with the general public. Following discussion the Commission approved the acquisition of the property if it can be obtained at reasonable cost. The following resolution authorizing the Secretary to sign the papers in behalf of the Commission was adopted by unanimous vote subject to the condition, however, that the Assistant Counsel will contact the Commission as to the price to be paid for the property before making any definite commitment:

WHEREAS, the Oregon State Highway Commission has heretofore found and declared, and does hereby find and declare, that the acquisition of certain real property, title to which is now vested in the United States of America, is necessary and is needed in connection with the expansion and size, improvement and maintenance of what is designated as Helmick Park located on the Pacific Highway West, U. S. 99W, in Polk County, which said park is located in the Southeast quarter (SE¼) of the Southeast quarter (SE¼) of Section 13, Township 9 South, Range 5 West, W. M.

WHEREAS, the Commission has heretofore authorized and directed J. M. Devers, its Chief Counsel, to apply to the proper agency of the United States of America for the purchase or transfer of certain real properties and for a disclosure on the part of the Federal Government as to the terms and conditions upon which said properties can be purchased or otherwise acquired by the State of Oregon; and

WHEREAS, it appears that the rules, regulations and procedure pursuant to which the Federal Government disposes of surplus properties require a petition or application to be executed by the applicant; and

WHEREAS, the Commission is in session regularly only once a month and therefore it is not always convenient for the members of the Commission to execute a formal application;

NOW, THEREFORE, the Commission does hereby authorize and empower H. B. Glaisyer, the duly appointed, qualified and acting Secretary to the Commission to execute for the Commission all necessary applications, petitions, or other papers required in connection with the acquisition of the real properties owned by the United States of America and offered for sale as surplus properties, which said real properties are located in Polk County in the State of Oregon and the acquisition of which the Highway Commission has heretofore authorized.

The form of such execution by said Secretary on behalf of the Highway Commission shall be: Oregon State Highway Commission, By H. B. Glaisyer, Secretary.

This resolution shall be entered in the minutes and records of the Commission as of the twenty-first day of July, 1947.

The Commission discussed the matter of acquiring extra right of way for widening the Santiam Highway in the town of Sweet Home but deferred action thereon pending discussion of the matter with a delegation from Sweet Home which is to appear before the Commission on the following day.

The Commission also discussed a request from Messrs. Clair E. Terry and William Ring, Coos Bay, Oregon, that a portion of Edward Street, former route of the Oregon Coast Highway through the Bunker Hill District in the City

Coos Bay, be vacated along the frontage of property which they recently purchased from the state. The Chief Counsel explained details. The Commission deferred its decision in the matter until the following day when Messrs. Terry and Ring are scheduled to be present for discussion of the matter.

The Chief Counsel reported briefly on the matter of the Commission's authority in connection with the removal of sand and gravel from beds of navigable streams and from the shore of the ocean. He advised that the State Land Board wishes a conference with the Highway Commission some time during the month of August for discussion of this matter with the view in mind of agreeing on rules and regulations for the control of such areas. The Commission approved such a conference and accordingly deferred action on the matter until it is held. The Chief Counsel was instructed to arrange the details of the conference.

The Commission had under discussion the matter of acquiring extra right of way that will be needed in connection with widening the Canyon Road Section of the Sunset Highway, particularly the acquisition of property owned by the City of Portland and by Multnomah County. It was pointed out that this highway is now constructed for four lanes of travel but because of the increase in traffic volume will have to be widened in the not distant future. It was also pointed out that this district is rapidly developing and that the extra right of way could be acquired at much less expense now than later on. The Chief Counsel read aloud a letter from Right of Way Agent Mark McCallister on the subject, particularly concerning property at the intersection of Canyon Road and Sylvan Road. He reported that two competent appraisers in Portland have been asked to appraise this property and that as soon as these appraisals are finished the values will be reported to the Commission for further instructions. The Chief Counsel also advised that he has been informed by the owners that the proposed lease of the property for commercial purposes will be deferred until further negotiations can be carried on between the Highway Commission and the owners of the property.

The Commission discussed a complaint from Mr. Elmer Bankus, Brookings, Oregon, regarding the maintenance of certain property on the Oregon Coast Highway near Brookings which he deeded to the state for right of way and other purposes. Mr. Bankus alleges that when he deeded the property to the state it was with the understanding that the state would maintain it in a sightly condition and that it would reconvey to him that portion of the property which the state didn't need, also, that the state is not maintaining the property in accordance with the agreement but is allowing brush to grow thereon, contrary to his understanding. The State Parks Superintendent advised that he favors the natural tree growth on the property. The Assistant Counsel, Mr. DeSouza, advised that the property Mr. Bankus has in mind lies between the old highway and the new highway location, and was donated to the state by Mr. Bankus with the understanding that the state would return to him the portion that wasn't needed for highway purposes. The Engineer advised that he is not in position to recommend that any of the property be deeded back to Mr. Bankus. He suggested that the matter should be referred to the Landscape Engineer for investigation and report as to what should be done to fulfill the state's obligation. The Commission approved the suggestion and so ordered.

The Chief Counsel reported on the rerouting of the Burns-Crane Highway in the City of Burns, which matter was referred to him by the Commission at the previous meeting. He advised that the change consists of rerouting the highway for a distance of about four blocks along a city street in order to improve the highway alignment and that the agreement now before the Commission for acceptance obligates the city to maintain the former route. It was his thought that it would be to the state's interest if the Commission approved and executed this agreement, inasmuch as it would relieve the state from any obligation with respect to the future maintenance of the old route. The Commission approved the report and executed the agreement later in the session.

The matter of establishing a State Parks Division as authorized by the 1947 Legislature had the attention of the Commission, but action thereon was deferred until Commissioner Schaupp is present.

The Chief Counsel reported a proposed settlement of a condemnation action of the State versus Leal concerning acquisition of right of way needed in connection with the construction of the dike project adjacent to the Boardman-Stanfield Secondary Highway in Umatilla County. He advised that after the condemnation proceedings were started Mr. Leal demanded a bridge across an irrigation ditch to replace one that was previously there. The estimated cost to construct the type of bridge which Mr. Leal wanted, he said, is $1,200, but he succeeded, by negotiation, in settling the case for $600 with the understanding that Mr. Leal would build his own structure. He recommended approval of such settlement. The Commission approved the recommendation unanimously.

The Chief Counsel also brought up for discussion objections concerning the new location of the Little Sheep Creek Secondary Highway through the Harley Tucker Ranch in Wallowa County. He advised that Mr. Tucker feels very keenly about this matter, and, according to his attorney, is going to fight the matter in court insofar as is possible, so it appears that it is going to be necessary to proceed with the condemnation proceedings that were authorized by the Commission at the previous meeting. The Engineer advised that this location is on a supported six percent grade, which eliminates a 12 percent grade on the present road to which the people of this district have objected for some time, and that on a suspended grade of this kind there is only one location where the road can be placed. Following discussion, the Commission decided to make no change in the alignment and authorized the Chief Counsel to proceed with condemnation to acquire the Tucker property; however, he was instructed, before starting the proceedings, to report to the Commission for its approval the offer that he recommended in connection therewith.

The Chief Counsel also brought up for discussion a proposed settlement of the condemnation case of the State Highway Commission versus Kemp, having to do with the acquisition of right of way for the Pelican City-South Sixth Street Section of the Klamath Falls-Malin Highway, in Klamath Falls. He advised that the Commission heretofore authorized an offer of $750 for this property, but Mr. Kemp refused to accept it and made a demand for $1,200; however, as a result of negotiations, Mr. Kemp has finally agreed to settle for $800. He recommended settlement on such basis. The Commission approved

the recommendation.

The Chief Counsel reported the results of a conversation with Mr. James W. Ford, of Gardiner, with respect to sidewalk construction in connection with the proposed improvement of the Oregon Coast Highway through the town of Gardiner, as instructed at the previous meeting. He advised that, as a result of this discussion, he is convinced that it was the understanding of all parties concerned that the state would construct sidewalks at state expense in front of the properties of those owners from whom the state procured easements for slope purposes but that sidewalks were to be constructed by the owners in those cases where no land or easements were acquired. He recommended, in view thereof, that sidewalks be constructed by the state at no expense to the property owners in those cases where slope easements were acquired, but not along other locations. The matter was discussed at some length and was referred back to the Chief Counsel with instructions to secure a written agreement with the property owners on such basis, if possible, and report the same to the Commission when a final decision will be reached.

The Chief Counsel reported the results of a conference with the City Council of Klamath Falls relative to the deadending of certain streets along the new location of the Klamath Falls-Malin Highway as provided for in the Commission's agreement with the city and the county covering this major highway improvement. He advised that there are some 25 streets involved and that the city agreed to deadend all of them except two --- Earle Street and Melrose Street --- but since the conference the city has also requested that Erie Street be left open for travel and the City Council has adopted a resolution in conformity therewith. The Engineer advised that bids are to be received on the following day for construction of a portion of the project involving two of the streets that are under discussion and provision has been made therein for closing all of the streets in accordance with the original agreement. The matter was discussed at some length, but the Commission deferred a decision pending consultation with a delegation from Klamath Falls which is to be present on the following day; however, the Commission decided unanimously that it would not award a contract for the proposed improvement until this matter has been satisfactorily disposed of.

The Engineer reported the results of the taking of bids in Salem on July 14, 1947, for the purchase of a ten-room residence building in Eugene and for the purchase of timber growing on a state-owned quarry site in Polk County. He advised that no bids were received for the purchase of the residence building and that only one bid was received for the purchase of the timber, being that of a Mr. H. C. Lamb, Salem, at $1,400. He recommended rejection of this bid and that the Commission authorize private negotiations for the sale of the timber. He also recommended private negotiations for the sale of the residence building. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer presented a copy of an order from the Public Utilities Commissioner, being Order No. 17932, in the matter of the application of the Weyerhaeuser Timber Company for authority to construct railroad crossings at grade on streets and highways in the City of Sutherlin. He pointed out that,

according to this order, the Weyerhaeuser Timber Company is given authority to construct grade crossings at this place on the condition that the Company installs reflectorized signs and automatic flashing light signals at appropriate locations for the protection of vehicular traffic, and will do certain other things for public protection, all of which are to be paid for by the Weyerhaeuser Timber Company. The Commission took no action in the matter, it appearing that there is nothing that can be done under the premises.

The Engineer reported the results of a study of traffic conditions in the City of Redmond as previously instructed by the Commission. (See detailed report directed to the Oregon State Highway Commission dated July 11, 1947, in general files, for details.) Briefly, this report points out that US97 (The Dalles-California Highway) is routed through the City of Redmond on Sixth Street and that US28 (McKenzie and Ochoco Highways) follows along "H" Street to Sixth, thence along Sixth Street to "E" Street, thence along "E" Street to the west city limits, and that the business section centers along Sixth Street between "C" and "G" Streets where there is considerable congestion of traffic. He recommends that, when the Commission has the requisite funds and if the City Council will approve, the present route along Sixth Street be designated a one-way route for southbound traffic and that northbound traffic be routed over Fifth Street with appropriate connections at each end of Fifth Street. He estimated the cost of the improvement between $100,000 and $150,000.

The Engineer also pointed out that the city is asking the Commission to designate a log-hauling route extending from a connection with the McKenzie Highway at Sixth and "H" Streets to a connection with the Ochoco Highway at Third and "E" Streets, following along the north side of the Pilot Butte Canal. It was his thought that the one-way street plan for The Dalles-California Highway would eliminate the necessity for the log truck route.

As the result of discussion, the Commission ordered that the city be informed the Commission is not in position at the present time to do what is requested but will give consideration to this project in the formulation of its next construction program if the city will adopt appropriate ordinances. As to construction of the log-truck route, the Commission ordered that the city be informed that the state cannot build separate roads for logging trucks or other truck traffic.

The Commission had under discussion the report of the Engineer on the matter of retirement of superannuated employees, which, according to a bulletin received from the Public Employees Retirement Board, begins as of July 1, 1947. (See Engineer's letter to Oregon State Highway Commission dated June 11, 1947, in general files, for details.) The Engineer requested instructions relative to the retirement of State Highway employees who have reached the age of 65 years, of whom there are 146. He pointed out that the list includes numerous employees who have worked for the Highway Department for many years and whose immediate retirement would be a serious shock to the organization. He asked the Commission to adopt a policy with respect to the

matter and particularly with respect to the employment of understudies for certain key employees who have reached retirement age and will have to be replaced unless they are granted some special concession. It was the thought of the Commission that, inasmuch as the state employees were primarily responsible for the enactment of the law, they should be required to abide by it. As to the exceptions mentioned by the Engineer, the Commission stated that it would be guided by the advice and recommendation of the Chief Counsel and Engineer. The Chief Counsel and the Engineer were thereupon instructed to report their recommendations at the Commission's next meeting, including the matters of understudies, costs, etc.

The Commission had under discussion a report from the Engineer dated June 12, 1947, on the condition of the Highway Department's finances, including a statement showing the present status of the Postwar Construction Program, an estimate of the funds that will be available to the Commission during the years 1947, 1948, and 1949, and an estimate of the amount that will be required to meet the obligations of those years. (See letter in general files for details.) In the discussion of this matter the Commission considered the advisability of selling bonds to finance highway work. The Engineer and the Chief Counsel were instructed to look into this matter and advise the Commission as to its power and authority to sell bonds for this purpose.

The Engineer requested instructions with regard to the expenditure of $250,000 of State Tax Street Funds which the 1947 Legislature, in amending the 1943 State Tax Street Fund Law, reserved for expenditure by the State Highway Commission in the improvement of city streets not a part of the State Highway System but which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. The Engineer suggested that it might be advisable to bring this feature to the attention of the incorporated cities and towns which are qualified to share in such allocation and to request them to file applications for a portion of the funds at the earliest possible time so that necessary plans can be made well in advance of the proposed date of construction of the projects that are to be accomplished in 1948. It was the thought of the Commission that the desired results could be obtained by merely sending a copy of the law to the City Council of each of the cities and towns, and it was so ordered.

The Commission had under discussion a report from the Engineer on the cost to improve the Helix-Holdman Junction Road, in Umatilla County, which road the Umatilla County Court wishes to substitute in the Federal Secondary Highway Construction Program for the Adams-Thorn Hollow County Road. According to the Engineer's report, the grade of the Helix-Holdman Junction Road is sufficiently wide for an 18-foot oil-mat surface with shoulder and subgrade stabilization; and the cost to construct such an improvement, which will satisfy the County Court, is $130,000. In the discussion it was pointed out that, whereas the Adams-Thorn Hollow County Road has been designated a Federal Aid Secondary Highway, no appropriation has been provided to finance its improvement. Following discussion the Commission decided not to improve the Helix-Holdman Junction Road at this time. The Secretary was instructed to so inform the Umatilla County Court and to fur-

ther advise the court that the Commission will give the project due consideration in the formulation of its next construction program, although no promise or commitment as to construction can be made at this time.

The Commission also discussed reports from the Engineer on the encroachment of service station buildings belonging to Mr. Arthur Muller on the right of way of The Dalles-California Highway in the town of Tygh Valley. The Engineer recalled that when this matter was discussed at the previous meeting the question arose whether or not the building encroachment created a hazard to highway traffic, and he was instructed to ascertain the facts. According to the Maintenance Engineer, Mr. E. A. Collier, he said, the traffic hazard is small, notwithstanding that Mr. Muller's gasoline pumps are set in the business center of this small town on a slight grade and on the inside of a long-radius curve; further, that while the highway carries about 300 vehicles daily, the records do not disclose any accidents occurring at this place since the keeping of such record was started in January 1941. He advised that he could not recommend that Mr. Muller be required to move his buildings back, but he did recommend that Mr. Muller be required to set back a certain sign which extends over the highway right of way even farther than the buildings. The Commission decided, in view of this information, to allow Mr. Muller to maintain his buildings on the right of way as a matter of sufferance until such time as the area is required for highway purposes, however, instructed the Engineer to install right of way posts in order to define the right of way limits. The Commission approved the Engineer's recommendation with respect to the sign and instructed the Chief Counsel to order Mr. Muller to remove it.

The Commission discussed a written report from the Engineer dated July 17, 1947, relative to the work performed by Warren Northwest, Inc. this year in connection with its contract, No. 2822, for construction of the Woodburn Section of the Pacific Highway East, such report being rendered pursuant to instructions of the Commission at the previous meeting. Briefly, the Engineer advised that the poor quality of the work performed by the contractor last fall, requiring the placement of a smoothing course on the pavement this spring, was not entirely the fault of the contractor but was primarily due to bad weather conditions; however, some extra material was placed to eliminate the abrupt changeover from a four-lane highway to a two-lane highway at the north end of the improvement, as an accident prevention measure. He pointed out that $153,881.75 was set up to pay for this improvement, but the final cost of the job was $154,556.55, which is only $674.80 more than the amount originally budgeted for it; and recommended, in view of the circumstances, that the contractor be paid for the full amount of the work performed. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of purchasing additional hull and machinery insurance for the Astoria ferries "Tourist II" and "Tourist III". He advised that, pursuant to instructions from the Commission, he has ascertained that the maximum amount of insurance that will be approved by the insurance underwriters on these ferries is $64,000 and $96,000 respectively, as compared with the amounts presently in force of $50,000 and $80,000, and that the premium on the increased insurance would be $960 more annually than is now being paid, an increase of approximately four and one-

half percent. He recommended purchase of the maximum amount of such insurance that can be obtained. The Commission approved the recommendation unanimously. (Following this meeting revised figures were submitted by the insurance agents raising the maximum limits to $80,000 and $120,000, respectively, and increasing the annual premium for the extra insurance from $960 to $2,592.65. This was approved by the Commission over the telephone.)

The Commission discussed a resolution from Willamette Grange No. 52, Corvallis, requesting the resurfacing of the Pacific Highway West (US99W) from Corvallis south a distance of about eight miles. The Engineer pointed out that no funds are provided in the present construction program for widening and resurfacing this section, but the plan is to do considerable paving plant patching work this summer and to maintain the road in the best possible condition until a major improvement is undertaken. He suggested that the Grange be so informed and that the Commission give consideration to this improvement in the formulation of its next construction program if additional Federal funds have been made available at that time. The Commission approved the suggestion and so ordered.

A letter was presented from Mr. Martin T. Pratt, Sheriff, Multnomah County, in which the Commission is urged to level off the shoulder on the east side of Vancouver Avenue, Portland, south of Schmeer Road Junction, so as to provide for three lanes of moving traffic at this point where there is considerable congestion of traffic during the periods that the Portland Meadows Race Track is in operation. The Engineer suggested the construction of four lanes of pavement, rather than three, between Columbia Slough Bridge and Schmeer Road Junction which, he said, would cost about $7,000. He recommended approval of this expenditure by the Commission and that the work be done as a minor betterment project. The Commission approved the recommendation unanimously.

A letter was presented from Hon. A. G. Ames, Mayor of Estacada, Oregon, suggesting the rerouting of the Clackamas Secondary Highway through this town in order to take the highway away from their public school buildings and to eliminate the dangers that now confront school children. The Engineer advised that the route suggested by Mr. Ames has been investigated, and that the estimated cost to improve such route is approximately $50,000. He suggested that the request be denied for immediate undertaking but that the matter be given further study and consideration in the formulation of future construction programs. The Commission approved the suggestion and ordered that Mr. Ames be informed accordingly.

The Secretary presented a letter from the City Council of the City of Vale, Malheur County, advising that the city has plans for the construction of curbs and gutters on its city streets, but cannot proceed with the work until some arrangement has been made to fill in some borrow pits along the route of the Central Oregon Highway through the town. The City Council inquires as to the possibility of securing assistance from the state in doing this work. The Engineer advised that investigations reveal that it will cost about $500 to fill-in the borrow pits. He recommended approval of this expenditure in order to help the city, the work to be done some time during the summer or the late fall when suitable equipment is available in that vicinity. The Commission approved the recommendation unanimously.

The Engineer submitted a list of rural footpath projects for approval by the Commission as a part of the 1947 Minor Betterment Program, totaling $58,500. The Commission deferred action on this matter pending additional information. The Engineer was instructed to submit a detailed report concerning each of these projects, which reports shall contain information concerning the need and justification for the improvements.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts, as follows, bids for which were received by the Commission at its meeting on June 17, 1947:

Bituminous macadam widening on the Foster Section of the Santiam Highway, Linn County; contract awarded to Frank M. Parsons, low bidder, on June 20, 1947;

Grading, surfacing, and oiling Lower Klamath Lake Secondary Highway, Klamath County; awarded to F. L. Somers, low bidder, on June 23, 1947;

Construction of a railroad grade separation structure on the Sunset Highway near Orenco, Washington County; contract awarded on June 23, 1947, to Birkemeier & Saremal, low bidder;

Grading, surfacing, and oiling the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway, Linn County; awarded on June 30, 1947, to Vernie Jarl, the low bidder;

Grading, surfacing, and oiling the Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, Gilliam County; awarded June 30, 1947, to Vernie Jarl, the low bidder.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer reported that the surveys for the relocation of the Bonanza-Malin County Road, Klamath County, (Federal Aid Secondary Highway), and for the relocation of the Gunnell Road-Robertson Bridge Section of the Rogue River Loop Secondary Highway, in Josephine County, have been completed. He submitted maps showing the survey locations and recommended approval of each survey and that authority be granted the Chief Counsel to negotiate options for the right of way. With respect to the Bonanza-Malin County Road project, he advised that a letter has been received from Commissioner A. W. Schaupp, dated July 14, 1947, approving the location. With respect to the Gunnell Road-Robertson Bridge Section, he advised that several minor revisions have been made in the alignment as suggested by the Commission at its meeting in April, one of which will eliminate acquisition of a small house, and that the recommended alignment meets with the approval of the Public Roads Administration, concerning which previously there was some doubt. Following discussion the Commission approved the Engineer's recommendation and thereupon, by unanimous vote, adopted the following resolution approving the surveys:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the Bonanza-Malin County Road, in Klamath County, and of the Gunnell Road-Robertson Bridge Section of the Rogue River Loop State Secondary Highway, in Josephine County, and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively voting, as follows:

1. That the surveys of the Bonanza-Malin County Road, in Klamath County, and of the Gunnell Road-Robertson Bridge Section of the Rogue River Loop State Secondary Highway, in Josephine County, together with the maps, which for identification purposes bear the map file Nos. 5B-19-21 & 6B-23-7, and 6B-13-1, respectively, field notes, and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-first day of July, 1947.

The Commission discussed briefly contractors' requests for extensions of time within which to complete highway contracts, and the acceptance of contracts completed, but deferred a decision with respect thereto until the following day. (See ahead for additional item.)

The Commission recessed for luncheon at 12:00 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Bids, as follows, for highway construction work and for the purchasing of the old ferry boat "North Beach" moored at Astoria, were opened and read in conformity with previously-published notice, following which

Chairman Bamfield announced that the awards of contracts would be made at 10:00 a.m. the following morning:

PACIFIC HIGHWAY WEST IN BENTON COUNTY
CORVALLIS (HARRISON STREET) SECTION

Warren Northwest, Inc., Portland	$ 27,385.00
United Contracting Co., Portland	28,916.00

NORTH UMPQUA COUNTY ROAD AT GLIDE IN DOUGLAS COUNTY
CONSTRUCT BRIDGE OVER LITTLE RIVER

Harry I. Hamilton Co., Eugene	$ 58,920.00
Tom Lillebo, Reedsport	71,420.00

THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY
EAST DIAMOND LAKE JUNCTION-LOBERT SECTION

Rogers Constr. Co., Portland	$769,233.00
E. C. Hall Co. & J. C. Compton Co., McMinnville	897,674.00
Newport Constr. Co., Portland	1,053,328.00
McNutt Bros., Eugene	1,162,479.50

PACIFIC HIGHWAY NEAR HARRISBURG IN LANE COUNTY
REMOVE WILLAMETTE OVERFLOW BRIDGE

No bids received

COLUMBIA RIVER HIGHWAY (SANDY BOULEVARD) IN MULTNOMAH COUNTY
PARKROSE (82ND AVE.-99TH AVE.) SECTION

Parker-Schram Co., Portland	$ 75,897.50
Porter W. Yett, Portland	84,252.50

KINZUA COUNTY ROAD IN WHEELER COUNTY
BUTTE CREEK-KINZUA SECTION

J. R. Taggart & Co., Inc., Brogan	$151,972.00
Rogers Constr. Co., Portland	158,732.00
J. S. Risley, Milwaukie	159,850.80

Warren Northwest, Inc., Portland	188,266.00

A letter was presented from the County Court of Columbia County in which the Highway Commission was requested to authorize its weighmasters to extend their weighing services to the county roads of Columbia County for the next 90 days, or until the county secures its own weighing scales, particularly

in order to preserve the county roads in the Scappoose area which were recently improved under state highway contract, and which are now under heavy log-hauling traffic. The Commission approved such request by unanimous vote.

The Commission discussed a request from Mr. Paul Carpenter, Corvallis, for permission to obtain about 20 cubic yards of gravel from state-owned property located on Ten Mile Creek on the southeast corner of Section 27, Township 15 South, Range 12 West, W.M., Lincoln County, with which to surface a private road leading to his residence. The Commission denied the request as a matter of long established policy, it appearing from discussion that material is available for Mr. Carpenter's use from other sources. The Commission, however, indicated that it might approve similar requests in the future if investigation reveals that suitable materials are not obtainable elsewhere in the vicinity of the place where such material is to be used.

A letter was presented from Mr. Ford Hammersly, Superintendent-Clerk, School District No. 9, Tillamook County, advising that a survey had recently been made by a member of the staff of the University of Oregon for a suitable site for a new high school building in or adjacent to the City of Tillamook, and the site chosen as most suitable is known as the Weller Estate property located just east of the city limits of Tillamook and on the north side of 3rd Street --- entrance of the Wilson River Highway into Tillamook. Mr. Hammersly advised that it is the plan of the school board to purchase this site unless the State Highway Commission makes a definite statement that it plans to construct a new entrance into Tillamook for the Wilson River Highway which might involve this particular tract. The Engineer advised that surveys for the proposed new highway entrance into Tillamook are definitely controlled at the railroad underpass adjacent to the Weller property, and that the road will pass through this property. He exhibited a map showing the proposed location. As a result of discussion the Engineer was instructed to inform Mr. Hammersly that the new Wilson River Highway approach to Tillamook will definitely pass through the Weller property, so it will be advisable for the school district to select another location for its high school building in order to avoid the hazards that would obtain if the school were located adjacent to the highway.

Consideration was given by the Commission to a report given by the Engineer regarding violations committed by Emmett C. Baugh, log hauler, McMinnville, who operates over state highways in the vicinity of Grand Ronde. It appears from the report that Mr. Baugh is a consistent violator of the weight requirements and in addition thereto has, on a number of occasions, interfered with highway department weighmasters while engaged in weighing loads of other operators. Also, that Mr. Baugh had used strong language in verbally abusing the weighmasters and, on one occasion, threatened the life of Weighmaster Dunn when cited for a 10,170 pound overload. The Engineer recommended the cancellation of Mr. Baugh's permit. The Commission approved the recommendation unanimously.

A report was also rendered by the Engineer of log-hauling violations committed by Lloyd J. Allen, dba Allen Logging Co., Scappoose. He recalled that Mr. Allen appeared before the Commission at the previous meeting at the

Commission's request to show cause why his permit should not be canceled and, at that time, was warned by the Commission that his permit would be canceled unless he complied strictly with the rules and regulations, and submitted a letter stating his future intentions. The Secretary presented a letter from Mr. Allen, dated June 18, 1947, stating what his attitude is to be in the future. This letter did not appear satisfactory to the Commission. The Engineer reported additional violations committed by Mr. Allen and five of his operators on July 16, 1947, involving overweight loads and insufficient binder chains. It appeared to the Commission, from Mr. Allen's letter and the fact that he was apprehended for five violations subsequent to receiving his warning, that Mr. Allen does not intend to cooperate. In view thereof the Commission unanimously authorized the cancellation of Mr. Allen's P.U.C. permit.

The Secretary presented letters from John L. Lamar, log-hauler, Scappoose, and E. F. Gallagher, dba Shamrock Logging Co., Lebanon, advising their future intentions with respect to complying with the rules and regulations covering the truck-hauling of logs over state highways. These letters appeared to be satisfactory to the Commission and were ordered filed with the proper records.

Consideration was given by the Commission to a request from Lucille C. Wilson, Portland, for permission to maintain a sign advertising the Hood River Valley on state highway property located at the base of Hood River Loops on the Columbia River Highway, just east of the City of Hood River. The Chief Counsel advised as to the legal authority to control situations of this kind. Chairman Banfield expressed himself as being opposed to the granting of this privilege because of the Commission's endeavors to keep the highways clear of all such material. The Commission thereupon denied the request.

The Commission discussed the advisability of disposing of portions of old highway rights of way as follows:

(1) Old section of the Pacific Highway East near the south city limits of Canby

(2) Portion of Fulton Canyon-Wasco Secondary Highway (old route) near its junction with the Columbia River Highway

(3) Portions of old right of way of the Dallas-Coast Secondary Highway along the Buell and Salt Creek-Dolph Sections

(4) Portion of the Nehalem Secondary Highway along the Astoria-Naval Hospital Section.

The Engineer advised that the old highway in Canby no longer is of value for state highway purposes and recommended that it be allowed to revert to the City of Canby in conformity with the city's request and the recommendation of the Clackamas County Court. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pacific Highway known as the Canby Section in Clackamas County, the northerly terminus of which is at highway engineer's station 170+98.5 of the reconstructed line and the southerly terminus of which is at highway engineer's station 54+27.9 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, but are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between highway engineer's station 36+60 and highway engineer's station 50+90 of the reconstructed highway, and which area is identified and shown colored in blue on map attached hereto and marked Exhibit "A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the City Council of the City of Canby, and said road shall thereafter be maintained by the City for public use. *

2. The area shown colored in green on said Exhibit "A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit "A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Clackamas County a duly certified copy thereof, and shall file with the Clerk of Clackamas County a like certified copy and is likewise directed to mail to the City Council of the City of Canby a like certified copy, and shall file with the City Recorder a like certified copy and said County Court and City Council hereby are respectfully requested to take appropriate official action, by resolution or otherwise, by which the City shall accept the said abandoned sections of the said old right of way shown colored in blue on the map attached hereto and marked Exhibit "A", and shall assume jurisdiction thereover as a city street and shall maintain the same for public purposes. *

Clackamas County, acting by and through its County Court, has found and does hereby find that the sections of highway referred to in the above resolution are not needed for county road or highway purposes, and requests and recommends that such sections be maintained as city streets by the City of Canby or permitted to revert to the abutting owners as provided in the within resolution.

Dated this 15th day of May, 1947.

City of Canby, acting by and through its City Council, does hereby request and recommend to the State Highway Commission that the within resolution be adopted by the State Highway Commission, and partic-

ularly agrees that upon the passage of such resolution it will assume and exercise jurisdiction over that portion of the right of way between station 36+60 and station 50+90 as a city street according to the terms and conditions of said resolution.

Dated this 2nd day of June, 1947.

FOOTNOTE:

* The Exhibit mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 159, under the heading "Abandonment and Retention Resolutions" and said exhibit by this reference is made a part of this minute entry to the same extent as if copied in full herein.

With respect to the Fulton Canyon-Wasco Secondary Highway, the Engineer advised that, whereas the highway had been realigned where it connects with the Columbia River Highway, the old highway is still of value for state highway purposes, particularly as an access or hauling road for use in connection with highway construction and maintenance. He recommended retention of this short section of old right of way for state highway purposes. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Fulton Canyon-Wasco Secondary Highway known as the North Unit, Fulton Canyon Section in Sherman County, the Northerly terminus of which is at Highway Engineer's Station 0+00, and the Southerly terminus of which is at Highway Engineer's Station 68+55.7 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, but is still needed for highway purposes and must be retained for highway use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area or areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. By reason of the relocation of a part of the Fulton Canyon-Wasco Secondary Highway the unit of the old right of way which is shown colored in light green on the attached print will no longer be used as a part of the right of way of said secondary highway, but nevertheless said unit is needed as and for an access or hauling road in connection with highway construction and maintenance. *

2. Said unit of the old right of way which is defined as beginning at Engineer's Station 437+00 of the survey of the Columbia River Highway and ending at Engineer's Station 8+50 of the relocated and reconstructed Fulton Canyon-Wasco Secondary Highway, hereby is declared to be necessary for highway purposes and said unit and the right of way thereof and title thereto shall be kept and retained by the State.

3. The boundaries of all real properties acquired for right of way and the boundaries of all real properties, title to which is retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Sherman County a duly certified copy thereof, and shall file with the Clerk of Sherman County a like certified copy.

FOOTNOTE:

* The print mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 160, under the heading "Abandonment and Retention Resolutions" and said print by this reference is made a part of this minute entry to the same extent as if copied in full herein.

With respect to the disposition of the old right of way of the Dallas-Coast Secondary Highway along the Buell and Salt Creek-Dolph Sections, the Engineer recommended that portions thereof be retained by the state for state highway purposes and that a portion be allowed to revert to Polk County to be maintained by the County as a County road, pursuant to a written agreement with Polk County Court, dated January 17, 1946, and that the balance be allowed

to revert to the abutting property owners if that is agreeable to the County Court. He exhibited a map showing the sections under discussion. After careful consideration the Commission approved the recommendations and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission has found it necessary and desirable to relocate the sections of the Dallas-Coast Secondary State Highway No. 192, known as the Buell and Salt Creek-Dolph Corner Sections, the Westerly terminus of the Buell Section being Highway Engineer's Station 210+50 of the reconstructed line, and the Easterly terminus at Highway Engineer's Station 252+00, and the Westerly terminus of the Salt Creek-Dolph Corner Section being at Highway Engineer's Station 445+00 of the reconstructed line and the Easterly terminus at Highway Engineer's Station 623+50; and

WHEREAS, by reason of the relocation of said sections of said highway, portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, which eliminated sections or areas are no longer needed for highway or other public purposes; and

WHEREAS, the State Highway Commission and the County of Polk entered into an agreement dated January 17, 1946, setting forth what disposition was to be made of certain portions of the right of way of the old highway when the new highway was completed and thrown open to travel; and

WHEREAS, the Buell and the Salt Creek-Dolph Corner Sections were completed and thrown open to traffic on May 31, 1947; and

WHEREAS, it is the purpose of the State Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the sections or areas of the old right of way which lie between Highway Engineer's Station 214+70 and Highway Engineer's Station 247+75 of the reconstructed line, and between Highway Engineer's Station 450+80 and Highway Engineer's Station 592+40 of the reconstructed line, and which lie outside of the areas of the right of way of the reconstructed line, which area is otherwise shown and identified colored in red on the map attached hereto marked "Exhibit A", and by this reference is made a part of this resolution, is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained by the County as a county road. The Commission hereby surrenders all jurisdiction with respect to said highway, and hereby consents that jurisdiction thereover may be assumed and exercised by the County Court of Polk County. *

2. The area of land within the limits of the old right of way and outside of the limits of the right of way of the reconstructed line which lies between Highway Engineer's Station 610+00 and Highway Engineer's Station 621+00 of the reconstructed line, and which area is otherwise shown and identified colored in brown on said "Exhibit A", is no longer needed for highway or other public purposes, and, therefore, all of said area colored in brown is eliminated from the right of way of said highway, and such title, interest, or right which the State has, or may have had in said real property, is hereby relinquished, and hereafter title thereto and jurisdiction and control thereover shall be in the County, and may be vacated as a public highway or kept by the County for such public use as the County may determine. *

3. The area shown colored in green on said "Exhibit A" includes right of way and other property acquired for the relocation and reconstruction of the said highway, and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such purposes and uses, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

4. That prior to the adoption of this resolution a mutual agreement between the State and Polk County was executed, by which the County has accepted and agreed to maintain as a county road the section of the old location shown colored in red on said "Exhibit A". *

5. This resolution shall be deemed adopted and entered in the minutes and records of the State Highway Commission as of the 21st day of July, 1947.

FOOTNOTE:

* The exhibit mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 128, under the heading "Abandonment and Retention Resolutions" and said exhibit by this reference is made a part of this minute entry to the same extent as if copied in full herein.

With respect to the disposition of the Astoria-Naval Hospital Section of the Nehalem Secondary Highway, the Engineer recommended that a portion thereof be retained by the state for state highway purposes; that a portion be allowed to revert to the abutting property owners; and that the remainder be surrendered to the jurisdiction of the Clatsop County Court for future maintenance and use as a county road pursuant to a written agreement with Clatsop County Court dated June 27, 1946. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Oregon State Highway Commission has found it necessary and desirable to relocate the section of the Nehalem Secondary State Highway known as the Astoria Naval Hospital Section in Clatsop County, the Westerly terminus of which is at Highway Engineer's Station 0+00 of the reconstructed line and at the intersection of 5th and Taylor Streets of Olney's Addition to Astoria, and the Easterly terminus of which is at Highway Engineer's Station 188+80.6 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway or other public purposes, while other portions or sections are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation; and

WHEREAS, Clatsop County and the Highway Commission have entered into an agreement under date of June 27, 1946, relating to the use and jurisdiction of the abandoned sections;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The areas of land within the limits of the old right of way which lie between Engineer's Station 112+90 and Engineer's Station 132+75 of the reconstructed highway, and which areas are shown colored in brown on the map attached hereto, which map is marked "Exhibit 'A'", and by this reference is made a part of this resolution, are no longer needed for highway or other public purposes and, therefore, all of said area colored in brown is eliminated from the right of way of said highway and such title, interest, or right which the State has or may have had in said real property is hereby permitted to revert to the owners of the real properties abutting directly upon the said area colored in brown. *

2. That the portions of the old right of way which, by reason of the relocation of the said highway, are no longer within the boundaries of the new right of way, and which portions lie between Highway Engineer's Station 88+90 and Highway Engineer's Station 105+50 of the reconstructed highway, and also between Highway Engineer's Station 137+50 and Highway Engineer's Station 176+60 of the reconstructed highway, and which areas are identified and shown colored in yellow on said map attached hereto, are to be retained by the State and possession thereof and title thereto shall continue to remain in the State of Oregon for use in connection with the construction, maintenance and operation of said highway and for such other public uses as said areas may serve. *

3. That the section or area of the old right of way which lies between Highway Engineer's Station 62+40 and Highway Engineer's Station 71+50 of the reconstructed highway and is otherwise shown and identified colored in red on said "Exhibit 'A'" is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Clatsop County, and said road shall thereafter be maintained by the County for public use. *

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. The matters, things, and official acts covered by this resolution have all heretofore been done and fully performed but the formal adoption of an appropriate resolution by the Commission was inadvertently overlooked; therefore, this resolution shall be deemed to have been adopted as of the twenty-seventh day of June, 1946, and its entry in the minutes of the Commission shall be deemed as of said date.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Clatsop County a duly certified copy thereof, and shall file with the Clerk of Clatsop County a like certified copy; and said County Court hereby is respectfully requested to take appropriate official action by resolution or otherwise by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit 'A'", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. *

FOOTNOTE:

* The exhibit mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission,

Salem, being Resolution No. 143, under the heading "Abandonment and Retention Resolutions" and said exhibit by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Consideration was given by the Commission to a letter from Mr. John C. Kendall, Attorney for the Port of Coos Bay, in which the Commission is advised that the U.S. War Department plans to deepen the Coos Bay ship channel to a projected depth of ultimately 30 feet MLLW and requires the Port of Coos Bay to furnish necessary disposal areas for material to be pumped by hydraulic-excavation therefrom; and requesting that permission be granted by the State Highway Commission for the depositing of this material upon tide lands included in the right of way of the Oregon Coast Highway at this point. The Engineer advised that the former Highway Commission, in 1936, granted a similar privilege on the condition that the material is properly leveled down and the premises left in a presentable condition. He recommended approval of the request, subject to the same conditions. The Commission approved the recommendation unanimously and it was so ordered.

The Engineer requested authority for J. M. Devers, Chief Counsel; H. G. Smith, Construction Engineer; E. A. Collier, Maintenance Engineer; G. S. Paxson, Bridge Engineer; and himself to attend, at state expense, the annual meeting of the Western Association of State Highway Officials which is to be held in Missoula, Montana, on August 6 and 7, 1947. He advised that the expense involved would be nominal and that it is the intention to drive to Missoula in a state car. The request was approved by unanimous vote subject to concurrence by Governor Snell.

The Engineer also requested authority for J. M. Devers, Chief Counsel, and himself to attend, at state expense, the annual meeting of the American Association of State Highway Officials which is to be held in New York City from September 22 to 27, 1947. The Commission approved the request by unanimous vote subject to concurrence by Governor Snell.

The Secretary presented an invoice from the Western Association of State Highway Officials in the amount of $50 representing annual dues of the State of Oregon in this association. The Commission approved payment of this invoice by unanimous vote.

The Engineer reported that the City of Antelope had met all of the legal requirements with respect to the expenditure of 1945 State Tax Street Funds which it had received in 1946 and that the plans for the improvements which are to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Highway Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by the Oregon State Highway Commission apportioned to the city hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the sum or amount set opposite the name of said city:

Antelope - $135.18

AND, WHEREAS, said city has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified, the following streets in the following named city:

Antelope - McGreer Street, College Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named city hereby are approved.

3. That the action taken by said city as evidenced by appropriate resolutions adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city so as to qualify said city to receive and use the funds apportioned to said city.

4. That Resolution Form 3, previously adopted by the City of Antelope, and approved by the State Highway Commission on April 4, 1946, shall be canceled, in accordance with the request of the City of Antelope on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Highway Commission, the Secretary shall thereafter mail to the proper officer in said city a duly certified copy of the resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 21st day of July, 1947.

The Engineer also reported that the following cities and towns have complied with the legal requirements with respect to the expenditure of 1946 State Tax Street Funds which they had received in 1947, and that the plans for the improvements contemplated to be financed with such funds have been examined and found satisfactory:

Antelope	Corvallis	Phoenix
Bay City	Jefferson	Riddle
Butte Falls	Oakridge	St. Paul

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto;

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Antelope	$ 180.51
Bay City	1,079.02
Butte Falls	679.90
Corvallis	16,831.12
Jefferson	960.69
Oakridge	1,042.92
Phoenix	1,285.60
Riddle	429.20
St. Paul	367.03

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Antelope - College Street

Bay City - 1st Street, Ocean to Pacific; 2nd Street, Trade to "A" Street; 4th Street, Hendricks to "D" Street; 6th Street, Ocean to Main, and from Trade Street to "A" Street, and from "C" Street to Highway; 9th Street, Portland Avenue to Highway; Hare Street, Salmon to Spruce; Warren Street, McCoy Avenue to Spruce; 13th Street, Seattle Avenue to Tillamook Avenue; 15th Street, Seattle Avenue

to Tillamook Avenue; Hendricks Street, 4th to 5th; High Street, 1st to 4th; Ocean Street, 1st to 4th; Pacific Street, 1st to 4th; Main Street, Miami to 12th; Trade Street, Bay to 4th; "A" Street, 4th to 6th; "B" Street, 4th to 6th; "C" Street, 2nd to 5th; "D" Street, 4th to 5th; "E" Street, 4th to 5th; Portland Avenue, 5th to 12th; Seattle Avenue, Highway to 8th, and from 11th to 13th, and from Petteys Avenue to 15th; Union Avenue, 15th to Petteys Avenue; Tillamook Avenue, entire length; McCoy Avenue, Highway to Sallal Street; Spruce Street from Hare to Warren; Salmon Street, Adams to Hare; 5th Street, Hendricks to High

Butte Falls - Corner of Broad, south to the corner of South and Fir, east on South to the corner of Oak

Corvallis - 15th Street (bridge over Marys River)

Jefferson - Third Street, Union Street

Oakridge - First Street West

Phoenix - Church Street, Rose Street, "C" Street, 5th Street

Riddle - Main Street, 4th Street

St. Paul - Church Street, Blanchet Avenue, Park Avenue, 2nd Street, Main Street, Christie Street, 3rd Street, Mission Avenue

2. That the type, plan and character of improvement proposed in th resolutions filed with the State Highway Commission by the above named respec tive cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approv ing the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of July, 1947.

Consideration was given by the Commission to the oral request of Mr. H. G. Maison, Superintendent of the Department of State Police, for the relocation of the highway department truck scales on the Lower Columbia River Highway at Burlington as a convenience in the disposal of overweight violations. The Engineer advised that the scales are now located four miles west of the Town of Linnton in Multnomah County and that, under present conditions, the violators have to be cited to the District Court of Multnomah County, which means that a police officer is "tied up" from one to three days for each case. This condition could be avoided, he said, if the scales were located a short distance further west on the same highway, but within the boundaries of Columbia County. He estimated the cost of moving the scales at $3,000 and recommended approval of the request, the work to be done as a minor betterment project. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion a request from the Vale Chamber of Commerce for the installation of a traffic signal at the intersection of the Central Oregon Highway (US 20) and the John Day Highway (US 28) in that town. The Engineer advised that this matter has been investigated by the Traffic Engineer who recommends that a flashing beacon be installed at this location at an estimated cost of $300, provided the city will execute the usual agreement to pay the expense of maintenance and operation. He advised that he concurs in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer brought up for discussion the matter of designating reduced speed zones at the following highway locations:

(1) Pacific Highway East just north of Eugene

(2) Sunset-Tualatin Valley Highway between Portland and Beaverton

(3) Pacific Highway East north of Albany

He recommended a 40-miles-per-hour speed limit on the Pacific Highway East (US99E) between the west city limits of Eugene (MP 122.25) and a point about 3.27 miles northerly therefrom, at the crossing of what is known as Prairie Road. He also recommended a 35-miles-per-hour speed limit for the Sunset-Tualatin Valley Highway (ORE 2 & 6) between Portland and Beaverton; and a 45-miles-per-hour speed limit for the Pacific Highway East (US99E) between milepost 73.94 (east of Cox Creek) to milepost 74.16 (Albany city limits). With respect to the latter mentioned project he advised that ultimately the entire section of highway through the City of Albany should be zoned for reduced speeds, though the city portion comes under the jurisdiction and control of the State Speed Control Board. As a result of discussion the Commission approved the Engineer's recommendation with respect to the Pacific Highway East, just north of Eugene, and the Sunset-Tualatin Valley Highway between Portland and Beaverton; but deferred action on the section of the Pacific Highway East north of Albany pending action that may be taken by the State Speed Control Board with respect to the section within the corporate limits of Albany. The following resolutions relative thereto were adopted by the Commission by unanimous vote:

14070

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highway and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Pacific Highway

Highway Number: 1 Route Number US99

Location of Termini	Established Speed
M.P. 118.98 (Prairie Road Jct.) to M.P. 122.25 (Eugene West City Limits)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth ar more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: .....Sunset Highway.....

Highway Number: .....47..... Route Number: ..ORE.2.&.6...

Location of Termini	Established Speed
M.P. 70.91 (Jct. Tualatin Valley Hwy.) to M.P. 72.53 (Portland City Limits)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and h hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

14072

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 155-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1951, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Tualatin Valley Highway

Highway Number: 29 Route Number Temp. ORE 2 & 6

Location of Termini		Established Speed
M.P. 0.00 (Jct. Sunset Hwy.) to	M.P. 3.176 (East City Limits - Beaverton)	35 miles per hour
M.P. 4.017 (West City Limits - Beaverton) to	M.P. 4.217 (West of Beaverton)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

In the discussion of the matter of designating reduced speed zones, Chairman Banfield suggested that it would be advisable to maintain an appropriate sign near the end of each reduced speed zone calling public attention to the fact that it is about to enter such a zone, and a similar sign notifying the public that it is about to leave the zone. Commissioner Chandler approved of the suggestion, and it was so ordered.

A letter was presented from the following concerns doing business on S.W. Kelly Street, Portland, requesting permission to maintain a parking space for their customers under the Arthur Street Viaduct:

Boyer's Fruit Market
Boyer's Grocery
Salem Meat Company

They allege that, as a result of the Harbor Drive improvement, a substantial portion of street parking place has been eliminated so that many of their customers have no place to park their cars when making purchases. The Engineer recommended that the request be denied as a matter of policy and to avoid a situation that might prove highly dangerous. The Commission approved the recommendation unanimously.

The Engineer reported the need to provide living quarters for the use of a section man working out of the Austin Maintenance Headquarters in Grant County. He advised that several years ago an employee of the State Highway Department constructed a house on state property at this location at his own expense, and that it is now owned by a Mr. Frank E. Owens who has recently resigned as Sectionman's Helper and who has no further use for the building. Mr. Owens, he said, has offered to sell the house to the state for $2,000. He recommended purchase of the building at such figure, appraisals revealing that a similar house could not be built for less than $2,500. He explained that this is rather an isolated section of the state and it is desirable to have helpers live at the Section Headquarters; further, that if the Commission authorized the purchase of the house it would be rented at a reasonable rate to another State Highway employee. The Commission approved the purchase of the building at the price quoted.

The Engineer reported a request from the Wolf Creek Water District, Portland, which is connected with the Cedar Hills Development along the Sunset Highway west of Portland, for permission to maintain a 1,000,000 gallon reservoir on state-owned property situate in the island formed by the intersection of Sunset Highway and Barnes Road, northwest of what is known as Commonwealth Underpass. He exhibited a drawing showing the location of the

proposed reservoir, and explained the manner in which the district proposed to develop it by landscaping, etc. The Engineer advised that he could see no particular objections to granting this request providing the district will landscape and maintain the area satisfactorily and will not construct footpaths on the property which might induce pedestrians to cross the highway. In the discussion of the matter it developed that the top of the reservoir would be about ten feet above the natural ground level and that the reservoir would be about 96 feet in diameter. The Commission questioned the advisability of allowing public property to be used as intended and, accordingly, ordered that the district be informed that the Commission prefers that it find another location for its reservoir.

The Chief Counsel brought up for discussion the sale to the Myrtle Creek Telephone Company of some of the property that was salvaged from the old Postal Telegraph pole line in Josephine County. He advised that the Company desires to purchase some of this property but is unable to pay cash for it and has requested the privilege of paying for it in installments, viz., $500 down, and the balance in installments of $500 annually. He recommended approval of their request. The Engineer concurred. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion the setting of a date for its next regular meeting and decided unanimously to hold such meeting on Monday and Tuesday, August 25 and 26, 1947, in Portland. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

In this connection, the Commission also considered the advisability of holding a special meeting prior to August 25th for the disposal of accumulated matters that require action when all three members of the Commission are present. The Engineer was instructed to consult with Mr. Schaupp as to a date that would be convenient for him, and then advise the other members of the Commission. (This meeting was later scheduled to be held in Portland on Monday, August 11, 1947.)

The Commission's Chief Counsel, Mr. J. M. Devers, reported receipt of a letter from Mr. C. L. Starr, President, Children's Farm Home, Portland, relative to right of way required for a proposed revision of the Pacific Highway north of Main Street in the town of Cottage Grove. It appears that a man by the name of Edd Jenks, deceased, owned property at this location and that by the terms of his will and testament the sum of $3,000 has been given to the Public Library Board of Cottage Grove and the rest of his estate has been given to the Children's Farm Home and the Children's Orphanage in Washington. It was Mr. Starr's thought that the Highway Commission might be interested in purchasing a portion of this property that is needed as right of way for the proposed improvement of the highway. The Chief Counsel questioned the advisability of acquiring this property without purchasing the balance of the right of way that might be needed for this highway improvement. The Engineer advised that ultimately the Pacific Highway will bypass Cottage Grove, although that is a project for a long time in the future; however, gave as his thought if the right of way can be acquired at reasonable expense it might be advisable

to purchase it, although in his estimation, the cost would be exhorbitant. The Assistant Counsel, Mr. DeSouza, gave an offhand estimate of the cost at $100,000. The Commission deferred a decision in the matter pending additional information and referred it to the Engineer to make a complete investigation with instructions to report his findings at the earliest possible time.

The Commission considered the following matters of unfinished business:

(1) Settlement with W. H. Gonyea for right of way needed for the proposed improvement of the Pacific Highway south of Eugene. The Chief Counsel advised that this matter was investigated by the Engineer and the Assistant Counsel, Mr. Neuner, but that a report cannot be rendered until the next meeting due to the illness of Mr. Neuner.

(2) Request of City Commissioner Bowes for clarification of oral arrangements made between the Highway Commission and the City of Portland during the wartime period. The Engineer advised that the report on this subject is not ready due to the fact that Mr. Bowes has not as yet indicated just what he has in mind, but that he will report to the Commission as soon as such information is received.

(3) Report on right of way matters concerning the three-party project in the City of Eugene. The Chief Counsel advised that the report is not yet ready for presentation. The Commission ordered that this item be deleted from future agenda.

(4) Proposed modification of State and Federal Secondary Construction Program to take up Federal monies allotted to surveys. Consideration of this matter was deferred by the Commission until all Commissioners are present.

(5) Request of the City of Coos Bay for establishment of a truck route bypassing the congested district in the City of Coos Bay. The Commission denied the request, it being considered that this is a city responsibility.

(6) Report of Engineer and Chief Counsel on proposed Sullivan's Gulch Highway. The Engineer reported the plan for stage construction of this highway by units. The Chief Counsel read aloud the Engineer's recommendation with respect thereto as contained in a tentative agreement with the City of Portland. The matter was discussed by the Commission but no action thereon was taken.

(7) Proposed service road along the Steiwer Hill-Albany Section of the Pacific Highway East, Linn County. The Engineer estimated the cost to construct such service road at $25,000 and advised that, according to a report from the Right of Way Department, right of way would cost an additional $17,000. The Commission decided unanimously not to construct such service road.

(8) Erection of additional historical markers along Oregon highways. The Engineer gave as his understanding that the Legislature approved funds for the expenditure by the Oregon Historical Society to assist the State Highway Commission in its study of Oregon history and suggested that, if the Legislature has recognized the official standing of this society, it would be proper to refer to that society the requests for installation of markers. The Chief Counsel cited to the Commission as evidence of the standing and integrity of the Oregon Historical Society, Section 90-232, O.C.L.A., as follows:

> '"That the secretary of state be and he hereby is authorized and directed to deliver to the Oregon Historical Society, as trustee of the State of Oregon, for safekeeping, all documents, letters, reports, journals, proceedings of the public meetings held at the Oregon institute at Champoeg and other places for the purpose of forming an organized government, census reports, messages, petitions, court proceedings, election returns, engrossed and enrolled bills and all legislative documents relating to the political history of the provisional government prior to March 2, 1849, and the territorial government of the territory of Oregon prior to February 14, 1859, now in the custody of the secretary of state, taking a general receipt of the secretary of the Oregon Historical Society therefor; provided, however, that when in the judgment of the Oregon state board of control suitable fireproof vaults are available in the capitol building group in Salem, Oregon, all of such documents shall, upon the order of the said Oregon state board of control be returned to the secretary of state and by him deposited in the room or vaults provided for such records." (L. 1931)'

He explained that the above act of the Legislature indicates the standing and integrity of the Oregon Historical Society, and gave as his opinion that it is quite appropriate and proper for the Commission to likewise recognize the Oregon Historical Society. He suggested that all requests for markers or other monuments come to the Commission through the Oregon Historical Society either with or without the society's approval. Chairman Banfield, in reviewing the situation, gave as his thought that the Oregon Historical Society should be recognized by the Highway Commission as the responsible agency for the Commission to work through in matters of this kind. Commissioner Chandler expressed himself similarly, whereupon it was ordered that all historical matters hereafter should be referred to the Oregon Historical Society for its advice and recommendation.

(9). Amendatory agreement with Clackamas County covering the relocation of the Woodburn-Sandy Secondary Highway so as to eliminate a small portion of the old road which was included in the original agreement by mistake. It was explained that action on this matter was deferred by the Commission upon recommendation of the Chief Counsel pending disposal of some condemnation cases. The Chief Counsel advised that circumstances are such that these law suits cannot be tried until October. He recommended, in view thereof, that the Commission approve the amendatory agreement at this time inasmuch as it is simply a perfunctory matter to clarify a mistake in the original agreement. The Commission approved the recommendation and signed the agreement later in the session.

(10) Request of delegation from Seaside for establishment of a logging truck route along Roosevelt Drive, Seaside. The Engineer advised that his report on the cost to improve this street as a log-hauling route, previously ordered by the Commission, is not ready. He anticipated that he would be able to render a report at the next regular meeting.

(11) Request of Gas-Heat, Inc., for leasing a small tract of state-owned land at Seaside. The Chief Counsel advised that, in following up this matter subsequent to the previous meeting, he ascertained that the company found another site that served its purposes so no longer needs the state's property.

(12) Request of Klamath County for construction of a fence at the Klamath County Fairgrounds along South Sixth Street, Klamath Falls. The Engineer reported that provision has been made for the construction of this fence.

The Commission discussed briefly matters that are to be presented by delegations the following day, but took no action thereon.

The Commission also discussed matters covered by agreements which are now before the Commission for approval and execution. All of the agreements were approved and were signed by the Commission on the following day.

The Chief Counsel brought up for discussion a claim filed by Mr. Harold A. Wayman, Attorney, Roseburg, on behalf of Mrs. Lenora Hammersly and Joan Hammersly, granddaughter, concerning an accident that occurred on the Tiller-Trail Secondary Highway near Days Creek in Douglas County, which resulted in injuries to Mrs. Hammersly's granddaughter who was thrown out of a light truck in which she was riding over this road. He advised that the Hammerslys attributed their accident to the bad condition of the road, and at first demanded a settlement of $1,000; however, are now willing to settle for $500, the amount of their doctor's bill. The Chief Counsel advised that the matter has been investigated and a study of the report indicates that the state is not liable. He recommended that the claim be denied. The Commission approved the recommendation by unanimous vote.

The Engineer presented a request from the Spokane-Portland-Seattle Railroad Company to acquire a small tract of state-owned land adjacent to the Lower Columbia River Highway north of the town of Linnton. He advised that the former Highway Commission, in 1933, acquired from the United Railway Company a portion of the old railroad right of way north of Linnton for a distance of some 2.5 miles. This property, he said, is valuable for right of way where it abuts the existing highway; but is of no value for such purpose at the northerly end, including the small area that the Spokane-Portland-Seattle Railroad Company now wishes to repossess as a borrow pit site. He recommended sale of this property to the Spokane-Portland-Seattle Railroad Company at the same unit price which the state originally paid for it. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to an agreement with the City of Silverton covering the plant patching of city streets that are not on the state highway system. The Engineer explained that this agreement is a result of action taken by the Commission at its meeting on April 23, 1947, when the Commission approved the expenditure of a maximum sum of $2,500 for the improvement of certain streets that are being used by log haulers. Under this agreement, he said, the City of Silverton is obligated to contribute the sum of $500 toward the cost of the improvement. The Commission approved the agreement and signed the same later in the session.

The Commission also discussed an agreement with the City of Lebanon covering the maintenance of Fifth Street, Lebanon, as a log-hauling route between Main Street and Rose Street, a distance of about 2,000 feet. According to this agreement, the state's share of the cost is $1,600 and the city's is the sum of $400. The Secretary advised that this arrangement was authorized by the Commission at its meeting on February 4, 1947, and that the city has already contributed its proportionate share of $400. The Commission approved the arrangement and signed the agreement on the following day.

An agreement was presented with the City of Hood River providing for the installation of a traffic signal at the intersection of 9th and Oak Streets, route of the Columbia River Highway. The Secretary advised that this agreement is in conformity with action taken by the Commission at its meeting on March 24, 1947; moreover, the city has met the requirements with respect to the adoption of an ordinance providing for the stopping of traffic on 9th Street before entering Oak Street. The Commission approved the agreement and signed the same on the following day.

The Engineer brought up for discussion matters pertaining to the construction of the Warm Springs Highway between Warm Springs Agency and the junction with the Wapinitia Highway at Bear Springs. He recalled that the Commission, at the previous meeting, authorized the contracting of all of the work south of the National Forest Boundary, and pointed out that that section would be of little use unless the 6.9 mile section through the National Forest is graded and surfaced to a junction with the Wapinitia Highway, which work is scheduled to be performed as a forest highway project but which cannot be financed at the present time because of the "tieup" of forest highway funds. He suggested, in view thereof, that the forest highway section be withdrawn from the forest highway program and constructed as a federal aid project; and that the amount of $323,000 of federal aid funds which has been programmed for construction of the Forest Boundary-Jones Ranch Section of the Ochoco Highway be used to finance it, which would expedite the contracting of the grading work on the Warm Springs Highway through the National Forest, and the completion of the entire road for general public use. He declared that the Warm Springs Highway is one of the most important connections to Eastern Oregon and that it will save 35 miles distance over the present road via Maupin and that the arrangement, in his estimation, will not delay completion of the Ochoco project. As a result of discussion the Commission approved the Engineer's recommendation by unanimous vote and authorized him to secure approval by the Public Roads Administration.

The Engineer requested instructions relative to the procedure to be followed in the matter of revising the program of state construction projects. Action on this matter was deferred by the Commission until all Commissioners are present.

Consideration was given by the Commission to the matter of designating a maximum speed limit for the operation of motor vehicles on ocean beaches. The Engineer read aloud a report on the subject by F. B. Crandall, Acting Traffic Engineer. The Chief Counsel advised that the statutes fix a maximum of 25-miles-per-hour for vehicles operating at such locations; however, it authorizes the State Highway Commission to designate a slower speed if it wishes. After due consideration the Commission, by unanimous vote, ordered a 20-miles-per-hour speed limit for motor vehicles operating on the ocean beaches and instructed the Engineer to maintain signs accordingly. The Chief Counsel was instructed to prepare an appropriate resolution covering the matter for adoption by the Commission at its next meeting.

The Engineer submitted, for the Commission's consideration, a list of highways, to be known as "Group I Highways", which will accommodate combinations of vehicles 60 feet overall in length without hazard to other traffic, and a list of highways, to be known as "Group II Highways", which cannot accomodate a vehicle combination 60 feet overall in length but the geometrical design of which is such that they can accommodate a vehicle combination 50 feet overall in length, with an increased weight load. He advised that these highways have been selected, for the most part, as the result of test runs of vehicle combinations over them. He assured the Commission that the highways listed in both group classifications are capable of handling the vehicle combinations which it is proposed to operate over them, and recommended approval of the list by the Commission for use in connection with the granting of permits under authority of Chapter 69, Oregon Laws, 1947, commonly known as the "Big Truck Bill". Following careful consideration and upon assurance by the Engineer that the roads can accommodate the vehicle combinations proposed under the two classifications without creating a hazard for other traffic or overstressing highway facilities, the Commission approved both lists and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Oregon Legislature when in session in 1947 enacted Chapter 156, Oregon Laws, 1947, Section 1 of which reads as follows:

> "Notwithstanding any other provisions of law, the state highway commission hereby is authorized, with the approval of the governor, to permit the movement over state highways, or sections thereof, of vehicles, or combinations of vehicles, having a length and combined and gross weight in excess of all statutory limitations."

WHEREAS, it is the judgment and opinion of the Commission, based on engineering advice and records, that some of the highways which are under the control and jurisdiction of the State Highway Commission can, without undue damage thereto and with due regard to public welfare,

carry and accommodate the movement thereon of "vehicles, or combinations of vehicles, having a length and combined and gross weight in excess of all statutory limitations", while other state highways cannot sustain or accommodate such traffic; and

WHEREAS, the State Highway Engineer, having made due and proper investigation and inspection of the highways under the jurisdiction and control of the State Highway Commission, and based on such study and inspection, has made and filed with the Commission his written report and recommendation, which report by this reference is made a part of this order; and

WHEREAS, said Engineer has in and by said written report found and recommended that the highways, or sections of highways, hereinafter referred to and identified are of such structure, character, and design, and condition of repair, as to permit the movement thereover of vehicles, or combinations of vehicles, having a length and combined and gross weight equal to the lengths and combined and gross weights hereinafter fixed and specified. The highways and sections of highways so classified and designated are each and all named and defined on the paper marked "Exhibit A" and by this reference made a part hereof, and generally designated as Group 1 Highways, and on "Exhibit B" attached hereto and by this reference made a part hereof, and generally designated as Group 2 Highways; and *

WHEREAS, based upon the advice and recommendation of said Engineer, it is the judgment and opinion of the Commission that permits be issued upon application therefor, by which there shall be authorized the movement over the highways above referred to, vehicles, or combinations of vehicles, having a length and combined and gross weight equal to but not in excess of the limits herein fixed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, a majority of the members being present and voting affirmatively:

1. That subject to such action as the Commission may hereafter deem to be in public interest, the issuance of permits hereby is authorized, by which permits there may be moved over the highways designated in said "Exhibit A", vehicles, or combinations of vehicles, having a length in excess of the statutory limits, but not in excess of sixty (60) feet, and by which there may be moved over the highways designated in said "Exhibit B", vehicles, or combinations of vehicles, having a length not in excess of fifty (50) feet, and vehicles, or combinations of vehicles, having a combined and gross weight in excess of the statutory limits, but not in excess of that determined by the formula fixed and given in Section 2 of Chapter 156, Oregon Laws, 1947. *

2. That the form of permit attached hereto is hereby approved as the form of permit which shall be used within the meaning and purpose of this order and resolution. *

3. That a permit issued on said form may be signed for the Commission by H. B. Glaisyer, Commission Secretary, and when so signed, shall be deemed valid and in full force and effect; subject, however, to modification or revocation by the Commission.

4. That the Commission hereby reserves the right to change or modify the action hereby taken, but any change or modification shall be evidenced by a formal resolution or order entered in the minutes and records of the Commission.

5. That before any permit or permits are issued pursuant to this resolution, the resolution shall be submitted to His Excellency, Earl Snell, for his approval.

6. That this resolution be entered in the minutes and records of the Commission as of the 21st day of July, 1947, and the Secretary is hereby authorized and directed to deliver to the Superintendent of State Police a full, complete, and correct copy thereof, and to the Public Utilities Commissioner a like copy.

Within the meaning of Chapter 156, Oregon Laws, 1947, and for the purpose of making it possible for the Highway Commission to issue permits as authorized by said act and to extend permits already issued, I hereby give my approval to the action of the Commission as expressed by the foregoing resolution.

Dated this _____ day of _____, 1947.

_____
Governor of Oregon

FOOTNOTE:

* The exhibits mentioned in the above resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Item No. 19, under the heading "Special Matters" and said exhibits by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The meeting adjourned at 4:40 p.m. to reconvene the following morning in the same room.

Portland, Oregon
July 22, 1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused from attending this meeting.

Bids as follows for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

CLACKAMAS HIGHWAY IN CLACKAMAS COUNTY
CONSTRUCT CONCRETE BRIDGE AND CULVERT
MILWAUKIE-ESTACADA SECTION

Johnson-Sterner Corporation, Portland	$33,775.00
Lindstrom Bros., Portland	36,920.00
Lockyear & White, Inc., Seattle, Wn.	61,020.00

SADDLE MOUNTAIN PARK ROAD IN CLATSOP COUNTY
LEWIS AND CLARK RIVER SECTION

Grimstad & Vanderveldt, Astoria	$ 8,604.00
R. C. Larson Constr. Co., Astoria	8,994.00
Loran Petro, Hermiston	10,052.50
Stevenson Constr. Co., Salem	10,950.00
Frank M. Parsons, Forest Grove	11,116.00
John A. Logan, Portland	12,384.00
Heavy Hauling Co., Astoria	12,671.90
Dobyns & Webb, Salem	12,737.50

OREGON COAST HIGHWAY IN DOUGLAS COUNTY
REEDSPORT JUNCTION SECTION

Jack Robinson, Waldport (1)	$13,204.10
Denton Constr. Co., Portland (2)	22,480.00

(1) Lump sum reduction of $500 if also awarded Waldport Project.
(2) Lump sum reduction of $2,000 if also awarded Waldport Project.
(2) Bidder will not accept this project alone.

PACIFIC HIGHWAY IN JACKSON COUNTY
WIDEN BRIDGE OVER MILLERS GULCH

Perkins Bros., Portland	$ 7,258.00
McNutt Bros., Eugene	8,591.00
Settergren-Wiley Co., Ashland	13,469.00

KLAMATH FALLS-MALIN HIGHWAY IN KALMATH COUNTY
KLAMATH FALLS (1ST AVE.-ESPLANADE ST.) SECTION

Babler Bros., Portland	$391,746.00

WARNER SECONDARY HIGHWAY IN LAKE COUNTY
FREMONT JUNCTION-MUD CREEK SECTION

Rogers Constr. Co., Portland *	$139,790.00
E. C. Hall Co., Portland *	152,466.00
McNutt Bros., Eugene *	199,943.00

* Bidder will not accept this project alone.

WARNER SECONDARY HIGHWAY IN LAKE COUNTY
MUD CREEK-DRAKE CREEK SECTION

E. C. Hall Co., Portland *	$202,238.00
Rogers Constr. Co., Portland *	206,605.00
McNutt Bros., Eugene *	299,704.50

* Bidder will not accept this project alone.

COMBINATION BIDS
FOR ABOVE TWO PROJECTS

(1) Fremont Junction-Mud Creek Section of Warner Secondary Highway
(2) Mud Creek-Drake Creek Section of Warner Secondary Highway

	(1)	(2)	Reduc.	Comb. Bid
Rogers Constr. Co.	$139,790.00	$206,605.00	- - - -	$346,395.00
E. C. Hall Co.	152,466.00	202,238.00	- - - -	354,704.00

C. J. Montag & Sons, Portland	47,400.00

TUALATIN HIGHWAY IN WASHINGTON COUNTY
WIDEN CONCRETE BRIDGE OVER DAIRY CREEK

Lindstrom Bros., Portland	$ 55,878.00
J. F. Johnston, Aurora	58,950.00
Walder & Kenworthy, Portland	64,090.00
Lockyear & White, Inc., Seattle, Wn.	64,415.00

The following persons, representing the joint interim committee created by the 44th Legislative Assembly of the Oregon Legislature pursuant to Senate Joint Resolution No. 9, appeared before the Commission with respect to the activities of this committee: Representative Ralph T. Moore, Bandon, Chairman; Representative Pat Lonergan, Portland; and Senator E. R. Fatland, Condon. Senator Fatland advised that the Committee has had two meetings and is of the opinion, after careful consideration, that it is going to cost approximately $100,000 to conduct the studies and prepare the report contemplated by this law. He presented a copy of the budget adopted by the Committee on July 12, 1947, from basic data furnished by the Automotive Safety Foundation, as follows:

"Direct charges of Automotive Safety Foundation on the work it is to do	$25,000
Expense of printing report by State Printer	5,000
Extra expense of State Highway Department in furnishing data and reports	25,000
Expense of legislative committee including tax studies	28,500
Car-operating expense using State Highway equipment	1,500
Total	$ 85,000
Contingencies	15,000
Total budget	$100,000"

The Commission approved the budget and assured the delegation that the Highway Commission would cooperate with the Committee in every way possible and will work with the Committee as the Committee may desire. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Forty-fourth Legislative Session of the Oregon Legislature passed and regularly adopted Senate Joint Resolution No. 9, by which resolution the legislature created a committee to consist of seven members, three of whom were appointed by the President of the Senate from the members of the Senate, and four of whom were appointed by the Speaker of the House from the members of the House; and

WHEREAS, said Committee is authorized and directed to make a complete and exhaustive study of the transportation facilities of the state, including state highways, county roads, and city streets, and based upon such study and examination said committee is directed to determine the immediate and future needs and requirements of the state with respect to the construction and maintenance of public thoroughfares; and

WHEREAS, said committee is further authorized and directed to explore, study, and report with respect to further or additional measures or means by which revenues may be produced or procured for use in connection with future and more permanent improvement of the state's highway system, included in which study shall also be the advisability of issuing general obligation bonds; and

WHEREAS, said committee is further authorized to employ or consult such technicians, experts, clerical and other help as in its judgment are necessary for the proper functioning of said committee; and

WHEREAS, it is further provided in and by said resolution that said committee shall receive its necessary traveling expenses, and other expenses incurred in the performance of its duty, which claims are to be filed with the Secretary of State for audit, and when found correct the Secretary of State is authorized to draw warrants in payment thereof against the State Highway fund; and

WHEREAS, it is recognized by the Commission that the service to be performed by said committee, the facts, information, and data which will be assembled and thereafter incorporated in the committee's report to the next legislative assembly, may prove of real value to the highway user in general and to the Highway Commission in particular; and

WHEREAS, said committee has submitted to the Highway Commission a budget of estimated expenses and expenditures covering said committee's work, which budget is in words and figures as follows:

Direct charges of Automotive Safety Foundation on the work it is to do	$25,000
Expense of printing report by State Printer	5,000
Extra expense of State Highway Department in furnishing data and reports	25,000
Expense of legislative committee including tax studies	28,500
Car-operating expense using State Highway equipment	1,500
Total	$85,000
Contingencies	15,000
Total budget	$100,000

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of its members being present and voting affirmatively:

1. That there be and there hereby is set up a special account in the State Highway Fund in the office and records of the State Highway Commission, which special account shall be known as the Legislative Interim Committee Account.

2. That there hereby is budgeted and set aside in the State Highway Fund and credited to said Legislative Interim Committee Account the sum of $100,000, which sum, or so much thereof as may be necessary, may be used to pay the expenses and other legitimate disbursement of said committee incurred in the performance of its legislative duty.

3. That all claims legally chargeable to and payable out of said special account shall be submitted in proper form by said committee to the Highway Commission for audit, and if found correct shall be approved by the State Highway Commission and thereafter presented to the Secretary of State for official audit and payment in the same manner that other claims payable out of State Highway Funds are audited and paid.

4. That a certified copy of this resolution shall be delivered by the Secretary to the Commission to the Secretary of State, and a like copy to each member of said committee.

5. That all disbursements made and all expense incurred by the State Highway Department for and in connection with the duties, functions and work of said Interim Committee shall be paid out of said special account.

6. That this resolution be entered in the minutes and records of the Commission as of the twenty-second day of July, 1947.

The Engineer and the Chief Counsel were instructed to render such assistance as the Committee may request. The Chief Counsel was further instructed to work out the details for paying, out of state highway funds, the expenses of the Committee.

At 10:00 a.m. Chairman Banfield publicly announced awards of contracts, bids for which were received at 2:00 p.m. on the previous day, the action having previously been approved by the unanimous vote of the Commission, as follows:

"Paving the Corvallis (Harrison Street) Section of the Pacific Highway West in Benton County. Warren Northwest, Inc., Portland, submitted the low bid in the amount of $27,385.00. United Contracting Co., Portland, submitted the only other bid in the amount of $28,916.00. The Commission has awarded this contract to the low bidder, Warren Northwest, Inc.

"Construction of a bridge over Little River on the North Umpqua County Road at Glide in Douglas County. Harry I. Hamilton, Eugene, submitted the low bid for this work in the amount of $58,920.00. Tom Lillebo, Reedsport, submitted the only other bid in the amount of $71,420.00. The Commission has awarded this contract to the low bidder, Harry I. Hamilton.

"Grading, surfacing and oiling the East Diamond Lake Junction-Lobert Section of The Dalles-California Highway in Klamath County. The low bid submitted for this work was that of Rogers Constr. Co., Portland, at $769,233.00. The second low bid was submitted by E. C. Hall Co. & J. C. Compton Co., McMinnville, at $897,674.00. There were two higher bidders. The Commission has awarded this contract to the low bidder, Rogers Constr. Co., at its bid price.

"Removal of the Willamette Overflow Bridge on the Pacific Highway at Mile Post 105.92, near Harrisburg, and replace with frame trestle on existing concrete pedestals, in Lane County. The Commission received no bids for this work.

"Pavement widening and resurfacing the Parkrose (82nd Ave.-99th Ave. Section of the Columbia River Highway (Sandy Boulevard) in Multnomah County. Parker-Schram Co., Portland, submitted the low bid for this work in the amount of $75,897.50. The only other bid was submitted by Porter W. Yett, Portland, at $84,252.50. The contract has been awarded to the low bidder, Parker-Schram Co.

"Grading, surfacing and oiling on the Butte Creek-Kinzua Section of the Kinzua County Road in Wheeler County. The low bid for this work was submitted by J. R. Taggart & Co., Inc., Brogan, at $151,972.00. Rogers Constr. Co., Portland, submitted the next low bid in the amount of $158,732.00. There were three higher bidders. The Commission has awarded this contract to J. R. Taggart & Co., Inc., low bidder, at its bid price.

"Sale of the diesel powered ferry boat (North Beach) docked at the Astoria Marine Construction Co. moorage near Astoria. The Commission received no bids for the purchase of this vessel."

Mr. William H. Huck, Rufus, Oregon, came before the Commission with regard to settlement for right of way for the proposed improvement of the Columbia River Highway near the John Day River Crossing. Mr. Huck advised that some years ago he gave the Highway Commission an option to purchase this right of way for the sum of $5,000, but the option was not exercised due to the fact that the war stopped highway construction; and now he feels that he is entitled to greater compensation because of present-day conditions and the fact that it is going to cost him considerable more to re-establish his buildings than was originally anticipated. He requested payment in the sum of $10,000. The Assistant Attorney advised that the original option was taken in 1943, but was not closed for reasons stated by Mr. Huck, so an agreement was reached with him to defer the purchase until a more propitious time. The Chief Counsel advised that, in his estimation, due to the change in conditions, Mr. Huck probably is entitled to an increase in payment. Following discussion the Commission referred the matter back to the Chief Counsel for further study and recommendation.

County Judge Nelson B. Higgs, Harney County, came before the Commission and inquired as to the status of the plans for the improvement of the Diamond Valley Secondary Highway between Crane and Princeton, and of the Rome-Princeton Secondary Highway between Folly Farm and the I.O.N. Highway Junction. He was informed by the Engineer that it has been necessary to make a resurvey of a portion of the Crane-Princeton Section to meet certain requirements of the Public Roads Administration, and that his report would be ready to present to the Commission at its next regular meeting if the Public Roads Administration's approval has been secured in the meantime. As to the Folly Farm-I.O.N. Highway Section, he was advised that this project is scheduled for contracting at the August meeting of the Commission.

Judge Higgs also inquired as to the Commission's plans for oiling the John Day-Burns Highway between Grant County line and the end of the present oiled section at Soda Mountain, in Grant County. He was informed that this section, which is 12 miles in length, is partially within the National Forest and is to be included as a Forest Highway Project when Forest Highway funds are made available to finance it. The state's portion, he said, is in the Construction Program. The Commission instructed the Engineer to write Judge Higgs the details with respect to this project.

Mr. Frank L. Calise, Secretary-Manager, Vale Chamber of Commerce, was present and inquired into the status of the proposed improvement of the John Day Highway between Unity and Ironsides. He was informed by the Engineer that this work is now under way. Mr. Calise also asked the Commission to assist the city in construction of sidewalks and curbs along the state highway in their town. He was informed that it is not the general practice of the Highway Commission to construct curbs and sidewalks except under special working agreement with the city. Mr. Calise was also informed that the only

request the Commission has received for special state aid in Vale is for the filling in of some borrow pits, estimated to cost $500, which the Commission has approved. He was further informed that the Commission's Postwar Construction Program has been prepared, and there is no money available for additional projects and if the project to which he refers is now included in the Program, it will be constructed, but not otherwise.

The Commission had under discussion the following requests for extensions of time within which to complete highway contract work:

Sound Construction and Engineering Company, Contract No. 2772, for grading the Berger Ranch-Barnes Road Section of the Sunset (Wolf Creek) Highway, in Washington County, requested an additional extension of time from June 15 to September 1, 1947, within which to complete this job. They alleged that materials encountered in cuts greater than six feet deep contained a high moisture content which made it impractical to haul or obtain satisfactory compaction in embankments and by reason thereof the progress of their work was delayed. The condition was remedied, they said, by taking the cuts down to the six foot level and then allowing the cuts and fills to dry. Attempts to hasten the drying by manipulation met with little or no success. They also alleged that their work was delayed somewhat by failure of certain building owners to remove their buildings from the right of way. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, subject, however, to the condition that if the work is not satisfactorily completed by September 1, 1947, then a penalty will be imposed on the contractor subsequent to that date. This extension of time was not granted by the Commission on the strength of the contractor's statements.

Sound Construction and Engineering Company, Contract No. 2778, for grading the Davies-North Plains Section of the Sunset (Wolf Creek) Highway, in Washington County, requested an additional extension of time from June 15 to September 1, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to high moisture content in materials encountered in cuts greater than six feet deep which handicapped their hauling and made it difficult to secure satisfactory compaction in embankments. They also alleged that their work was handicapped by inability of contractors on the structures to obtain materials for their work. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, subject to the condition that a penalty will be imposed in the event the contract is not satisfactorily completed by September 1, 1947. The Commission did not approve this extension of time on the basis of the contractor's statements.

Sound Construction and Engineering Company, Contract No. 2779, for grading the North Plains-Gardner Ranch Section of the Sunset (Wolf Creek) highway, in Washington County, requested an additional extension of time from June 15 to September 1, 1947, within which to complete this job. They gave as their reason for failure to complete the contract within the specified time limit the high moisture content in materials excavated in cuts greater than six feet deep and the impracticability to haul such materials or to obtain satisfactory compaction in embankments, necessitating the drying out of the materials by air. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, subject, however, to the condition that a penalty will be imposed if the work is not completed by September 1, 1947.

Adler Construction Company, Contract No. 2791, for grading the Mill Creek-Miller Flat Section of the Warm Springs Highway, in Jefferson and Wasco Counties, requested an additional extension of time of 31 days, from May 30 to June 30, 1947, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to inability to secure a competent patrol grader operator for final finishing work on roadbed and slopes and that it was also due to their inability to resume operations in the spring after the winter shutdown because of unavailability of required equipment. The Engineer advised that the contractor's statement is correct as to equipment and that the state has not incurred any additional expense nor the public inconvenienced by reason of the delay. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statements.

Mark Smith & Co., Contract No. 2803, for construction of a lighting system along South Sixth Street, route of the Klamath Falls-Lakeview Highway, in Klamath Falls, requested an extension of time of 212 days, from December 31, 1946, to July 31, 1947, within which to complete this job. They based their request on the following: That the progress of the paving contractor governed the completion of the lighting project so that they were unable to install light standards until May 1, 1947; also, due to adverse weather conditions they were unable to complete the painting until June 12, 1947; and, that the installation has been ready to operate since May 1, 1947, but they have been unable to make the required tests because the power company which is to furnish the electrical energy could not furnish the proper size regulator transformer. The Engineer advised that the statements given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statements.

Parker-Schram Company, Contract No. 2820, for grading the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County, requested an extension of time of 90 days, from April 30 to July 29, 1947, within which to complete this work. They attributed their failure to complete the project within the specified time limit to inability to secure delivery of reinforcing steel needed in connection with construction of concrete structures, and excessive water encountered during the fall, winter, and spring months which prevented the subgrade drying out so the grading operations could go forward. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statements.

J. C. Compton Co., Contract No. 2824, for grade widening and paving on the Dixonville Marks Ranch Section of the North Umpqua County Road, in Douglas County, requested an extension of time of 61 days, from July 31 to September 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, although the decision was not based on the reasons given by the contractor for overrunning the time limit.

Albert W. Denton, dba Denton Construction Company, Contract No. 2888, for grading and paving the Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County, requested an extension of time of 45 days, from July 31 to September 15, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to delays caused by the City of Ashland in lowering its water mains and storm sewers and further delays caused by the telephone company lowering its cables, which are underground in conduit. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, but not on the basis of the contractor's statements.

The Engineer reported that Contracts Nos. 2767, 2800, 2809, 2822, 2835, 2836, 2850, 2851, 2852, and 2861 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said job are now ready for acceptance:

Contract No. 2767, with Morrison-Knudsen Company, Inc., for construction of the Arthur Street Overcrossing on Front Avenue, Portland, Multnomah County, completed June 30, 1947

Contract No. 2800, with A. D. Ford & Son, for construction of the Vadis Overcrossing on the Sunset (Wolf Creek) Highway, in Washington County, completed July 7, 1947

Contract No. 2809, with E. C. Hall Co., for grading, surfacing and oiling on the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway in Wallowa County, completed July 12, 1947

Contract No. 2822 with Warren Northwest, Inc., for pavement widening on the Woodburn Section of the Pacific Highway in Marion County, completed May 31, 1947

Contract No. 2835, with T. W. Thomas, for grading, surfacing and oiling the Tumalo-Deschutes Section of the Tumalo-Deschutes Secondary Highway in Deschutes County, completed May 23, 1947

Contract No. 2836, with K. F. Jacobsen & Co., Inc., for regrading and oil-mat surfacing the Hope-Derry Ranch Section of the Vale-West Secondary Highway in Malheur County, completed June 17, 1947

Contract No. 2850, with Sound Construction and Engineering Co., for surfacing and oiling the Kimberly-Dry Creek Section of the Kimberly-Long Creek Secondary Highway in Grant County, completed June 14, 1947

Contract No. 2851, with Sound Construction and Engineering Co., for surfacing and oiling the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway in Grant County, completed June 14, 1947

Contract No. 2852, with Vernie Jarl, for regrading and oil-mat surfacing the North Unit, Fulton Canyon Section of the Fulton Canyon-Wasco Secondary Highway in Sherman County, completed June 10, 1947

Contract No. 2861, with E. C. Hall Co., for regrading and oil-mat surfacing the Cove-Union Section of the Cove Secondary Highway in Union County, completed June 25, 1947

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

The Engineer reported a request from Mr. L. E. Neel, Agate Beach, Oregon, that the pedestrian underpass which it is proposed to construct acros the Oregon Coast Highway near Molloch Creek on the Spencer Creek-Agate Beach Section be moved north about one-half mile to a point opposite his real estate development known as "Car-Mel Beach". He advised that at this point the highway excavation has been daylighted so as to provide for an overlook and parking place for automobiles, that it is quite high above the ocean, and were an underpass to be constructed there it would require a pipe at least 130 feet long. He gave as his opinion that a pass of such length is entirely impractical for use by children. He estimated the cost of the installation at Mr. Neel's development at about $4,000 compared with a cost of about $1,900 at Molloch Creek; moreover, he explained that the Molloch Creek site was selected because the pipe could be placed under a roadbed of normal width only a short distance above the ocean, making the beach accessible without a long trail down the face of the cliff, which would be required if the site requested by Mr. Neel were selected. He recommended that Mr. Neel's request be denied and that the Molloch Creek site be retained as originally planned. The Commission approved the recommendation unanimously.

A delegation from Hood River, consisting of members of the County Court and others was present and discussed with the Commission matters pertaining to the truck hauling of logs over the Mt. Hood Highway. Those present were John Shelldrake, County Judge; R. W. Arens, County Commissioner; Louis Rupp, Manager, Hood River Box and Veneer Company; and Louis Zeman, log hauler, all of Hood River. Mr. Arens was principal spokesman for the group. He advised that because of the need for logs at the Hood River Box and Veneer Company, the limited amount of timber available in this district suitable for construction of apple boxes, etc., and because such material is not readily available except adjacent to the Mt. Hood Highway, they feel it is necessary that the Highway Commission permit the truck hauling of logs over this highway, at least conditionally, after September 1 when the peak of travel on this highway is past. Mr. Zeman stated that he has about one million feet of timber in the vicinity of Barlow Pass that he would like to bring out to the box factory, 200,000 feet of which has now been felled. He estimated it would take him about one month to complete the hauling. He also said that for the most part the logs will be delivered to the box company, but the tops of the trees, which cannot be used by the box company, will be hauled into Hood River for shipment to Portland. Chairman Banfield pointed out that two things are involved in the hauling operations, one being the furnishing of logs as an emergency proposition to the box factory, and the other being the transporting of the logs to Hood River for shipment to Portland. The Commission, he said, wants to be as helpful as is possible in the matter, but it also has a duty

to the general traveling public, and there is a limit to the concessions that it can make. He suggested that the Commission might consider approving the truck hauling of logs over this highway during hours of darkness, such as between 10:00 p.m. on one day and 8:00 a.m. on the following day, when there is a minimum of other classes of traffic on the highway. Mr. Zeman stated his disapproval of such hours because of the difficulty of loading his second load. There followed a general discussion but the Commission deferred its decision until the afternoon session. (The matter was discussed later in the session, at which time the Commission approved the truck hauling of logs over this highway from Barlow Pass to Hood River between the hours of 10:00 p.m. and 8:00 a.m. on the following day, starting September 3, 1947, and continuing until the Engineer considers it necessary to stop such operations in order to preserve the road surface. See ahead for further details.)

A delegation of log haulers from Albany and other Willamette Valley points appeared before the Commission in the interests of night hauling of logs over state highways. The delegation was headed by Mr. L. L. Wimer, Albany, and included Charles Ginther, R. L. Jenkins, W. A. Mitchell, Emmette Olds, M. K. Childes, all of Albany; G. E. Margin, Milwaukie; Theodore Sherman and Howard Allisten, Alpine; Jim Butler, Portland and Sweet Home; Dale Henderson, Ernest Miller, Cecil Heyne, and Ed Munsen, Sweet Home; John Day, Brownsville; and John A. Todd, Corvallis. Mr. Wimer stated that the Commission's ruling prohibiting the truck hauling of logs over state highways during the hours of darkness is creating a hardship on log haulers because, in instances where the haul is long, they are unable to deliver more than one load a day. He urged the Commission to modify its ruling so as to permit the delivery of the second load. He said they offer no objections to the other features of the Commission's ruling. He suggested that it would be sufficient if the Commission would permit the delivery of loads up to 8:30 or 9:00 p.m. There followed a general discussion of this matter in which a number of the log haulers joined; however, the Commission took no action at this time. The delegation was informed that the Commissioners would discuss this matter among themselves and might be able to give them an answer during the afternoon session. (The matter was reconsidered later in the session, at which time the Commission referred it to the Engineer and the Chief Counsel for their further study and recommendation.)

Hon. Ed Ostendorf, Mayor, City of Klamath Falls, came before the Commission at this time with regard to the deadending of 25 city streets which intersect the Esplanade Street Section of the Klamath Falls-Malin Highway. He advised that the city has adopted a resolution providing for the deadending of 22 of these streets with the provision that traffic from the remaining three streets, viz., Erie, Melrose and Erle, be allowed to enter Esplanade on right-hand turns only. Chairman Banfield referred to a previous understanding with the city which provided for the closing of all streets except two --- Erle and Melrose Streets --- and pointed out that now the city is asking that three be left open for certain traffic, and the Highway Commission is not particularly inclined to grant this concession. The Engineer advised that he could not recommend that Erie Street be left open. The Chief Counsel advised that the Highway Commission can deadend

streets only under an agreement with the city; otherwise, the property owners could sue the state for damages; further, that the city must follow its charter provisions which require that it obtain the consent of at least 75 percent of the property owners affected. Following further discussion the Commission informed Mr. Ostendorf that it would not sign any agreement today or make any definite commitment with respect to the subject or take any action until the Chief Counsel advises that all matters pertaining thereto are entirely clear.

Messrs. Clair Terry and J. W. Ring, Coos Bay, Oregon, came before the Commission regarding the vacation of Edward Street, former route of the Oregon Coast Highway through the Bunker Hill District, in the City of Coos Bay. Mr. Terry was principal spokesman. He advised that the State Highway Commission recently sold to them, for the sum of $2,000, a small tract at the northwest corner of the intersection of Edward Street with the new highway, on which they propose to construct tourist cabins; further, that they already have spent a considerable sum of money to level the area for their purposes, but they need a little more land on the Edward Street side which they thought might be obtained from the state since Edward Street is only one block long and is very little used. He suggested that the Commission might vacate the westerly 20-foot portion of this street, which is all they need. The Engineer advised that Edward Street is a connecting road between the Oregon Coast Highway and the Coos River Secondary Highway. He pointed out that the westerly 20-foot portion thereof has never been used because of a high mound of earth located thereon, so up to the present time it has been valueless for state highway purposes. He suggested that the vacation of that portion would not inconvenience anyone because traffic would still have a forty-foot street for its use as in the past. The street is under the jurisdiction of the state he said, having never been abandoned as a state highway route. The matter was discussed at some length, but a decision was deferred until the afternoon session. (The matter was reconsidered during the afternoon session, at which time the Commission approved abandonment of the westerly 20-foot portion of this street on the condition that the City of Coos Bay offers no objections thereto and that Messrs. Terry and Ring will remove the mound of earth on the property to a level satisfactory to the State Highway Engineer. The Chief Counsel was instructed to prepare the necessary papers.)

Messrs. William A. Bowes, Commissioner of Public Works; F. T. Fowler, Traffic Engineer; and Ben R. Morrow, City Engineer, Portland, came before the Commission at this time with regard to the proposed Sullivan's Gulch Highway and the signalization and channelization of Barbur Boulevard.

Mr. Bowes advised that in order for the City to act on the Sullivan's Gulch matter it will be necessary to place the matter on the ballot for the 1948 May primary. He inquired as to the attitude of the Highway Commission with respect to the City Council's resolution heretofore adopted. He was informed by Chairman Banfield that this is a matter on which all three Highway Commissioners must act because of the many angles and conditions involved, including financing, so the Commission has taken no action up to the present time, there being only two Commissioners available to discuss it.

Mr. Bowes then brought up the matter of traffic control on Barbur Boulevard. He alleged that such control is needed because of the high accident record. Chairman Banfield advised that the Highway Commission has not changed its attitude with respect to this project and is not in position today to make any promise or commitment thereto. The Commission, he said, has not yet indicated any willingness to contribute toward the expense of such an undertaking; moreover, it is not particularly interested in assuming any of the police powers of the City of Portland in its traffic control problems and will not take over or assume the city's responsibilities in that regard. Mr. Bowes advised that the City Traffic Engineer, Mr. Fowler, has prepared plans of minimum requirements to effect proper control of traffic on Barbur Boulevard and inquired whether or not the Highway Commission has taken any action on them. The State Highway Engineer acknowledged receipt of the plans but advised that he has not had time to study them thoroughly or report to the Commission, but will do so at an early date. The conference was concluded with no action being taken except that the Engineer was instructed to check the City's plans and report the results of his check to the Highway Commission as soon as possible.

The meeting adjourned for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Chief Counsel brought up for discussion the controversy with contractor C. J. Eldon regarding State Highway Contract No. 2792, Waldport Rock Production Project, for the furnishing of crushed rock in stockpiles for the Oregon Coast and Alsea Highways, in Lincoln County. He recalled that the contractor requested annulment of the contract because the source from which he alleges he was told to secure his materials did not prove satisfactory, and he therefore demanded reimbursement in the sum of $7,868.43 which he claims was expended by him for development purposes. The claim has been investigated by the Engineer, he said, who suggests that the contract be canceled and a compromise settlement be made with Mr. Eldon for the sum of $4,779.04 and that the Commission either re-advertise the project for new bids or negotiate with another contractor to do the work privately at the same unit prices submitted by Mr. Eldon. He advised that he concurs in this recommendation. As a result of discussion the Commission voted unanimously to cancel the contract on the basis of the recommendation --- payment of the sum of $4,779.04 to Mr. Eldon. The Commission also authorized negotiations with the other contractor to perform the work required. An agreement with Mr. Eldon covering the matter was signed by the Commission later in the day.

The Chief Counsel also brought up for discussion a settlement with an "incompetent" person residing in the East who owns land which the state needs for the Seaside-Hug Point Section of the Oregon Coast Highway, in Clatsop County, being settlement No. 10827. He advised that this matter previously had been before the Commission, and the amount of $50 was approved in payment for the land; however, because of circumstances it is going to cost the grantors an additional $25 to culminate the transaction through the courts, in view of which they are asking an additional $25 pay-

ment for the property. He gave as his thought that this is no more than fair and recommended payment of $75 for the property rather than $50 as originally approved. The Commission approved the recommendation unanimously.

A delegation from Sweet Home, consisting of Representative Max Landon, realtor; Ed Cordwell, department store owner; Rolly Middleton, grocer; and Jess Parker, City Manager, came before the Commission with regard to the widening of the Santiam Highway through this town. Mr. Parker advised that right of way needed for this improvement all has been donated for the purpose by the property owners with the exception of one, a Mr. Weddle, who is not very cooperative and is demanding exhorbitant pay for his property. He expressed a fear that if the city should Pay Mr. Weddle for his property, then the other property owners would make like demands, which would result in considerable expense and defer the improvement indefinitely. Mr. Landon confirmed Mr. Parker's statement and asked the Commission to condemn the property and pay the costs involved. He pointed out that there is one small building to move. In reply to the inquiry of the Chief Counsel whether or not the city would pay for the land if the state condemned it and would pay for the moving of the building, Mr. Parker advised that the city has $500 which could be used for this purpose. The Engineer explained that the plan is to construct a four-lane highway through this town, which requires an additional strip of right of way ten feet wide. The matter was discussed at considerable length, and as a result thereof the Commission referred it to the Engineer and the Chief Counsel for study and report at the next meeting. They were instructed to consult with the members of the delegation with respect to details.

Messrs. Ed Reitmann and J. S. Burres, Condon, were present regarding improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway, particularly improvement of the West Cottonwood Grade. Chairman Banfield explained that the Highway Commission has budgeted $50,000 of state money to improve this section and that the work will be done, but it will take some little time to prepare the plans for contracting. They were also informed that, while the improvement will not provide a standard highway, it will be the best that can be done with the money available and it is felt will adequately serve until a major improvement can be undertaken.

Reconsideration was given by the Commission to the matter of permitting truck hauling of logs on state highways during certain hours of darkness The Engineer reported on the accident rate during such periods as follows:

	1941	1946
Total vehicle accidents	11,841	15,892
Total involving a log truck	187	369
Month of September only, percentage of accidents involving a log truck during the hours of darkness	9.1%	10%

He pointed out that the accident rate, relatively speaking, is no greater during hours of darkness than during daylight hours. A general discussion of this matter followed during which Chairman Banfield expressed the

feeling of the Commission that if a handicap is being placed on the log-hauling industry by reason of the night hauling restriction, something probably should be done to correct the situation if that is possible from the legal and engineering standpoints, particularly from the standpoint of protecting traffic by proper lights and other safety features. Such concession is to be granted only in emergency cases and would not extend through all hours of the night. If this concession is granted, he said, it would be with the understanding that the operators would have to comply with the safety regulations which the Chief Counsel feels are necessary for public protection. Commissioner Chandler explained that this privilege would be granted only to allow a second load to be delivered to the dump in cases where a long haul is involved. The Commission referred the matter to the Engineer and the Chief Counsel to work out a solution and recommendation along that line.

The matter of permitting log hauling on the Mt. Hood Highway was also discussed. The Engineer recommended the granting of this privilege for a limited period of time immediately following Labor Day and that hauling be confined to the hours from 10:00 p.m. to 8:00 a.m. on the following morning, during which time the road would be closed to other manner of traffic, and with the understanding that the road would be closed to log hauling traffic when conditions are such that damage is being done to the highway surface. It was his thought that this would permit hauling for about six weeks' time. The Commission approved the Engineer's recommendation unanimously under the following conditions:

(1) The overall length of equipment and load shall not exceed 56 feet.

(2) Between Barlow Pass, M.P. 60.37, and Cooper Spur, M.P. 78.43, logs shall be hauled between 10:00 p.m. and 8:00 a.m. the following day. During the above hours this section shall be closed to the public by means of flagmen furnished, provided, and paid for by the permittee and stationed at Barlow Pass and Cooper Spur.

(3) No loaded logging truck will be permitted on the Mt. Hood Highway between Barlow Pass and Cooper Spur between the hours of 8:00 a.m. and 10:00 p.m., but empty logging trucks will be allowed to return to the point of loading during these hours.

(4) The hauling of logs over the Mt. Hood Highway from Barlow Pass to the Hood River Box and Veneer Company and to the Columbia River Log Dump will start on Wednesday, September 3, 1947, and continue until the closing date to be determined by the Engineer, but in no event later than November 1, 1947.

A letter was presented from the Warm Springs Lumber Company, Warm Springs, Oregon, requesting a modification of the Commission's regulations prohibiting the truck-hauling of logs over the Warm Springs Highway on Saturday afternoons so as to permit a sufficient accumulation of logs to keep their mill running during the winter months, which the Company alleges cannot

be done unless the operators are permitted to truck haul logs six full days a week. The Commission denied the request, it being the feeling of the Commission that the concession granted haulers to operate during certain hours of darkness will take care of their situation.

The Engineer reported on the log-hauling operations of the Converse Logging Company over the North Santiam Highway between Sardine Creek and Niagara. He advised that the section of highway over which the hauling is taking place is still under the jurisdiction of the Marion County Court, which granted the company this privilege as a temporary expedient prior to the time that the contract was awarded for construction of the new highway. The movements, he said, are interfering with the operations of the highway contractor and are creating a dangerous condition for other highway users; however, the County Court is willing to cancel the permit if requested to do so by the State Highway Commission. He recommended that the County Court be asked to cancel the permit. The Commission approved the recommendation unanimously.

The Engineer requested authority to purchase three surplus buildings from Camp Adair which have been allotted to the State Highway Department by the War Assets Administration. He advised that these can be purchased for the sum of $850 and can be used to good advantage at the following locations: one for section maintenance purposes at the Hermiston Maintenance Headquarters; one for housing maintenance employees at the Warm Springs Junction Headquarters where there are no other housing facilities, and the third to be dismantled for the lumber contained therein. He pointed out that the 1947 budget contains an item of $200,000 for construction of maintenance stations and that to date only about $60,000 of this has been expended, so there are ample funds on hand to pay the cost of the three extra buildings and to re-establish them at the new locations. The total cost involved, he said, is $14,000. The Commission approved the request by unanimous vote.

Mr. L. L. Wimer, log hauler, Albany, re-appeared before the Commission and inquired as to the decision of the Commission with respect to the truck hauling of logs during the hours of darkness. Chairman Banfield explained briefly that the Commission is inclined to modify its previous order so as to allow a certain amount of night hauling, but definite action to that end has been deferred pending reports from the Engineer and the Chief Counsel as to the basis on which the Commission can grant such privileges. The Commission, he said, will act immediately upon receipt of these reports.

Reconsideration was given by the Commission to the request of Messrs. Clair Terry and J. W. Ring for vacation of the westerly 20-foot portion of Edward Street in the Bunker Hill District of the City of Coos Bay. Following discussion the Commission voted unanimously to vacate such portion of this street on the condition that the City of Coos Bay offers no objections thereto and provided that Messrs. Terry and Ring will remove the mound of earth on the property to a level which meets with the approval of the State Highway Engineer. The Chief Counsel was instructed to institute the necessary vacation proceedings as soon as these conditions have been satisfied.

At 3:00 p.m. the Commission discussed with the Engineer the bids received at the morning session for highway construction and approved unanimously the action taken thereon as expressed by Chairman Banfield in the following public announcement made at 3:00 p.m.:

"Construction of a concrete bridge over Deep Creek and a culvert over Rock Creek on the Milwaukie-Estacada Section of the Clackamas Highway, in Clackamas County. Johnson-Sterner Corporation, Portland, submitted the low bid for this work in the amount of $33,775. Lindstrom Bros., Portland, submitted the next low bid in the amount of $36,920. There was one higher bid. The Commission has awarded this contract to the low bidder, Johnson-Sterner Corporation, at its bid price.

"Grading and topping the Lewis and Clark River Section of the Saddle Mountain Park Road, Clatsop County. The low bid submitted for this work was that of Grimstad & Vanderveldt, Astoria, at $8,604. R. C. Larson Construction Co., Astoria, submitted the next low bid in the amount of $8,994. There were six higher bidders. The Commission has awarded the contract to the low bidder, Grimstad & Vanderveldt, at their bid price.

"Grading, surfacing, and oiling the Reedsport Junction Section of the Oregon Coast Highway, in Douglas County. Jack Robinson, Waldport, submitted the low bid for this work in the amount of $13,204.10. He offered to reduce the amount of his bid by $500 if also awarded the contract for construction of the Waldport Project on the Oregon Coast Highway, in Lincoln County. Denton Construction Company, Portland, submitted the only other bid for this job in the amount of $22,480. They stated that they would not accept the contract for the Reedsport Project unless also awarded the contract for the Waldport Project. Following a study of the bids, the Commission decided to reject those received for the Waldport Project and accordingly has awarded the Reedsport Junction Project to Jack Robinson, low bidder, at his bid price of $13,204.10.

"Widen the bridge over Millers Gulch on the Pacific Highway near Gold Hill, in Jackson County. Perkins Bros., Portland, submitted the low bid for this work in the amount of $7,258. The next low bid was that of McNutt Bros., Eugene, at $8,591. There was one higher bidder. The Commission has awarded the contract to the low bidder, Perkins Bros., at their bid price.

"Grading, surfacing, oiling, and paving the Klamath Falls (First Avenue-Esplanade Street) Section of the Klamath Falls-Malin Highway, in Klamath County. The Commission received only one bid for this work, being that of Babler Bros., Portland, in the amount of $391,746. The bid has been rejected.

"Grading and surfacing the Fremont Junction-Mud Creek Section of the Warner Secondary Highway, in Lake County. The low bid submitted for this work was that of Rogers Construction Co., Portland, at $139,790. E. C. Hall Co., Portland, submitted the next low bid in the amount of

$152,466. There was one higher bidder. Each of these bidders qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for the grading and surfacing of the adjoining Mud Creek-Drake Section of this highway. The Commission has rejected all bids for both projects.

"Grading and surfacing the Mud Creek-Drake Creek Section of the Warner Secondary Highway, in Lake County. E. C. Hall Co., Portland, submitted the low bid for this work in the amount of $202,238. Rogers Construction Company, Portland, submitted the next low bid in the amount of $206,605. All of the bidders qualified their bids by stating that they would not accept the award of this contract unless also awarded the contract for the Fremont Junction-Mud Creek Section. The Commission has rejected all bids for both projects.

"Grading and bituminous macadam widening on the Waldport Section of the Oregon Coast Highway, in Lincoln County. Denton Construction Co., Portland, submitted the low bid for this work in the amount of $44,540, using asphalt, and $45,600 based on the use of tar. Jack Robinson, Waldport, submitted the next low bid in the amount of $53,019.40, based on the use of asphalt. He submitted no bid based on the use of tar. The Commission has rejected both bids.

"Santiam Slope and Pier Protection Project on the Pacific Highway East, in Linn and Marion Counties. Dobyns & Webb, Salem, submitted the low bid for this work in the amount of $15,168. R. A. Heintz-Construction, Portland, submitted the next low bid at $18,960. There were two higher bidders. The Commission has awarded this contract to the low bidder, Dobyns & Webb, at their bid price.

"Widening the bridge over Dairy Creek on the Tualatin Valley Highway near Hillsboro, in Washington County. The low bid for this work was submitted by Lindstrom Bros., Portland, at $55,878. The second low bid was submitted by J. F. Johnston, Aurora, at $58,950. There were two higher bidders. The Commission has awarded the contract to the low bidder, Lindstrom Bros., at their bid price."

The Commission considered and signed agreements, etc., as follows:

Agreement with Southern Pacific Company covering installation of two flashing beacons at the railroad grade crossing on Park Street, in the City of Lebanon, being on the proposed new route for northbound Santiam Highway traffic.

Agreement with the O.W. R. & N. Company providing for an overcrossing of its main line tracks in Troutdale.

Agreement with Robena Parman for the leasing of a quarry site needed as a source of materials for the construction of the Condon-West Section of the Wasco-Heppner Secondary Highway.

Agreement with F. F. Criteser, et ux. for the leasing of a gravel pit needed in connection with the improvement of the Roseburg-Dixonville Section of the North Umpqua County Road, in Douglas County.

Agreement with the City of Salem covering the installation of a traffic signal at the intersection of Fairgrounds Road with North Capitol Street (US99E).

Agreement with the City of Burns covering the relocation of a portion of the Burns-Crane Highway within the corporate limits of Burns.

Agreement with the City of Hood River providing for the installation of a traffic signal at the intersection of Ninth Street and Oak Street (Columbia River Highway) in Hood River.

Agreement with the City of Yamhill covering the installation of a flashing beacon at the intersection of Maple Street and Main Street in Yamhill, both of which streets are state highways.

Agreement with the City of Silverton relative to the repair of certain city streets in Silverton that are not on the State Highway System.

Agreement with the City of Lebanon covering the maintenance of Fifth Street as a log-hauling route between Oak Street and Rose Street, in Lebanon.

Agreement with C. J. Eldon relative to the cancellation of his contract with the State Highway Commission for the furnishing of materials for the Waldport Rock Production Project, in Lincoln County, being State Highway Contract No. 2792.

Agreement with Lyle E. Marsters and L. Flae Marsters for the leasing of a gravel bar from which to secure materials for construction of the Roseburg-Dixonville Section of the North Umpqua County Road, in Douglas County.

Agreement with Clackamas County with respect to the relocation of the Woodburn-Sandy Secondary Highway, being an amendatory agreement to correct a mistake in the original agreement.

There being no further business to come before the Commission at this time the meeting adjourned at 3:30 p.m.

T. H. Banfield
Chairman

State Highway Engineer

By R. H. Lundell
Commissioner

Secretary

Portland, Oregon
August 11, 1947

The State Highway Commission met in special session at 9:00 a.m., in room 715, Imperial Room, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
G. W. Neuner, Assistant Chief Counsel
H. B. Glaisyer, Secretary

This meeting was called by Chairman Banfield for the discussion of matters requiring action by the full membership of the Commission.

The first order of business was the programming of an allotment of Federal Lands Funds, amounting to approximately $190,000, information having been received from the Public Roads Administration that such funds very likely will be made available to the State of Oregon to finance construction of highways across public lands. The Engineer advised that a suggestion has been made by the Public Roads Administration that these funds be allocated to finance the improvement of the Follyfarm-I. O. N. Section of the Rome-Princeton Secondary Highway in Malheur County, which is now scheduled for improvement in 1948 as a Federal Aid Secondary Highway Project, an amount of $375,000 ($225,000 Federal, $ 150,000 State) having been budgeted to finance it. He recommended approval of the suggestion and pointed out that if the Commission authorizes the change, it will release a portion of the Federal monies now set up for this job for use on other work, although it will mean that the contracting of the work will have to be deferred somewhat.

The Commission appeared favorably inclined towards such allocation of funds, but deferred a definite decision until later. The Engineer was instructed to submit to the Commission, at its next meeting, a list of projects that are eligible for this class of funds.

The Engineer brought up for discussion the matter of amending the State Construction Program as adopted by the Commission by resolution on June 27, 1946, and as amended by subsequent resolution of September 24, 1946, so as to bring the official record up to date to include changes and additions that have been authorized by the Commission since the latter-mentioned date. He submitted a list of the changes referred to, together with a list of five projects which he proposed for elimination from the program, as follows:

I. PROPOSED PROJECT ELIMINATIONS

Hood River County	Bennett Pass-Cooper Spur	$130,000
Umatilla County	Umatilla River Bridge Widening	32,000
Umatilla County	McDougall Camp-Pioneer Spur	230,000
Yamhill County	Town of Yamhill	5,000
Linn County	Albany Service Road	60,000
	Total	$457,000

II. ADDITIONAL PROJECTS

Douglas County	Little River Bridge at Glide (State share only)	$ 32,400
Lane County	Springfield Junction Turnaround	9,900
Lane County	Oak Hll Grade Separation	120,000
Lincoln County	Siletz River Bridge, Replace trestle superstructure and add walks	50,000
Sherman County	West cottonwood Grade	50,000
Wallowa County	North Unit, Washington State Line-Buford Creek	173,400
Yamhill County	Amity-Hopewell, 0.5 mile grad., surf. and oiling	22,500
	Total	$458,200

III. ALLOTMENT INCREASES

Clackamas County	Oregon City-Canby, Paving ($400,000 to $600,000)	$200,000
Multnomah County	Parkrose, Pavement widening ($20,000 to $80,000)	63,500

In the consideration of this matter Chairman Banfield pointed out that when the Commission adopted the State Construction Program, as presently prepared, it was on the basis of distributing the funds so as to provide a balanced construction program covering the entire state, and, in his estimation, no project should be eliminated from this program unless another project of equal value in the same location is substituted for it.

Commissioners Schaupp and Chandler were in agreement with the thought as expressed by Chairman Banfield, whereupon, following discussion of the entire matter, the Commission by unanimous vote decided to eliminate from the present program only the Albany Service Road Project, shown in the above tabulation under heading "I. PROPOSED PROJECT ELIMINATIONS."

The Commission by unanimous vote, also approved all of the projects listed under heading "II. ADDITIONAL PROJECTS", and all of the "ALLOTMENT INCREASES" listed under heading III in the above tabulation. as recommended by the Engineer.

A resolution covering the matter was adopted by the Commission following discussion of additional program matters.(See ahead for resolution.)

The Commission had under discussion the matter of utilizing unexpended balances of pre-war Federal Aid Funds, heretofore authorized to finance surveys and planning work, to finance projects now included in the State Construction Program. The Engineer explained that in 1943 the Federal Government authorized the use of such Federal Funds for surveys and planning work and under such authority the Commission approved a program for 82 survey projects totaling an estimated cost of $506,000, of which amount $314,000 represents Federal funds and $192,000 represents State matching funds. Fourteen of these surveys, he said, were for construction work that eventually did not become a part of the three-year Post War Program. He suggested that it would be advisable, in order that the Federal funds not be tied up indefinitely, or lost entirely, to eliminate the survey projects from the program and to utilize the funds thus released to finance construction work included in the State Construction Program. He pointed out that if the Commission approves, it would make it possible to expedite construction of some of the projects in the State Program and would eliminate confusion which now obtains in securing reimbursement from the Federal Government of State funds advanced to pay the cost of surveys. He recommended that the following five projects in the State Program be transferred to the 1943 Federal Aid Secondary Highway Program and that the survey funds thus released be used to finance them, with the understanding, that there would be a corresponding reduction in the amount of Federal Aid to be claimed on the Federal Aid Survey Account:

	Estimated Cost	Federal Share
Tyee Road-Sutherlin, Surfacing	$100,000	$60,000
East Unit, Sams Valley Highway Grad, & Surf.	100,000	60,000
Hilgard-Starkey, Resurfacing	30,000	18,000
N. Unit, Joseph-Wallowa Lake, Grad., Surf. & Oil	30,000	18,000
Fremont Highway Jct.-Mud Creek Grad & Surf.	153,000	92,000
	$413,000	$248,000

As a result of careful consideration of this matter the Commission, by unanimous vote, approved such transfer of funds and projects as recommended by the Engineer. The Engineer was authorized to arrange with the Public Roads Administration to put the changes into effect. A resolution

covering this matter was adopted by the Commission following the discussion of additional program matters. (See ahead for resolution)

In the discussion of the matter of utilizing Federal money allotted for surveys to pay for state construction work the Commission also considered the advisability of paying the expense of all surveys with state money and using Federal funds only to finance construction. It was the thought of the Commission that less confusion would result and that the construction program could be handled more expeditiously if the state assumed the payment of all survey expense. The Commission thereupon ordered that hereafter all such survey expenses shall be paid with State funds. The following resolution with regard thereto was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the provisions of the Federal Aid Highway Act of 1944 authorize the use of Federal Aid funds in payment of survey and preliminary engineering costs as recognized parts of highway construction expense; and

WHEREAS, it appears that state highway funds under the control of and subject to disposition by the Highway Commission are adequate to match all funds allocated to the State of Oregon under the provisions of said Federal Aid Highway Act of 1944; and

WHEREAS, in the opinion of the Highway Commission public interests will be best served and the postwar highway projects more expeditiously handled if all surveys and preliminary engineering costs incident thereto are paid entirely out of state highway funds.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by the Commission, all members being present and voting affirmatively, as follows:

1. That the total cost of surveys and preliminary engineering made for and in connection with the construction of highways, bridges or grade separations in which the Federal Government is involved and toward which Federal funds are appropriated shall be paid out of state highway funds, thus releasing for other highway construction purposes all Federal funds allocated to the State of Oregon under the provisions of said Federal Aid Highway Act of 1944.

2. That this resolution be entered in the minutes and records of the Commission as of the 11th day of August, 1947, and a true copy thereof delivered to William H. Lynch, Division Engineer, Public Roads Administration, Portland, Oregon.

The matter of completing the construction of the Warm Springs Highway, particularly the Forest Highway Section thereof, approximately seven miles in length, between Bear Springs Junction and the South Forest Boundary,

had the attention of the Commission. The Engineer recalled that at its July meeting the Commission authorized him to arrange, if possible, with the Public Roads Administration to finance such work with the $320,000 of Federal Aid Funds heretofore allocated to the Forest Boundary-Jones Ranch Section of the Ochoco Highway, in order to expedite completion of the Warm Springs Highway. This transfer of funds, he said, has been approved by the local representatives of the Federal Government, but as yet has not been acted upon by the officials in Washington, D. C., although indications are that action by such officials will be favorable. The Engineer pointed out that when this matter was first discussed it was thought that $320,000 would be sufficient to do all the work required; however, it now develops that such sum is only sufficient for the grading work involved, so it will be necessary to provide an additional sum of $130,000 to pay for surfacing and oiling when that work is ready to go forward. He gave as his thought that that part of the work can be financed with Forest Highway money next year if it is then available. The Commission approved the report by unanimous vote and authorized the transfer of the Federal Aid Funds in conformity with the Engineer's recommendation. This completed the discussion of matters pertaining to the State and Federal Aid Construction Programs, whereupon the following resolutions embodying the action taken by the Commission on such programs, at this meeting, were adopted by the Commission by unanimous vote:

WHEREAS, supplementing the action of the Commission, by which there was designated and adopted a Federal-State Postwar Program, the Commission on the twenty-seventh day of June 1946, designated and adopted a State Postwar Construction Program; and

WHEREAS, subsequent thereto it was deemed necessary to amend in some respects the said State Postwar Construction Program, which amendments are provided for and covered in the resolution adopted by the Highway Commission on September 24, 1946; and

WHEREAS, circumstances which now prevail make it necessary and warrant a further amendment of said State Postwar Construction Program;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That said State Postwar Construction Program is hereby amended by deleting therefrom the following projects which are found in Part I of Exhibit A of said State Postwar Construction Program:

County	Highway	Section and Description	Construction	R.of W.	Total	
Douglas	Elkton-Sutherlin	Tyee Road-Sutherlin, Surfacing	$100,000	$15,000	$115,000	A

County	Highway	Section and Description	Construction	R.of W	Total	
Jackson	Sams Valley	E. Unit of Hwy., Gr.& Surf.	$100,000	- -	$100,000	A
Lake	Warner Valley	Hwy Jct.-Muddy Cr., Grad.,Surf. & Oiling	110,000	$2,000	112,000	A
Union	Starkey	Hilgard-Starkey, Resurf.	30,000	- -	30,000	A
Wallowa	Joseph-Wall. L.	N. Unit, Joseph-Wallowa Lake, Gr.,Surf. & Oil,	30,000	- -	30,000	A

2. That there be deleted from said State Postwar Construction Program the following project which is found in Part II of Exhibit A of said State Postwar Construction Program:

County	Highway	Section and Description	Construction	R.of W.	Total	
Linn	Pacific E.	Albany Service Rd., G-S-O	$60,000	$20,000	$80,000	D

3. That there shall be and hereby are added to said State Postwar Construction Program the following projects:

County	Highway	Section and Description	Construction	R.of W.	Total
Lincoln	Oregon Coast	Siletz River Bridge, replace trestle, superstructure and add walks	$50,000		$
Lane	McKenzie	Springfield Junction Turnaround	9,900		
Wallowa	Enterprise-Lewiston	N. Unit, Washington State Line-Buford Creek, Grading	173,400		
Yamhill	Bellevue-Hopewell Secondary	Amity-Hopewell, 0.5 miles, G. S. & O.	22,500		
Lane	Richardson-Eugene Secondary	Fisher Road-Oak Hill, Grad., Surf.& Oil, Sta. 268+70-339, 1.26 miles	35,000		35,000
Lane	Richardson-Eugene Secondary	Oak Hill Overcrossing	55,000		55,000
			$ 90,000		$ 90,000

County	Highway	Section and Description	Construction	R.of W.	Total
Sherman	Wasco-Heppner Secondary	West Cottonwood Grade	$ 50,000		
Douglas	North Umpqua County Road	Bridge over Little River at Glide (State share only)	32,400		

4. That the following project, to-wit: Oregon City-Canby, Paving, for which there was allocated in said original Program under Part I of Exhibit A the sum of $400,000, shall be given an increased allotment of $200,000.

5. That the following project, to-wit: Parkrose Section, Pavement Widening, for which there was allocated in said original Program under Part II, Exhibit A the sum of $20,000, shall be given an increased allotment of $63,500.

6. That this second amendatory resolution shall become a part of said original State Postwar Construction Program Resolution and to the extent herein provided shall amend said original Program but not otherwise.

7. This resolution shall be entered in the minutes and records of the Commission as a second amendment to said original State Postwar Construction Program as of August 11, 1947.

WHEREAS, the Highway Commission heretofore, to-wit: On the twenty-ninth day of May, 1945, duly and regularly adopted a resolution by which the Commission selected and designated state highways and sections of state highways for improvement as a Federal Aid Postwar Program; and

WHEREAS, subsequent to the adoption of said Federal Aid Postwar Program the Commission found it necessary to change in some respects said Program and, therefore, adopted an amendatory resolution on the twenty-third day of September, 1945; and

WHEREAS, existing circumstances make necessary and warrant a further amendment of said original Federal Aid Postwar Program;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That said original Federal Aid Postwar Resolution as amended be and the same hereby is further amended by deleting therefrom the following projects which are found in Part I of Exhibit A of the original Program:

County	Section and Description	Construction	R.of W.	Total	Year
U. S. Route No. 28 (Ochoco):					
Wheeler	For. Bndry.-Taylor Cr., Sta 24-172,2.8 Mi.Grading	$270,000	$3,000	$273,000	3
Wheeler	For. Bndry -Jones Ranch, Sta.24-215, 3.6 Mi. Surfacing	50,000	- -	50,000	3

2. That there be deleted from said original Federal Aid Postwar Program the following project found in Part III of Exhibit A of the original Program:

County	Section and Description	Construction	R.of W.	Total	Year
Richardson-Eugene, Secondary					
Lane	Fisher Road-Oak Hill, Grad., Surf. & Oil, sta. 268+70-339, 1.26 miles	$ 35,000	- -	$ 35,000	1
Lane	Oak Hill Overcrossing	$ 55,000	- -	$ 55,000	1
		$ 90,000		$ 90,000	

3. In lieu of the deletions covered under No 1, add the following project:

County	Section and Description	Construction	R.of W.	Total	Year
Warm Springs Highway (No Route No.):					
Wasco	Wapinitia Junction to Forest Boundary, 6.92 miles, Grading	$ 320,000	--	--	3

4. The following projects heretofore on the State Postwar Construction Program but by proper resolution having been deleted therefrom hereby are added to the Federal Aid Postwar Program, to-wit:

County	Highway	Section and Description	Construction	R. of W	Total	
Douglas	Elkton-Sutherlin	Tyee Road-Sutherlin Surfacing	$100,000	$ 15,000	$115,000	A
Jackson	Sams Valley	E. Unit of Hwy , Gr. & Surf .	100,000	--	100,000	A
Lake	Warner Valley	Hwy. Jct.-Muddy Cr., Grad , Surf. & Oiling	110,000	2,000	112,000	A
Union	Starkey	Hilgard-Starkey, Resurf	30,000	--	30,000	A
Wallowa	Joseph Wall L.	N. Unit, Joseph-Wallowa Lake, Gr., Surf & Oil	30,000	--	30,000	A

5. That this second amendatory resolution shall become a part of said original Federal Aid Postwar Program Resolution and to the extent herein provided shall amend said original Program but not otherwise.

6. This resolution shall be entered in the minutes and records of the Commission as a second amendment to said original Federal Aid Postwar Program as of August 11, 1947.

The Commission had under discussion matters pertaining to the construction of the 1st Ave.,-Esplanade Section of the Klamath Falls-Malin Highway in the City of Klamath Falls, particularly the Engineer's proposal to install hot water pipes under the pavement for a short distance between the railroad crossing and the USRS Canal in order to keep the surface of the

pavement free from frost and ice during the winter months. Commissioner Schaupp declared his opposition to such type of construction. The Engineer explained details of the plan, advising that the heating of the pavement is necessary in order to avoid heavy construction expense and right of way costs that would result if another type of construction were employed.

The matter was discussed by the Commission at some length and, as a result thereof, the Engineer was instructed to report full details of the matter to the Commission at its next meeting when he will be given final instructions. During the discussion Chairman Banfield made it clear and definite that the Commission does not intend to proceed with the project until all matters pertaining to it, including the installation of hot water pipes and the dead-ending of intersecting city streets, have been settled to the Commission's entire satisfaction. Commissioners Schaupp and Chandler concurred.

The Engineer brought up for discussion the need for providing additional office space for Highway Department employees in Salem. He advised that the work in the Highway Department is rapidly increasing and cannot be carried on efficiently without more employees, and they cannot be hired because there is no place to put them. The situation is such, he said, that it would be impossible for the Department to function properly pending construction of a new State Office Building. He advised that there is no suitable office space available in Salem, either state-owned or privately-owned, and indications are that the new State Office Building will not be ready for occupancy for two or three years. Moreover, information from the State Board of Control indicates that even when the new State Office Building is constructed, there is not going to be enough space to satisfy the needs of the State Highway Department, so the probability is that the Highway Department will have to construct its own building.

In the general discussion of this matter Commissioner Chandler stated emphatically that he is in favor of the Highway Department having its own building. Commissioner Schaupp expressed himself similarly. Chairman Banfield also indicated a favorable attitude on the subject; however, he added that, in his estimation, the building should be part of the Capitol Group, and that the architectural features should harmonize with the other buildings in that group. It was his thought that it would be a mistake to construct the building at the Highway Shops only to avoid facing the building with marble. Commissioner Schaupp inquired as to the means of financing the building and was informed by the Chief Counsel that funds belonging to other State Departments could be borrowed through the State Treasurer. This matter was discussed at considerable length, and as a result thereof, the Commission decided to discuss it with the members of the Board of Control before taking any action. The Chief Counsel was instructed to arrange a meeting with the Board on August 28, 1947, if possible.

The Engineer then brought up for discussion the matter of providing office space to take care of the immediate needs of the Highway Department. He again pointed out that no space is available in any of the exist-

3

ing state-owned buildings, and, while space probably could be obtained in privately-owned business buildings in Salem for some of the smaller departments by scattering them around in different buildings, that would be very objectionable and an inefficient way of solving the problem. He pointed out that the Highway Department needs a new sign shop building at the State Shop Grounds and suggested that it might be advisable to construct such a building now for emergency use for office purposes pending the construction of a permanent office building. He estimated the cost to construct a suitable building at $160,000; however, he advised that the Department could get along with a partial building for the time being which would cost only $75,000. The Commission deferred action on this matter until the building situation has been discussed with the Board of Control.

The Chief Counsel reported the results of a conference with members of a delegation from Sweet Home which appeared before the Commission at its previous meeting with regard to the widening of the Santiam Highway in their town. He advised that the State Highway Engineer and he discussed this matter with the local people, including Mr. A. L. Weddle, the owner of the property under controversy, and ascertained from Mr. Weddle that he had offered to donate sufficient land to widen the highway, as needed by the State, on the condition that the City would adopt an ordinance requiring parallel parking of vehicles through the town, but it appears that the City wants to establish angle parking. It was his thought that the Commission should insist on a uniform right of way through the town and that if an agreement cannot be reached with the property owners for the additional right of way needed, that it be condemned. The Engineer stated that the highway through this town should be wide enough for four lanes of moving traffic and that he and the Chief Counsel have been working to that end. It was the thought of Chairman Banfield that consumation of the right of way matter is a City problem and that the City should be so informed, and should also be informed that the Commission is ready and willing to proceed with construction of the highway as soon as the right of way matter has been satisfactorily disposed of; further, that the state should insist on parallel parking on this thoroughfare. It was the Chief Counsel's opinion that the right of way should be condemned. Chairman Banfield gave as his opinion that the authority to condemn should be deferred pending further reports from the Engineer and the Chief Counsel on the cost involved to construct the highway and to acquire the right of way; also that when the state improves a highway route which passes through a city or town, the work should be done properly The Commission thereupon instructed the Engineer and the Chief Counsel to report on the construction and right of way costs as mentioned by Chairman Banfield.

(The reports referred to were presented by the Engineer and the Chief Counsel on the following day, at which time the Commission voted unanimously to acquire the right of way needed for the improvement, on the condition that the City of Sweet Home will adopt an ordinance for the parallel parking of vehicles on this street. See ahead for additional paragraph and resolution.)

In connection with the discussion of this matter the Commission also discussed briefly a similar situation on Second Avenue East, (North Umpqua Highway) in the City of Roseburg. The Engineer and the Chief Counsel were instructed to present reports on this situation similar to those ordered on the Sweet Home project.

The Chief Counsel requested instructions concerning filing statements with the Federal Power Commission and the Oregon Hydro-electric Commission setting forth the attitude of the Highway Commission with respect to the application of the Idaho Power Company for a preliminary license to construct a dam across the Snake River at what is known as the "Oxbow Damsite", which will result in the inundation of a portion of the Baker-Homestead Highway by the backwater from the dam. He presented a form of petition directed to the Federal Power Commission and pointed out that it merely requests that the Federal Power Commission make a very careful and scientific investigation of the question involved before granting a preliminary permit, and that it take such steps as may be necessary to protect the general public interests and particularly the interests of the users of public highways at the present time and for time to come. The Commission unanimously approved the petition as prepared, on the motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler, and thereupon signed the petition.

In this connection the Engineer requested authority to make an investigation as may be necessary with regard to the highway situation at this place. He estimated that such investigation would cost about $500. The Commission approved the request unanimously.

The Chief Counsel discussed with the Commission the matter of "No Parking" signs heretofore erected by the State Highway Department along US99E (Pacific Highway East) in the vicinity of Hubbard, Marion County. He advised that, according to his understanding, the purpose of the signs was to eliminate congestion of traffic created by the parking of cars on the highway in front of a place where farm auctions are frequently held, but it appears that results not anticipated have taken place, and at least two property owners are being seriously harmed in a financial way, one of whom is in the car wrecking business and the other in the restaurant business. This matter was discussed briefly by the Commission, but action on it was deferred pending additional information. The matter was referred back to the Engineer and the Chief Counsel for further study and to work out a solution of the problem if possible, it being understood that the Commission would approve any joint recommendation that the Engineer and the Chief Counsel might present.

The Engineer reported the need to post the Willamette River Bridge on the Hillsboro-Silverton Secondary Highway No. 140, at Newberg, for legal limit loads. He advised that this is an old county bridge, designed years ago for an H-10 load, and that while the overstress, under ordinary legal loads, is quite severe it is not too great and would not damage the structure; however, no load heavier than maximum legal load should be allowed on this

structure. He recommended action by the Highway Commission to limit the weight of loads on this bridge to the maximum weight loads authorized by the statutes. The Commission by unanimous vote approved the posting of this bridge for such weight loads and instructed the Engineer to post the bridge accordingly.

The Engineer presented a request from the Beutler-Quistad Lumber Company of West Salem for state aid in constructung a paved surface along the Salem-Dayton Secondary Highway in front of the company's business property in West Salem. He advised that this matter had been investigated and that in order to do as the company desires it will be necessary to reconstruct the highway paving to a certain extent. He estimated the cost of the improvement at approximately $ 2,190 and recommended approval of the request on the condition that the state paving expense be limited to one-half of such amount, the company to pay the balance. He advised that Warren Northwest, Inc., highway contractors, which has a paving plant in Salem, is willing to do the work and suggested, if the Commission approves the project, that the offer of this company be accepted and that a written agreement be reached with Warren Northwest, Inc., covering the matter, provided that the Beutler-Quistad Lumber Company shall pay its share of the cost in advance. The Commission approved the arrangement by unanimous vote on the condition that no traffic hazard shall be created.

The Commission discussed briefly additions and changes made in the highway law by reason of legislation adopted by the 1947 Oregon Legislature but deferred action thereon until a later meeting, except that in the discussion of the so-called "Throughways" bill the Commission instructed the Engineer to submit a report on the zoning of highways coming under the throughway classification.

A letter was presented from Mr. Hugh Russell, Sherwood, Oregon, complaining of what he understands is the illegal use of Oregon beaches by aircraft. He particularly referred to such illegal use of Roads End Beach north of Wecoma, in Lincoln County, on Sunday, August 3, 1947, by a pilot who seriously endangered the lives of pedestrians on the beach. The Chief Counsel explained the law covering such matters and gave as his opinion that no part of the shore of the ocean which by law has been declared to be a public highway may be used for the taking off or landing of aircraft except pursuant to a permit given by the State Highway Commission and under such rules and regulations as the Commission may prescribe. He was instructed by the Commission to convey such information to Mr. Russell.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission discussed the appointment of one or more Assistant State Highway Engineers, an Assistant Counsel, and an Auditor, pursuant to authority granted by the provisions of Chapter 359, Oregon Laws 1947, and also discussed the appointment of a State Parks Superintendent, pursuant to

the provisions of Chapter 184 of said laws. The Chief Counsel explained the requirements of the laws covering such appointments and the Commission's authority thereunder. Chairman Banfield advised that the Commission feels such appointments are a necessity in order to provide for greater efficiency in the activities of the State Highway Department and that it would be to the best interests of the state if the appointments were made as soon as possible He pointed out that the Commission is not desirous of changing the Highway Department personnel but prefers to fill these appointive positions with deserving employees who are now connected with the Highway Department organization rather than to secure the services of people who are not acquainted with the activities of this Department; however, he said, the Commission will be obliged to act according to what it considers necessary in the best interests of the state to promote harmony and a greater efficiency within the organization He requested the Engineer's recommendation with respect to the appointments on the basis that he would be responsible for the actions of his subordinates as designated in the law.

Chairman Banfield also asked the Engineer to submit an organization chart showing the duties that would be assigned to each of the Assistant State Engineers in the event more than one is appointed. He also stated that it is the feeling of the members of the Commission that the Assistant State Highway Engineers, rather than the State Highway Engineer himself, should make the personal contacts with officials of cities and counties so as to afford the cities and the counties the opportunity of appeal to the State Highway Engineer if they are not satisfied with the decisions of the Assistant State Highway Engineers, rather than appealing to the Commission. The Engineer was instructed to bear this in mind in recommending engineers for consideration as Assistant State Highway Engineers.

The Engineer advised that there is no question but that he needs at least one assistant now, and possibly two later on, to take care of the routine engineering problems which arise, which would then give him more time to study the important engineering problems. He gave as his thought that if the Commission feels two Assistant State Highway Engineers should be appointed now that one of them should be placed in charge of surveys and construction and related activities and the other should be placed in charge of maintenance operations and related matters. With this in mind he recommended as his first choice for appointment as First Assistant State Highway Engineer Mr. W. C. Williams, Division Engineer with headquarters in Portland, and as Second Assistant State Highway Engineer he recommended Mr. W. W. Stiffler, Assistant Maintenance Engineer with headquarters at Salem. He also mentioned the names of several other engineers now connected with the Highway Department organization who are qualified to assume the responsibilities of these positions The matter was discussed at considerable length but action thereon was deferred by the Commission pending the furnishing of additional information of a personal nature with respect to each of the engineers whose name had been mentioned in this discussion. The Engineer was instructed to obtain such information and to report it to the Commission on the following day(see ahead for additional paragraph on this matter and for the Commissions' resolution appointed two Assistant State Highway Engineers and Assistant Counsel).

The Commission next discussed the appointment of an Auditor. Chairman Banfield explained briefly what the Commission has in mind in connection with the activities of the Auditing Department. He particularly pointed out that the Commission wishes to know the cost of each highway function, and to set up its auditing organization as a separate and distinct department from the engineering organization. The Engineer recommended the appointment of Mr. Malcom Hawke, Certified Public Accountant, who assisted in setting up the Auditing Department as it now functions, and who has been in charge of the Auditing Department for a number of years. The Commission deferred a decision with respect to this appointment until the next meeting and referred the matter to the Engineer, the Chief Counsel, and the Secretary to submit a joint recommendation at that time.

Appointment of a Superintendent of State Parks next had the attention of the Commission. Chairman Banfield advised that it is the feeling of the Commission that this department should function to a large extent as it has functioned in the past, giving the State Parks Superintendent a free hand in connection with all state park matters without separating that department from the State Highway Department and without duplicating state highway administrative functions. The State Parks Department, he said, should not be handicapped in its activities by lack of equipment, etc., and its activities should be coordinated with the Engineering Department. The Engineer pointed out the need for the services of a Landscape Engineer in working up plans for landscape work in connection with road improvements. He gave as his thought that the matter of constructing and maintaining roadways within the park areas should be delegated to the Engineering Department as in the past. Chairman Banfield advised that the Commission is of the opinion that the Landscape Engineer should be assigned to the State Parks Department, but his services could be loaned to the Engineering Department as occasion demands in connection with the design of landscape improvements such as mentioned by the Engineer. As to construction and maintenance of roadways in parks, he said, that matter could probably be worked out satisfactorily. The Commission took no definite action with respect to the appointment of the State Parks Superintendent but deferred the matter pending additional information. The Engineer was instructed to discuss the matter with the State Parks Superintendent and present a joint recommendation setting forth a clearly defined plan of delineation for the operations of the Parks and Engineering Departments.

The Commission next discussed the appointment of an Assistant Counsel and upon recommendation of the Chief Counsel appointed Mr. George W. Neuner to this office by unanimous vote. (This appointment was confirmed by formal resolution on the following day. See ahead for the resolution.)

The Engineer requested salary increases as follows:

Name	Position	Present Salary	Proposed Salary
W. W. Stiffler	Asst. Maint. Engr.	$ 416	$ 434
M. Stevenson	Asst. Bridge Engr.	416	434
F. B. Crandall	Traffic Engineer	398	434

The Engineer advised that all of these men are classified under the Civil Service ruling as Civil Engineers Grade 4, for which there is a salary range of $380 to $470 per month. He gave reasons for justification of the increases and recommended approval of the request. The Commission approved such salary increases by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler, retroactive to July 1, 1947.

The Chief Counsel recommended a salary of $500 a month for Mr. George W. Neuner, newly-appointed Assistant Counsel. He advised that this is an increase in salary from $405 to $500 a month and has been approved by the Attorney General. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler, such increase being retroactive to July 1, 1947.

Next under discussion was the matter of granting increases in salaries to the State Highway Engineer and the Chief Counsel. Chairman Banfield suggested an increase of $100 per month for each. The suggestion was adopted by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler. It was understood that these increases would be retroactive to July 1, 1947.

Mr. E. J. Stack, engineer representing the C. D. Johnson Lumber Co., was present with respect to the agreement between the Company and the Highway Commission relative to construction of a pedestrian walk on state highway property at the south end of the Yaquina Bay Bridge at Newport. He advised that they have had to change their plans with regard to their development to facilitate the loading of the Company's boats at this place, which necessitates the driving of dolphins inside of the fender piling on the upstream side of the bridge on the state highway right of way, and he requested permission from the Commission to maintain these pilings on the state's property. The Chief Counsel advised that he has discussed this matter with the Bridge Engineer, Mr. G. S. Paxson, who offers no objections to the improvement from the bridge standpoint. The Commission approved the request by unanimous vote upon motion of Commissioner Schaupp, duly seconded by Commissioner Chandler, subject to the condition that the Engineer and the Chief Counsel, on further investigation, are of the opinion that that is the proper thing to do. If approved by them, the matter is to be covered by appropriate written agreement. (The arrangement was later approved by the Engineer and the Chief Counsel and a permit authorizing such use of the state's property was executed.)

The meeting adjourned at 4:45 p.m. to reconvene on the following morning at 10:00 a.m. in the same room.

Portland, Oregon
August 12, 1947

The meeting of the State Highway Commission reconvened at 10:00 a.m. in Room 715, Imperial Hotel, with all Commissioners, the State Highway Engineer, the Chief Counsel, the Assistant Counsel, and the Secretary present.

Pursuant to instructions from the Commission on the previous day the Engineer presented an organization chart, showing his ideas with respect to the assignment of duties under the organizational set-up proposed by the Commission as outlined on the previous day, and the personal information requested by the Commission on the previous day with respect to the Engineers who are being considered for appointment as Assistant State Highway Engineers, and explained details thereof, This matter was discussed at some length during which Chairman Benfield advised that the Commission has decided to appoint two Assistant State Highway Engineers, one as 1st Assistant who will be in charge during the absence of the State Highway Engineer, and the other as 2nd Assistant, however, whatever the Highway Commission may decide to do at this meeting is subject to change in the interests of promoting harmony and efficiency in the State Highway Department. As a result of this discussion the Engineer was instructed to prepare a new chart showing, among other things, each department head and his assistant; also showing that the Auditor is to report direct to the State Highway Commission with copies of his report to go to the Engineer and the Chief Counsel, the Parks Superintendent to report direct to the Commission, and the Landscape Engineer to report to the State Parks Superintendent, with the loan of his services when necessary to the Engineering Department, and other details.

The Chief Counsel reported further on the widening of the Santiam Highway through the Town of Sweet Home, particularly with regard to the acquisition of property from Mr. A. L. Waddle and others. He recommended, in order to dispose of this matter, that the Highway Commission underwrite the cost of acquiring this right of way on the condition that the City of Sweet Home will enact ordinances providing for parallel parking of cars and will do whatever is necessary to stop the present practice of diagonal parking. It was his thought that the right of way could be acquired at a nominal expense in the event the city cooperates to the extent recommended. The Commission approved the recommendation and thereupon authorized condemnation of the right of way, if necessary, when the city has fulfilled its obligation. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

> WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition, or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for

the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways, or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and both necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RECOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and both necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to-wit:

Real property owned by Vivian Weddle Long, which property is located in the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 31, Township 13 South, Range 1 East, W. M. Linn County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 13458, which property is being acquired for right of way purposes in connection with the Santiam Highway; and *

Real property owned by A. L. Weddle, which property is located in the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 31, Township 13 South, Range 1 East, W M., Linn County, Oregon and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13497, which property is being acquired for right of way purposes in connection with the Santiam Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said properties whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners of said real properties and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twelfth day of August, 1947.

Footnote:

(*) The names of the property owners and the detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 85, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

Chairman Banfield also brought up for discussion matters pertaining to a new highway construction program. The Commission, he said, is of the belief that it would be possible to defer the construction of numerous major projects for a number of years if a reasonable expenditure of money were made for revamping the existing highways by cutting back the corners and widening turns. The Commission, he said, has in mind an expenditure of approximately $2,000,000 for such purposes. The Engineer was thereupon instructed to prepare a report on the subject.

Mr. W. C. Williams, Division Engineer, Portland, appeared before the Commission at this time by request regarding the appointment of an Assistant State Highway Engineer. Chairman Banfield explained that the Commission has in mind the appointment of two assistant state highway engineers to aid the State Highway Engineer in the discharge of his many duties, it being the belief of the Commission that such appointments will provide for greater efficiency in the functioning of the State Highway Department. He outlined the requirements of such appointments, particularly pointing out that persons who are appointed to fill these positions not only must be qualified from an engineering standpoint but also must be able to cooperate and work in harmony with the other administrative appointees so as to promote maximum efficiency in the Highway Department organization. A general discussion of the matter followed during which Mr. Williams stated that he believes he is qualified to fill such a position and expressed appreciation for any consideration that the Commission might give him in making the appointment. He advised that if he receives the appointment he will do his utmost to please the Commission in every way, that he will work in harmony with the other administrative officers and will cooperate with them to the best of his ability in an endeavor to carry out the wishes and desires of the Commission and to promote harmony and efficiency in the organization. Following Mr. Williams' departure, the Commission discussed the matter further and as a result thereof voted unanimously to appoint Mr. Williams First Assistant State Highway Engineer. The action was taken upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler. (See resolution ahead for formal appointment.)

The question of salaries to be paid the First Assistant and Second Assistant State Highway Engineers was then discussed, and it was unanimously decided that the salary of the First Assistant State Highway Engineer should be $525 per month and that of the Second Assistant State Highway Engineer, $500 per month.

The Commission discussed informally matters pertaining to the furnishing of additional office space for State Highway Department employees located in Salem but again deferred action thereon pending a conference with the State Board of Control.

Recess was taken for luncheon at twelve o'clock noon. The meeting reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Mr. W. W. Stifflor, Assistant Maintenance Engineer, Salem, appeared before the Commission by request regarding the appointment of a Second Assistant State Highway Engineer. Chairman Benfield outlined to Mr. Stifflor what the Commission has in mind, as was done in the case of the appointment of the First Assistant State Highway Engineer, and inquired as to his feelings in the

matter. In the general discussion that followed, Mr. Stiffler stated that he believed he could qualify for this appointment from an engineering standpoint as well as from the standpoint of working in harmony with the other administrative officers. He stated that if he receives the appointment he will do his utmost to cooperate and work in harmony with the other administrative officers in every respect according to the wishes and the desires of the Commission. He thanked the Commission for any consideration that may be given to him in this appointment. Following Mr. Stiffler's departure, the Commission discussed the matter further among themselves and as a result thereof appointed Mr. Stiffler Second Assistant State Highway Engineer, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The following resolution covering the appointment of W. C. Williams as First Assistant State Highway Engineer, W. W. Stiffler as Second Assistant State Highway Engineer, and G. W. Neuner as Assistant Counsel was thereupon adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

WHEREAS, by virtue of the authority provided in Section 100-113, O. C. L. A., as amended by Chapter 359, Oregon Laws, 1947, the Highway Commission is authorized to appoint a State Highway Engineer and one or more Assistant State Highway Engineers, and under the same statute the Commission is authorized to appoint a Chief Counsel and an Assistant Counsel;and

WHEREAS, prior to the amendment of said statute but by virtue of the provisions of Section 100-113, O. C. L. A., the Commission appointed R. H. Baldock as State Highway Engineer, whose term of office has not yet expired; and

WHEREAS, in the opinion of the Commission the work of the Department and the business of the Commission can best be served by the appointment of Assistant State Highway Engineers to serve the Highway Commission in such capacity; and

WHEREAS, prior to the amendment of said statute, the Commission, under authority provided in Section 100-113, O. C. L. A., appointed J. M. Devers as Chief Counsel, whose term of office has not yet expired, and under the same statute appointed G. W. Neuner to serve as Assistant Counsel at the pleasure of the Commission; and

WHEREAS, it is the opinion of the Commission that under and by virtue of the authority provided for in said Chapter 359 an Assistant Counsel should be appointed; and

WHEREAS, after investigation and upon due consideration, it is the opinion of the Commission that W. C. Williams is a competent civil engineer and is well qualified by technical training as well as by practical experience in highway engineering, and by reason of said qualifications is a competent person to serve as Assistant State Highway Engineer; and

WHEREAS, it is the opinion of the Commission upon due investigation and consideration that W. W. Stiffler is a competent civil engineer qualified by technical training and by practical experience in highway engineering, and by reason of said qualifications is a competent person to serve as Assistant State Highway Engineer; and

12

WHEREAS, it is the opinion of the Commission after due consideration that G. W. Neuner, who is admitted to practice before the courts of the State of Oregon, the United States District Court for the District of Oregon, and the Supreme Court of the United States, and who has had several years experience as a practicing attorney, is competent to serve as Assistant Counsel,

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That W. C. Williams be and he hereby is appointed Assistant State Highway Engineer to serve in such capacity during the pleasure of the Commission.

2. That W. W. Stiffler be and he hereby is appointed Assistant State Highway Engineer to serve in such capacity during the pleasure of the Commission.

3. That G. W. Neuner be and he hereby is appointed with the approval of the Attorney General, as Assistant Counsel to serve in such capacity for the period of four years.

4. That the said W. C. Williams shall serve as First Assistant State Highway Engineer, and the said W. W. Stiffler shall serve as Second Assistant State Highway Engineer under the State Highway Engineer, but subject, nevertheless, to such orders, instructions and directives as the Commission from time to time may find necessary to order and prescribe.

5. That W. C. Williams as First Assistant State Highway Engineer shall, in the absence of the State Highway Engineer, have full authority to perform any duty required or permitted by law to be performed by the State Highway Engineer.

6. That the said G. W. Neuner shall within the meaning and purpose of said Chapter 359 serve in the capacity of Assistant Counsel and shall, as provided in said law, serve under the direction of the Chief Counsel, and in the absence of the Chief Counsel said Assistant Counsel shall have full authority to perform any duty required or permitted by law to be performed by the Chief Counsel.

7. Before entering upon the discharge of their respective duties the said W. C. Williams, W. W. Stiffler and G. W. Neuner shall take and subscribe the usual official oath.

8. That this resolution be entered in the minutes and records of the Commission as of the twelfth day of August, 1947.

The State Highway Engineer recommended the following appointments necessitated by the promotion of Mr. Williams and Mr. Stiffler: Mr. A. G. Skelton, District Maintenance Superintendent was recommended as Division Engineer for Division I, Portland, to fill the vacancy created by the pro-

motion of Mr Williams at a salary of $380 per month; Mr. I. A. DeFrance, Assistant Maintenance Engineer, Salem, was recommended for the vacancy created by the promotion of Mr. Stiffler at a salary of $380 per month; Mr. L. R. Chandler, Resident Engineer, Pendleton, was recommended to fill the vacancy created by the promotion of Mr. A. G. Skelton, at a salary of $360 per month; Mr. R. B. Sipprell, Assistant Maintenance Engineer, Salen, was recommended as Director of Permits at a salary of $340 a month. The recommendations were approved by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

The Commission had under discussion an increase in salary for the Commission's Secretary, Mr. H. B. Glaisyer, and by unanimous vote approved a salary of $475 a month, effective as of July 1, 1947.

There being no further business to come before the Commission at this time the meeting adjourned at 3:45 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
August 25, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, First Assistant State Highway Engineer
W. W. Stiffler, Second Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission, by unanimous vote, approved the minutes of the meeting held on June 16 and 17, 1947.

The State Parks Superintendent reported on the following park matters:

1. Proposed acquisition of Federal Recreational Demonstration Project adjacent to Silver Creek Falls State Park: The Parks Superintendent advised that this area contains approximately 6,000 acres and that it is now possible to obtain it from the Federal Government as a gift on the condition that the state will operate it in conformity with past policies and practices. He advised that a former Highway Commission, of which Mr. Leslie M. Scott was Chairman, approved acquisition of the area for state park purposes, but it has taken 12 years to accomplish it. Following considerable discussion of this matter, the Commission deferred its decision pending further study and report from the Parks Superintendent as to the details of the obligation that the Commission would assume if it accepted the area as part of the State Parks System. The report is to show exactly what the Commission is acquiring if it accepts the Government's offer and what it is going to cost the state for development, operation, etc.

2. Proposed acquisition of timber land bordering on Elbow Lake on the Oregon Coast Highway, in Douglas County: The Parks Superintendent advised that this is a partially-timbered tract, containing about 40 acres of land, which is owned by the Sparrow Interests and will make a valuable addition to the State Park System. He suggested that the Right of Way Department be authorized to negotiate for the purchase of it. The Commission approved the suggestion and instructed the Chief Counsel to report on the matter at the next meeting.

3. Suggestion of the Astoria Kiwanis Club that the state acquire a portion of the Ft. Stevens Military Reservation for state park purposes: The Parks Superintendent advised that this Reservation is to be made surplus, and it is possible for the state to acquire it if the Commission feels that is desirable; further, that if the Commission is

interested, he will investigate the matter and report his findings. The Commission ordered a report.

4. Petition for development of ocean wayside along the Oregon Coast Highway south of Waldport: The Parks Superintendent advised that a petition has been received signed by 80 citizens of Waldport and vicinity asking for development of this area, which is known as Wakonda Beach; further, that the property is now state-owned and that he has plans for construction of an access road to it, and when such access has been provided it is his intention to work up plans for development. The Commission ordered that the petitioners be so informed.

5. Report on receipts from sale of Vista House concession: The Parks Superintendent reported information from the concessionnaire that during the month of July gross sales amounted to $19,075.95, of which the state's share, according to contract agreement, amounted to $2,031.98. The Commission approved the report.

In this connection the Parks Superintendent advised that the premises are not being kept in first class condition due to the heavy sale of popcorn and soft drinks, and there is considerable amount of debris accumulation, paper sacks, pop bottles, etc. He suggested that the sale of such commodities be prohibited. The Chief Counsel pointed out that the contract for this concession provides that the concessionnaire must keep the premises in a clean condition. During the discussion of the matter Chairman Banfield expressed the opinion of the Commission that the place must be kept clean, and if the concessionnaire cannot keep it that way, then perhaps the state should take it over. In the meantime, however, it is up to the State Parks Superintendent to see that the concessionnaire lives up to the agreement.

6. Report on receipts from sale of concession in Silver Creek Falls State Park: The Parks Superintendent reported that the gross sales amounted to $7,329.76 during the month of July, of which the state's share was $219.89. The Commission approved the report.

7. Proposed purchase of the Paul Baird property adjoining Rocky Creek State Park on the Oregon Coast Highway: The Parks Superintendent advised that this matter was before the Commission several meetings ago, but a decision was deferred pending the adoption of a permanent location for the highway at this point. He gave as his understanding that such location has been approved, and he inquired whether or not the Commission is now ready to pass on the purchase of the Baird property. He recommended purchase of the property, which consists of 42 acres of land, in order to protect the present park area. During the discussion of this matter Chairman Banfield pointed out that the property under discussion is a steep hillside, and, in his estimation, should not be acquired unless it is needed for right of way for the highway improvement. Commissioner Schaupp expressed himself similarly. The matter was referred back to the Engineer and the Parks Superintendent to advise just what portion of the property is needed as right of way, it being understood that the Commission will acquire such portion but not the balance. A joint report is to be rendered to the Commission at the next meeting.

8. Report on operations of park maintenance crews along the Upper Columbia River Highway: The Parks Superintendent exhibited pictures showing vistas opened up along this highway by crews under his jurisdiction. The Commission took no action in the matter.

The Assistant Counsel, Mr. J. W. DeSouza, requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the offer that he recommended in connection with each parcel. Following careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

FOOTNOTES:

* Item No. 11902, acquisition of right of way from B. A. Kliks for the Troutdale Section of the Columbia River Highway: The Commission approved this settlement on the condition that the property owner's access to the highway shall be restricted to a service road to be built and maintained by the Commission along the northerly boundary of the right of way. If Mr. Kliks will not agree to such condition, then the property is to be condemned.

** Item No. 11961, acquisition of right of way from Dominico Giancone for the Troutdale Section of the Columbia River Highway: This settlement was approved by the Commission, but the transaction is not to be closed until settlement has been effected with Mr. Kliks, inasmuch as it involves an exchange of properties.

*** Item No. 13795, purchase of right of way from Joe V. and Mary Hendrick: The Commission approved the price to be paid for this property but authorized purchase only in the event the Commission later approves the Engineer's plan for installing a heating system in the pavement on the Esplanade Street Section of the Klamath Falls-Malin Highway, in Klamath Falls. (The Commission later in the session approved the installation of such a heating system.)

The Assistant Counsel, Mr. DeSouza, also requested authority to institute condemnation proceedings to acquire additional parcels of real property which cannot be purchased by negotiation. He submitted a list of such properties, together with the offer that he recommended be made in condemnation for each parcel, as follows:

		Recommended Offer
ROSEBURG-DIXONVILLE SECTION OF THE NORTH UMPQUA HIGHWAY		
13264	Ross C. Lovelace and Alma M. Lovelace	$7,500.00
JOHN DAY RIVER-QUINTON SECTION OF THE COLUMBIA RIVER HIGHWAY		
8943A 10281	Roy Philippi and Myrtle Philippi	2,000.00
TIDEWATER SECTION OF ALSEA HIGHWAY		
12643A	G. P. Hunter and Eliza Hunter	3,000.00
MILWAUKIE-ESTACADA SECTION OF THE CLACKAMAS SECONDARY HIGHWAY		
13972	Bertha Bachman, widow, and George Bachman, son	100.00
COURT STREET-DORIAN STREET SECTION OF THE OLD OREGON TRAIL		
12678	Peter Pinney	5,000.00
ANDERSON VALLEY SECTION OF DIAMOND VALLEY HIGHWAY		
13737A	James D. Dunn	50.00
TROUTDALE SECTION OF THE COLUMBIA RIVER HIGHWAY		
11921	M. Chase	850.00
11920	Wm. C. Spence Estate, Mrs. M. Butler, Administratrix	11,350.00
11952	M. A. Cerruti	3,000.00
11904	George C. Wilson and Russell C. Wilson	2,950.00
11905	R. L. Phillippi Co., Inc.	5,000.00

Following discussion, the Commission approved the request and the offers and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns,

together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Bertha Bachman, et al, which property is located in the south half ($S\frac{1}{2}$) of Section 12, Township 2 South, Range 2 East, W.M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2, and is further identified in the records of the Highway Commission as file R 13972, which property is being acquired for right of way purposes in connection with the Clackamas Secondary State Highway; *

Real property owned by G. P. Hunter and Eliza Hunter, which property is located in Lot 5 (the northeast quarter of the southwest quarter) of Section 28, Township 13 South, Range 10 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4, and is further identified in the records of the Highway Commission as files R 12643 and R 12643B, Parcel No. 3 being acquired for right of way purposes in connection with the Alsea Highway and Parcel No. 4 being acquired for the appropriation, acquisition, and manufacture of roadbuilding materials; *

Real property owned by James E. Dunn, which property is located in the northeast quarter (NE¼) of the northeast quarter (NE¼), the southeast quarter (SE¼) of the northeast quarter (NE¼), the southwest quarter (SW¼) of the northeast quarter (NE¼), the northwest quarter (NW¼) of the southeast quarter (SE¼), and the northeast quarter (NE¼) of the southwest quarter (SW¼) of Section 3, Township 27 South, Range 33 East, W.M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 13737A, which property is being acquired for right of way purposes in connection with the Diamond Valley Highway; *

Real property fee title to which is in Earl Gillanders, which title the State is acquiring by agreement but in which property Peter Pinney has a leasehold interest, which leasehold interest the State is seeking to acquire by agreement, and, if such interest cannot be so acquired, then by condemnation; which property is located in the southeast quarter (SE¼) of the northwest quarter (NW¼)of Section 10, Township 2 North, Range 32 East, W.M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 12678, and which property is being acquired for right of way purposes in connection with the Old Oregon Trail. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the state is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney

General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise, the said above-described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or for the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fifth day of August, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 80, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic

value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Columbia River Highway (State Highway No. 2, U.S. Route No. 30) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the John Day River-Quinton Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Columbia River Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Columbia River Highway known and designated as the John Day River-Quinton Section; *

2. That the said properties described on the attached sheets are owned by Roy Philippi and Myrtle Philippi, and that Parcels Nos. 1 to 7, inclusive, and Parcel No. 9 are needed and the acquisition of the same is necessary for right of way purposes and that Parcel No. 8 is needed and the acquisition of the same is necessary for the purpose of procuring roadbuilding materials therefrom; *

3. That the section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage;

4. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the parcels of real property described on the attached sheets and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission; *

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

6. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission;

7. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise, the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

8. The real properties sought to be acquired are described on the attached sheets, consisting of 5 pages, on which sheets are shown a complete and accurate description of said property; said parcels of real property are otherwise identified as Parcels Nos. 1 to 9, inclusive; *

9. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fifth day of August, 1947

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 81, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for

the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Columbia River Highway (State Highway No. 2, U.S. Route No. 30) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Troutdale-Dodson Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Columbia River Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties hereinafter described are needed and required for use in connection with the construction and maintenance of the section of the Columbia River Highway known and designated as the Troutdale-Dodson Section;

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, all of which are made a part of this resolution; *

3. That all of said real properties are needed and the acquisition of the same is necessary for the specific purposes stated in the description of each ownership;

4. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described hereinafter in this resolution, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission; *

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission;

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners;

9. The real properties sought to be acquired are described on the attached sheets, consisting of 4 pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties said parcels of real property are otherwise identified as Parcels Nos. 1 to 9, inclusive; *

10. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fifth day of August, 1947.

FOOTNOTE:

* The names of the property owners the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 82, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the

safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the North Umpqua Highway in Douglas County, State of Oregon, is a county road which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, said highway is now being improved pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon, and Douglas County; and

WHEREAS, the real property hereinafter described is necessary for right of way purposes in connection with the contemplated and proposed improvement of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the construction and improvement of the North Umpqua Highway in Douglas County, Oregon, to wit:

Parcel No. 1

A parcel of land lying in Lots 13, 15, 16, and 18 of Deer Creek Orchard Tracts, Plat A, in Section 15, Township 27 South, Range 5 West, W.M., Douglas County, Oregon; the said parcel being all that portion of said Lots 13, 15, 16, and 18 included in a strip of land of variable width lying on each side of the center line of the North Umpqua Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 189+70.94 to Station 210+05.18, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 189+70.94, opposite and 40 feet distant from which point the northeasterly line of the said strip of land intersects the north line

of Lot 18, Deer Creek Orchard Tracts, Plat A; said point being 1306.49 feet north and 1054.83 feet east of the southwest corner of D. L. C. No. 47 in Section 15, Township 27 South, Range 5 West, W.M.; thence South 57° 10' West 2034.24 feet to Engineer's Station 210+05.18, opposite and 40 feet from which point the northerly line of said strip of land intersects the south line of said Lot 13 of said Deer Creek Orchard Tracts, Plat A.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
189+70.94	to 200+00	80 feet	40 feet	40 feet
200+00	to 200+75	110 feet	40 feet	70 feet
200+75	to 201+50	120 feet	50 feet	70 feet
201+50	to 202+00	90 feet	50 feet	40 feet
202+00	to 207+00	80 feet	40 feet	40 feet
207+00	to 209+00	90 feet	50 feet	40 feet
209+00	to 210+05.18	80 feet	40 feet	40 feet

The parcel of land to which this description applies contains 4.065 acres, of which 0.192 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 3.873 acres lie outside of the existing right of way.

Parcel No. 2

A parcel of land lying in Lot 12 of Deer Creek Orchard Tracts, Plat A, in Section 15, Township 27 South, Range 5 West, W.M., Douglas County, Oregon, the said parcel being described as follows:

Beginning on the north line of that tract of land conveyed to Kenneth Loban and Harriet Loban by deed recorded in Book 133, Pages 601 and 603, at a point which is 40 feet northerly from (when measured at right angles to) the center line of the relocated North Umpqua Highway at Engineer's Station 214+24; thence South 89° 53' West along the north line of said Loban tract 147.1 feet; thence North 0° 14' West along the east line of a tract of land which Eldon T. Ogle and Elizabeth R. Ogle have contracted to purchase from Elena M. Lovelace 95.5 feet to a line parallel to and 40 feet northerly from said relocated highway center line; thence South 57° 10' East parallel to said center line 186.7 feet to the point of beginning.

The parcel of land to which this description applies contains 0.161 acre.

Parcel No. 3

A parcel of land lying in Lot 11 of Deer Creek Orchard Tracts, Plat A, in Section 23, Township 27 South, Range 5 West, W.M., Douglas County, Oregon, the said parcel being described as follows:

Beginning on the east line of a tract of land which Robert H. Collins and Erma L. Collins have contracted to purchase from Elema M. Lovelace at a point which is 40 feet northerly from (when measured at right angles to) the center line of the relocated North Umpqua Highway at Engineer's Station 216+91.7, said point being 148.1 feet south and 451.8 feet west of the northeast corner of said Lot 11; thence South 57° 10' East parallel to said highway center line 402.2 feet to the north line of a tract of land which James D. Adair and Lucille Adair have contracted to purchase from Elema M. Lovelace; thence North 81° 45' West along the north line of said Adair tract and its extension 192.3 feet to a line parallel to and 40 feet southerly from said highway center line; thence North 57° 10' West parallel to said center line 175.7 feet to the east line of the above mentioned Collins tract; thence North 0° 02' West along said east line 95.2 feet to the point of beginning; containing 0.53 acre.

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commis-

sion, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fifth day of August, 1947.

In this connection the Assistant Counsel, Mr. DeSouza, also brought up for discussion the matter of acquiring right of way for the proposed city-county-state project in Eugene. He advised that options have been secured for a considerable portion of the property, but negotiations are not complete. The Commission deferred action on the options until all have been obtained and it can be determined how much the right of way is going to cost the state. The Commission will then be ready to construct the project if the arrangements are reasonable and satisfactory.

The Assistant Counsel, Mr. DeSouza, reported on costs to acquire right of way and to move buildings on East Second Street, Roseburg, route of the North Umpqua County Road, particularly as to property lying within the city limits. He advised that the city is willing to purchase the right of way but wants the state to remove the buildings therefrom, which is estimated to cost about $18,000. The Commission deferred a decision in the matter pending discussion with a delegation from Roseburg which will be present on the following day. (The matter was discussed at considerable length with the Roseburg delegation, during which City Councilman Percy Croft inquired whether or not the Highway Commission would consider cooperating with the city on a 50-50 basis. The Commission referred the matter to the Engineer and the Chief Counsel to discuss it with the city on that basis.)

The matter of permitting Mr. V. T. Brockman to maintain a building partially located on the right of way of the Oregon Coast Highway in the town of Gardiner was discussed by the Commission. The Assistant Counsel, Mr. DeSouza, explained details, advising that the building was constructed in its present location in 1913, but since then the highway has been widened and it now encroaches somewhat on the state's property and will have to be cut off unless the Highway Commission is willing to allow the encroachment. He estimated that it would cost about $500 to remodel the building, which expense, he said, Mr. Brockman is financially unable to assume. He suggested that the Highway Commission might assume 50 percent of the cost. The Commission approved the suggestion by unanimous vote on the condition that the state's share shall not exceed $300.

The Commission had under discussion approval of an agreement with the Oregon Washington Railroad and Navigation Company for an easement to occupy a small portion of state highway right of way along the Old Oregon Trail near Weatherby, Baker County. The Assistant Counsel, Mr. George Neuner, ex-

plained that the railroad company is improving its facilities at this place, which includes construction of a channel change in the Burnt River so as to avoid two railroad bridges, but which necessitates encroachment on the state's property for a short distance. He advised that the matter has been investigated by engineers of the Highway Department who are of the opinion that the encroachment will not result adversely to the state highway; moreover, that the form of agreement as prepared will protect the state's interests. The Engineer advised that the agreement provides that the railroad company will be liable for anything they do on the property. He recommended that a permanent lease be given to the railroad company for the use of this property without cost. The Commission approved the recommendation unanimously on the condition that the state is held harmless and that the railroad company will assume liability and responsibility for any acts that may occur on the property. The agreement covering the matter was executed by the Commission on the following day.

A request was presented from Mr. John T. Ballard, Florence, inquiring as to the possibility of acquiring a state-owned quarry containing 8.92 acres abutting property which he recently purchased on the Cape Mountain Road near the town of Florence. It appears that Mr. Ballard is of the understanding that this is an abandoned quarry and probably will not be used by the state again for quarry purposes, and because of its proximity in relation to his other property, he would like to acquire it. The Engineer advised that, while this quarry has not been used for a number of years, investigation reveals that it will be used many times in the future, so it is his recommendation that it not be sold to Mr. Ballard. The Commission approved the recommendation.

The Chief Counsel brought up for discussion the request of a Mr. D. D. Martin, Warren, Oregon, filed through his attorney, Mr. John L. Foote, St. Helens, to lease a portion of state-owned property lying between the old and new Columbia River Highways in front of the post office at Warren. It appears that Mr. Martin wishes to construct a portable building with the idea of maintaining a modern drive-in market on the property, the building to be an attractive structure and to be placed in a location which meets with the approval of the State Highway Commission. It appears, also, that there is no regular store at Warren at the present time, and if Mr. Martin is allowed to operate this business, it will be an accommodation to the local residents. The Engineer advised that this is not a new matter and that similar requests have been denied on several occasions in the past. The Assistant Counsel, Mr. DeSousa, stated that, according to Construction Engineer H. G. Smith, the property is needed for proposed future improvement of the highway and should not be sold or leased; also, that Mr. W. C. Williams, First Assistant State Highway Engineer, recommends against leasing the property. In view of this report the Commission decided unanimously to deny the request.

The Engineer brought up for discussion a request from Mr. M. E. Karpow, Portland, to purchase a portion of the right of way of the Columbia River Highway (old route) south of Logie Trail, particularly between Highway Engineer's Station 265+50 and 270+50. He advised that this matter has been investigated by Mr. W. C. Williams, First Assistant State Highway Engineer,

who recommends abandonment of that portion of the old route at this location insofar as it lies outside of a right of way width of 50 feet on the westerly side of the highway center line because the old highway is not used, is badly overgrown with brush and weeds, and serves mainly as a dump ground for rubbish, and for the further reason that it is of no value as a stockpile or storage site. The Engineer advised that he concurs in this recommendation subject to the condition, however, that access to the highway be allowed only at Station 270+50 and at Station 265+50, or as such access now exists. The Commission approved the recommendation by unanimous vote and instructed the Chief Counsel to prepare the necessary papers to effect such abandonment.

The Chief Counsel brought up for discussion a protest filed by citizens of Coos Bay against the vacation of any part of Edward Street in the Bunker Hill Addition to this city, as has been requested by Messrs. Clair E. Terry and William Ring. He advised that a delegation is scheduled to appear before the Commission on the following day regarding this matter. The Commission deferred a decision pending discussion of the matter with the delegation.

The Chief Counsel also reported on the matter of the application of the state retirement law to certain Highway Department employees. (See letter from Chief Counsel to members of the State Highway Commission, dated August 20, 1947, in general files, for details.) He recommended retention of the services of certain employees who are subject to retirement on December 31, 1947, until such time as other persons can be trained to replace them. The Commission deferred action on this matter until later in the session.

The Chief Counsel reported on developments in connection with negotiations for acquisition of seven miles of ocean frontage in Curry County, which acquisition is being considered for state park purposes. The Commission considered the time was not propitious to discuss this matter and ordered it deleted from future agenda for the time being.

The Engineer reported on the cost to stabilize Roosevelt Drive in the City of Seaside as a log-hauling route, as previously requested by a delegation from that city. He advised that investigation reveals that the present pavement on this street is very uneven and is too weak to stand up under the continued pounding of logging trucks, without considerable resurfacing. He estimated the cost to provide a proper improvement at approximately $35,750. He recommended against the improvement. The Commission approved the recommendation unanimously.

The Engineer also reported the results of investigation of a complaint filed by Mr. Elmer Bankus concerning roadside maintenance on the Oregon Coast Highway near Brookings, Curry County. He recalled that the investigation was conducted to determine whether or not the area should be retained for state highway purposes or should be deeded back to Mr. Bankus, and if it were to be retained by the state, what would be required to place it in satisfactory condition. The Parks Superintendent, he said, recommends retention of the property and that some work be done on it to improve its appearance, such as removing some of the tree growth, doing certain grading

work and planting new shrubs, all of which would cost about $1,735 if the Commission feels inclined to accept the offer of Mr. Bankus to furnish equipment necessary to reslope the cut banks and to make some of the proposed fills As an alternate proposition, he suggested the renting of Mr. Bankus' equipment on a daily or hourly basis. On the other hand, if state equipment were used, the work will cost approximately $2,335 because it would then be necessary to send in special highway equipment for the job. Mr. Mark Astrup, Landscape Engineer, pointed out that the area would never be used by the public for picnic purposes but suggested that the improvement be authorized from the aesthetic standpoint. The matter was discussed at considerable length, during which Chairman Banfield expressed the opinion that if the responsibility for cleaning up the premises belongs to the state, then the state should do the work. Commissioners Schaupp and Chandler expressed themselves similarly. It appearing from the reports that such responsibility is the state's and that it would be desirable to retain the property in the name of the state, the Commission by unanimous vote authorized the Engineer to proceed with the work; however, it was with the understanding that Mr. Bankus' equipment is not to be used in connection with the operation unless it is paid for at the customary rates.

The Engineer reported that plans for the following roadside improvement projects are complete, and he requested authority to proceed with the work:

Name of Project	
Ashland Traffic Circle	$ 2,000.00
Grants Pass-Redwood Hwy. Intersection US99	3,000.00
Reedsport Wye US101	1,500.00
Monmouth-Camp Adair Section US99W	2,000.00
Medford-Camp White Section, Crater Lake Hwy.	1,700.00
Halsey-Harrisburg Section US99E	450.00
TOTAL	$10,650.00

He advised that all of these projects involve the planting of native species of trees and shrubs to complete the improvement of construction projects that are now underway or previously have been completed; further, that none of the plantings will in any way impair the sight distance of highway users, and all will greatly improve the appearance of the highway right of way in these urban locations. He recommended approval of the request at this time so that the work can go forward as soon as weather conditions are right this fall. The Commission approved the recommendation unanimously and ordered that the work be done as minor betterment projects.

The Commission discussed a letter from the Southern Pacific Company concerning the need to install an additional flood light at the Wilson River Highway grade crossing of the Southern Pacific Company's tracks at the east city limits of Tillamook. The Engineer advised that in 1941 the Southern Pacific Company installed two such lights at this crossing on the basis that

the Company paid the entire expense of the installation and the State Highway Department maintained the lights and paid for the electrical energy to operate them. The Company now feels that the additional light is a necessity and is willing to install it on the same basis; moreover, a recent report by the Public Utilities Commissioner, indicates that the additional light is necessary to properly protect the public at this crossing. He recommended approval of the railroad company's request on the same basis as the prior installation --- that the installation cost be paid by the railroad company and that the state pay the cost of maintenance and for the current, which he estimated would cost about $72 a year. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed by the Commission on the following day.)

The Commission also discussed a request from the Southern Pacific Company for the installation of two flood lights at the grade crossing of the railroad and Cascade Secondary Highway No. 160 near the town of Liberal, Clackamas County. The Engineer recalled that the Commission, at its meeting on March 24, 1947, approved the installation of two flood lights at this crossing on the basis of the railroad company and the state paying for the installation and subsequent maintenance and operation on a 50-50 basis; however, an agreement covering the matter was never executed. He recommended confirmation of the original arrangement and execution of the agreement as prepared by the Southern Pacific Company on such basis. The Commission approved the recommendation. (The agreement was signed by the Commission on the following day.)

The Commission had under discussion reports from the Engineer and the Chief Counsel regarding the application of the State Retirement Law as it affects employees of the State Highway Department. (For details of these reports see the Chief Counsel's letter directed to members of the State Highway Commission, dated August 20, 1947, the Engineer's letter directed to the Oregon State Highway Commission, dated August 21, 1947, and a letter from the State Parks Superintendent directed to Mr. T. H. Banfield, Chairman, Oregon State Highway Commission, dated August 21, 1947, in general files.) The question before the Commission was whether or not to request the Retirement Board to extend the period of employment for certain employees who are subject to retirement on December 31, 1947.

The Chief Counsel recommended that the following employees in his department be retained in their present capacities for a period of one year starting January 1, 1948, so as to give sufficient time to break in new men to take their places: Clifford L. Gardiner, Mark D. McCallister, W. S. McChesney, Right of Way Agents; A. B. Kneass, Real Estate Supervisor; and W. J. Minkiewitz, Clerk.

The Engineer recommended the retention of the following employees under his supervision who are subject to retirement on January 1, 1948: Orrin A. Chase, Assistant Staff Engineer (supervising bridge design); Frederick D. Eason, Division Engineer; Lambertus F. Heuperman, Engineer Designer (specialized draftsman); Frank G. Hutchinson, Engineer Designer

(artist-designer); Hollis W. Libby, Assistant Staff Engineer (supervision and location); Carl P. Richards, Engineer Specialist (specialty - research work); E. A. Skelley, Assistant Staff Engineer (chief draftsman); and C. C. Seeley, Resident Engineer. The Parks Superintendent recommended retention of Mr. W. A. Langville, Park Historian.

As a result of discussion, the Commission voted unanimously to retain the above-mentioned employees for a period of one year after December 31, 1947, subject to approval by the State Retirement Board.

The Commission recessed for luncheon at 12 o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

At 2:00 p.m. bids, as follows, for highway construction were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 10:00 a.m. on the following day:

OCHOCO HIGHWAY IN CROOK COUNTY
CONSTRUCT BRIDGE OVER CROOKED RIVER

Lindstrom Bros., Portland	$ 50,360.00

The Chief Counsel brought up for discussion a resolution adopted by the Baker County Chamber of Commerce regarding the application filed by the Idaho Power Company with the Federal Power Commission for permission to conduct preliminary investigations incident to the construction of a power dam across the Snake River at a location commonly known as the Oxbow Damsite. He read aloud letters from the Idaho Power Company and the Baker County Chamber of Commerce on the subject and his replies thereto. The matter was discussed at some length, during which the Commission declared that in filing its objections with the Federal Power Commission it did so, not with the intention of blocking the development proposed by the Idaho Power Company, but only to protect the state's interests in the state highway which would be inundated were the dam across the Snake River at this place actually constructed. In view of this declaration the Commission decided not to retract in any degree from statements contained in its communication to the Federal Power Commission objecting to the application of the Idaho Power Company. (This matter was discussed further on the following day when representatives of the Baker County Chamber of Commerce were present. See ahead for details.)

Mr. Malcolm Hawke, Chief Accountant, State Highway Department, was present at the Commission's request for discussion of matters pertaining to the appointment of a Chief Auditor for the State Highway Department as authorized by the provisions of Chapter 359, Oregon Laws, 1947. Chairman Banfield explained the purpose of the conference and requested Mr. Hawke's ideas for setting up an Auditing Department absolutely separate and distinct from the Engineering Department, and answerable only to the Highway Commission. As the result of considerable discussion, Mr. Hawke was instructed to submit a written report to the members of the Highway Commission, prior to its next regular meeting, if possible, outlining his ideas with respect to setting up a department in conformity with the Commission's ideas. This report is to be made in detail and is to show how Mr. Hawke would keep a record of the Highway Department finances and accounts as the "last word" in accounting.

The Engineer brought up for discussion the matter of expenditure of $250,000 of State Tax Street Funds which the 1947 Legislature, under provisions of Section 3, Chapter 425, Oregon Laws, 1947, withdrew from the general appropriation for expenditure by the State Highway Commission on streets in cities and towns which are not a part of the State Highway System but are receiving excessive wear through a sudden increase in population in the area or heavy and unusual industrial traffic. (For details of the Engineer's presentation see his letter dated August 21, 1947, directed to the Oregon State Highway Commission, in general files.) The Engineer suggested that the money should be spent for small jobs to be undertaken by state paving crews or by special maintenance crews and that the cities should be requested to file with the Commission, not later than December 1, 1947, a list of the projects that they would like to have included in the program, which would give sufficient time for each project to be investigated before the beginning of the 1948 construction season, the idea being that if they were approved by the Commission, then they could be included in the working schedule of the several crews; further, that a full report be rendered to the Commission in February of 1948, and the Commission at that time could issue its instructions. Chairman Banfield suggested that the Commission should be advised first what the statute really means and what the obligations of the State Highway Commission are in administering the act; further, that the Commission should set up a system of requirements and qualifications as a measuring stick so that if requests submitted do not meet those requirements they need not be submitted to the Highway Commission for consideration. He added that the Commission does not wish to hear delegations concerning any project which is not qualified and which will not be approved. It was his thought that the Chief Counsel and the Engineer should get together and work up a set of requirements for the Commission's approval. Commissioners Schaupp and Chandler concurred, and it was so ordered. The Engineer and the Chief Counsel were instructed to report their recommendations at the next regular meeting of the Commission. A decision with respect to expenditure of the fund was deferred until that time.

The Engineer reported on the matter of purchasing additional hull and machinery insurance on the ferries "Tourist No. II" and "Tourist No. III" which operate across the Columbia River between Astoria, Oregon, and Megler, Washington. He recalled that the Commission, at its meeting on July 21 and 22, 1947, authorized the purchase of such additional insurance and, acting under that authority, he has secured endorsements to the existing insurance policies as follows:

Tourist No. 2

Valuation increased from $50,000 to $80,000 Insurance rate reduced from 4.8125 to 4.583 Resulting additional premium - - - - - - -	$ 935.67

Tourist No. 3

Valuation increased from $80,000 to $120,000
Insurance rate reduced from 4.8125 to 4.583
Resulting additional premium - - - - - - - - - $1,224.83

Total additional premium $2,160.50

Total valuation - $200,000

The Commission by unanimous vote approved the purchase of such additional insurance.

The Commission discussed a report from the Engineer on the improvement of Esplanade Street, in Klamath Falls, involving a short section which passes over the existing USRS Canal and under the tracks of the Southern Pacific Company (see Engineer's written report dated August 21, 1947, directed to the Oregon State Highway Commission, in general files, for details). The Engineer advised that the design for this improvement necessitates construction of an eight percent grade, and, in order to eliminate the danger of frost and ice on such a steep grade, it is proposed to install heating pipes two inches under the surface of the concrete pavement. To reduce this grade to five percent, he said, would result in additional costs of about $119,000 for construction and property damage and would necessitate the introduction of a 6.7 percent grade on another section of this street, so that to a certain extent the same ice hazard would exist. The cost of installing the heating system, he said, is estimated at about $15,000. He recommended approval of the design which includes the heating system. Commissioner Schaupp stated that when this matter was first discussed at the previous meeting he was not fully informed as to the details, but since then he has ascertained such details and has given the matter considerable study and now is of the opinion that the design is satisfactory and will serve the purpose intended. He recommended approval of the design. The Commission approved the recommendation by unanimous vote.

Pursuant to instructions given by the Commission at the previous meeting, the Engineer submitted individual reports on ten rural footpath projects, totaling $38,700, as follows (For details of these reports see copy of the Engineer's letter to the Oregon State Highway Commission dated August 21, 1947, in general files; the reports for each project are attached to this letter.):

	Highway	Mile Posts	Location	Length	Side of Highway	Cost
	Division I					
1	Sunset	close several gaps	Sylvan-West Slope	.5	West	$1200

				Total all Divisions.			$3870C

In the discussion of the several projects, Chairman Banfield expressed his opinion that no footpath projects should be recommended to the Commission unless the improvements are necessary in order to eliminate safety hazards, and the most important thing to be considered is the safety of the school children. Each of the above-mentioned projects was discussed from that standpoint, and as a result thereof, the Commission by unanimous vote authorized the Engineer to proceed with the construction of each of the ten projects.

In this connection the Commission also discussed resolutions from the Agate Beach Community Club and from the City of Newport requesting that provision be made in the contract for the construction of the Oregon Coast Highway between Newport and Agate Beach for a sidewalk to take care of the pedestrian traffic. The question arose whether or not such sidewalk construction is necessary and justified, it being the thought of the Commission that if a sidewalk were approved for this location, it would establish a precedent, and the Commission would then be more or less obligated to approve other requests in the same category, and similar provisions would have to be made in all future projects. The Engineer advised that this section of high-

way is about 1.7 mile in length and that to construct a sidewalk along the section would cost about $2,600. He pointed out that it is a requirement of the Public Roads Administration that sidewalks be constructed in connection with projects near cities and towns where there is considerable pedestrian traffic. Mr. T. M. Davis, District Engineer of the Public Roads Administration, who was present, confirmed this statement. He added, however, that footpaths are required only in congested districts and that they may be of either gravel or bituminous type; also, that the Public Roads Administration is not in favor of constructing concrete sidewalks. Commissioner Chandler advised that the Commission's primary object is to provide safety for school children. Chairman Banfield confirmed this statement and added that if construction of a sidewalk along this section is only a matter of convenience, then it had better wait until there is more justification for it. The matter was discussed further, but the Commission reached no definite decision with respect thereto, however, authorized and instructed the Engineer to include in the plans for the Newport-Agate Beach Project an alternate item for sidewalk construction, the idea being to accept the proposal containing the sidewalk item if the bid for this item is not unreasonable; however, if construction of the sidewalk as revealed by the bids, is too costly, the Commission will select the other alternate.

The Commission discussed a report from the Engineer on the request of the log-hauling industry that the rules recently adopted by the Commission prohibiting log hauling during certain periods be modified so as to permit such hauling during certain hours of darkness (see Engineer's letter directed to the Oregon State Highway Commission dated August 21, 1947, in general files, for details). The Engineer advised that a delegation is to appear before the Commission on the following day regarding this matter, but pending discussion with this group, he would recommend as follows:

(1) That the regulations continue to prohibit the hauling of logs on Saturday afternoons, Sundays, and holidays legal in the State of Oregon.

(2) That the hauling of logs during the months of May, June, July, and August be permitted between the hours of 4:00 a.m. and 8:00 p.m., Pacific Standard Time. He explained that this early hour during the summer months is to allow the logging operations to continue from approximately 4:00 a.m. to 11:30 a.m., when ordered to discontinue by the State Forester because of fire hazards.

(3) That during the balance of the year the hauling of logs be permitted between the hours of 6:00 a.m. and 8:00 p.m., Pacific Standard Time.

(4) That all equipment operating on state highways during hours of darkness conform to the statutes and P.U.C. regulations as to lighting of equipment.

The Commission deferred action on the matter pending results of the conference on the following day with the log-hauling group (see ahead for additional item).

The Commission discussed the matter of providing additional office space for the State Highway Department in Salem, and in this connection the Engineer presented the following information: (1) An airplane photograph showing the Capitol group (2) Original plan provided by the Capitol Building Commission for the group of buildings (3) Copy of the zone ordinance of the City of Salem (4) Tentative floor plan of the proposed office building (5) Drawing showing a portion of the area included in the state building group and particularly the area bounded by Capitol Street on the east, Summer Street on the west, Chemeketa Street on the South, and Center Street on the north, which he considered the best location for the State Highway Department's building.

This matter was discussed by the Commission at considerable length, but action thereon was deferred pending a conference with the members of the State Board of Control. The Chief Counsel advised that the only open dates which the Board of Control has in the near future are on the afternoon of Tuesday, September 2, and any time during Thursday, September 4. He was instructed by the Commission to arrange for a meeting with the Board at 10:00 a.m. on Thursday, September 4. The Chief Counsel was also instructed to secure an appraisal of the property being considered as a site for the Highway Department building, and the Engineer was instructed to advise the Commission as to the financing of the structure, including an estimate on the interest rate that would have to be paid for borrowed money and the number of years it would take to amortize the cost at reasonable rental rates. The Secretary was instructed to have available at the meeting with the Board of Control all material that will be needed iin the discussion of the matter.

The Engineer then brought up for discussion the question of what the State Highway Department is to do for office space pending construction of the new office building. He read aloud his report to the State Highway Commission dated August 21, 1947 (see detailed report in general files), in which he recommends the construction of a concrete sign building as affording the best and most practical solution of the problem. He estimated the cost of such a building at $73,000 and in support of his recommendation advised that the Sign Department is now scattered about in five different buildings, none of which are fire proof, so it constitutes a definite fire hazard, inasmuch as the operation of the Sign Department involves use of considerable paint. Fire proof quarters, he said, should be provided for this Department, and a start on such an installation could be made by building a reinforced one-story concrete building which could be used for office space until such time as a new office building is completed in the Capitol group. He exhibited a floor plan and cross section of such a building as he has in mind. The Commission deferred definite action in the matter pending its conference with the members of the Board of Control.

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
August 26, 1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the same persons present and participating.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contract would be made at 3:00 p.m. in the same room:

CLACKAMAS SECONDARY HIGHWAY IN CLACKAMAS COUNTY
CONSTRUCT 182-FT. CONCRETE BRIDGE OVER ROCK CREEK

Lindstrom Bros., Portland	$ 43,910.00
Johnson-Sterner Corp., Portland	45,000.00

DIAMOND VALLEY SECONDARY HIGHWAY IN HARNEY COUNTY
CRANE-PRINCETON SECTION

E. C. Hall Co., Portland	$189,914.00
Rogers Constr. Co., Portland	204,701.00

DIAMOND VALLEY SECONDARY HIGHWAY IN HARNEY COUNTY
ANDERSON VALLEY AND SWAMP CREEK SECTIONS

George E. Corliss, Ontario	$ 29,899.50
Loran Petro, Vancouver, Wn.	30,771.20
E. C. Hall Co., Portland *	35,166.00
Rogers Constr. Co., Portland *	36,005.00

* Bidder will not accept this project alone.

COUNTY ROAD NEAR CENTRAL POINT IN JACKSON COUNTY
CONSTRUCT 354-FT. CONCRETE BRIDGE OVER BEAR CREEK

Perkin Bros., Portland	$ 70,470.00
Sleeper & Keyes, Bend	71,710.00
McNutt Bros., Eugene	74,240.00

THE DALLES-CALIFORNIA HIGHWAY IN JEFFERSON COUNTY
54-FT. RIGID FRAME CONCRETE BRIDGE OVER USRS NORTH UNIT MAIN CANAL

George E. Berry, Beaverton	$ 24,900.00
Del R. Beebe Constr. Co., Eugene	27,875.00
Denton Constr. Co., Portland	29,150.00

WARM SPRINGS HIGHWAY IN JEFFERSON AND WASCO COUNTIES
FOREST BOUNDARY-AGENCY SECTION

Rogers Constr. Co., Portland	$556,415.50
E. C. Hall Co., Portland	629,239.00
McNutt Bros., Eugene	637,599.00

BONANZA-MALIN COUNTY ROAD IN KLAMATH COUNTY
BONANZA-POE VALLEY-MALIN SECTION

Rogers Constr. Co., Portland	$183,603.00
E. C. Hall Co., Portland	207,814.00
A. H. Saxton & Sons, Corvallis	210,987.00
Del R. Beebe Co., Eugene	217,504.00
Homer G. Johnson, Portland	242,283.00

WILLAMETTE HIGHWAY IN LANE COUNTY
PLEASANT HILL - LOST CREEK SECTION

	USING ASPHALT	USING TAR
R. A. Heintz-Constr., Portland	$327,366.25	- - - - -
Leonard & Slate Oreg. Ltd., Portland	351,000.00	- - - - -

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
CONSTRUCT 48-FT. CONCRETE BRIDGE OVER OWENTA CREEK

Erick Enquist, Troutdale	$ 22,985.00
Chas. R. Schmiedeskamp, Portland	27,625.00
E. C. Hall Co., Portland	33,410.00

WARM SPRINGS HIGHWAY IN WASCO COUNTY
CONSTRUCT BRIDGE OVER MILL CREEK

C. J. Montag & Sons, Portland	$394,860.00

COUNTY ROAD NO. 266 IN WASHINGTON COUNTY
CONSTRUCT "ROOD" BRIDGE OVER TUALATIN RIVER

J. F. Johnston, Aurora	$ 67,542.00
R. H. Jones, Hillsboro	76,932.00
Walder & Kenworthy, Portland	79,512.00
C. J. Eldon, Portland	79,625.00
E. C. Hall Co., Portland	103,070.00
Morrison-Knudsen Co., Portland	115,426.00
Guy F. Atkinson Co., Portland	133,133.00

26 1 47

SALMON RIVER AND PACIFIC WEST HIGHWAYS IN YAMHILL COUNTY
PRINGLE CORNER-McMINNVILLE SECTION

	USING ASPHALT	USING TAR
Leonard & Slate Oreg. Ltd., O. C. Yocom Co., and J. C. Compton Co., McMinnville	$482,917.30	- - - - -
R. A. Heintz Constr., Portland	520,395.50	- - - - -
Porter W. Yett, Portland	580,253.60	- - - - -

At 10:00 a.m. Chairman Banfield announced the awards of contracts for which bids were received by the Commission at 2:00 p.m. on the previous day, the awards having previously been approved by the Commission by unanimous vote, as follows:

"Construction of a bridge over Crooked River on the Ochoco Highway at Prineville, Crook County. The Commission received only one bid for this work being that of Lindstrom Bros., Portland, at $50,360. The bid has been rejected.

"Grading and bituminous macadam widening on the Gardiner Section of the Oregon Coast Highway, in Douglas County. The Commission received no bids for this project.

"Repairing pier fenders on the Umpqua River Bridge on the Oregon Coast Highway at Reedsport, Douglas County. The Commission received one bid for this project, being that of Tom Lillebo, Reedsport, at $5,049. The contract has been awarded to Mr. Lillebo at his bid price.

"Grading and bituminous macadam surfacing on the Juniper Butte-Crooked River Section of The Dalles-California Highway, in Jefferson County. M. L. and C. R. O'Neil, Eugene, submitted the low bid for this work in the amount of $267,196.50. T. W. Thomas, Portland, was the next low bidder at $268,980. There were eight higher bidders. The Commission has deferred the award of this contract and has referred the bids to the Engineer with authority to award the contract to the low bidder, M. L. & C. R. O'Neil, at their bid price, when certain conditions have been satisfied.

"Rock surfacing the Globe-Elmira Section of the Richardson-Eugene Secondary Highway, in Lane County. McNutt Bros., Eugene, submitted the low bid for this work at $109,970. The next low bidder was D. F. McKenzie, Salem, at $113,350. There were three higher bidders. The Commission has awarded this contract to the low bidder, McNutt Bros., at their bid price.

"Grading and bituminous macadam widening on the Waldport Section of the Oregon Coast Highway, in Lincoln County. D. F. McKenzie, Salem, submitted the low bid in the amount of $41,645, based on the use of asphalt. Denton Construction Co., Portland, submitted the next low bid in the amount of $47,830, based on the use of asphalt. Jack Robinson, Waldport, submitted the only other bid in the amount of $51,525.35, using asphalt. None of these contractors submitted a bid based on the use of tar. The Commission has awarded this contract to the low bidder, D. F. McKenzie, at his bid price."

A delegation from Sheridan, including Mr. Leland R. Sackett, City Councilman; and Mr. R. I. Merrifield, Chairman of the Roads and Highways Committee of the Sheridan Chamber of Commerce, was present and asked the Commission to authorize the widening of Main Street in their town, route of the Salmon River Highway, from Bridge Street to the east city limits, being a continuation of widening work completed several years ago west of Bridge Street. They alleged that they were given to understand, when the former work was accomplished in 1941, that the state would construct a similar improvement east of Bridge Street later on; however, that has not been done, and the traffic situation at the present time is such that a bottleneck is created by reason of the narrowing of the street at Bridge Street. They presented a resolution from the Sheridan City Council urging such improvement as a temporary expedient to take care of present travel conditions and suggesting, also, if this does not correct the situation, that Main Street be declared and designated a one-way street for eastbound highway travel and that westbound highway travel be routed over Yamhill Street, which is one block north of Main Street, and that this street also be designated a one-way street. The Engineer estimated the cost of the proposed widening work on Main Street between Bridge Street and the east city limits at $55,000. The Commission deferred a decision in this matter pending a report and recommendation from the Engineer which was ordered for the next regular meeting of the Commission. The Secretary was instructed to check the records and ascertain whether or not the former Highway Commission made any commitment relative to the widening work now requested.

The following persons representing the City Council of the City of Scappoose were present and urged the Commission to improve the Columbia River Highway through their town: Cecil Johnson, Mayor, E. Dering, City Councilman; and J. G. Watts, City Recorder. Mayor Johnson was principal spokesman. He advised that the town of Scappoose is growing and developing, and their parking problem has become difficult because of the increase in highway traffic and the narrowness of the highway through their business district. He urged the Commission to widen the highway northerly from the curve in front of the church near the south city limits so as to provide sufficient passageway for the large volume of traffic which uses this street, to avoid confusion, and to eliminate the present traffic hazard. He said that the city already has adopted ordinances providing for parallel parking of automobiles on both sides of the street. The Engineer advised that in 1937 a plan was prepared to construct two lanes of pavement each 30 feet wide with a 17-foot parkway in between, but the work was never done. The estimated cost at that time, he said, was about $28,000, but the present-day estimate is about $40,000.

He recommended the improvement as a desirable project when money is available to finance it. The Commission took the matter under advisement and referred it to the Engineer for a report and recommendation whether or not it might be possible to do this work as a minor betterment project in 1948. The delegation was informed that the Commission is not promising the improvement but is only getting a report to ascertain the possibility of doing the work.

A delegation from Bend, representing the Central Oregon and Bend Chambers of Commerce, appeared before the Commission in regard to the completion of the Warm Springs Highway. The delegation was headed by Hon. William Niskanen, State Representative and Chairman of the Roads Committee of the Central Oregon Chamber of Commerce, and included Messrs. Howard W. Turner, Madras, President; Guy Wade, Madras, Secretary; and Howard Steib, Bend, Manager of the Bend Chamber of Commerce. Mr. Niskanen expressed approval of the Commission's action in advertising the bids for the completion of this highway outside of the forest boundary and urged continued advertising for bids for the construction of the Mill Creek Bridge. He also urged the Commission to see what can be done to expedite the construction of the seven-mile section within the forest boundary heretofore scheduled for improvement as a Forest Highway Project. He expressed the hope that the entire highway could be completed in 1948. He was informed by Chairman Banfield that it is not likely the work can be completed until 1949 because the contractors are having difficulty securing materials and manpower, and in some cases weather conditions are not favorable for construction operations. The Highway Commission, he said, has gone on record to complete this project as rapidly as possible. He pointed out that, insofar as the Mill Creek Bridge is concerned, that project has been advertised for bids on two occasions, but this is a steel bridge, and the contract could not be awarded because of unavailability of that material. The Highway Commission, he added, recognizes that this highway is essential and is doing everything it can to expedite construction of it. He explained action previously taken by the Commission transferring funds from the Postwar Project on the Ochoco Highway to the Warm Springs Project in order to advance the work on the latter and to assure that the grading work on the Forest Highway Section will be completed at the earliest possible time.

Mr. Niskanen inquired as to the plans of the Commission to get traffic across Mill Creek after the road on each side has been completed if no provision has been made for the bridge at this point -- would the Commission construct a detour for temporary use. He was informed by Chairman Banfield that the Commission is not in position to advise him with regard thereto at the present time; however, the bridge project will be re-advertised as soon as the Commission feels that the time is propitious, which may be within the next three or four months. This concluded the discussion.

Mr. Frank L. Calise, Executive Secretary, Vale Chamber of Commerce, was present and inquired as to the plans of the Highway Commission for the expenditure of the $250,000 of State Tax Street Funds which the Highway Commission is to spend for the improvement of city streets that are not on state highway routes, as authorized by the 1947 Legislature. He was informed that this matter is being studied by the Commission with the idea of constructing such projects during 1948 and that the Engineer is now receiving requests from the various communities so that a program can be arranged.

Mr. Calise inquired as to the plan for the construction of the Dads Creek-Dixie Mountain Section of the John Day Highway, for which, he said, the sum of $125,000 of Forest Highway Funds has been provided. He was informed by the Chairman that there are no Forest Highway Funds available because the appropriation made by Congress was far below that which was needed for such purposes, so the Commission is not in position to give him an answer.

Mr. Calise also inquired whether or not the Highway Commission would authorize the City of Vale to maintain a sign on the highway right of way at the junction of the John Day and Central Oregon Highways, in Vale, advertising the Central Oregon Highway (US20) as the shortest and fastest route from Vale to Portland. He exhibited a sketch of the sign that he has in mind which includes, among other cities, the names of Portland, Eugene, and Klamath Falls. He was informed by Chairman Banfield that this sign is not in conformity with the legal requirements and could not be approved by the Highway Commission; moreover, the State Highway Commission is designated by law as the official agency to maintain directional and mileage signs along state highway routes. Mr. Calise then asked if additional names can be placed on the Highway Department's present sign at this location. He was informed by the Engineer that experience reveals that a large number of names on such signs makes for confusion, so the names have been limited to three; however, if Mr. Calise would make his request in writing, it would be given due consideration.

Mr. Thomas Smithson, Engineer for the Wolf Creek Water District, Portland, was present and renewed a previous request of the district for permission to construct a million gallon reservoir on state-owned property at the junction of the Sunset Highway and Barnes Road for servicing homes in the Cedar Hills development area and others in this vicinity. He presented a written application of the District in support of his oral request (for details see typewritten application directed to the Oregon State Highway Commission and dated August 6, 1947, in general files). Chairman Banfield advised that he personally is opposed to the use of state property, or that of any other governmental agency, for private purposes because such use would eventually, if not immediately, result in handicapping the use of the property for state or governmental purposes. He pointed out that the State Highway Department paid a large sum of money for the property under discussion and, in his estimation, it would be contrary to the state's interests to permit its use for the purpose intended. He mentioned that the Commission at the previous meeting denied the request, and, insofar as he personally knows, there is no reason to change the decision at this time. Commissioner Schaupp requested additional time for the Commission to discuss the matter among themselves before making a definite decision. This was agreeable to Chairman Banfield and Commissioner Chandler, and it was so ordered. (The matter was reconsidered later in the session when the Chief Counsel pointed out that the reservoir has no connection whatsoever with the highway development or with highway use and, in his estimation, it would be unwise to permit it on the state's property, particularly in view of the fact that the area on which it is to be placed was acquired by the Commission at considerable cost under condemnation proceedings. Chairman Banfield stated that he personally would

like to help the District in the matter but not to the extent that they are asking. The Commission thereupon voted unanimously to deny the request.)

The County Court of Lane County, represented by County Judge Clinton W. Hurd, County Commissioner W. J. Holland, and County Engineer P. M. Morse, came before the Commission at this time regarding the relocation of a section of the Jasper-Lowell Market Road so as to avoid a grade crossing of the Southern Pacific railroad near Jasper, as is proposed by the U.S. Army Engineers in connection with the construction of the Meridian Dam. Mr. Morse headed the group. He explained that, according to the plans of the Army Engineers for construction of what is known as Lookout Point Dam on the Meridian Site, the Southern Pacific railroad will have to be realigned so as to avoid being inundated by backwater from the dam, which relocation will result in reconstruction of the railroad at grade across their county road, which is objectionable from the county's standpoint because it will introduce an undesirable hazard to county-road traffic. He suggested that the grade crossing could be avoided if the county road were likewise relocated for a distance of about one mile and exhibited a map showing the plans for such a revision. He asked the Commission to assume the responsibility for the road by taking it over as a state secondary highway, to conduct investigations for the rerouting of the road to avoid the railroad grade crossing, and to intercede in the county's behalf when the matter comes up for a hearing before the Public Utilities Commissioner. He said that the county is not asking the state to take over this road now because the dam has not been constructed and a revision will not have to be made for three or four years.

Chairman Banfield explained that, inasmuch as this is a county road, the state's only interest in it is in designating it as a state secondary highway, but the Commission is not in position to do that at the present time because there are other roads throughout the state which the Commission considers of more importance; moreover, the Commission has not at any time discussed designating this road as a state secondary highway. The State Highway Engineer mentioned that, while this road is a county road, it is on the Federal Aid Secondary Highway System and at some future time will be constructed by the state as such; however, jurisdiction will still remain with the county. Commissioner Schaupp indicated a willingness to cooperate with the county in making a survey for the proposed revision of the road without going into too much detail, but not to the extent of assuming full responsibility for the road. The State Highway Engineer advised that it would cost about $1,000 to conduct a survey sufficient to estimate the cost to build the road on the new alignment. Such a survey, he said, would not be in detail but would include only sufficient information to support figures that would be obtained.

In the discussion which followed Mr. Morse suggested that the Highway Commission might cooperate with the county on a 50-50 basis to conduct an investigation sufficiently adequate to present to the Public Utilities Commissioner when the matter comes up for a hearing. The Commission approved the suggestion by unanimous vote with the understanding, however, that the State Highway Department would not present any arguments to the Public Utilities Commissioner with respect to the project but would limit its presentation to a defense of the figures that would be obtained as the result of the survey.

The engineer reported the need to revise the plans for construction of the Bridal Veil Overcrossing on the Columbia River Highway, Contract No. 2896, awarded April 22, 1947, to Guy F. Atkinson Company. He advised that the original plans for this structure contemplated that all pier foundations were to be bottomed on gravel base; however, excavations for these foundations, as made by the contractor, reveal a large percentage of soft clay materials mixed with the gravel, which is considered unsafe and unwise to use as a base on which to place the retaining walls between Stations 7+16.71 and 9+66.77, or to rest certain bents designated in the contract Because of these conditions, he said, it has been necessary to alter the plans and specifications in some respects so as to provide for the driving of piles down through the soft material to a hard strata, which is going to increase the cost of the project by approximately $30,000. As a result of discussion, the Commission approved the Engineer's report by unanimous vote and authorized him to proceed accordingly. An agreement with the contractor covering the matter was signed later in the session.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

Messrs. William A. Bowes, Commissioner of Public Works; Ben R. Morrow, City Engineer; F. T. Fowler, Traffic Engineer; and L. G. Apperson, of the City Engineer's Office; all of Portland, were present and discussed with the Commission the channelization and signalization of sections of Barbur Boulevard (US99W) in Portland, particularly section between S.W. Bancroft and S.W. Hamilton Streets and at the S.W. Terwilliger Boulevard intersection of Barbur Boulevard. Mr. Bowes headed the group. The State Highway Engineer exhibited a map showing what the city has in mind and explained the details thereof. He estimated the cost of the entire project at approximately $75,000 exclusive of the cost of a small amount of right of way that probably will be required. He recommended approval of the project on the basis of the city and the state assuming equal shares of the expense with a provision that the city shall do the work and bill the state for its share when it is completed, the city also to make available right of way as may be required without expense to the state. There followed a general discussion, but a final decision in the matter was deferred until later in the day. (The matter was reconsidered later in the afternoon, when the Chief Counsel advised that the Commission is not legally obligated to cooperate in projects of this kind but has the authority to do so if it wishes, however, the Commission does assume a definite responsibility in the protection of through traffic when it routes such traffic through a city, which apparently is the case in this instance. As a result of this discussion, the Commission unanimously agreed to pay 50 percent of the cost of the project on the condition that in no event shall the state's contribution exceed the sum of $40,000.)

Mr. Bowes also inquired if the Commission is ready to discuss the proposed Sullivan's Gulch Highway and was informed in the negative. He expressed a desire to discuss such matter with the Commission at its next regular meeting. The Commission indicated its approval but made no definite appointment.

Mr. C. J. Montag appeared before the Commission in regard to the proposal which he submitted for the construction of the Mill Creek Bridge on the Warm Springs Highway, in Wasco County. He was accompanied by Mr. Joe Damain, Manager of the Imperial Hotel. Mr. Montag advised that he left his proposal with the hotel clerk on duty on the evening before the bids were opened, but it was not delivered to the Commission at the time of the bid opening. He inquired whether or not the Commission would consider his bid, it being the only one submitted for this job, notwithstanding the lateness of the hour. Mr. Damain confirmed Mr. Montag's statement with respect to filing the bid with the clerk on duty on the previous evening. In view of the circumstances, the Commission decided to consider the bid, whereupon the bid was opened and the unit prices were read aloud by the Secretary. It was then referred to the engineers for tabulation and report along with other bids received at this letting.

The following persons representing the Oregon Loggers Highway Advisory Committee of the Pacific Northwest Loggers Association appeared before the Commission with regard to the Commission's recent order prohibiting the truck hauling of logs over state highways during certain periods; E. T. Clark, Portland, Secretary-Manager, Pacific Northwest Loggers Association; C. J. Warren, Portland, Secretary, Columbia River Branch; Warren Tilton, Portland, Forest Engineer, West Coast Lumberman's Association, W. V. Johnston, Medford, logger; John Hearin, Medford, logger; L. L. Simpson, Medford, Secretary-Manager, Conservation and Tree Farm Association; Harry Patton, Portland, Manager, Hammond Logging Company; R. L. Davis, Riddle, logger and Manager of the Harbor Plywood Corporation. Mr. Clark headed the group and requested that the new regulations be modified in four respects, as follows: (1) Modification so as to allow empty logging trucks to return to the woods during the restricted periods; (2) Modification to allow a little more leeway on Saturday afternoons for the last truck loaded in the morning to deliver its load to the dump; he suggested a deadline of 2:00 p.m.; (3) Modification to eliminate Armistice Day as one of the holidays when log hauling is not permitted; (4) The granting of more leeway for hauling in the early morning and in the evening (before sunrise and after sunset).

With respect to the first modification, Mr. Clark gave as his understanding that the Commission did not intend this restriction to extend to the movement of the empty logging trucks; however, the requirement in that respect is not clear. He was informed by Chairman Banfield that the Highway Commission has no objections to the movement of empty logging trucks over state highways at any time, provided they operate in conformity with statutory requirements.

Concerning Modification No. 2, Mr. Clark advised that the industry is not objecting to the Commission's ruling insofar as it pertains to general log hauling during Saturday afternoons, but some times, particularly when a long haul is involved, an operator whose equipment is not loaded until late in the morning is unable to deliver that load to the dump before the noon deadline. He suggested that in such cases the operator be allowed

until 2:00 p.m. to deliver the load. Chairman Banfield advised that the Commission could not approve such modification because it considers the noon hour on Saturdays late enough and, as a matter of safety, that the heavy traffic that uses the highways on Saturday afternoons should not have to contend with log movements. Mr. Simpson pointed out that in some instances mills require a large stockpile of logs in order to continue operating during the winter season, and it is important that as many logs as possible be delivered to the mills during the season of the year when they can be transported expeditiously. In the case of a 50-mile haul, he said, an operator working on Saturday would be able to deliver only one load of logs if the Commission definitely fixes noon as the deadline for hauling on that day, but if the operator is allowed until two o'clock, it would then be possible for him to deliver two loads instead of one. He was informed by Chairman Banfield that if the Commission made an exception in one case, it would have to make the same exception in all cases, which it is not inclined to do because of the hazards that would be created for other classes of traffic.

Mr. Simpson then inquired whether or not the Commission would consider modifying the rule after school starts in the fall and was informed that the Commission might consider a modification when the tourist season is over, but no promises can be made at this time.

As to deleting Armistice Day from the list of holidays when log hauling is prohibited on state highways, Mr. Clark mentioned that Armistice Day is not recognized in the industry's contracts with the unions and suggested that this restriction be eliminated from the requirements. He also suggested elimination of the restriction which prohibits log hauling on any Monday which follows a legal holiday on Sunday unless the Governor should declare the Monday in that instance a legal holiday. The Commission denied both requests.

As to extending the period of hauling in the morning and in the evening, Mr. Clark suggested that the operators be allowed to haul between the hours of 4:00 a.m. and 9:00 p.m. He was advised that the Commission wishes to discuss this matter among themselves before making a final decision. (This feature was discussed later in the day, at which time Commissioner Chandler suggested that the loggers be allowed to haul as early as possible in the morning provided their trucks are properly lighted, but that they be restricted to a definite hour in the evening; also, that twelve o'clock noon on Saturdays be definitely established as the deadline for log hauling on that day. The Engineer and the Chief Counsel were instructed to work up a set of rules and regulations on such basis and to report their recommendation to the Commission by telephone, when instructions will be given.

Mr. Clark also presented a request from Mr. George Gray, Seaside, that the sign installed by the Commission at the junction of the Oregon Coast Highway and Roosevelt Drive, in Seaside, which requires northbound

traffic to stop before entering this intersection be removed. He was informed by the Engineer that the City of Seaside has already called this matter to his attention and that the matter is now being investigated.

The County Court of Wasco County, represented by County Judge R. J. Wilson, County Commissioners S.M. Hicks and J. O. Swartz, and County Engineer C. P. Fauerso, came before the Commission regarding the construction of a toll bridge across the Columbia River at The Dalles. Also present with this group were W. S. Nelson, Manager of The Dalles Chamber of Commerce, and Col. Ralph A. Tudor, Consulting Engineer, San Francisco. Judge Wilson headed the group. He recalled that for the past ten years attempts have been made to solve the critical problem of crossing the Columbia River at The Dalles, which crossing is now negotiated by a private ferry owned by Captain C. T. Smith. None of these efforts, he said, has had a sound enough backing of facts, but they have continued their studies based on the Highway Engineer's report published in 1944 and believe that a solution has been found. He advised that what they now have in mind is construction of a bridge as a self - liquidating project, which they believe is sound and feasible, but they will need some state help to carry through with it. He further advised that they are not asking the State Highway Commission to contribute any funds toward the project that will not be returned to it, and that if the Highway Commission does not find the project sound and feasible, then they will discard it. He introduced Col. Tudor who, he said, has been employed by the County to make certain studies and to present their case to the Highway Commission.

Col. Tudor advised that his connection with the County Court is only to make a preliminary investigation and report on the basis of construction of a toll bridge. He presented facts and figures with respect to traffic and costs involved and methods of financing such a project, including the following: In 1941, traffic using the present ferry amounted to 135,000 vehicles. In 1943 this dropped off to 100,000, but in 1947 the number of vehicle crossings increased to 266,000. This latter figure, he said, was checked by the County Court only two weeks ago, and the rate of vehicle crossings was found to be correct. He predicted that traffic would increase at the rate of one and one-half percent annually and that all of this traffico would use the bridge were it constructed, and in addition thereto, if the ferry rate were not lowered, 28 percent of the traffic which now uses the Maryhill Ferry, 13 percent of the traffic which crosses the River at Cascade Locks, and seven percent of the traffic which crosses the River at Hood River, would be diverted to the bridge at The Dalles. He predicted that the ferry would recapture about 45 percent of this traffic if the ferry toll were reduced 25 percent to 50 percent.

Col. Tudor also asserted that a bridge at The Dalles would generate traffic, although not so much as if there were centers of business at each end of the bridge. He estimated that the traffic crossing the bridge, including diverted and generated, would reach a volume of 425,000 vehicles during the first year after the bridge is opened for use, which, at 55 cents per vehicle, would result in a revenue of $208,000, and thereafter, with the predicted increase, would amount to from $225,000 to $230,000 annually provided the rate of the competing ferry service were not reduced. If such

ferry service rate were reduced, he said, the annual revenue would amount to approximately $160,000 a year.

As to the cost of constructing the bridge, Col.Tudor took figures from the Highway Engineer's report, wherein the Engineer estimated that such bridge would cost $1,318,000, to which 20 percent should be added for engineering and contingencies, which would make a total estimated cost of $1,800,000. He gave as his opinion that this estimate is reasonably conservative. This cost, he said, could be amortized in 30 years with three and one-half percent money, which would require an annual payment of $98,000. Operation costs, he said,would amount to approximately $41,000; in other words, the amortization cost would amount to $139,000 compared with a revenue of $160,000.

As to financing, Col. Tudor mentioned the possibility of the sale of state revenue bonds bearing interest at the rate of three and one-half percent. He also mentioned the possibility of obtaining a loan from the Reconstruction Finance Corporation. He gave as his belief that the State has authority, under existing statutes, to construct the bridge on a toll revenue basis; also, that Wasco County, likewise, could be the sponsor, and the City of The Dalles is in a similar position to that of the County. Col. Tudor pointed out that until two years ago it was necessary to secure congressional action in order to build a bridge across a stream separating two states; however, he said, this no longer is required, and the only permit now needed is from the Corps of Engineers. In conclusion, Col.Tudor advised that he finds and believes that the bridge is economically justified. He suggested approval of the project and that it be financed on the basis of the sale of revenue bonds.

Chairman Banfield advised that this is a new matter to the State Highway Commission, which will not be ready or in position to ask any questions regarding the proposition until it has had the advise and counsel of the Engineer and the Chief Counsel. Judge Wilson read aloud and presented the County Court's brief with respect to the project. This concluded the conference. The Commission thereupon referred the entire matter to the Engineer and the Chief Counsel for study and report.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts for which bids were received at the morning session, such awards previously having been approved by the Commission by unanimous vote, as follows:

"Construction of a bridge over Rock Creek on the Clackamas Secondary Highway, in Clackamas County. Lindstrom Bros., Portland, submitted the low bid for this work in the amount of $43,910. The only other bid was that of Johnson-Sterner Corporation, Portland, at $45,000. The Commission has referred these bids to the Engineer with authoirty to award the contract to the low bidder, Lindstrom Bros., when certain conditions have been satisfied.

"Grading and construction of an oil mat surface on the Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County. The Commission received two bids for this work, being those of E. C. Hall Co., Portland, at $189,914 and Rogers Construction Company, Portland, at $204,701. The Commission has rejected both bids.

"Grading and construction of roadbed topping on the Anderson Valley and Swamp Creek Sections of the Diamond Valley Secondary Highway, in Harney County. George E. Corliss, Ontario, Oregon, submitted the low bid for this work in the amount of $29,899.50. Loren Petro, Vancouver, Washington, submitted the next low bid in the amount of $30,771.20. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, George E. Corliss, when certain conditions have been satisfied.

"Construction of a bridge over Bear Creek on a county road near Central Point, Jackson County. The low bidder for this work was Perkins Bros., Portland, at $70,470. Sleeper & Keyes, Bend, submitted the next low bid in the amount of $71,710. McNutt Bros., Eugene, submitted the third, and only other,bid in the amount of $74,240. This is a county contract, and the Commission has referred all the bids to the Jackson County Court for further handling.

"Construction of a bridgeover USRS North Unit, Main Canal on The Dalles-California Highway near Culver, Jefferson County. George E. Berry, Beaverton, submitted the low bid for this work at $24,900. Del R. Beebe Construction Company, Eugene, was the second low bidder at $27,875. There was one higher bid. The Commission has awarded this contract to the low bidder, George E. Berry, at his bid price.

"Regrading, surfacing and oiling the Forest Boundary-Agency Section of the Warm Springs Highway, in Jefferson and Wasco Counties. Rogers Construction Company, Portland, submitted the low bid for this work at $556,415.50. The next low bidder was E C. Hall Company, Portland, at $629,239. There was one higher bidder. The Commission has awarded this contract to the low bidder, Rogers Construction Company, at its bid price.

"Grading, surfacing, oiling, and construction of two bridges on the Bonanza-Poe Valley Malin Section of the Bonanza-Malin County Road, Klamath County. The low bid for this work was submitted by Rogers Construction Company, Portland, at $183,603. The next low bid was submitted by E. C. Hall Co., Portland, at $207,814. There were three higher bidders. The Commission has awarded the contract to the low bidder, Rogers Construction Company, at its bid price.

"Grading, bituminous macadam surfacing, and construction of a concrete bridge on the Pleasant Hill-Lost Creek Section of the Willamette

Highway, in Lane County. The low bid for this work was submitted by R. A. Heintz - Construction, Portland, at $327,366.25, based on the use of asphalt. They submitted no bid based on the use of tar. Leonard & Slate Oreg. Ltd., Portland, submitted the next low bid at $351,000, based on the use of the asphalt. They submitted no bid based on the use of tar. There were five higher bidders. The Commission has awarded the contract to the low bidder, R. A. Heintz - Construction, at its bid price.

"Construction of a concrete bridge over Oneonta Creek on the Columbia River Highway near Multnomah Falls, Multnomah County. Erick Enquist, Troutdale, submitted the low bid for this work at $22,985. The next low bid was submitted by Charles R. Schmiedeskamp, Portland at $27,625. The third, and only other, bidder was E. C. Hall Company, Portland, at $33,410. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Erick Enquist, when certain conditions have been satisfied.

"Construction of a bridge over Mill Creek on the Warm Springs Highway, in Wasco County. C. J. Montag & Sons, Portland, submitted the only bid for this work in the amount of $394,860. The bid has been rejected.

"Construction of the "Rood" Bridge over the Tualatin River on County Road No. 266 southeast of Hillsboro, Washington County. J. F. Johnston, Aurora, submitted the low bid for this work in the amount of $67,542. The next low bidder was R. H. Jones, Hillsboro, at $76,932. There were five higher bidders. This is a county project, and the Commission has referred all of the bids to the County Court of Washington County for further handling.

"Grading and paving the Pringle Corner-McMinnville Section of the Salmon River and Pacific West Highways, Yamhill County. The low bid for this work was submitted by Leonard & Slate Oreg. Ltd., O. C. Yocom Co., and J. C. Compton Co., McMinnville, as a joint venture, in the amount of $482,917.30, using asphalt. They submitted no bid based on the use of tar. R. A. Heintz - Construction, Portland, submitted the next low bid in the amount of $520,395.50, based on the use of asphalt. They submitted no bid based on the use of tar. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidders when certain conditions have been satisfied.

Messrs. Claude H. Giles and J. H. Beddingfield, attorneys, Coos Bay, came before the Commission regarding the proposed vacation of the westerly 20-foot portion of Edward Street in the Bunker Hill District just south of the City of Coos Bay. Mr. Giles stated that he represented property owners affected by such abandonment and Mr. Beddingfield advised that he represented the Coos Bay Lumber Company, which uses this street in its operations. Both attorneys spoke against the vacation of this street or any portion thereof. Mr. Beddingfield advised that the Coos Bay Lumber Company is absolutely opposed to the vacation of any portion of Edward Street. This Company, he

said, uses this road in the transportation of lumber, and if the road were narrowed and the community develops as is predicted, it cannot be used for their purposes. He urged that the road be widened rather than narrowed. Mr. Giles stated that he represents the small property owners along this street, all of whom are opposed to vacating any portion of the street. He gave as his opinion that it would be wrong for the Highway Commission to give any portion of this street, which is public property, to a private individual and suggested that the Commission turn the road back to the County whence the Commission acquired it and asserted that he was sure the County Court would not vacate it as is now contemplated by the Commission. Chairman Banfield advised that the Commission would take the matter under advisement and will inspect the property on the following day when all members of the Commission expect to be in the City of Coos Bay to attend the dedication of the C. B. McCullough Bridge.

Mr. Clair Terry, Coos Bay, who recently purchased from the State Highway Commission property lying on the west side of Edward Street and at whose request the Commission considered the vacation of a portion of this street, was present. He questioned Mr. Giles' statement that all of the property owners are opposed to the vacation proceedings, asserting that with the exception of three who own property situate directly across the street from his property, all are in favor of the vacation and have signed a petition to that effect. He advised that he and his partner, Mr. William Ring, need the westerly 20 foot portion of this street in connection with the operation of a tourist camp which they plan to construct on the property which they acquired from the state, and are willing to accept the 20-foot strip under discussion without access to the highway from this property. He was informed that the Commission would view the property on the following day.

A delegation from Roseburg, consisting of Hon. A. L. Flagel, Mayor; Percy Croft, Councilman; H. C. Wells, Manager, California-Oregon Power Company; and D. N. Busenbark, County Judge, Douglas County, came before the Commission regarding the acquisition of right of way and the moving of buildings on East Second Street in Roseburg, route of the North Umpqua Highway (County Road). Mr. Croft was principal spokesman. He advised that the right of way for this improvement within the city limits has been acquired by the city, but the city is not financially able to assume the responsibility for removing certain buildings thereon. He asked the Commission to assume this responsibility and pay for the work with state money. The Assistant Counsel, Mr. DeSouza, estimated the cost to move the buildings at $18,000. Chairman Banfield pointed out that the North Umpqua Road is not a state highway, and that it is contrary to the policy of the Commission to spend state money for the removal of buildings in cases of this kind, although in some instances the Commission has cooperated with the cities on a 50-50 basis in moving buildings from state highway rights of way within the city limits; moreover the Highway Commission does not want the responsibility of removing the buildings. He suggested that the city might finance such work with monies that it receives from state highway revenues. Mr. Croft reiterated that the city does not have funds available to pay for moving the buildings on its own account. He inquired whether or not the Highway Commission would be

willing to assume 50 percent of this expense. The Commission, without making any definite commitment, thereupon authorized and instructed the Engineer and the Chief Counsel to discuss the matter with the city on such basis.

Mayor Flagel brought up for discussion the matter of improving the intersection of Winchester Avenue (old route of the Pacific Highway) and US99 at the top of what is known as Winchester Hill in the northern part of Roseburg. He was told to present his request in writing. Mr. W. C. Williams First Assistant State Highway Engineer, was instructed to confer with the city officials with regard to the project.

Mr. A. S. Grant, attorney, Baker, Oregon appeared before the commission as a representative of the Baker Chamber of Commerce regarding a communication heretofore filed with the Federal Power Commission by the State Highway Commission concerning the request of the Idaho Power Company to conduct preliminary investigations for a power project in the Snake River at a place known as Oxbow. Newspaper reports, he said, indicate that the State Highway Commission is opposed to the construction of the Oxbow Dam, and the people of Baker County are very much wrought up over it because they are of the belief that the Commission's action was directly responsible for the Idaho Power Company deferring the construction of this project and electing to spend its money for the construction of a project in another location, in the State of Idaho. All that the Company wanted, he said, was authority to make a preliminary survey, which naturally would include investigations for replacement of highway facilities; moreover, the law requires payment for damages in cases where property is hurt or destroyed. He asked the Highway Commission to declare "flat footedly" that it is not opposed to the construction of the dam, if the reports are erroneous.

Chairman Banfield advised that, insofar as he is concerned, the Commission's resolution is satisfactory as adopted. It appeared to him that the only question involved is one between Baker County and the Highway Commission's Chief Counsel, whose advice the Commission always follows in matters of this kind. He suggested that Mr. Grant discuss this matter with the Commission's Chief Counsel, and if the Chief Counsel should then recommend amended action, the Commission will act accordingly. Commissioners Schaupp and Chandler concurred. The Chief Counsel advised that the Highway Commission was served with a copy of the petition of the Idaho Power Company, the purpose of which, he said, was to give the Highway Commission an opportunity to press upon the record its objections, if it had any. The only concern of the Highway Commission, he said, is the state highway which parallels the Snake River at this location, and a portion of which will be inundated if the dam is constructed, and all that the Commission intended by it resolution was simply to call to the attention of the Federal authorities, and to impress on them the fact that the Commission would expect the road to be replaced. The Highway Commission, he said, is not opposing any preliminary steps by its answer to the petition, and s ould the Commission see fit to file an amended answer, it should be made clear that by so doing it is not waiving any claim to damages that might result to the highway. He gave as his thought,however, that it would not be fair to the Highway Commission to

file an amended answer because the original answer only calls attention to the highway which will be damaged and is not a protest against construction of the dam. Commissioner Schaupp stated that the Commission's sole object was to protect the state's interests in the highway and it is the intention of the State Highway Commission to be guided entirely by the advice of the Chief Counsel. Commissioner Chandler stated that the Highway Commission is working in harmony with the Idaho Power Company. Chairman Banfield advised that the Highway Commission is not going to "back water" from the position that it has already taken in protecting the state's interests. The Commission thereupon decided unanimously not to revise its original filing with the Federal Power Commission.

A delegation from Ontario, representing the City Council and consisting of Mayor Elmo Smith and Mr. J. D. Bennett, Chairman of the Street Committee, appeared before the Commission with regard to the $250,000 State Tax Street Fund which was appropriated by the 1947 Legislature for expenditure by the State Highway Commission in the improvement of city streets that are not state highway routes. They were informed by Chairman Banfield that these funds do not become available for expenditure until 1948 and that the State Highway Commission is not ready to act on the apportionment of the funds to the several cities and towns of the state. He also advised that the city should send in its written application for a portion of the funds with full information as to the work that it wants performed with them.

A delegation from Tillamook, representing the City Council and consisting of Hon. H. C. Elliott, Mayor; F. H. Guyton; and Tom H. Bailey, came before the Commission and requested a share of the $250,000 State Tax Street Fund that has been set up by the 1947 Legislature for expenditure by the State Highway Commission for improvements on city streets that are not state highway routes, particularly streets that are being damaged by log hauling. They were informed by Chairman Banfield that the funds to which they refer are not available for expenditure until 1948 and that the Commission is in no position at the present time to make any commitments of such funds; moreover, the Commission cannot formulate a program for the funds until it has received applications from the cities of the state and a recommended program from the Engineer. He suggested that the city should file its written application for a share of the funds and include therein a detailed description of the work it would like performed with the money.

Mayor Elliott then asked the Commission to install a "stop and go" light at the intersection of Second Avenue East and Third Street, which is the intersection of the Oregon Coast Highway and the Wilson River Highway. He declared that the existing "blinker" at this location is not satisfactory because people are not very careful about observing it and that the other type is a necessity, this being a hazardous intersection. The Commission referred the matter to the Engineer for investigation and report.

Mr. Lloyd J. Allen, Scappoose, representing the Allen Logging Company, came before the Commission with regard to the reinstatment of his log-hauling permit, which was previously canceled for violation of the rules and regulations governing his operations. He asserted his willingness to abide by the requirements in all respects if allowed to go back to work. He was instructed to direct a letter to the State Highway Department, Salem, stating fully his future intentions in this regard. The letter is to be referred to the State Highway Engineer who will communicate it to the members of the Commissionover the telephone with his recommendation, following which the Commission will take action.

The Engineer reported the appointment of Mr. C. H. Armstrong, District Maintenance Superintendent, as Maintenance Office Engineer in the Salem Office to replace Mr. I. A. DeFrance, who has been promoted to the position recently occupied by Mr. W. W. Stiffler. He also reported the appointment of Mr. A. F. Parson, Resident Bridge Engineer, as District Maintenance Superintendent, Pendleton, replacing Mr. Armstrong in that capacity. The Commission approved these appointments by unanimous vote.

Pursuant to instructions given him by the Commission at the meeton August 11, 1947, the Engineer submitted a list of highways, portions of which qualify as Federal Lands Highways and for the improvement of which Federal Lands Highway Funds may be used.

He explained the Federal requirements with respect to the use of such funds and recommended that funds immediately available, amounting to approximately $196,000, be allocated for the construction of the Rome-Princeton State Secondary Highway as a substitute for Federal Aid Secondary Highway Funds now allocated to such road in the 1948 Postwar Program. He pointed out that such substitution of funds would make it possible to release a like amount of Federal Aid Secondary Highway Funds for re-allocation to some other project. He also said that the Public Roads Administration wants to handle the work under a Federal contract in the same manner that Forest Highway contracts are handled, and that he recommends approval of the request. Following a general discussion of the matter, in which W. H. Lynch, Division Engineer, Public Roads Administration, joined, the Commission voted unanimously in favor of a substitution of funds as recommended by the Engineer. The Commission also approved the contracting of the work by the Public Roads Administration.

Reconsideration was given by the Commission to the request of the log-hauling industry for modification of the rules and regulations recently adopted by the Commission prohibiting log hauling over state highways during certain periods. Commissioner Chandler suggested that these operators be allowed to truck haul logs over state highways as early as possible in the morning, provided their equipment is properly lighted during the hours of darkness but that such operations during the evening hours be limited to a definite set time; also, that no hauling whatsoever be permitted after the noon hour on Saturdays. Chairman Banfield stated that he would like to help the logging operators as much as possible, provided the general public

is protected. He also stated his objections to permitting any log hauling during the afternoons on Saturdays. As to the operation of empty logging trucks at any time, he stated that he offers no objections whatsoever thereto. Following a general discussion of the matter the Commission referred it back to the State Highway Engineer, the Second Assistant State Highway Engineer, and the Chief Counsel to work up regulations in conformity with the ideas expressed at this meeting and to phone their recommendation to the individual members of the Commission, when instructions will be given.

Reconsideration was also given by the Commission to the request of the City of Portland for state cooperation in the channelization and signalization of Barbur Boulevard (US99W). The Chief Counsel advised that the Commission has no legal obligation to cooperate in this matter, but it has the authority to do so if it wishes, although in certain circumstances, when the Commission routes highway traffic through a city it does have a definite obligation to see that such traffic is protected. The Engineer recommended that the Commission join with the city in this project on a 50-50 basis. As a result of this discussion the Commission voted unanimously to cooperate with the city of Portland by paying 50 percent of the total cost of the project, on the condition that the state's contribution shall in no event exceed $40,000.

The request of the Wolf Creek Water District for permission to maintain a million gallon reservoir on state highway property at the intersection of the Sunset Highway and Barnes Road was also reconsidered by the Highway Commission. The Chief Counsel pointed out that this has no connection with the highway or with highway use, and, in his estimation, it would be unwise for the Commission to permit the use of the property for the purpose intended, particularly since the area was acquired by the Commission at considerable expense as the result of condemnation. Chairman Banfield expressed his desire to help the Water District but not to the extent that it asks. The Commission voted unanimously not to grant this request.

The Engineer requested authority for Mr. Manley Robison, Director of the Travel and Information Department, to attend, at state expense, a meeting of the National Association of Travel Officials which is to be held in Chicago during October 23,24, and 25, 1947. The Commission approved the request by unanimous vote subject to further approval by Governor Snell.

The Commission discussed the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Tuesday and Wednesday, October 21 and 22, 1947. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

A letter was presented from the La Grande Chamber of Commerce requesting that the bridge at Milo Post 794 on the Starkey Secondary Highway,

Union County, be repainted a red color for historic reasons. The Commission approved the request and instructed the Engineer to use such color the next time the bridge has to be painted.

The Chief Counsel presented for the Commission's approval a petition to be filed with the Hydro Electric Commission of Oregon opposing the application of the Idaho Power Company to construct a dam across the Snake River at a place known as Oxbow near Homestead, which petition is substantially the same as the one previously approved by the Commission and filed with the Federal Power Commission covering the same subject. The Commission thereupon approved and signed the petition.

The Engineer presented a plan for the development of the Columbia River Highway at Multnomah Falls, which includes the construction of a divided highway for a short distance along this section with a parking area for vehicles between the two legs and appropriate landscaping to harmonize with the scenic setting of this popular recreational center and to enhance the attractiveness of the premises. He advised that the plan is the result of much study and consultation with officials of the Public Roads Administration and the U. S. Forest Service, including Mr. W. H. Simonson, who represents the Washington, D. C., Office of the Public Roads Administration and who is a specialist in such matters, and the plan meets with the approval of all concerned. He exhibited a map showing the proposed layout and explained details with respect thereto. He particularly pointed out that the plan involves the shifting of the permanent highway location nearer the Columbia River, for a short distance, than was originally contemplated; however, the immediate cost to the state will not be increased because provicion has been made in the state's contract (No. 2894) with Hydraulic Dredging Compa ny, now under way, for revisions such as this should they develop during the progress of the contract work. The cost to construct the adjoining section, he said, will be increased because it will include the development work in front of Multnomah Falls Lodge; however, this section will be built by the Public Roads Administration as a Forest Highway project, and the Public Roads Administration and the Forest Service have asserted their willingness to assume the additional expense in order to provide a satisfactory improvement. (Mr. T. M. Davis, District Engineer, Public Roads Administration, who was present, verified the Engineer's statement in that regard.)

In his further explanation of the plan, the Engineer advised that it provides for construction of a foot path extending from the parking area to the lodge for the benefit of people who park their cars and walk to the lodge. He pointed out that this path passes under the south leg of the divided highway, under the railroad tracks of the O.W.R.& N. Company, and over Multnomah Creek by means of a small bridge, with steps leading up from the bridge to the old highway in front of Multnomah Lodge; also that provision is made for a future vehicular traffic interchange structure between the old and the new highways, but that is not contemplated in the initial construction, and its need cannot be decided until the new highway is completed and the volume of traffic which will use the old highway has been determined. He recommended approval of the general plan and that he be authorized to put it into effect immediately so necessary instructions can be given to the state's contractor before he begins construction at this point.

Mr. Mark Astrup, Assistant State Parks Superintendent, was present and explained the details of the proposed pedestrian walk leading from the parking area to the Lodge.

Chairman Banfield gave as his understanding of the plan that it shifts the highway closer to the Columbia River, which, in his estimation, is a better location; that the main change is to be assumed by the Federal Government under a future Forest Highway contract; that the Federal Government is willing to construct its portion of the work in conformity with this plan, notwithstanding the added expense; that the change can be made without increasing the cost to the state; and that the proposed traffic interchange matter is not an immediate concern but can be deferred for future consideration. He was assured by the Engineer that his understanding is correct.

As a result of further discussion motion was made, duly seconded, and unanimously carried that the plan as outlined by the Engineer be approved, except insofar as it concerns the proposed vehicular traffic interchange structure and the pedestrian walk extending from the parking area to the Lodge. The Engineer was thereupon authorized to arrange with the state's contractor to carry on his work in conformity therewith. He was instructed to report further on the proposed pedestrian walk, including underpasses and bridge, and along with such report to submit to the Commission plans covering these features.

A letter was presented from the City of Monmouth requesting the establishment of a "no parking" zone at the intersection of US99W and the Monmouth-Independence Highway in Monmouth. The Engineer recommended approval of this request. The Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto;

> WHEREAS, East Main Street in the City of Monmouth has heretofore been by the State Highway Commission designated as and now is a street of said city over which there has been and is now being routed traffic over the Monmouth-Independence State Highway No. 43; and
>
> WHEREAS, South East Street south of its intersection with East Main Street likewise has heretofore been by the State Highway Commission designated and now is a street of said city over which there has been routed and now is being routed traffic moving over the Pacific Highway West, State Highway No. 1W and
>
> WHEREAS, by reason of the narrowness of said East Main Street, the parking of cars on the south side of said street for a distance of 50 feet west of South East Street and along the west side of South East Street for a distance of 50 feet south of East Main Street obstructs a clear view of moving traffic at this intersection subjecting such traffic to danger and possible damage; and

WHEREAS, the City of Monmouth by appropriate resolution has prohibited the parking of vehicles of any description on the south side of East Main Street for a distance of 50 feet west from South East Street and along the west side of South East Street for a distance of 50 feet south from East Main Street and has furnished the State Highway Commission a copy of said resolution;

NOW, THEREFORE BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That said resolution, duly and regularly adopted by the Common Council of the City of Monmouth, be and the same hereby is approved and ordered filed in the records of the State Highway Commission at Salem, Oregon.

2. That this resolution be entered in the minutes and records of the State Highway Commission as of the 26th day of August, 1947, and a duly certified copy thereof delivered to the Common Council of the City of Monmouth.

The Engineer brought up for discussion the matter of designating certain state highways "through highways" and recommended that the following highways be so designated:

Dallas-Coast Secondary Highway No. 192.
North Santiam Secondary Highway No. 162.
Mehama-Mill City Secondary Highway No. 213.
Woodburn-Estacada Secondary Highway No. 161.
Clackamas Highway No. 171.
Kings Valley Secondary Highway No. 191.
Albany Lyons Secondary Highway No. 211.
Central Oregon Highway No. 7.
Burns-Crane Highway No. 24.
Fremont Highway No. 19.

As a result of discussion the Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by the provisions of Section 115-351, O.C.L.A., the State Highway Commission with respect to state highways is authorized to designate main traveled or through highways or sections thereof by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highway or highways; and

WHEREAS, the Highway Commission has heretofore, to wit: on the twenty seventh day of April, 1943, adopted a resolution in which a large number of state highways have been declared to be and have been designated as through highways, and the Engineer was instructed to properly mark the same; and

WHEREAS, it is now the judgment and opinion of this Commission that the following known and designated highways are highways which carry a large volume of traffic, both local and through traffic, and by reason thereof and by reason of other traffic conditions and facts said highways should, in the judgment of the Commission and in the interests of the general public, be declared to be through highways:

Dallas-Coast Secondary Highway No. 192 between Salmon River Highway junction, at Wallace Bridge (Mile Post 0.00), and Salem-Dallas Highway junction, at Dallas (Mile Post 14.83)

North Santiam Secondary Highway No. 162 between Silver Creek Falls Secondary Highway junction (Mile Post 0.00) and Santiam Highway junction (Mile Post 78.46)

Mehama Mill-City Secondary Highway No. 213 between North Santiam Highway junction, in Mehama (Mile Post 0.00), and North Santiam Highway junction in Mill City (Mile Post 8.70)

Woodburn-Estacada Secondary Highway No. 161 between Pacific Highway East junction, near Woodburn (Mile Post 0.00), and Clackamas Secondary Highway junction, at Estacada (Mile Post 34.19)

Clackamas Secondary Highway No. 171 between Pacific Highway East junction in Milwaukie (Mile Post 0.00), and Mile Post 25.62 southeast of Estacada.

Kings Valley Secondary Highway No. 191 between Salem-Dallas Highway junction, at Dallas (Mile Post 0.00), and Corvallis-Newport Highway junction, near Wren (Mile Post 28.05)

Albany-Lyons Secondary Highway No. 211 between Santiam Highway junction, at Crabtree Corner (Mile Post 0.00), and Mehama-Mill City Secondary Highway junction, at Lyons (Mile Post 24.68)

Central Oregon Highway No. 7 between The Dalles-California Highway junction, in Bend (Mile Post 0.00), and Old Oregon Trail junction at Cairo (Mile Post 258.59)

Burns-Crane Highway No. 24 between Central Oregon Highway junction, in Burns (Mile Post 0.00), and highway terminus in Crane, (Mile Post 28.91)

Fremont Highway No. 19 between The Dalles-California Highway junction, near Lapine (Mile Post 0.00), and the Oregon-California State Line, at New Pine Creek (Mile Post 158.17);

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by this Commission, all members being present and voting affirmatively, as follows:

1. That the above listed highways hereby are declared to be and are designated as through highways.

2. That all traffic entering said highways from intersecting streets, and roads or highways, shall come to a stop before entering any of said highways except that (a) Woodburn-Estacada Secondary Highway traffic shall be required to stop before entering the Monitor-Barlow County Road intersection at Mile Post 5.26 of said secondary highway, and shall be required to stop before entering Cascade Secondary Highway intersection at Mile Post 11.34, near the city of Molalla; (b) Clackamas Secondary Highway traffic shall be required to stop before entering Cascade Secondary Highway intersection in the town of Clackamas (Mile Post 4.85), and eastbound traffic on Clackamas Secondary Highway shall be required to stop before entering Woodburn-Estacada Secondary Highway intersection in the town of Estacada (Mile Post 24.02); (c) southbound traffic on the Albany-Lyons Secondary Highway shall be required to stop before entering Main Street intersection (Mile Post 9.85) in the city of Scio; and (d) Fremont Highway traffic shall be required to stop before entering the Klamath Falls-Lakeview Highway intersection in the city of Lakeview (Mile Post 143.43).

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by law and by this resolution. Such signs as may be erected at said points of intersection shall conform to the types and standards heretofore approved by the Commission.

4. The Engineer is instructed to place such signs or markers as nearly as practicable at the place where the intersecting street, road or highway, meets a prolongation of the nearest property line of such through highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highways from said intersecting roads the place where the stop shall be made.

5. This resolution shall be entered in the minutes and records of the Commission as of the 26th day of August, 1947, and a duly certified copy thereof delivered to the Public Roads Administration and to the County Court of each County wherein said highways are located.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

J. F. Johnston, Contract No. 2748, for the construction of the Pudding River Bridge on the Pacific Highway East at Aurora, requested and additional extension of time of 60 days, from July 31 to September 30, 1947, within which to complete this job. He based this request on the following reasons: " A considerable portion of the job could not be undertaken until the new span was in place. We did not feel that it was safe to drive false work to move old bridge until all danger of highwater was past. Also, we have had much difficulty in obtaining suitable skilled labor." The Engineer advised that the contractor did not prosecute his work diligently, and, in his estimation, the reasons given by him for failure to complete the project within the specified time limit are not sufficient for granting the extension without penalty. He recommended, in view thereof. that the extension of time requested be granted but that the contracotr be charged with engineering costs that accrued to the job subsequent to July 31, 1947, the expiration date of the previously-extended time limit. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

C. J. Eldon, Contract No. 2773, for construction of a trestle bridge over McKay Creek on the Sunset Highway, in Washington County, requested an additional extension of time of 15 days, from June 30 to July 15, 1947, within which to complete this job. The contractor alleged that the job has been completed for some time, with the exception of the installation of some reflectors, and that the bridge has been in use by the general public for quite a while. He declared that the State Highway Department was to furnish the reflectors but did not do so in time for their installation during the placing of the concrete, so it was necessary to send men back to the job as they were available to make the installations. The Engineer advised that this job was actually completed on July 3, 1947, so only a three-day additional extension of time is required. He recommended, because the engineering expense on the job was negligible during this period, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

C. J. Eldon, Contract No. 2788, for construction of a bridge over Coffey Creek on the Tiller-Trail Secondary Highway, in Douglas County, requested an additional extension of time of 60 days, from July 31 to September 30, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing materials, particularly lumber. The Engineer pointed out that this contract was awarded on March 12, 1946, that the date of completion as specified was October 31, 1946, but because of delays in the prosecution of the work it was necessary for the Mainte-

nance Department to perform maintenance work on the existing structure to keep it safe for traffic. Expenditure for this work, he said, amounted to $385.59. He recommended that the extension of time requested by Mr. Eldon be granted but that he be charged $385.59, the cost of the maintenance work performed by the state, and in addition thereto that he be charged with all engineering expense which occurred on the job subsequent to July 31, 1947. The Commission approved the recommendation by unanimous vote.

Strong & McDonald, Inc., Contract No. 2795, for grading the Spring Creek Hill Section of The Dalles-California Highway, in Klamath County, requested an additional extension of time of 35 days, from May 31 to July 5, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the wet and unworkable condition of material in the grade, which made it impossible to do fine grade work and finishing until dry weather prevailed. The Engineer advised that, in his estimation, the contractor's delay in completing the project was due to inability to secure new equipment. He further stated that this was a very heavy shovel job, consisting of rock cuts and imbedded boulders, and during the progress of the operations the contractor had to replace two shovels before the job could progress in an adequate manner. They were also handicapped by wet weather. The slowness of the job, he said, caused some inconvenience to the engineering personnel and probably increased the engineering costs somewhat, but it did not delay surfacing, since the job was completed in ample time for the award of the surfacing contract. He recommended that the extension of time request be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. S. Risley, Contract No. 2817, for oiling and rock production on the Robertson-Bridge Hayes Hill-Shattuck Corner Section of the Rogue River Loop Secondary and Redwood Highways, in Josephone County, requested an additional extension of time of three days, from June 30 to July 3, 1947, within which to complete this job. Mr. Risley gave the following reasons for failure to complete the project within the specified time limit: (1) Unfavorable weather which delayed the starting of the oiling operations; (2) Additional work ordered by the Engineer shortly before the oiling work was started. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Struss & McCoy, Contract No. 2859, for production of crushed materials in stockpiles for the John Day Rock Production Project on the John Day - Beech Creek, Pendleton-John Day, and John Day-Burns Highways, in Grant County, requested an extension of time from July 31 to December 31, 1947, within which to complete this job. They attributed their

failure to complete the project within the specified time to inability to secure enough experienced help and to the difficulty of doing so much work in the short time allowed. The Engineer advised that he knows of no reason why the contractor should not have completed the job within the specified time limit, and he recommended, in view thereof, that the extension of time requested be granted on the condition that the contractor shall reimburse the state for engineering expense incurred in connection with the job subsequent to July 31, 1947. The Commission approved the recommendation by unanimous vote.

Angelo A. Doveri, Contract No. 2814, for construction of the Chiloquin Overcrossing and Spring Creek Bridge on The Dalles-California Highway, in Klamath County, requested an additional extension of time of 61 days, From July 31 to September 30, 1947, within which to complete this job. He based his request on the following reasons: (1) The road was impassable for trucks until the end of April 1947 because of mud, (2) Construction of the foundation was delayed awaiting a decision of the State Highway Engineer (3) Work was also delayed pending the Highway Engineer's decision on the results of sand tests. The Engineer advised that the reasons given by the contractor are not well founded, and, in his estimation, there has been unnecessary delay. He recommended, in view thereof, that the extension of time requested be granted but that the contractor be charged, as a penalty, all of the engineering expense incurred in connection with the job subsequent to July 31, 1947. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

In passing on the above requests for extension of time within which to complete highway contracts, the Commission made it clear that it did not grant the requests on the basis of the contractors' statements but solely on the recommendations of the State Highway Engineer.

The Engineer reported that Contracts Nos. 2737, 2773, 2789, 2791, 2796, 2803, 2829, 2883, 2886, 2889, 2893, and 2902 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2737 with C. J. Montag & Sons for bridge construction on the Steiwer Hill-Albany Section of the Pacific Highway East in Marion and Linn Counties; completed July 29, 1947.

Contract No. 2773 with C. J. Eldon for bridge construction on the McKay Creek Section of the Wolf Creek (Sunset) Highway in Washinton County; completed July 3, 1947.

Contract No. 2789 with C. J. Eldon for grading, surfacing and oiling on the Milo-Tiller Section of the Tiller-Trail Secondary Highway in Douglas County; completed July 17, 1947.

Contract No. 2791 with Adler Construction Company for grading on the Mill Creek-Miller Flat Section of the Warm Springs Highway in Jefferson County; completed June 27, 1947.

Contract No. 2796 with McNutt Brothers for grading on the Mazama Junction-Spring Creek Hill Section of The Dalles-California Highway in Klamath County; completed April 30, 1947.

Contract No. 2803 with Mark Smith Company for lighting work on the South Sixth St. Section of the Klamath Falls-Lakeview Highway in Klamath County; completed July 29, 1947.

Contract No. 2829 with Warren Northwest, Inc., for paving and furnishing crushed material in stockpiles on the McNamars Camp-Washburn Section of the Wilson River Highway in Tillamook County; completed July 28, 1947.

Contract No. 2883 with J. S. Morris Company for painting Elk River and Pistol River River Bridges on the Oregon Coast Highway in Curry County; completed August 8, 1947.

Contract No. 2886 with Pacific Bridge Painting Company for painting the Necarney Creek Bridge and Nehalem River Bridge on the Oregon Coast Highway in Tillamook County; completed August 16, 1947.

Contract No. 2889 with J. N. & M. J. Conley for surfacing and oiling on the Spitzenberg-Scappoose Section of the Pittsburg-Scappoose County Road in Columbia County; completed July 25, 1947.

Contract No. 2893 with Loran Petro for embankment on the Umatilla River Dike Project on the Boardman-Stanfield Highway in Umatilla County; completed July 31, 1947.

Contract No. 2902 with J. C. Compton Company for recoiling on the Minam-Wallowa Lake Section of the Wallowa Lake-Joseph-Wallowa Lake Highways and the Hurricane Creek County Road in Wallowa County; completed July 22, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection therewith is hereby authorized.

The Commission discussed, approved, and signed the following joint letter with the Public Roads Administration and the U. S. Forest Service recommending to the Chief, Forest Service, and Commissioner, Public Roads Administration, Washington, D. C., approval of revisions of the Forest Highway System to conform with the current correct mileages and classifications.

"Portland, Oregon
August , 1947

Chief, Forest Service
Commissioner, Public Roads Administration
Washington D. C.

Gentlemen:

The Forest Highway System selected and submitted by the Oregon State Highway Commission, pursuant to the Rules and Regulations for administering Forest Roads and Trails under the provisions of the Federal Highway Act was approved by the Department in accordance with the recommendations of the Bureau of Public Roads and the Forest Service under date of March 19, 1924 and certain revisions were approved by subsequent letters.

It is now recommended that the approved Forest Highways be revised to conform with the current correct mileages and classifications. Therefore, in accordance with the Rules and Regulations for administering Forest Roads & Trails, under the provisions of the Federal Highway Act, it is requested that the Forest Highway System for the State of Oregon be revised to read as follows:

Route No.	Name	Termini	Approved Length	Class
1	McMinnville-Tillamook	Hebo-East For. Bdry	13.9	1
2	Salmon River	Oregon Coast Hwy-West Polk Co. Line	13.7	1
3	Oregon Coast	Neskowin-Siletz River	22.8	1
4	Siletz	Oregon Coast Hwy.-Forest Boundary	6.0	2

Route No.	Name	Termini	Approved Length	Class
5	Oregon Coast	Yaquina Bay-Umpqua River	68.7	1
6	Alsea	Waldport-Benton Co. Line	28.4	2
7	Siuslaw	Blachly-Oregon Coast Hwy.	45.1	1
8	Umpqua	Scottsburg-Reedsport	15.6	1
9	Oregon Coast	Hauser-Douglas Co. Line	9.7	1
10	Oregon Coast	Port Orford-Gold Beach	31.3	1
11	Redwood	O'Brien Schoolhouse-State Line	5.4	1
12	Redwood	Summit Hayes Hill-Love Station	2.0	1
13	Oregon Caves	3 mi. West of For. Bdry. to Caves	11.5	2
14	Applegate	Ruch-Watkins	17.0	3
15	Pacific	Canyonville - 2-3/4 mi. S. of Forest Bdry.	11.0	1
16	Tiller-Trail	Tiller to Trail	26.3	2
17	Crater Lake	Trail-Park Boundary	44.0	2
18	Crater Lake	Dalles-Calif. Park Bdry.	7.7	1
19	Dalles-California	Crescent-Old Ft. Klamath	57.8	1
20	Sand Creek	Dalles-California Hwy.-Park Boundary	4.3	3
21	Willamette	Lowell to Dalles-Calif. Hwy.	73.3	1
22	McKenzie	Blue River to Sisters	51.2	1
23	Santiam	1 mi. East of Foster to Sisters	69.5	1
24	North Santiam	Niagara-Santiam Hwy.	44.6	3
25	Mt. Hood	Wapinitia Jct. to West Bdry.	15.4	1
26	Wapinitia	Mt. Hood Hwy. to 1 mi. North of Wapinitia	32.6	1
27	Ochoco	West For. Bdry to North For. Bdry	19.6	1
28	Columbia River	West For. Bdry. to East For, Bdry.	27.3	1
29	Fremont	East For. Bdry. to West For. Bdry.	16.2	1
30	Klamath Falls-Lakeview	West For. Bdry to East For. Bdry.	29.4	2
31	Fremont	4 mi. South of Valley Falls to 6 mi. North of Lakeview	13.0	1

Route No.	Name	Termini	Approved Length	Class
32	Heppner-Spray	Mouth of Chapin Creek to John Day Hwy.	26.3	2
33	Pendleton-John Day	2-1/2 mi. Northwest of Albee to Range	30.7	1
34	Pendleton-John Day	Long Creek-South For. Bdry.	20.4	1
35	John Day-Burns	John Day to Burns	70.2	2
36	John Day	Prairie City-Unity	42.6	1
37	Weston-Elgin	McDougall's Camp to Summerville-Elgin Road	23.2	2
38	Flora-Enterprise	Oregon-Wash.State Line to South For. Bdry.	30.3	2
39	Little Sheep Creek	Imnaha to West For. Bdry.	8.8	2
40	Baker-Cornucopia	Carson to Cornucopia	5.0	3
41	Loop-Dalles	Mt. Hood Hwy. to East For. Bdry	15.0	3
42	Warm Springs	Wapinitia Hwy. to For. Bdry.	6.9	1
43	Diamond Lake	Union Creek to Dalles-Calif.Hwy. via Diamond Lake	38.9	3
44	Williams Creek	Applegate Hwy. -Oregon Caves Hwy.	20.0	3
45	Oregon Coast	North For. Bdry. to South For. Bdry between Hebo and Beaver	1.1	1
46	Cascade Lakes	North Bdry.of Crater Lake Park to Bend	101.0	3
47	North Umpqua	Rock Creek to Cascade Lakes Hwy	60.0	3
48	Klamath Lake-West Side	Seven Mile Creek to Forest Bdry. southeast of Odessa Creek	20.0	2
49	Mt. Hood	Wapinitia Junction-North For, Bdry.	21.5	2
50.	Timberline	Junction Mt. Hood Hwy. to Timberline Lodge	5.6	3

MILEAGES

Class 1	Class 2	Class 3	TOTAL
724.5	345.9	311.4	1381.8

No other changes in the system are contemplated at this time.

Yours very truly,

U. S. FOREST SERVICE, REGION #6

S/S By Ben R. Chandler
Member

(The discussion and signing of the above letter actually took place in the City of Coos Bay on Wednesday, August 27, 1947, during inspection of Edward Street, a portion of which the Commission has been requested to vacate for the benefit of the abutting property owner, and is included in the minutes of this meeting for record purposes only.)

The Chief Counsel brought up for discussion a controversy with the Erickson Dairy Products Company concerning acquisition of land needed to provide a uniform width right of way for the Columbia River Highway in the town of St. Helens. It appears that the company is about to construct a building on a portion of the property which is needed by the state, and if satisfactory arrangements cannot be made by negotiation for the re-establishment of the Company's creamery, then it will be necessary to condemn the property. The Chief Counsel advised that he is now in the process of making an appraisal of the property and ascertaining a means of re-establishing the creamery but is not is position to make the Company a definite offer. He suggested that the Commission authorize him to condemn the property if it is found necessary to do so, action at this time being required so that he can start the proceedings on short notice. The Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land described on the attached sheet are necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property described on the attached sheet are necessary for right of way purposes in connection with the Columbia River Highway, which real property is owned by Erickson's Dairy Products Co. and is identified in the records of the Highway Commission as file R14094; *

2. That the Commission does hereby find and declare that the said parcels of real property described on the attached sheet are required for the specific purpose hereinabove set forth, and the said property is being acquired for the express and specific purpose in this resolution set forth; *

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain;

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner of said real property and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there by any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to said parcels of real property;

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner;

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-sixth day of August, 1947.

FOOTNOTE:

* The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Sale , being Resolution No. 84, under the heading, "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Commission considered and signed agreements, etc., as follows:

Agreement with Guy F. Atkinson Co., being a modification of its Contract No. 2896 with the Highway Commission for the construction of the Bridal Veil Overcrossing on the Upper Columbia River Highway, in Multnomah County.

Agreement with the Southern Pacific Company covering the installation of two flood lights at the grade crossing of the Cascade Secondary Highway with the Southern Pacific Company's tracks in the town of Liberal, Clackamas County.

Agreement with the Southern Pacific Company covering the installation of a third luminaire at the grade crossing of the Wilson River Highway and the Southern Pacific Company's tracks one-half mile east of Tillamook.

Agreement with the O. W. R. & N. Co. covering the lease to the Company of certain state-owned property adjacent to the Old Oregon Trail at Weatherby, Baker County.

Statement to be filed with the Hydro-Electric Commission of Oregon with respect to the application of the Idaho Power Company to construct a dam across the Snake River at the Oxbow Damsite near Homestead, Baker County.

Modification of a lease with the Grande Ronde-Siletz Agency covering payments for use of a stockpile site at the junction of the Oregon Coast Highway and Roads End Road, in Lincoln County. This modification provides for the payment of the fees direct to the allottees rather than through the Indian Agency.

Bargain and sale deed conveying to Robert C. Hogan, et ux. two parcels of land in Crook County.

Joint letter with the Public Roads Administration and the U. S. Forest Service revising the Forest Highway System for the State of Oregon to conform with the current correct mileages and classifications.

The meeting adjourned at 5:15 p.m.

14369		of part approved. See EXHIBIT "N".
		Harney County. Burns-Crane Hwy. Abandonment of part approved. See EXHIBIT "O".
		Jefferson & Crook Counties. Madras-Prineville Secdy. Hwy. Abandonment of part approved. See EXHIBIT "P".
		Wallowa County. Enterprise-Lewiston Hwy. Abandonment of part approved. See EXHIBIT "Q".
		Jefferson County. The Dalles-California Hwy. south of Madras. Request of County that part of old hwy. be designated as Secdy. Hwy. to be studied. Engineer to report.
14370		Personnel. Salem shops employees request monthly rate of pay. Engineer to report.
		Organization Chart discussed. Action deferred.
		Yamhill County. McMinnville. Pacific Hwy. W. No Parking Zone on Baker Street approved. See EXHIBIT "R".
		Meeting Date. Next regular meeting set for Dec. 29-30, 1947.
		Curry County. Oregon Coast Hwy. Gold Beach Authority granted to acquire R/W. Engineer to investigate revised alignment south of 4th Street.
14371		Agreements and other papers signed.
		Portland. Traffic accident analysis. Signing agreement deferred. Engineer to report.
		Eugene Water Board. Pacific Hwy. Cooperation in lowering water
14372		main approved. Agreement to be prepared.
		Corvallis Chamber of Commerce. Removal of snow on road to Mary's Peak. Request denied.
		Equipment. Sale of snow plow to Corvallis Chamber of Commerce approved.
		Astoria Ferry. Alterations approved.
		Astoria Ferry. Operation costs to be kept separate.
		Highway Construction. All items of cost to be included in estimates.
14373		Betterment projects. Action deferred.
		Highway route numbers. Change discussed. Action deferred.
		Sale of lifeboat. Sigfridson offer of $50 accepted.
		Tillamook County. Rockaway. Paving and sewers discussed. Referred to Engineer.
		Snow removal. Timberline Lodge forest road. Agreement approved and signed.
		Columbia River Hwy. Oneonta. Agreement with O.W.R. & N. approved.

14547		EXHIBIT "L". Helen M. Wells authorized to sign permits.
14548		EXHIBIT "M". Crater Lake and Ochoco Hwy. sections designated as Group I Hwys.
14549		EXHIBIT "N". Amended reduced load limit. Weston-Elgin Secdy. Hwy.
14551		EXHIBIT "O". Gold Beach survey.

Portland, Oregon
October 21, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stifflor, 2nd Asst. State Highway Engineer
H. B. Glaisyer, Secretary

Bids, as follows for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

NORTH UMPQUA COUNTY ROAD IN DOUGLAS COUNTY
ROSEBURG-DIXONVILLE SECTION

Leonard & Slate, Oreg. Ltd., Portland	$ 298,882.00
J. C. Compton Co., McMinnville	306,894.50
K. F. Jacobsen Co., Portland	318,104.00
Babler Bros., Portland	344,995.00

DIAMOND VALLEY SECONDARY HIGHWAY IN HARNEY COUNTY
CRANE-PRINCETON SECTION

Inter City Sand & Gravel Co., Eugene	$ 164,840.50
A. H. Sexton & Sons, Corvallis	167,838.00
E. C. Hall Co., Portland	178,949.75
Peter Kiewit Sons, Omaha, Nebraska	179,726.20
Homer G. Johnson, Portland	181,973.00

OCT 21 1947

WARM SPRINGS HIGHWAY IN WASCO COUNTY
CLEAR CREEK-FOREST BOUNDARY SECTION

Peter Kiewit Sons, Omaha, Nebraska	$ 320,083.50
Guy F. Atkinson Co., Portland	356,943.00
Kuckenberg Construction Co., Portland	415,536.00
C. J. Eldon, Portland	416,523.00

The Commission by unanimous vote approved the minutes of the meetings held on July 21 and 22 and on August 25 and 26, 1947. The Commission also approved the minutes of the special meeting held on August 11 and 12, 1947, subject to a revision suggested by Chairman Banfield.

The State Parks Superintendent, Mr. S. H . Boardman was present and reported on the following park matters:

1. Proposed acquisition of the area included in the Ft. Stevens Reserve at the mouth of the Columbia River. The Parks Superintendent recommended the filing of an application to acquire this property which consists of 2,800 acres, when it has been declared surplus by the War Assets Administration. He advised that the filing of the application will not obligate the Commission to acquire the property but will make it possible to ascertain the terms under which it can be secured, considering that the U. S. Army Engineers, who have first refusal, may occupy a portion of the premises. He pointed out that the property is highly developed, including roadways, buildings, etc., and that it fronts on the Columbia River at the point where sports fishing is concentrated, and also fronts on the Pacific Ocean. This matter was discussed at considerable length, during which the members of the Commission expressed themselves as not being in favor of taking over this property, or any other property, if there are restrictions, however, agreed to give the matter further consideration if the Parks Superintendent will render an additional report, giving more definite information with respect to the restrictions and other features.

2. Construction of caretakers' houses in Collier, Armitage, Saddle Mountain, Short Sand Beach, and Tou Velle State Parks; The Parks Superintendent requested authority to construct such buildings, which he estimated would cost $10,000 each. He explained that he is unable to secure the services of caretakers at these locations because of the lack of housing facilities. The Commission by unanimous vote decided not to approve the request at the present time. This matter is to be reconsidered next spring.

3. Acquisition of Crown-Zellerbach property as an addition to Ecola State Park: The Parks Superintendent presented an offer from the Crown-Zellerbach Corporation to sell to the state, for the sum of $ 46,065, 308 acres of land which the company owns adjoining the present park. He advised that this offer is on the stumpage basis and that the tract includes what is known as Tillamook Head. The Commission deferred action on this matter until its next meeting. The Parks Superintendent was instructed to render a report to the Commission in writing prior to that time. The Chief Counsel was instructed to pass on the legality of the transaction. In this connection the Parks Superintendent was instructed hereafter to submit his reports to the Commission at least a week before its regular meetings, so the members can study them prior to the time the matters come up for discussion.

4. Rental of farm property in Champoeg State Park: The Parks Superintendent advised that Mr. Henry Zorn, who has leased 70 acres in this park for the last several years, has requested renewal of the lease for the year 1948. He recommended approval of the request at the same rate at which the land has been rented before. The Commission approved the recommendation.

5. Request of the Oregon Historical Society for state aid in maintaining the grounds of the Society located at Ft. Clatsop: The Parks Superintendent advised that the Oregon Historical Society maintains an exhibit at this place, and Mr. Lancaster Pollard, Superintendent, has requested state aid in maintaining the grounds on which it is located. He recommended that the request be denied. The Commission approved the recommendation.

6. Report on concession at Vista House, Crown Point: The Parks Superintendent filed a statement showing receipts of this concession, amounting to $7,551.27, covering the period April 12 to September 30, 1947. The Commission ordered the report filed.

The Commission had under discussion the approval of options secured by the Right of Way Department for the acquisition of certain parcels of real property that are needed for various state highway improvements throughout the state. The Assistant Counsel, Mr. J. W. De Souza, presented a list of the properties, together with the offer he recommended for each parcel. Careful consideration was given by the Commission to each individual item, and as a result thereof, the Commission approved the options and authorized acquisition of the properties on the basis of the prices contained therein. A resolution covering the matter, which is attached hereto and marked EXHIBIT "A", and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

In this connection the Chief Counsel reported the status of negotiations for right of way needed for the improvement of the Oregon Coast Highway through the town of Gold Beach, Curry County. It appears that certain individuals at this place are reluctant to abide by the arrangement heretofore effected with respect to the right of way needed for this project and are making additional demands including the construction of sidewalks and storm sewers. In the discussion of this matter Chairman Banfield suggested that the local people be informed that the Highway Commission is willing to proceed with construction of the project at such time as right of way is obtained on the basis of the original arrangement, but will not do so unless and until the right of way matter has been satisfactorily disposed of. The suggestion was approved by Commissioners Schaupp and Chandler, and it was so ordered. The Chief Counsel was instructed to complete the securing of options as may be possible and then to notify the city to arrange for the acquisition of the balance of the right of way.

In the discussion of this matter the question arose whether or not any commitment has been made with respect to sidewalks and storm sewers. It appears that the plans for the project make provision for such facilities and that negotiations have been carried on on the basis that they would be furnished. It was the thought of the Commission, in view of the circumstances obtaining in this particular instance, that it would be necessary to include the sidewalk and storm sewer construction in the plans for the improvement; however, the Chief Counsel was instructed hereafter to incur no obligation whatsoever with respect to such matters unless and until he receives a letter from the Commission authorizing him to do so.

The Commission also discussed the matter of removal of buildings from right of way that is being acquired by the city of Roseburg in connection with the improvement of the North Umpqua County Road within the city

limits. The Chief Counsel estimated the cost involved to move the buildings at $18,639. He recalled that the Roseburg delegation which appeared before the Commission at the previous meeting asked the Commission to assume 50 percent of the cost of moving the buildings and that, as a result thereof, the Commission instructed the Engineer and himself to confer with the city officials relative thereto. Such conference has been held, he said, and the city has executed an agreement providing that the city shall procure the right of way at its sole cost and expense and that the cost of moving the buildings shall be paid for 50 percent by the city and 50 percent by the state. The Commission by unanimous vote approved such an arrangement and executed the agreement on the following day. (This action was taken by the Commission during the discussion of the options covering the Roseburg-Dixonville Section of the North Umpqua County Road as disclosed in the attached resolution marked EXHIBIT "A".)

Settlements with respect to the acquisition of right of way needed for the improvement of the Pacific Highway in Eugene were also discussed by the Commission, and as a result thereof, the Commission approved the settlements listed in the attached resolution designated as EXHIBIT "A", it being strictly understood that such settlements are for right of way needed for the section which extends easterly (southerly) from the crossing of Broadway Street with the Eugene Mill Race, northerly from which point there is still a question as to the eventual routing of this highway.

The Assistant Counsel, Mr. DeSouza, mentioned that there are a number of other properties needed for highway improvements which cannot be acquired by negotiation. He submitted a list of such properties, together with the offer that he recommended be made in connection with each parcel in condemnation proceedings, as follows:

		Recommended Offer
SUNDIAL ROAD-TROUTDALE SECTION OF THE COLUMBIA RIVER HIGHWAY		
11902-A	B. A. Kliks	$ 11,500.00
BUTTE FALLS JUNCTION-ANTELOPE CREEK SECTION OF THE CRATER LAKE HIGHWAY		
12476	G. C. Sherlock and Gordon Dolan	253.50
CARLTON-CHEHALEM SECTION OF THE YAMHILL COUNTY ROAD		
13558	Elmer Schrweid and Edith Schrweid	750.00
FOREST BOUNDARY-WOCUS MARCH SECTION OF THE KLAMATH LAKE SECONDARY HIGHWAY		
14082	Weyerhaeuser Timber Company	250.00

TYEE-SUTHERLIN SECTION OF THE ELKTON-SUTHERLIN HIGHWAY

13957	Ralph P. Getchell and Stella Getchell	$ 3,250.00
13960	Frank A. Bemis	750.00

SYLVAN SECTION OF THE SUNSET HIGHWAY

*13939	Mary H. Ross and Anna M. Algesheimer	40,000.00

FOOTNOTE:

* The offer of $40,000 approved by the Commission for the Mary H. Ross and Anna M. Algesheimer property needed for the Sylvan Section of the Sunset Highway was given very careful consideration by the Commission. In the discussion of this matter the Engineer explained engineering details that necessitate acquisition of the property and recommended approval of the condemnation proceedings to secure it. Chairman Banfield gave additional reasons for acquiring the property at this time.

After due consideration of this matter, the Commission authorized the condemnation of all the properties listed and approved the offers as recommended. Resolutions covering the matter, attached hereto, and marked EXHIBIT "B1", "B2", "B3", and "B4". and by this reference made a part hereof with like effect as though extended herein, were thereupon adopted by the Commission by unanimous vote.

A delegation consisting of Messrs. Raymond Hoyt, of the Regional Office of the National Parks Service, San Francisco; Harry B. Buckley, Assistant Supt. of Parks, Portland, and former member of the National Parks Service; C. P. Keyser, Supt. of Parks, Portland; and T. T. Munger, member of the Portland Chamber of Commerce's Recreational Resources Committee, appeared before the Commission at this time regarding a proposal that the State Highway Commission take over for state park purposes 6,000 acres of land in the Silver Creek Recreational Area which has been operated under Government supervision and control for some twelve years past, which matter recently was brought to the attention of the Highway Commission by the State Parks Superintendent. The Commission's Chief Counsel, Mr. J. M. Devers, outlined the situation briefly and pointed out certain features which are more fully explained in his report to the members of the State Highway Commission dated October 3, 1947 (for details see copy of report in general files). He particularly pointed out that the former Highway Commission, in 1934, went on record as being willing to maintain the property after the area had been developed by the Federal Government and it had been turned over to the State, either by lease or by deed, provided that is the only obligation it would incur. He suggested, in view thereof, that it would be advisable for the present Highway Commission to follow up the action of the former Highway

Commission if that can be done without any restrictions or handicaps in the manner in which the Commission operates the area.

Chairman Banfield advised that insofar as he personally is concerned the project itself is a commendable one; however, from available information, it appears that it is going to be a costly one for the state to take over, and there is a question whether the Highway Commission has authority to spend state highway funds for such an undertaking. It was his thought that the state should not be asked to acquire this property, or any other property, unless title is clear and there are no restrictions in the deed of conveyance that would handicap the Commission in operating it. He also gave as his thought that the basis on which the property is taken over by the state, if the state takes it over, should be worked out in advance. Mr. Hoyt gave as his belief that the Commission has been somewhat misinformed as to the intent of Congress in making it possible to transfer this area to the state. There was no intention whatsoever, he said, to require the state to follow the policies that have been set up by the National Parks Service for this project, and the only condition that the Government would make is that the area be operated for recreational and conservational purposes with the understanding that if it were not operated in such manner for a period of three years, then, at the discretion of the Secretary of the Interior, it would revert to the Government. He further stated that the State of Oregon would be under no obligation to operate the area in any particular manner-- that the State Highway Commission would have a free hand in establishing picnic grounds and other facilities or in doing anything else, including construction of hotels or lodges and the establishment of fees for the use of the premises. He added that the deed whereby the Government conveys the tract to the state would contain no restrictions whatsoever.

In reply to an inquiry from Commissioner Schaupp as to why the National Parks Service is endeavoring to get rid of the area, Mr. Hoyt stated that the project originated in the days when the Government had a relief program, and it was not intended then, nor is it intended now, that the Federal Government would go into the state recreation business which rightfully belongs to the individual states. Commissioner Chandler inquired as to what is meant by conservation, pointing out that the Highway Commission at some future time might consider it advisable to cut some of the overripe timber in the area. He was informed by Mr. Hoyt that the deed of conveyance from the Government to the state would contain no reference at all with respect to that feature except what might apply to the O & C lands, and in that case the O & C authorities might feel they were entitled to the income derived from such cutting, but other than that, the Government would have no objections to the state cutting the timber, although local people might have some feeling in the matter. As a result of further discussion, Mr. Hoyt agreed to furnish for the Commission's approval a form of deed conveying the property to the state. The Chief Counsel was thereupon instructed to examine the deed carefully when it is received and to report to the Commission his recommendations with regard thereto.

A telegram was presented from Mr. George F. Burr, Chairman of the Highway Committee of the Coquille Chamber of Commerce and Street Commissioner of the City of Coquille, calling attention to a hazardous condition which he states exists on the Oregon Coast Highway at its north entrance to the City of Coquille where accidents frequently occur because of a curve in the highway alignment. The telegram was referred to the Engineer for investigation and report.

The Engineer requested authority for Clarence B. Stanley, Radio Technician, to attend a meeting of the Northwest Section, American Police Communication Officers Association, in Tacoma, Washington, on October 22, 1947. He advised that the Association members are convening for the purpose of making a joint recommendation to the Federal Communications Commission for the allocation of radio frequencies and that it will be to the state's advantage if Mr. Stanley attends the meeting. He estimated the expense would not exceed $20. The Commission approved the request by unanimous vote.

The Assistant Counsel, Mr. DeSouza, brought up for consideration the matter of acquiring property from Mr. Ray Hageman at Ft. Hill on the Salmon River Highway, involving the granting of commercial access to the highway at this point. He advised that Mr. Hageman's property fronts on the Salmon River Highway and on a county road and at the present time he has access only from the county road which is a very unsatisfactory arrangement for the operation of his service station business. The proposed access, he said, would be about 50 feet distant from the intersection of those two roads and if the Commission grants this access, Mr. Hageman will deed to the state a strip of land ten feet wide extending from the county road to the approach to the Ft. Hill Bridge. He recommended approval of this arrangement. The Commission deferred action on the matter pending additional information and referred it to the Engineer and the Chief Counsel for a report on the following day. (Such report was rendered on the following day, at which time the Commission unanimously approved the arrangement as outlined.)

The Assistant Counsel also requested instructions with respect to the Commission's general policy regarding sales of land, particularly excess areas that have been acquired in connection with right of way transactions but which are of no value for state highway purposes. He pointed out that the Commission, in February 1946, ordered discontinuance of the sale of such properties and advised that he is bringing the matter up at this time only because of the many requests for the purchase of such tracts and the opportune time for selling them. In the discussion of this matter Chairman Banfield pointed out that the Commission is not desirous of retaining title to property that is not needed for state highway purposes, and if opportunities arise to dispose of it, it should be sold if the price is right; however, authority should not be requested from the Commission to sell any tract unless the sale is recommended by the Engineer and the Chief Counsel. Commissioners Schaupp and Chandler concurred in Chairman Banfield's statement, and it was so ordered.

A letter was presented from Messrs. Guy L. Earl and Harry B. McMillan, Cottage Grove, inquiring as to the possibility of purchasing a

small parcel of state-owned property located on the west side of the Pacific Highway between Madison Avenue and Quincy Avenue in Cottage Grove. They propose to erect a small building on the property to serve sandwiches to the traveling public. The Engineer and the Chief Counsel recommended that the request be denied because it would introduce another hazard for highway traffic. The Commission approved the recommendation.

The Commission had under discussion the sale of state-owned property in the City of Coos Bay to Mr. Karl Nichols, the property being described as portions of Lots 3 and 4, Block 28, Nasburg's Addition to Coos Bay. The Assistant Counsel, Mr. Neuner, explained that this property lies on the westerly side of the relocated Oregon Coast Highway and was acquired in 1940 in connection with a right of way transaction, it being necessary to purchase the whole of these two lots in order to obtain the right of way, notwithstanding that portions of the lots are not needed for highway purposes. He further explained that Mr. Nichols owns the property which lies between these lots and Kingwood Avenue and is particularly anxious to acquire only Lot 3, although he believed that he might also purchase Lot 4 if necessary to secure the other. He valued both fractional lots at $1,000 each and recommended that they be advertised for sale on the condition that right of access to the highway shall be denied. Mr. Neuner also mentioned that Senator William G. Walsh, who is handling the matter on behalf of Mr. Nichols, has requested the privilege for Mr. Nichols to meet the price of the high bidder for the property in the event his bid is not the highest of those received. He suggested that this privilege be granted, which is in conformity with the practice of the State Land Board, whose notices of sale contain provision that the owner of abutting property will be given the privilege of meeting the high bid. Commissioner Chandler gave as his thought that both lots should be sold together and that the deed of conveyance should contain provision that no vehicular traffic could enter the highway from the property. The Engineer advised that the property is not needed for state highway purposes. As the result of further discussion the Commission authorized the sale of both fractional lots as one parcel. They are to be advertised for sale, and, if the Chief Counsel can work out a satisfactory arrangement to protect the Highway Commission, Mr. Nichols is to be given the opportunity of meeting the bid of the high bidder if Mr. Nichols' bid is not the high one. Access to the highway from these lots is to be denied and there is to be secured from Mr. Nichols right of access to the highway from Lots 1 and 2. The Commission's decision was unanimous.

The Commission recessed for luncheon from twelve o'clock noon to 2:00 p.m., at which time the meeting reconvened with the same persons present and participating.

Chairman Benfield brought up for discussion protests that have been received by the Highway Commission that the uncompleted portion of the Alsea Highway has not been improved. He explained for the benefit of Commissioner Chandler and members of the press present, that when the Postwar Program was in the process of formulation, the Commission made several trips throughout the state to secure from the county courts lists of the projects that they would like to have included, there being three types of money available for

expenditure- - state money, Federal Aid money, and Forest Highway money. It so happens, he said, that certain highways were, and still are, eligible for Forest Highway funds, and the Commission was endeavoring to arrange for the use of such funds to finance their improvement, there being no indication at that time that such class of funds would not be immediately available; however, it has developed since then that the Congress did not see fit to appropriate additional Forest Highway funds, and as a result thereof, numerous Forest Highway projects have had to be postponed, the Alsea Highway project being in this category. He expressed regrets that this project could not go forward as originally planned and gave as his thought that the project should be revived just as soon as addiditional Forest Highway monies are made available. Commissioners Schaupp and Chandler concurred.

Mr. Malcom Hawke, State Highway Department Auditor, was present in regard to the discussion begun at the previous meeting relative to the appointment of an auditor under the provisions of Chapter 359, Oregon Laws, 1947. Chairman Banfield advised that the Commission has decided that it would be advisable, before making the appointment, to have the accounting activities of the department analyzed by some competent outside party with a view of recommending a clear line of demarcation between the functions of the Auditing Department and the Engineering Department that will enable the Commission to fix the responsibilities of each department, including the submission of financial reports, cost information, etc. Commissioners Schaupp and Chandler concurred in this statement. The matter of appointing such an outside accounting firm was deferred until later in the session. (This matter was reconsidered on the following day, at which time the Commission voted unanimously to employ the firm of Whitfield, Stratford & Co., Certified Public Accountants, Pacific Building, Portland 4, Oregon, to make the study and recommendation.)

The Engineer presented for the information of the Commission a progress statement covering the Three Year Postwar Construction Project, showing details and summary of the following: Projects completed, October 15, 1947; projects under contract but not completed, October 15, 1947; projects remaining to be contracted, October 15, 1947, and the amounts allotted, contract authorization, and present estimated cost of each project. The Commission approved the report and ordered that copies of it be given to the press.

The Commission discussed and unanimously approved a form of resolution which was prepared by the Chief Counsel and entered in the minutes of the special meeting of August 11, 1947, covering the appointment of Mr. W. C. Williams as First Assistant State Highway Engineer, Mr. W. W. Stiffler as Second Assistant State Highway Engineer, and Mr. G. W. Neuner as Assistant Counsel.

The Engineer reported on the petition from the S. W. Neighborhood Council, Portland, for the construction of a pedestrian overcrossing of S. W. Front Avenue at its intersection with S. W. Hooker Street. He explained details as contained in his written report to the State Highway Commission dated October 16, 1947, (see copy of report in general files) and recommended construction of such an overpass in the interests of the safety of school children attending the Failing School and for others who find it necessary to

cross this four-lane thoroughfare. He estimated the cost of the structure at about $22,000. The Engineer pointed out that if this overpass is constructed, the school board will maintain school-boy patrols to see that the school children use it. He mentioned that the design of the structure provides for ramp approaches for the convenience of people who have to cross the highway with small-wheeled vehicles and that a wire guard will be constructed along the handrail to prevent the dropping of articles on highway traffic below. Chairman Banfield gave as his feeling that the overpass is a necessity to safeguard school children and others who are obliged to cross this four-lane fast traffic highway. The Commission unanimously approved the construction of such overpass, subject to the condition that it meets with the approval of the school authorities. The Engineer was authorized to proceed with construction of the structure as soon as a written agreement has been reached with the school board. The Chief Counsel was instructed to prepare an appropriate form of agreement covering the entire matter.

The matter of vacating a portion of Edward Street in the Bunker Hill District of Coos Bay had the attention of the Commission. The Engineer presented a map showing the proposed change that, in his estimation, would meet all requirements. He explained that this provides for the vacation of a strip 20 feet wide on the west side of Edward Street, extending from its junction with the Oregon Coast Highway northerly to a point 50 feet south of Newport Avenue, route of the Coos River Secondary Highway, and for widening the intersection of these two streets so as to permit vehicles to enter Edward Street safely from Newport Avenue. He recommended approval of the vacation of the strip and that he be authorized to widen and otherwise improve the intersection. He was unable to give an estimate of the cost of the work at this time. Commissioner Chandler gave as his thought that the plan as explained will satisfy everyone concerned, including those who have objected to the vacation of any part of this street. After careful consideration, the Commission by unanimous vote approved both the vacation of the 20 foot portion of this street, as recommended, and the widening work mentioned by the Engineer, subject, however, to the condition that the cost of such work will not be exorbitant. The Engineer was instructed to prepare an estimate of cost and report to the Commission for its final decision before proceeding with the work. The Chief Counsel was instructed to defer vacation proceedings until the Commission's final decision has been rendered with respect to the construction work.

The Engineer reported that in connection with the widening of the Oregon City-New Era Section of the Pacific Highway East to provide for four lanes of traffic it will be necessary to detour traffic over a county road because it will be extremely difficult to keep the highway open to traffic during construction operations; moreover, it would be very expensive to the contractor to maintain even one-way traffic during such period and such expense would be reflected in his bid. A detour route is available, using the county road known as the South End Road, which is surfaced to a width of 18 feet and is capable of handling the traffic providing a minor amount of widening work and some other repairs, estimated to cost a total of $20,000, are done. He requested authority to make this expenditure, and to spend

about $8,000 immediately for certain repair work that should be done while weather permits and before the contract for the highway improvement, bids for which are to be received by the Commission at the November meeting, is awarded. The Commission approved the request by unanimous vote on motion of Commissioner Chandler, which was seconded by Commissioner Schaupp, subject to the condition that a satisfactory working arrangement can be consumated with the County Court of Clackamas County. The Engineer and the Chief Counsel were instructed to confer with the County Court relative thereto.

The Engineer also reported on the request of the City of Sheridan for the improvement of the Salmon River Highway in this town from Bridge Street to the east city limits. He advised that, pursuant to the Commission's instructions, he has made an engineering investigation of this matter and ascertained that the improvement consists of widening the existing street to a width of 46 feet and the construction of curbs and storm sewers, all of which is estimated to cost about $57,000. He pointed out the possibility that ultimately highway traffic will be divided in this town by routing westbound traffic over East Yamhill Street and eastbound traffic over Main Street, the present route, although such project is not required for several years. To improve Yamhill Street to proper highway standards, he said, would cost approximately $126,000. He recommended approval of the improvement of the present highway, estimated at $57,000, in the next construction program and that consideration be given by the Commission at some future time to the designation of Main Street and Yamhill Street as one-way traffic streets. Chairman Banfield gave as his thought that this is one of the projects which the Commission could well consider in adoption of its 1948 Minor Betterment Program without authorizing an expenditure of money at this time. He also gave as his thought that the Commission should know just what the city authorities of Sheridan are willing to do with regard to the adoption of the two-way street plan before a commitment is made by the Commission in that regard. Commissioners Schaupp and Chandler concurred, whereupon the Engineer and the Chief Counsel were instructed to confer with the Sheridan City Council relative thereto.

A report was rendered by the Engineer on the request of Mr. George Gray, President of the Lower Columbia River Logging Association, and the Seaside City Council for alterations in the traffic channelization installation at the junction of Roosevelt Drive with the Oregon Coast Highway at the north city limits of Seaside. The Engineer advised that the matter has been investigated, and, in his estimation, a satisfactory solution of the problem could be had by rearranging the stop signs so as to require traffic to stop before entering the highway and by constructing a "refuge" for highway traffic entering Roosevelt Drive from the north. A study of the accident experience ratio at this location, he said, reveals that a blinker or flashing light is not justified. The solution as offered did not appear satisfactory to the Commission because it did not provide satisfactorily for protection of southbound highway traffic entering Roosevelt Drive. In view thereof, the Commission deferred action on the matter until a future meeting. The Engineer was instructed to give the matter further study.

The engineer reported on the request of Mr. Frank L. Calise, Secretary-Manager of the Vale Chamber of Commerce, that additional signs be erected on the Old Oregon Trail at Cairo Junction, near the City of Ontario, for the purpose of directing motorists to Portland via alternate routes especially via US20 through Vale. He advised that it is not practical to install signs containing lists of mileages and alternate routes to a destination at important junctions because of their tendency to confuse the motorists, who would have to stop and study the signs carefully before selecting a route. He recommended that no change be made in the present policy covering such matters and that no change be made in the signs now being maintained at this junction. The Commission approved the recommendation unanimously.

The Commission discussed the report of the Engineer on the wording to be placed on two textboards which groups have requested be erected on state highway rights of way at historic locations, one being the request of the Official Board of the Church of Christ at Pleasant Hill, Lane County, for such a textboard on the Willamette Highway at Pleasant Hill and the other being a request of the Oregon Council, American Pioneer Trails Association, for a historic marker at Olds Ferry on the Old Oregon Trail, Malheur County. The Engineer presented texts for these markers, as follows, and advised that they have been approved by the Memorials Committee of the Oregon Historical Society:

BRISTOW MONUMENT

Elijah Bristow, a veteran of Andrew Jackson's army, erected his cabin here on Pleasant Hill in 1846 -- earliest year of settlement in Lane County. He and his wife Susannah then led in establishing the county's first church and first school. This replica of their fireplace is from the original stones.

OLDS FERRY

Olds Ferry -- final crossing of the Snake on this branch of the Oregon Trail -- was operated one mile north of here from the early 1860's until 1882, and at this point from 1882 until completion of the modern highway. Here wagon trains from the East met gold-seekers and settlers from the West. R. P. Olds was one of the original ferrymen during the Idaho gold rush.

The Commission by unanimous vote approved the wording as reported and thereupon authorized erection of the markers.

The Engineer reported on the cost to purchase right of way for a revision of the Pacific Highway through the town of Cottage Grove, Lane County, particularly that needed across property owned by the Ed Jenks Estate where the highway location parallels the railroad in the northern part of this town. The estimated cost of the Jenks Estate property, he said,

is $42,000 and the cost to acquire the entire right of way through the town of Cottage Grove is $186,177. He pointed out that the eventual permanent location of this highway will probably not follow this alignment because present tentative plans are to reroute the highway at this place. In view thereof, he recommended that the right of way not be purchased at this time. The Commission approved the recommendation.

The Engineer reported the results of receiving bids in Salem on September 8, 1947, for the sale of buildings in the town of Monument and for the sale of a residence building in the City of Klamath Falls, as follows:

SALE OF BUILDINGS AT MONUMENT

J. Dempsey Boyer, Monument	$240.00
Earl Sweek, Monument	116.00
Clyde Jackson, Monument	75.00

SALE OF RESIDENCE BUILDING AT KLAMATH FALLS

W. J. Easter, Klamath Falls	$375.00
M. E. Palmer, Klamath Falls	155.00
John Lampert, Klamath Falls	101.50
Ray T. Kann, Klamath Falls	50.00
William J. Paull, Klamath Falls	50.00

The Engineer recalled that the Commission, on September 10, 1947, approved, over the telephone, the recommendation of Mr. W. C. Williams, Acting State Highway Engineer, and Mr. J. M. Devers, Chief Counsel, that the offer of Mr. J. Dempsey Boyer for the buildings at Monument and the offer of Mr. W. J. Easter, for the purchase of the building at Klamath Falls be accepted. He asked the Commission to confirm the action for the records. The Commission by unanimous vote approved the sale of the buildings to Mr. Boyer and to Mr. Easter.

Consideration was also given by the Commission to the bids received in Salem on October 6, 1947, for the sale of a tract of land at Junction City, Lane County. The Engineer reported only one bid received for this property, being that of Camarann Corporation, Junction City, at $100. The appraised value of this property, he said, is $1,624. He recommended rejection of the offer. The Chief Cousel concurred. The Commission approved the recommendation.

The Engineer reported the results of taking bids in Salem on October 17, 1947, for the sale of buildings at McNamar's Camp on the Wilson River Highway, as follows:

SALE OF BUILDINGS AT McNAMARS CAMP

Item	Bidders	
	J. E. Bateman, Gales Creek	Sullivan Wrecking Co., Portland
Building No.1	$ 106.00	
Building No.2	72.00	Lump sum bid for all buildings
Building No.3	106.00	$ 77.77
Building No.4	31.00	
	$ 315.00	$ 77.77

The appraised value of the buildings, he said, is $165. He recommended acceptance of the offer of Mr. J. E. Bateman, the high bidder, in the amount of $315 for all of the buildings. The Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Engineer presented a tabulation of the high bids received in Salem on October 6, 1947, for the purchase of used equipment and scrap materials stored at the Highway Department Shops at Salem, Coquille, Klamath Falls, La Grande, and Astoria. He recommended action by the Commission as follows with respect thereto:

*(1) Sale of used equipment, Salem (68 items)

Recommendation: Accept the offer of the high bidder for each of the 68 items listed. In the case of Items 47 and 48, where identical high bids were submitted by two bidders, the successful bidder is to be decided by some means satisfactory to both bidders.

*(2) Sale of scrap metals, batteries, tires, etc., Salem (12 items)

Recommendation: Accept the offer of the high bidder for each of the first 11 items listed and reject all bids for Item No. 12, scrap lumber.

*(3) Sale of used equipment, Coquille (11 items)

(Con't)

*(3) Sale of used equipment, Coquille (11 items)

Recommendation: Accept the offer of the high bidder for Items 1,4 and 5; reject all offers received for Items 2 and 3; no bids received for Items 6-11, inclusive.

*(4) Sale of scrap metals, batteries, tires, etc., Coquille (4 items)

Recommendation: Accept offer of Marshfield Bargain House, Coos Bay, for all items.

*(5) Sale of used equipment, Klamath Falls (13 items)

Recommendation: Accept the offer of the high bidder for each item listed.

*(6) Sale of scrap metals, batteries, tires, etc., Klamath Falls (8 items)

Recommendation: Accept offer of the high bidder for Items 1, 2, 3, 4, 5 and 6. No bids received for Items 7 and 8

*(7) Sale of used equipment, La Grande (16 items)

Recommendation: Accept the offer of the high bidder for Items 2, 15 and 16. Reject offers for all other items.

*(8) Sale of scrap metals, batteries, tires, etc., La Grande (9 items)

Recommendation: Accept the offer of the high bidder for each item. There being identical high bids for Item 4, the successful purchaseris to be decided by lot or by some other means satisfactory to both bidders

*(9) Sale of scrap metals, parts, etc., Astoria (7 items)

Recommendation: Accept the offer of the St. Louis Junk Co., Astoria, for each item.

FOOTNOTE: (*)

For details with respect to the offers submitted for the items advertised for sale at each of the above-mentioned points, see tabulations of bids on file in the office of the State Highway Commission, Salem.

In this connection and for the purpose of the records, the Commission confirmed telephonic authority heretofore given the Engineer to advertise for bids for the purchase of all of the used equipment and scrap materials reported above.

The Engineer presented the offer of the Knappton Towboat Company, Portland, to purchase, for the sum of $5,500, the old ferry, "North Beach" now stored at Astoria, as the result of private negotiations heretofore authorized by the Commission. He recalled that the Commission advertised this ferry for sale on July 21, 1947, but received no bids and thereafter authorized him by telephone to negotiate the sale privately, if possible, the offer of the Kanppton Towboat Company being the result thereof. He asked the Commission to confirm the telephonic authority given him to negotiate the sale privately and recommended acceptance of the Knappton Towboat Company's offer.

The Commission approved the request and recommendation and thereupon, by unanimous vote, adopted the following resolution with regard to the sale of the ferry, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler:

WHEREAS, the State Highway Engineer has recommended that the Commission sell the Ferry "NORTH BEACH", and

WHEREAS, upon inviting bids therefore, no bids were received, and

WHEREAS, the Engineer has negotiated a sale thereof to the Knappton Towboat Company, and said Company has made an offer in the amount of Five thousand five hundred and no/100 ($5,500.00) Dollars, and it appears that said ferry with its appurtenances is no longer needed for State Highway purposes,

NOW, THEREFORE, Be it and It Hereby is Resolved by the Commission, all members being present and voting affirmatively, that the Commission sell to the Knappton Towboat Company of Portland, Oregon the Oil Screw Vessel known as the "NORTH BEACH", for the sum of Five thousand five hundred and no/100 ($5,500.00) Dollars, and the Secretary be and he hereby is directed to prepare and have executed such documents of transfer papers as may be necessary to effect such transfer.

The Engineer reported an inquiry from Mr. Herman Oliver, John Day, former State Highway Commissioner, concerning the further improvement of the Ochoco and John Day Highways between Prineville and Vale in the Commission's Postwar Program. He said that Mr. Oliver is particularly interested in the Ochoco Highway construction, for which an amount of $323,000 of Federal Aid Funds was set up in the original Postwar Program, his concern being whether or not the transfer of this fund to the Warm Springs Highway, as approved by

the Commission, will act in any way to retard construction of the Ochoco Highway from the Mouth of Marks Creek easterly to a junction with the present road. He further stated that he advised Mr. Oliver concerning the status of Forest Highway Funds, that due to the failure of Congress to make an appropriation for this class of highway work, the Forest section had to be postponed and that the Commission, in view thereof, thought it best not to construct the state's portion, which is to be financed with Federal Aid monies, until the entire work can be done simultaneously, the state's section being of no value for public use until the Forest Highway section is completed; moreover, the Commission thought that it would be advisable to transfer the funds to the Warm Springs project in order to avoid tying up the Federal Aid Funds indefinitely and to expedite completion of the Warm Springs Highway. The Engineer gave as his understanding that it was the Commission's intention to revive the Ochoco Highway project just as soon as Congress appropriates additional Forest Highway Funds; however, that particular point is not clearly indicated in the minute record of the Commission's action taken on July 21 and 22, 1947. He suggested, therefore, that the Commission take action at this meeting clarifying the point so he can pass authentic information on to Mr. Oliver.

Chairman Banfield stated that this transfer of funds was made by the Commission only as a temporary expedient because the Ochoco Forest Highway project could not go forward as planned and the Commission did not wish to build the adjoining section of road until construction of the Forest Highway section can go forward, and that as soon as additional Forest Highway Funds are made available it is the intention of the Commission to revive the Ochoco Highway project and carry it forward to completion without delay. Commissioners Schaupp and Chandler concurred. A resolution, attached hereto and marked EXHIBIT "C", and by this reference made a part hereof with the same effect as though extended herein, was thereupon adopted by the Commissio by unanimous vote.

The Engineer requested authority to construct two small three-room cabins, estimated to cost $3,000 each, to house maintenance employees at Odel Lake. He advised that he has been unable to recruit a crew sufficiently larg to carry on the winter maintenance operations on this highway because housing conditions are very critical at this place, which is now undergoing a ver rapid expansion in the lumber and timber industries, and it was his thought that building these two small cabins would remedy the situation.

He also requested authority to construct a frame building 32 feet by 76 feet in dimension for equipment storage purposes on state-owned property adjacent to the Columbia River Highway near the west city limits of Hood River. He estimated the cost of such building at $15,000. For several years he said, the Commission has rented quarters located in the heart of the residential section of Hood River from Hood River County, but this building is in a bad state of repair and the county will not do anything to fix it; moreover it constitutes a definite fire hazard because of the oil and grease which leak through the main floor of the building; however, the most serious objection is the fact that there is no room for storage on the premises and the building itself will accommodate only three small trucks.

He pointed out that the Commission, in its 1947 Budget, allowed $200,000 for building construction, of which amount, he said, the total estimated expenditures will not exceed $111,500, including the buildings which he is now requesting authority to construct. Following discussion the Commission by unanimous vote approved construction of all three of the buildings as requested by the Engineer.

The Commission discussed with the Engineer bids received at the morning session and took the following action thereon by unanimous vote:

The contract for the grading and oil mat surfacing of the Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County, was awarded to the Inter City Sand and Gravel Co., of Eugene, the low bidder.

Bids received for grading and paving the Roseburg-Dixonveille Section of the North Umpqua County Road, in Douglas County, were referred to the Engineer with authority to award the contract to the low bidder when clearance of the award has been received from the Public Roads Administration.

All bids received for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, in Wasco County, were rejected as being too high

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Roseburg-Dixonville Section of the North Umpqua County Road, Douglas County. 4.39 miles of grading and paving. Leonard & Slate, Oreg. Ltd., Portland, submitted the low bid for this work in the amount of $298,882. The second low bid was that submitted by J. C. Compton Co., McMinnville, at $306,894.50. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Leonard & Slate, Oreg. Ltd., when certain conditions have been satisfied.

"Grading and oil mat surfacing on the Crane-Princeton Section of the Diamond Valley Secondary Highway, Harney County. Inter City Sand & Gravel Co., Eugene, submitted the low bid for this work in the amount of $164,840.50. A. H. Saxton & Sons, Corvallis, submitted the next low bid in the amount of $167,838. There were three higher bidders. The Commission has awarded this contract to the low bidder, Inter City Sand & Gravel Co., at its bid price.

"Clearing the Clear Creek-Forest Boundary Section of the Warm Springs Highway, in Wasco County. The Commission received four bids for this project but has rejected all of them because it considers them too high."

The Commission discussed a letter from Mr. Frank L. Beadle, Colonel, Corps of Engineers, U. S. War Department, concerning a proposed dam on the Snake River about 16 miles downstream from Homestead, Oregon,

particularly inquiring as to the possible need of a permanent high-level access road to the site from Oregon State Highway No. 86 near Halfway, Oregon, and the need for a highway bridge over the dam proper. The Engineer advised that this matter would entail considerable amount of study and conference among the highway officials of the states of Washington, Idaho and Oregon and the county courts of the counties adjacent thereto, as well as with the Army Engineers. He suggested that the Chief Counsel and he be authorized to discuss the subject with these agencies, which will enable him to render an intelligent report to the Commission on the subject. The Commission approved the suggestion unanimously.

A letter was presented from the City of West Salem, pointing out the need for better means of communication between West Salem and Salem and requesting construction of a new bridge across the Willamette River between these places to alleviate the condition. The Engineer advised that a comprehensive study is being made of the situation at this point under previous authority of the Highway Commission, but the study has not been completed and he is not in position to report at this time. The Secretary was thereupon instructed by the Commission to so inform the West Salem city officials.

A petition signed by 235 persons requesting the State Highway Commission to construct a roadway some 350 feet in length along a rock bluff at Corbett for the petitioners' use had the attention of the Commission. The Engineer advised that this matter has been investigated and that the cost to construct the roadway is estimated between $12,000 and $26,000, depending upon the width of roadway desired. This investigation, he said, revealed that the road would be used by only two people, both of whom own small residences one-half mile west of Corbett. The Engineer also advised that these people petitioned the Public Utilities Commissioner for a grade crossing at the Union Pacific railroad tracks in order that they might have access to the new Columbia River Highway, but the petition was denied. He recommended that the Commission also deny the request for construction of the road because, in his estimation, it is a private matter and not within the province of the State Highway Commission. The Commission approved the recommendation.

The Commission considered and denied a request from residents of Beverly Beach, Oregon, for an overpass over the Oregon Coast Highway at this beach, for the accommodation of "older persons", upon advice of the Engineer that such an overpass would cost about $4,000. The Commission's action was taken by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

The Secretary presented a petition from residents of Bates, Oregon, requesting the improvement of the Austin Spur Section of the John Day Highway. The Engineer advised that this road is about 2 1/2 miles in length and extends from the John Day Highway to the town of Austin; that investigation reveals that it is in need of repair, which he has already ordered as a temporary expedient to alleviate conditions until a better job can be done. The road, he said, should be oiled, and he recommended that the Commission consider, in the formulation of its next construction program, an appropriation of $40,000 for this purpose. The Commission approved the action already taken

by the Engineer in this matter and instructed him to bring the oiling project to the Commission's attention with a report when the next program is prepared.

A resolution was presented from the Washington County Farmers Union requesting improvement and widening of the Tualatin Valley Highway between West Slope and Forest Grove. The Engineer estimated the cost of widening this highway for four lanes of traffic, utilizing the existing right of way at $904,000. He pointed out that the widening of the West Slope-Beaverton Section for four-lane traffic is included in the Three Year Postwar Program as a first-year project, also, that the Commission is now widening the Dairy Creek Bridge west of Hillsboro in order to eliminate a traffic hazard at that point; furthermore, the rock shoulders on each side of the pavement are being oiled for a width of three feet as a further aid to traffic safety. It was his thought that any further improvement of this highway should wait until the Sunset Highway has been opened to general public use, when it can be ascertained whether or not further relief will be needed on the Tualatin Valley Highway, and he so recommended. The Commission approved the recommendation.

The Secretary presented a resolution from the County Court of Malheur County requesting the selection and designation as a state secondary highway of an extension to the Adrain-Caldwell Secondary State Highway No. 454, beginning at a point on the Oregon-Idaho State line in the quarter section corner common to Sections 31 and 6, Townships 21 and 22 South, Range 47 East, W. M., thence southerly along the Oregon-Idaho line approximately 0.6 mile to a junction with the county road in Canyon County, Idaho, approximately 0.1 mile north of the Snake River. He also presented a form of agreement between the State of Oregon, acting through its State Highway Commission, and the State of Idaho, acting through its Department of Public Works, providing for the improvement of such road jointly by both states on a 50-50 basis and pointed out that this agreement has already been accepted, approved and signed for and in behalf of the State of Idaho by its Commissioner of Public Works. It was explained that this matter was before the Highway Commission at its meeting on June 16 and 17, 1947 and at that time the Commission approved the construction of this road on the condition that the State of Idaho would pay one-half the expense of construction and maintenance and that the Malheur County Court would agree to the extension of the secondary highway and to the arrangement between the two states. The Commission considered that the conditions incident to the designation and construction of this road have been satisfied and thereupon approved the county court's resolution. A resolution, marked EXHIBIT"D", attached hereto and by this reference made a part hereof with like effect as though extended herein, designating this secondary highway extension was thereupon adopted by the Commission by unanimous vote. The agreement with the State of Idaho covering construction of the road was signed by the Commission on the following day.

The Commission discussed a letter from the Klamath Saddle Club, Klamath Falls, requesting improvement of the road leading to the Lake of the Woods recreational area. It appears that the State Highway Commission is being criticized for not improving the road, which, for the most part, is

not under its jurisdiction, and were the state to construct its portion to the proper standards, it still would be far from a good road. Commissioner Schaupp pointed out that this road, if and when constructed, will provide a much better route for travel between Medford, Ashland and Klamath Falls than the present Green Springs Highway route, and, in his estimation, the Commission will have to consider it in formulating its next construction program. As the result of considerable discussion, the Commission voted unanimously to consider the improvement of this road among others in the formulation of its next construction program on the condition that Klamath County and the U. S. Forest Service, which has jurisdiction over the major portion of the route, will improve their respective sections. The Commission ordered that people inquiring as to the road be informed of the action taken and that the highway will not be a good road throughout its entire length unless the other agencies do their part.

A letter was presented from Mr. P. A. Dale, President, John Day Chamber of Commerce, requesting the surfacing of the Dads Creek-Dixie Summit Section of the John Day Highway, in Grant County. The Engineer advised that this project is in the Postwar Construction Program but cannot go forward because of the lack of Forest Highway monies with which to finance the work. The Commission ordered that Mr. Dale be informed why this project cannot go forward as planned and that as soon as Congress provides additional Forest Highway monies construction will be commenced without unnecessary delay.

The Commission also discussed a letter from Mr. Dale concerning the improvement of the John Day Highway between Mt. Vernon and John Day. The Engineer advised that this project is estimated to cost $250,000 and has not been approved by the State Highway Commission for any program because it is too big to handle under present circumstances. The Commission ordered that Mr. Dale be so informed.

A letter was presented from Mr. Harry A. Dempsey, Rickreall, requesting the widening of the bridge over Rickreall Creek on US99W just south of the town of Rickreall. The Engineer estimated that it would cost about $62,000 to widen this structure. He pointed out that the bridge is not located on the route of the survey for the permanent improvement of the highbetween Rickreall and Monmouth, so the money expended for the widening work would be lost if the new highway is constructed as planned. He recommended, in view of the circumstances, that the request be denied. The Commission approved the recommendation by unanimous vote, it being the Commission's thought, in view of this possible future line change, that the expenditure at the present time is not justified.

A communication was presented from the Political Action Committee of Northwest Oregon, Astoria, requesting the following: (1) Oiling of the county road which extends from Vernonia to a junction with the Sunset Highway, (2) action by the Highway Commission to eliminate confusing neon signs and other forms of advertising along state highways, (3) installation of telephones along state highways for emergency use.

The Engineer advised that the oiling of the county road has been provided for in the Postwar Program and that present plans are to advertise it for bids next spring. As to the second request, the Engineer advised that the Chief Counsel is now investigating such signs to ascertain whether or not they are legal. In this connection the Commission instructed the Chief Counsel to advise the Commission in writing as to its authority to control signs along and adjacent to state highways. As to the third request, the Commission declared its willingness to find locations on state highway rights of way for the installation of emergency telephones if the telephone companies will furnish and install the telephone instruments.

The Chief Counsel reported that a number of illegal signs are being maintained on private property adjacent to the Stoiwer Hill-Albany Section of the Pacific Highway East by Tripp and Tripp, Realtors, Albany, notwithstanding that the deeds which the Highway Commission obtained from the from the property owners include provision that advertising signs shall not be erected within a distance of 300 feet of the highway right of way line. He was instructed by the Commission to see that the signs are removed.

The Engineer reported that the City of Umatilla has fulfilled the requirements with respect to the expenditure of its share of the 1944 State Tax Street Funds which it received in 1945 and that the plans for the improvements to be financed with such funds have been checked and found satisfactory. He recommended, in view thereof, that the plans be approved by the Commission. The Commission approved the recommendation and by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler, adopted the resolution attached hereto and marked EXHIBIT"E" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer also reported that the City of Powers has fulfilled the requirements with respect to the expenditure of its share of the 1945 State Tax Street Funds that it received in 1946 and that the plans of the improvement proposed to be financed with such funds have been checked and found satisfactory. He recommended that they be approved by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "F" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer also reported that the cities of Scotts Mills and Umatilla have fulfilled the requirements with respect to the expenditure of their shares of the 1945 State Tax Street Funds which they received in 1946 and that the plans for the respective improvements contemplated to be financed with such funds have been checked and found satisfactory. He recommended that they be approved by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT"G" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer also reported that the following cities and towns have fulfilled the requirements with respect to the expenditure of their

shares of the 1946 State Tax Street Funds that they received in 1947:

Carlton	Echo	Huntington	Monument
Creswell	Garibaldi	John Day	Powers
Eastside	Harrisburg	Monroe	Willamina

He further advised that the plans of the improvements that are to be undertaken with such funds have been checked and found satisfactory, and he recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "H" and which by this reference is made a part hereof with like effect as though extended herein.

The Egnineer advised that the following cities and towns have also fulfilled the requirements with respect to the expenditure of their shares of the 1946 State Tax Street Funds that they received in 1947:

Cave Junction	Gold Hill	Ocean Lake	Summerville
Dundee	Hubbard	Paisley	Turner
Empire	Lostine	Sisters	Umatilla

He further advised that the plans for the improvements contemplated with such funds have been checked and found satisfactory. He recommended their approval by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT"I" and which by this reference is made a part hereof with like effect as though extended herein.

A letter was presented from Mr. Robert E. Borland, City Manager, Silverton, Oregon, requesting engineering assistance from the State Highway Department in preparing plans and specifications and in advertising for bids for the construction of a steel and concrete deck bridge, including approaches, over Silver Creek on a city street known as James Avenue, in Silverton. The Engineer advised that the law provides for the furnishing of such service to counties free of cost; however, no provision is made for the furnishing of such service to the cities. He recommended, in view thereof, that the Commission approve rendering such service on the condition that the state will be reimbursed for expenses incurred in connection therewith. He advised that a similar request has been received from Mr. Vernon Thorpe, City Superintendent, Medford. In this instance the city is requesting that the State Highway Department design a bridge to cross Bear Creek on a city street known as Jackson Street. He recommended that this request also be approved on the condition that the state will be reimbursed for the expense incurred. Following discussion, the Commission ordered that both cities be informed that if they wish to employ State Highway Department engineers to perform this service for them, the Commission will approve such an arrangement if the cities will agree to reimburse the State Highway Department for expense incurred in rendering such service.

A letter was presented from Hon. H. D. Kerkman, County Judge of Washington County, requesting, on behalf of the County Court, that the State

Highway Department furnish a bridge inspector to supervise, in a general way, construction of "Rood" Bridge over the Tualatin River on County Road No. 266 about 2 1/2 miles southeast of Hillsboro, the contract for which was awarded by the County Court on September 3, 1947, as the result of bids being received by the State Highway Commission on August 26, 1947. Judge Kerkman advised that the county will reimburse the state for actual expenses incurred by the Highway Department in connection with this operation. The Engineer recommended approval of the County's request. The Commission approved the recommendation unanimously.

The Commission discussed a letter from Lions Club International, Ontario, Oregon, requesting that the State Highway Department join with the citizens of Ontario in constructing a sidewalk along the east side of S. W. 4th Street south of S. W. 4th Avenue in order to provide for the safety of Ontario school children in crossing the business area and in going to and from school. The state's share would consist of construction of such sidewalk along the westerly side of the Highway Section Maintenance Headquarters in this town. The Engineer advised that the Highway Department's property fronts this street for a distance of 250 feet and that the estimated cost to construct the sidewalk is $325. He recommended approval of the request and that the sidewalk be constructed as a Minor Betterment Project at such time as the other property owners who are concerned have constructed their respective shares. The Commission approved the recommendation unanimously.

A communication was presented from the Grants Pass Planning Commission requesting the widening and realigning of the Redwood Highway from the Grants Pass city limits to and including the Applegate Bridge. The Engineer advised that this section is about seven miles long and that a survey of the section has never been made. He roughly estimated that it would cost between $225,000 and $250,000 and stated that to provide a more accurate estimate would necessitate a survey costing about $8,000, although a reconnaissance survey could be made for about $500. The Engineer gave as his opinion that the present road is in pretty fair condition except for the Applegate Bridge, which is rather narrow, and he inquired as to the wishes of the Commission. The Commission authorized and instructed the Engineer to make a reconnaissance survey of the project and to report the results thereof.

The Commission considered and approved an agreement with Albert W. Denton, dba Denton Construction Company, concerning construction of the Ashland Section of the Pacific Highway, State Highway Contract No. 2888, particularly the paving work involved which is to be done with state forces and equipment because of the inability of the contractor to make other arrangements and it being essential that this work be completed before the rainy season begins. This agreement provides that payment for the work shall be deducted from the contractor's monthly estimates. (The agreement was signed by the Commission on the following day.)

The Engineer reported that he has awarded the following contracts, bids for which were received by the Commission on August 25 and 26, 1947 and referred to him at that time with power to award the contracts when certain conditions had been satisfied.

Grading and paving on the Pringle Corner-McMinnville Section of the Salmon River Highway and Pacific Highway West, in Yamhill County; bids received August 26, contract awarded September 4 to low bidder, Leonard & Slate, Oreg. Ltd., O. C. Yocom Co., and J. C. Compton Co.

Grading and bituminous macadam construction on the Juniper Butte-Crooked River Section of The Dalles-California Highway, in Jefferson County; bids received August 25, contract awarded September 4 to the low bidder, M. L. & C. R. O'Neil

Grading and roadbed topping on the Anderson Valley and Swamp Creek Sections of the Diamond Valley Secondary Highway, in Harney County; bids received August 26, contract awarded September 4 to the low bidder, Geo. F. Corliss.

Construction of a concrete bridge over Rock Creek on the Clackamas Secondary Highway, in Clackamas County; bids received August 26, contract awarded September 17 to Lindstrom Bros., the low bidder.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer reported that the surveys for the following sections of state highway have been completed and asked the Commission to approve them as the permanent routes of such highway sections:

Anderson Valley and Swamp Creek Sections of the Diamond Valley Secondary Highway, Harney County;

Tyee Road-Sutherlin Section of the Elkton-Sutherlin Secondary Highway, Douglas County;

Denny Creek Section of the Klamath Lake Secondary Highway, Klamath County;

Meadowbrook-Red Bridge Section of the Starkey Secondary Highway, Union County.

After due consideration of the report of the Engineer with respect to the surveys under discussion, and upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler, the Commission approved and adopted the surveys by the adoption, by unanimous vote, of the resolution marked EXHIBIT "J", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The matter of adopting resolutions covering changes, additions, deletions etc. in the original construction programs was brought up for discussion. The Commission ordered that hereafter, when such alterations are authorized by the Commission, formal approval of the alterations shall be given by appropriate resolution.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

Slate Construction Co., Contract No. 2744 for slide correction on the Toll Creek-Snow Creek Section of the Santiam Highway, in Linn County, requested an additional extension of time of 276 days, from October 31, 1946, to August 1, 1947, within which to complete this job. The contractor alleged that clearing operations required in connection with this contract could not be completed until the U. S. Forest Service contractor had removed certain timber located within the boundaries of the highway contract which prevented necessary clean up of the premises. The Engineer advised that this project has been completed for some time with the exception of the clean up; however, that work is now done and the contract is considered completed. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

J. R. Maginnis, Contract No. 2749 for clearing on the Circle Bridge-Hug Point Section of the Oregon Coast Highway, in Clatsop County, requested an additional extension of time of 30 days, from August 31 to September 30, 1947, within which to complete this job. The contractor alleged that his failure to complete the project within the previously-extended time limit was due to an unusual amount of wet weather which handicapped burning operations. The Engineer advised that this contractor is a professional logging contractor and used every means of burning the logs, including incendiary material developed by the Army and various types of blowers devised by himself; moreover, he had experts from the Army and elsewhere experiment with the various materials in order to expedite the work. He further stated that the contractor was greatly handicapped during the summer months by his inability to obtain burning permits when the material could have been disposed of most readily, although it would have caused some fire hazard to abutting property. He pointed out that the contract was awarded on October 30, 1945, with a specified completion date of June 30, 1946, but for the reasons stated it was necessary to extend the time limit on three occasions, and a fourth extension is now required. This job, he said, was actually completed on September 19, so an extension of time beyond that day is unnecessary. He recommended, in view of the circumstances, the granting of an extension of time up to and including September 19, 1947, without penalty, notwithstanding a letter from the Public Roads Administration, which was presented, advising that they also recommend such extension of time but with the understanding that, insofar as Federal funds are concerned, the usual penalty for this last or fourth extension will not be waived. The Commission by unanimous vote approved the extension of time to September 19, 1947, without penalty, as recommended by the Engineer.

Sound Construction and Engineering Co., Contract No. 2772 for grading the Berger Ranch-Barnes Road Section of the Wolf Creek (Sunset) Highway, in Washington County, requested an additional extension of time of 45 days, from September 1 to October 15, 1947, within which to complete

this job. They advised that materials encountered in cuts greater than six feet deep contained a high moisture content which made it impractical to haul or to obtain satisfactory compaction in embankments. Such condition was remedied by excavating to this level and then allowing the cuts and fills to air dry. Attempts to hasten the drying procedure by manipulation were without satisfactory results. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein, however, stipulating that should extensions beyond October 15, 1947, be granted, the assessment of the penalty as covered in the contract will be required. The Commission approved the recommendation by unanimous vote.

Sound Construction and Engineering Co., Contract No. 2778 for grading the Davies-North Plains Section of the Wolf Creek (Sunset) Highway, in Washington County, requested an additional extension of time of 45 days, from September 1 to October 15, 1947, within which to complete this job. They stated that the materials encountered in cuts greater than six feet deep contained a high moisture content which made it impractical to haul or to obtain satisfactory compaction in embankments, that the condition was remedied by taking cuts down to that level and allowing the cuts and fills to air dry; also, that attempts to hasten the drying by manipulation were without success. The Engineer recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein, stipulating, however, that should extensions beyond October 15, 1947, be granted, the Public Roads Administration would require the assessment of the penalty as covered in the contract. The Commission approved the recommendation by unanimous vote.

J. C. Papin, Contract No. 2810 for grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway, in Baker County, requested an additional extension of time of 75 days, from September 30 to December 15, 1947, within which to complete this job. Mr. Papin alleges that the excavation on the north side of Dooley Mountain is more difficult than was anticipated, being much more so than on the south side of the mountain, and that his operations have been slowed down accordingly. The Engineer advised that this job is the first one undertaken by this contractor since 1941, and his delay in completing it within the specified time limit was due largely to difficulties in re-organizing his set-up after the war. He has now purchased considerable more equipment and should be able to complete the remaining work in a satisfactory manner. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Del R. Beebe Construction Co., Contract No. 2818 for oil mat surfacing on the Hampton-Suntex-Juniper Ridge Section of the Central Oregon and Lakeview-Burns Highways, in Deschutes, Lake and Harney counties, requested an additional extension of time of 18 days, from August 15 to September 2, 1947, within which to complete this job. He

alleged that inclement weather encountered in connection with the other projects that he had under way for the state necessitated a late start on this particular project, also, that he experienced bad weather conditions during the oiling operations. The Engineer advised that the overrun of the time limit was partially due to poor oiling weather. He further stated that the contractor did an excellent job and, in his estination, is entitled to the extension of time requested without penalty, particularly in view of the fact that the state incurred no extra expense because of the delay and the traveling public was not inconvenienced, and he so recommended. The Commission approved the recommendation by unanimous vote.

Parker Schram Company, Contract No. 2820 for grading the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County, requested an additional extension of time of 60 days, from July 29 to September 27, 1947, within which to complete this job. They gave the following reason for overrunning the previously-extended time limit: Failure of other contractors operating under separate contracts with the State Highway Commission to complete certain structures in sufficient time to permit completion of the adjacent road grade within the specified time limit as previously extended. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He pointed out the provision in the contract which states that in cases where structures are not completed as expected, which would make it impossible for the grading contractor to complete his work, the time for the completion of the contract will be extended by the number of days the work was delayed on that account. He recommended, in view of this provision, that the extension requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Oscar E Joelson, Contract No. 2849 for rock production for the Lapine Rock Production Project on The Dalles-California and Fremont Highways, in Deschutes and Klamath Counties, requested an extension of time of 15 days, from August 31 to September 15, 1947, within which to complete this job. He alleged that his operations were delayed some two weeks because of difficulties in securing repair parts for his shovel; also, that it took more time to strip the gravel pits than was anticipated. The Engineer advised that the contractor experienced numerous breakdowns of his equipment and that his work was further delayed by reason of dirty material which necessitated the installation of washing equipment. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

John A. Logan, Contract No. 2856 for grading and bituminous macadam and bridge construction on the Tutuilla Creek Section of the Pendleton-John Day Highway, in Umatilla County, requested an extension of time of 90 days, from July 31 to October 29, 1947, within which to complete this job. He attributed his failure to complete the project

within the specified time limit to difficulties in securing reinforcing steel for construction of a bridge included in the project. The Engineer advised that the grading work and bituminous macadam construction were completed prior to the specified completion date and that the extension of time is to cover only the bridge construction, Mr. Logan having been unable to obtain reinforcing steel for this undertaking. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Sloeper & Keyes, Contract No. 2857 for construction of bridges over Cow Creek and Quines Creek on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County, requested an extension of time of 40 days, from October 1 to November 9, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing the necessary number of qualified and efficient men and to delays occasioned by slow delivery of steel. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct; that competition by lumber industries, together with the lack of housing facilities, has made it very difficult to secure construction labor. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Gladney and Adams, Contract No. 2863 for the production of rock for four state highways in Klamath County, requested an extension of time of 90 days, from August 31 to November 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delayed delivery of, and subsequent inadequacy of, plant feeding equipment and to the delivery of crushed materials to the State Highway Department from purchase orders having a priority rating over the general contract items. The Engineer advised that the reasons given by the contractor for overrunning the time limit are substantially correct. He pointed out, however, that the contractor has delivered only 1,000 cubic yards of material of 14,700 cubic yards required, which has caused changes in the schedule of state oiling crews so that it was necessary to defer some of the work contemplated for this season. He recommended that the extension of time requested be granted without penalty but that the contractor be required to reimburse the state for engineering expense incurred subsequent to November 30, 1947, if the job is not completed by that time. The Commission approved the recommendation unanimously.

O. C. Yocom Company, Contract No. 2869 for surfacing and oiling the Scholls-Newberg Section of the Hillsboro-Silverton Secondary Highway, in Washington and Yamhill Counties, requested an extension of time of 30 days, from August 31 to September 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to continued rains throughout the summer season. The Engineer advised that, due to other contract work which the company

had with the state, it was late in starting this job and also that some time was lost because of inclement weather during the summer and early fall seasons. He further stated that the state has not incurred any extra engineering expense because of the delay. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Archie R. Averill, Contract No. 2872 for construction of a concrete viaduct over Spencer Creek on the Oregon Coast Highway, in Lincoln County, requested an extension of time of 90 days, from September 30 to December 30, 1947, within which to complete this job. He alleged that a large amount of extra work was required in rebuilding the coffer dam and in driving foundation piling; also, that he experienced difficulty in securing cement which delayed the first concrete pour. The Engineer recommended the granting of an extension of time from September 30 to November 15, 1947, without penalty, rather than to December 30 as requested; also, that the contractor be required to reimburse the state for all engineering costs incurred subsequent to November 15 if the job is not completed by that time. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

Coos Bay Dredging Company, Inc., Contract No. 2878 for construction of bridge pier fenders on South Slough Bridge on the Cape Arago Secondary Highway, in Coos County, requested an extension of time of 30 days, from September 30 to October 30, 1947, within which to complete this project. They gave as their reason for not completing the project within the specified time limit, non-delivery of creosoted materials until after September 1, 1947. The Egnineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

J. P. Brittan & Co., Contract No. 2880 for construction of the Buck Hollow Bridge on the Sherars Bridge Secondary Highway, Sherman County, requested an extension of time of 30 days, from October 31 to November 30,1947, within which to complete this structure. He gave the following reasons for overrunning the time limit: Delay of approximately 60 days in delivery of metal reinforcement, change in the plans by the State Highway Department which necessitated revision in construction operations and caused delay to the steel fabricators in furnishing steel, and difficulties in securing sufficient skilled and semi-skilled carpenter labor. The Egnineer advised that the overrun of the time limit was caused by delays in obtaining reinforcing steel and difficulties in securing skilled labor. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

D. F. McKenzie, Contract No. 2881 for grade widening and surfacing the Gillespie Corner-Lorane Section of the Territorial Secondary Highway, in Lane County, requested an extension of time of 30 days, from October 15 to November 15, 1947, within which to complete this job. Mr. McKenzie states that all work was completed by October 2, 1947, except the furnishing of crushed rock in stockpiles and that he is having trouble in securing suitable material in the quarries for this purpose. The Engineer advised that the reason given by the contractor for delay in completion of this work is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Werner & Jeske, Contract No. 2915 for grading and paving the Springfield Junction Turnaround Section of the McKenzie Highway, Lane County, requested an extension of time of 10 days, from August 15 to August 25, 1947, within which to complete this project. They attributed their failure to complete the project within the specified time limit to "too much rain which softened the subgrade". The Engineer stated that the reason given by the contractor for overrunning the specified time limit is correct, and recommended that the extension of time requested be granted without penalty. The Commission unanimously approved the recommendation.

J. F. Johnston, Contract No. 2748 for grading, paving and bridge construction at Pudding River on the Pacific Highway East, in Clackamas and Marion Counties, requested an additional extension of time of 31 days, from September 30 to October 31, 1947, within which to complete this project. He attributed his failure to complete the project within the specified time limit, as previously extended, to a shortage of skilled labor and poor delivery of materials. The Engineer advised that the work covered by this contract is completed except for the removal of materials from the storage area and cleaning up of the site, and that the bridge has been in use by the general public for some time. He recalled that the Commission previously extended the time limit on this contract from July 31 to September 30, 1947, on the condition that the contractor would reimburse the state for all engineering costs incurred since July 31, and he recommended that the extension of time now requested be granted subject to the same condition. A letter was presented from the Public Roads Administration also recommending approval of the extension on the condition that the contractor will be penalized, as provided in the contract, for engineering expenses incurred by the state since July 31, 1947. The Commission approved the recommendation by unanimous vote.

Birkemeier & Sarenal, Contract No 2918 for construction of the Merle Railroad Grade Separation structure on the Sunset Highway in Washington County, requested an extension of time of 30 days, from October 31 to November 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in the delivery of structural steel and the transportation workers strike over which they had no control. The Engineer

advised that the reasons given by the contractor for overrunning the time limit are correct, and he recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

The action of the State Highway Commission on contractors' requests for extensions of time within which to complete the contracts, as listed above, was based upon the recommendation of the State Highway Engineer and his report, which considered, but did not necessarily adopt, either or any of the reasons stated in the contractor's requests.

The Engineer reported that Contracts Nos.2637, 2744, 2749, 2778, 2795, 2818, 2824, 2837, 2842, 2854, 2864, 2884, 2885, 2890, 2915, 2916, 2921, 2927, and 2930 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the report of the Engineer with respect to the contracts under discussion the Commission approved and accepted the contracts completed as reported by the Engineer and by unanimous vote adopted the resolution marked EXHIBIT "K", attached hereto, and by this reference made a part hereof with like effect as though extended herein.

The Engineer brought up for discussion matters pertaining to the application of the Civil Service pay plan and the rules and regulations governing it. He recalled that the Commission, at its meeting on March 24 and 25, 1947, approved the plan and the rules and regulations applicable to it, effective March 1, 1947, both of which were previously approved by the State Budget Director and by Governor Snell. In the application of this plan, he said, 225 employees will have completed, on September 1, 1947, six months of service at the first or beginning step of their respective salary ranges. Four hundred fourteen employees will have completed, on January 1, 1948, one year of service without advancement, and on July 1, 1948, 285 employees will have completed six months of service from September 2, 1947, at the first or beginning step of their respective salary ranges. He explained further details as contained in his written report to the Commission dated October 17, 1947, a copy of which is available for inspection in the Highway Department's general files, and inquired as to the Commission's wishes with respect to the application of the plan, as of September 1, 1947, as it effects only those employees who merit salary increases. He estimated that if all the increases were granted it would cost the State Highway Department approximately $190,000 for the biennium 1947-49.

Chairman Banfield stated that, whereas the Commission may have approved the Civil Service rules and regulations applicable to the Civil Service pay plan and the pay plan itself as set up by the Civil Service Commission, such approval did not necessarily mean that the increases would be automatic or mandatory, but that they would be permissible if the Commission considered them advisable. It was his thought that the employees in the lower brackets should be given first consideration rather than employees in all classifications. The Engineer then suggested approval of increases for the employees in the first group who have completed six months of service

at the first or beginning step of their respective salary ranges and who are employed on a probationary basis, which would cost the state about $31,500 annually. This matter was discussed at some length, and as a result thereof, motion was made by Commissioner Chandler that the employees in that particular group be granted increases in conformity with the Civil Service plan provided the increases are merited. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission, it being understood that the increases would be retroactive to September 1, 1947.

The Engineer then requested authority to bring to the Commission's attention a list of additional employees who are entitled to salary increases. The Commission approved the request on the condition, as expressed by Chairman Banfield, that the list will not result in a blanket pay increase, with which the Commission is not sympathetic.

The Engineer asked the Commission to confirm for the record the press release issued in his office on July 31, 1947, notifying the public that only essential traffic should traverse the North Santiam Highway between Gates and Detroit, where 15 miles of heavy construction work is under way and where the public would be subjected to numerous hazards and long delays. He advised that, in conformity with this notice, signs have been erected along the highway for public guidance. The Commission confirmed the press release by unanimous vote.

A letter was presented from Mr. E. E. Rhodes, Pasadena, California, demanding payment in the sum of $1,000 for the loss of his dog as the result of what he alleged was careless negligence on the part of the State Highway Department in failing to protect the public against such losses in dangerous places along state highways. Mr. Rhodes states that because of the lack of a suitable chicken wire fence on the wall at the edge of the Crooked River Gorge on The Dalles-California Highway his dog jumped over the wall and fell to the bottom of the Gorge below. The Chief Counsel advised that he is familiar with this case, and, in his estimation, the Commission has no liability. Following discussion, the Commission voted unanimously to deny the claim on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The Commission discussed a letter from Mrs. H. J. Moulton, Chairman of the Roadside Planning Committee of the Oregon State Beekeepers Association, requesting the preservation of flora along roadsides which is necessary to bees and other pollinating insects, and suggesting that when weeds are exterminated they be replaced with useful plants. The Engineer advised that it is not practical to replace obnoxious weeds obliterated by chemicals with flora necessary to bees and other pollinating insects; moreover, the mowing operations on highway rights of way are conducted by the State Highway Department to provide safety for all highway users and are not sufficiently extensive to have any great effect upon the bee industry. It was the thought of the Commission, as expressed by Chairman Banfield, that it is the duty and the function of the State Highway Department to keep state highway rights of way in a clean and neat condition, and, accordingly, the Commission by unanimous vote denied the request of the Beekeepers Association.

A petition was presented signed by numerous property owners and residents in the vicinity of Barbur Boulevard, Portland, protesting the proposed plan of channelization for this thoroughfare as it is now being constructed at S. W. Bancroft Street and at S. W. Viewpoint Terrace, and requesting that the plans be revised. The Commission denied the request by unanimous vote, it being the opinion of the Commission that the project is a city responsibility. The Secretary was instructed to inform the petitioners of the action taken and to advise them further that plans for the project were prepared by the city and were checked by engineers representing the Public Roads Administration and the State Highway Commission, and that the Highway Commission's concern is simply the acceptance of the report which they rendered.

The Commission considered a request from Mr. J. D. Walling, contractor, for the renewal of his permit for use of "Cape Horn" Quarry located adjacent to the Siuslaw Highway near the town of Swisshome, Lane County. It was explained that this quarry is located on U. S. Forest property and that authority to use the quarry was granted the State Highway Department by the U. S. Forest Service by means of a special use permit; further, that the Highway Commission, some time ago, allowed Mr. Walling to operate in it on the condition that he would make satisfactory arrangements with the Forest Service to take material therefrom. Mr. Walling's permit expired on October 15, 1947, and he now wants it renewed for another year. The Engineer advised that the Highway Department has no contemplated use for this quarry during the year 1948, and he recommended that Mr. Walling be allowed the further use of it during that period provided he will make the necessary arrangements with the U. S. Forest Service. The Commission approved the recommendation.

The matter of formally abandoning a short section of the old right of way of the Lower Columbia River Highway between the Columbia County line and Portland, particularly between Engineer's Stations 266+00 and 270+20, which was approved by the Commission at its meeting on August 25, 1947, had the attention of the Commission. After due consideration the Commission confirmed its previous action by the adoption, by unanimous vote, of the resolution marked EXHIBIT"L", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission considered and denied the suggestion of Mr. Roy H. Searle, Portland, "that the proposed speedway through and beyond Sullivan Gulch be denominated 'Benson Boulevard'".

The Commission had under discussion a suggestion that the new ferry now being constructed for service across the Columbia River between Astoria, Oregon and Meglor, Washington, be named the"M. R. Chessman" ferry in honor of the late M. R. Chessman, Astoria, former State Highway Commissioner. The Commission approved the suggestion and thereupon, by unanimous vote, adopted the following resolution with regard thereto, upon motion of Commissioner Chandler which was duly seconded by Commissioner Schaupp:

14237

WHEREAS, the life of Merle R. Chessman was dedicated to service, service to his community, service to his state and service to his country,a life and personality which became a part of the welfare and government of the city in which he lived, a part of the state in whose legislative halls he so constructively and competently served, and a part of the highways he helped plan and build, highways which, long after his leaving, will continue to bring together peoples from communities small and near, communities large and far away, and

WHEREAS, his counsel, service, vision, purpose and his personality while serving as a member of the State Highway Commission are all now a part of the records of highway planning, highway building and highway financing, and his comradeship and friendship are lodged permanently in the memories, the experiences and the thoughts of those who were privileged to serve with him, and

WHEREAS, in recognition of his untiring effort to adequately provide transportation facilities for the motoring public between Astoria, Oregon, and Megler, Washington, it is deemed appropriate that the new ferry, now under construction and soon to be launched and assigned to service at Merle's home town, be named " M. R. Chessman",

NOW, THEREFORE, Be It and It Hereby is Resolved by the Commission, all members being present and voting affirmatively, that the new ferry, which is soon to be launched and placed in service between Astoria, Oregon, and Megler, Washington, be named in honor of our former member, " M. R. Chessman", and

Be It Resolved further, that this resolution be entered in the permanent records of the Commission as of the 21st day of October, 1947, and a copy appropriately embossed and presented to Mrs. Merle R. Chessman.

In this connection the Engineer reported that latest information is that the ferry will be ready to launch in about 30 days. He was instructed to keep the Commissioners advised relative thereto so they can arrange to be present at the launching if they so desire.

The Commission had under discussion the appointment of a member of the Travel Advisory Board to fill the vacancy created by the death of Mr. M. R. Chessman, Astoria, but decided that it would be best to postpone the matter for the time being.

The Engineer brought up for discussion the matter of paying the salary of the inspector employed by the Union Pacific Railroad Company during construction operations on the Troutdale-Wahkeena Creek Section of the Columbia River Highway. He advised that, in 1938, an agreement was reached with the company that the state would reimburse the company for the cost of furnishing such engineering inspector, at the rate of $225 per month. Due to changed conditions, the railroad company has found it necessary to increase the salary rate from $225 per month to $378.80 per month and has asked the Highway Commission to reimburse it at that rate. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. Neuner, presented a request from Denver Parks and Victoria Parks, his wife, for an additional point of access to The Dalles-California Highway at Highway Engineer's Station 2329+45 on the Lonz-Kirk Section. He advised that this is a limited-access section of highway and that the Parks' request is to provide ingress to and egress from abutting property. He pointed out that this district is sparsely settled, there being very little privately-owned land between East Diamond Lake and Chiloquin, a distance of 35 miles, and, in his estimation, there is a need for some sort of service to the public along this section. The Parks, he said, have agreed not to erect any buildings within 50 feet of the edge of the right of way if granted this privilege. He recommended approval of the request. The State Highway Engineer concurred in the recommendation. Commissioner Schaupp expressed himself in favor of granting this concession because of its isolated location, it being his thought that gasoline and refreshments should be made available to the traveling public in such places. Chairman Banfield also expressed his approval, however, pointed out that the Commission must be very careful, when once it acquires right of access to the highway, that it does not dole these privileges out indiscriminately, which could defeat the purpose for which the access was acquired and for which state funds have been spent. The Commission thereupon by unanimous vote approved the recommendation. An agreement covering the matter was executed by the Commission on the following day.

A letter was presented from Mr. T. M. Davis, District Engineer, Public Roads Administration, dated July 18, 1947, advising that, during the Elks Convention held in Portland during the previous week, the City Council permitted the closing of the traffic lanes on the east side of the median strip on Harbor Drive from the Hawthorne Bridge to the Morrison Bridge, and all traffic on this thoroughfare was required to use the lanes on the west side of the median strip between the hours of 7:00 a.m. and 4:00 p.m. daily,

resulting in considerable confusion and congestion which was particularly bad at the Morrison Bridgehead. Mr. Davis points out that the blockading of Harbor Drive constitutes "undue interference with the free and convenient flow of traffic" on Harbor Drive and is in violation of the terms of the fifth paragraph of Resolution No. 21945 adopted by the Portland City Council on May 22, 1941. The Engineer was instructed to direct a letter to the Portland City Council calling its attention to the violation of this city ordinance and requesting that the City Council arrange to see that this thoroughfare is not again closed for any purpose in the future.

The Commission by unanimous vote confirmed the following log-hauling regulation, as suggested by the Public Utilities Commissioner, which was approved by all members of the Commission on September 17, 1947, over the telephone, being a revision of the regulation adopted at the previous meeting:

"Section C, General Regulations, Article 5. The truck hauling of logs, poles, and/or piling over or across any state highway on Saturday afternoons, Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Armistice Day, Thanksgiving Day, Christmas Day and during the period from 8 p.m. on any other day to 4 a.m. of the day following is prohibited. Hauling equipment operating between 4 a.m. and 8 p.m. of any day shall be equipped with, and during the hours of darkness, shall display lighted lamps and other illuminating devices conforming with all statutory requirements; provided further, that if the overall length of the equipment and load exceeds 50 feet, there shall, in addition, be displayed on each side of the load at the approximate center, amber side marker lamps."

The Engineer reported that, as a result of the appointment of two Assistant State Highway Engineers on August 12, 1947, and the creation of a Department of Permits, it is necessary that additional employees be authorized to sign and issue transportation permits in order to expedite the orderly and speedy movement of traffic and materials over state highways. He recommended that such authority be granted to the following employees in addition to those who now have such authority.

A. F. Parsons, District Maintenance Superintendent, Pendleton
Kenneth F. Loter, District Maintenance Officeman, Astoria
L. Paul Simpson, District Maintenance Officeman, Coquille
James M. Brown, District Maintenance Officeman, John Day
James D. Pratt, District Maintenance Officeman, Baker
Leland P. Dixon, District Maintenance Officeman, Burns
John F. Kergil, District Maintenance Officeman, The Dalles
Ralph B. Sipprell, Director of Permits, Salem
W. W. Stiffler, Second Assistant State Highway Engineer, Salem.

The Commission approved the request by unanimous vote and unanimously adopted the resolution attached hereto and marked EXHIBIT "M", which resolution is by this reference made a part hereof with like effect as though extended herein.

The Egnineer reported violations committed by Cecil J. Harmond,

Sutherlin, Oregon, in connection with the truck hauling of logs over state highways, particularly an overweight load of 32,500 pounds which was observed by Weighmasters on September 3, 1947, on the Pacific Highway at Oakland. The total gross weight of the truck and load, he said was 104,500 pounds. He pointed out that in September 1946, at the request of the Highway Commission, Mr. Hammond's permit was canceled by the Public Utilities Commissioner for an illegal load weighing 110,600 pounds, but the permit was restored on October 31, 1946, when Mr. Hammond agreed in writing thereafter to abide by the rules and regulations and gave as his understanding that another violation would necessitate the permanent cancellation of his permit. The Engineer gave as his thought that the present violation is deliberate and intentional and that it is justification for the permanent cancellation of Mr. Hammond's permit, and he so recommended. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

The Engineer also reported violations committed by Duane H. Mathers, Sweet Home, Oregon, in connection with his operations in the truck hauling of logs over state highways. This record reveals that on numerous occasions since July 1946 Mr. Mathers has refused to allow his loads to be weighed by State Weighmasters, that he has threatened the Weighmasters with bodily injury for endeavoring to weigh his loads, and that he has declared his intention to "lay out" with any loads that he considers heavier than those allowed by his permit. The Engineer recommended the cancellation of Mr. Mather' permit. The Commission approved the recommendation unanimously, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

The Engineer asked the Commission to confirm the telephonic authority previously given him to reinstate the log-hauling permit of Lloyd J. Allen, Scappoose, and that of Ernst G. Baugh, McMinnville, which were previously canceled at the Commission's request for violations of the rules and regulations governing their log-hauling operations. He advised that both Mr. Allen and Mr. Baugh submitted letters stating their intention hereafter to comply strictly with the rules and regulations and acknowledging the understanding that their permits will be permanently canceled if the violations are repeated. The Commission confirmed the reinstatement of both permits.

The Engineer brought up for discussion an order adopted by the Commission at its meeting on July 21, 1947, limiting the speed of motor vehicles operating on ocean beaches to 20 miles per hour and instructing the Engineer to maintain signs at beach entrances in conformity therewith. He advised that, subsequent to the issuance of that order, the Traffic Engineer made additional studies which reveal that in some places cars have to travel between 20 and 25 miles per hour in order to keep from being mired in the sand. He pointed out that the state law prohibits speeds of more than 25 miles per hour on the beaches and gave as his thought that it would be advisable to permit such rate of speed in places where vehicles are allowed on the beach, and in those places where the driving of a motor vehicle on the beach would create a bad hazard to pedestrians, that they be ruled off altogether. In reply to an inquiry from Chairman Banfield as to what reason there may be for permitt-

ing any motor vehicle operation on the beach areas, the Chief Counsel advised that they are allowed on the beaches by action of the Legislature and that the only authority the State Highway Commission has to stop them is if a county or municipality contiguous to the beach would request that the Highway Commission establish a zone,or zones, where they would be prohibited. It was the thought of the Commission that those communities should be informed that the Highway Commission is willing to establish such zones if the communities will request them, and it was so ordered. Motion was then made by Commissioner Schaupp that the order previously made by the Commission establishing a 20 mile per hour speed limit on Oregon beaches be rescinded, which would leave in effect the speed limit established by law. Motion was duly seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Commission discussed matters pertaining to the relocation of the Oregon Coast Highway through the Badley property at Otter Crest, Lincoln County, particularly a report from the Chief Counsel to the effect that Mr. Badley has expressed a desire to cooperate with the Commission and has suggested, as a compromise settlement, that the new highway location be revised so as to conform with the original plan for this improvement, and that he retain title to the area between the new location and the old highway with the understanding that he will limit his development to construction of two buildings, one a lookout at the south end of the area and the other a hotel at the north end of the area, which will leave a free and unobstructed view of the ocean from the highway between these two buildings. The matter was discussed at considerable length, in connection with which the Engineer exhibited a model showing the condition which would result if such plan were adopted. It appeared to the Commission that the desired results would be obtained by such an arrangement, whereupon the Chief Counsel was instructed to negotiate further with Mr. Badley for acquisition of the necessary right of way on such a basis. He was instructed, however, to secure from Mr. Badley assurance in writing that he would not construct any buildings on the westerly side of the old highway which might obstruct the view of the ocean.

The meeting adjourned at 5:00 p.m. to reconvene following dinner at the Arlington Club.

The meeting of the Highway Commission reconvened at 8:00 p.m. in the Victory Room of the Arlington Club with all Commissioners, the State Highway Engineer , the First and Second Assistant State Highway Engineers, the Chief Counsel, the Assistant Counsel, and the Secretary present.

The Commission had under discussion matters pertaining to a State Highway Department Office Building to be located in the Capitol Group, Salem, and construction of a temporary building to house employees pending completion of the permanent structure. The Engineer pointed out the possibility of placing a temporary building on Waverly Street, which extends from Court Street to State Street on the west side of the present State Office Building. He advised that the Board of Control is now arranging with the City of Salem for the use of this street on which to construct another building for temporary use by the State Tax Commission, and there is a possibility that the Board will approve construction of the Highway Department Building on the

area. He estimated that a suitable building could be constructed for $25,000 and recommended approval of such a proposition, which would serve the Highway Department until a permanent officebuilding could be constructed and would also eliminate the necessity of constructing a higher-priced building at the Shops, as was originally contemplated. He advised that the Board of Control wants to handle the contruction of both temporary structures, one for the State Tax Commission and the other for the State Highway Department.

Chairman Banfield approved such temporary structure in this location but stated that it should be built by the State Highway Department rather than by the Board of Control. Commissioner Schaupp declared himself similarly. Commissioner Chandler stated that he also is in favor of such a building on the condition that it will not delay construction of the permanent Highway Department Office Building.

Upon conclusion of the discussion with respect to the construction of a temporary office building on Waverly Street in Salem, Oregon, Commissioner Schaupp moved that the Chief Counsel be instructed to confer with the Board of Control for the purpose of conveying to the Board the Highway Commission's purpose and desire to construct on a portion of Waverly Street, if vacated by the City of Salem, a temporary office structure, and that Counsel be further instructed to obtain from the Board of Control the necessary permit and authorization to construct said building under the Commission's own plan, arrangement and supervision. The above motion was seconded by Commissioner Chandler and declared by Chairman Banfield unanimously passed.

The matter of constructing a permanent office building was then discussed. The Chief Counsel advised that the Phi Delta Theta Fraternity of Willamette University owns a residence building in Block 82, otherwise known as the Presbyterian Church Block, and has offered to sell this property to the state for $20,000. He pointed out that it is not located in Block 86, which the Highway Commission prefers for its office building, but probably will be required for state purposes some time in the future and will probably cost the state considerably more then than now. Chairman Banfield gave as his thought that the state's interests should be protected and that if the Board of Control does not have the funds to pay for this property at the present time it perhaps would be advisable to purchase it with State Highway money and later on turn the property over to the Board of Control when the Board needs it, provided the Board of Control will give the Highway Department full credit for the expenditure. Commissioners Schaupp and Chandler concurred.

Upon conclusion of the discussion of matters relative to the purchase of the Phi Delta Theta Fraternity property located in Block 82 in Salem, Oregon, Commissioner Chandler moved that the Chief Counsel be instructed to take an option on said property at a price not in excess of $19,500, and if said price is approved by the Board of Control, then the option shall be accepted and exercised by the Highway Commission, and the property purchased by the Highway Commission and held for exchange with the Board of Control for properties in Block 86 and now owned by the State. The motion was seconded by Commissioner Schaupp and declared by Chairman Banfield unanimously passed.

Chief Counsel then reported that the Board of Control had granted the Commission's request that Block 86, in the City of Salem, be assigned as the site and location for the new permanent State Office Building. In this connection, the Chief Counsel reported that the Board is without available funds to purchase properties in Block 82, which may, from time to time, be put on the market at prices acceptable to the Board of Control.

After discussion and consideration, it was the opinion of the Highway Commission that the Commission should aid the Board of Control in the purchase of properties in Block 82, so as to protect the State against future advances in prices.

Whereupon, Commissioner Schaupp moved that the Chief Counsel be instructed and authorized to take options at the request of the Board of Control on such properties in Block 82 and at such prices as the Board of Control approves, and bring said options to the Commission for consideration and acceptance on behalf of the Board of Control, with the understanding that the State Highway Fund will be reimbursed in full by the Board of Control for such purchases and expenditures, or that said properties or any of them may be used for exchange purposes for properties heretofore acquired by the Board of Control and located in Block 86. Commissioner Chandler seconded the motion, whereupon it was declared by Chairman Banfield unanimously adopted.

The Commission discussed alternate Plans "A" and "B" prepared by the Engineer for a proposed ferry terminal at Astoria. The Chief Cousel explained that this matter is being brought up at this time because Mr Charles Swanson, who owns a service station which is involved in Plan "A", has advised that he has plans to make certain improvements to his property in the near future, including the construction of a concrete building, and wants to know whether or not the state needs his property. He recalled that the state owns most of the property required for either of the two plans under consideration and pointed out that if Plan "A" were adopted it would be necessary to acquire Mr. Swanson's property and a small portion of county property which is subject to a long-term lease with the New England Fish Company, but which the Fish Company has indicated would be made available to the state at a reasonable cost. If Plan "A" were adopted, he said, there would be an excess of state property to the west which could be used to re-establish Mr. Swanson's service station, which is entirely agreeable to him. The Engineer estimated the cost to re-establish Mr. Swanson's station at about $10,000. He gave as his opinion that it would be cheaper in the long run to adopt Plan "A" and settle with Mr. Swanson because it will avoid the expenditure of any additional funds until the Commission is ready to build the terminal. Were Plan "B" adopted, he said, it would not be necessary to deal at all with Mr. Swanson, but it would require dealing with the county and with the Fish Company and would put the state to some additional expense. The Engineer recommended adoption of Plan "A" which he considered much better than the other because, for other reasons, it will provide for the storage of cars that are waiting to drive onto the ferry and will protect traffic where it has to cross the railroad tracks. Chairman Banfield expressed himself in favor of Plan "A", which includes the payment of $10,000 now to Mr. Swanson. Commissioner Chandler concurred and thereupon moved adoption of Plan "A" and settlement

with Mr. Swanson on the basis thereof. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

In this connection the Commission discussed a letter from the Chief Counsel to the Second Assistant State Highway Engineer concerning the agreement with Pacific County, Washington, with respect to the ferry landing on the Megler side of the Columbia River. It appears that the original agreement with the County provided that the State of Oregon should reimburse the County in the amount of $15,000 in connection with this landing. The Chief Counsel advised that the agreement was forwarded to the County Court for execution, but because of a change in the county officials it was not signed and the papers have become lost. He further advised that the new County Court is not insistent that payment be made at this time because it does not need the money, but it has requested a copy of the agreement which provides that the County shall receive a portion of the earnings of the ferry operation. He inquired whether or not he should follow this matter through since the ferry operation shows no earnings whatsoever at the present time. The Commission ordered that copies of the original agreement be forwarded to the County and the signature of the Court obtained.

The Chief Counsel brought up for discussion the matter of regulating the use of the beach adjoining the City of Gearhart. He advised that the state owns the beach at this place, having acquired it in 1939, and has the authority, under Chapter 184, Oregon Laws, 1947, to regulate it as a part of the State Parks System if it so desires, even to the extent of barricading it so that vehicles cannot get on the area if the Commission first secures the recommendation and approval of the Gearhart City Council. He pointed out that this beach is used extensively by individuals and recommended that the Commission adopt an order prohibiting vehicles on this beach and that appropriate signs be erected calling the attention of the public to this prohibition. The City of Gearhart, he said, will adopt an ordinance barring vehicular traffic on this beach if the Commission so requests. Chairman Banfield gave as his thought that if vehicles are prohibited the use of this beach area, it would relieve the Highway Commission from responsibility in the event accidents occur. After due consideration of this matter the Commission approved the Chief Counsel's recommendation and by unanimous vote adopted the resolution concerning the matter marked EXHIBIT "N", attached hereto and by this reference made a part hereof with like effect as though extended herein.

In the discussion of this matter, the Commission went on record in favor of closing other beach areas to vehicular traffic if the county court of the county in which the beach is located or the city council of any municipality contiguous to those portions of the ocean shore shall request such action by the State Highway Commission.

The Chief Counsel also brought up for discussion matters pertaining to the proposed bridge project across the Columbia River at The

Dalles. He advised that the proponents of this project intend to ask for another conference with the Highway Commission and that the Bridge Authority of the State of Washington expects to be present. The Engineer advised that he has not yet secured sufficient information for a detailed report on the subject upon which the Commission might base an intelligent decision, and accordingly suggested that such a conference be deferred for the time being. He advised that to secure a more accurate determination of the facts, additional studies will have to be made to determine the projected traffic for the next ten or 12 years, and a survey to determine the proper location of the bridge and the approach facilities and the estimated cost to construct the structure will need to be made. He estimated that it would cost about $24,000 to make such a study and advised that Wasco County has offered to pay one-third, or $8,000 , and has suggested that the balance be assumed by the State Highway Commission of Oregon and the State of Washington on an equal basis, $ 8,000 each (see Engineer's letter to the Oregon State Highway Commission dated October 15, 1947, in general files, for his detailed report on this subject). As the result of considerable discussion of this matter, the Commission authorized the Engineer and the Chief Counsel to confer with the Washington Bridge Authority and the County Court of Wasco County from the standpoint that the State of Oregon will contribute $8,000 toward this expense if the other two agencies will agree in writing to contribute like sums. Motion to that effect was offered by Commissioner Schaupp, seconded by Commissioner Chandler, and carried by the unanimous vote of the Commission. (For details with respect to the presentation made by the Commission's Chief Counsel, see copy of his written report dated October 15,1947, in general files.)

A petition was presented from residents of the town of Orient, Oregon, requesting the designation of a maximum speed limit of 25 miles per hour on the Mt. Hood Highway through the business district of their town. The petitioners pointed out that the Orient Elementary School is located on this highway and that there are some 300 children who daily are unloaded in front of the building beside the highway. The Engineer advised that this matter has been investigated by the traffic Engineer, who recommends approval of the request, and that he concurs in the recommendation. After due consideration of the report of the Engineer, the Commission approved and adopted a 25-miles-per-hour speed limit through this community. The resolution marked EXHIBIT "O", attached hereto, and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

A petition was also presented from residents of Troutdale and vicinity urging the installation of a "stop and safety" light at the intersection of the Columbia River Highway with Bell Road at a place known as Springdale. The Engineer advised that this request has been investigated by the Traffic Engineer who recommends the installation of a flashing beacon at this place, with the light facing Bell Road flashing red and the other flashing yellow. He estimated the cost of the installation at $250 and advised that he also recommends the installation. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was duly seconded by Commission Chandler.

A petition was presented from residents of Miles Crossing, near Astoria, requesting the following: (1) Paving of rock shoulders adjacent to the pavement on

US101, (2) establishment of safety lanes for the benefit of pedestrians crossing the highway and the installation of blinker lights at such safety-lane crossing points, and (3) establishment of a reduced-speed limit for vehicular traffic through the congested district. The Engineer recommended approval of the first request, the work to consist of oiling for a width of three feet on each side of the pavement, such work to be done during the 1948 oiling season. This work he estimated would cost about $1,000. He recommended denial of the request for painting safety lanes across the highway and for installing blinker lights because such pedestrian lanes are not satisfactory unless protected by school-boy patrols and unless other protective measures are also taken. He recommended approval of the third request and that a maximum speed limit of 35 miles per hour be designated over the more congested portion, which is between Mile Post 4.12 and Mile Post 5.64. The Commission approved the recommendations unanimously. A resolution, marked EXHIBIT "P", attached hereto and by this reference made a part hereof with like effect as though extended herein, designating a 35-miles-per-hour speed limit as requested by the petitioners was thereupon adopted by the Commission by unanimous vote.

A letter was presented from Mr. C. G. Signor, City Manager, Grants Pass, advising that because the people of that city voted not to increase the budget above the six percent limitation, the City Council has found it necessary to postpone the installation of the traffic lights heretofore approved by the Highway Commission until the next fiscal year beginning July 1, 1948. It was pointed out that this installation is estimated to cost $26,000, fifty percent of which is to be paid by the city and the balance by the state. In view of this communication the Commission instructed the Engineer not to install the signs until the city has advanced its share of the cost.

Consideration was given by the Commission to a request from the City of Yamhill for the installation of a flashing beacon at the intersection of Maple Street (ORE47) and Main Street (ORE240), where two state highways intersect, and for the installation of two additional flashing beacons on Maple Street near the north and south city limits of the town. The Engineer recommended approval of the request for the installation of a flashing beacon at the intersection of Maple Street and Main Street on the condition that the city will furnish the electrical energy to operate it, and that the request for the two additional signals be denied because experience reveals that such facilities do not act to control or reduce speeds except at primary or major intersections, which condition does not obtain at these locations. The Commission approved the recommendations by unanimous vote.

A request from the City of Medford for state aid in the installation of traffic signals at four city street intersections on state highway routes in Medford had the attention of the Commission. The Engineer advised that the locations requested are on the Medford-Provolt Secondary Highway (Main Street) where it intersects Bartlett Street, Front Street, Grape Street and Oakdale Street. This matter has been investigated by the Traffic Engineer, he said, who reports that the signal installations are fully warranted because of the large volume of traffic which enters these intersections. He estimated

the total cost of the installations at $12,000, which would be paid 50 percent by the state and 50 percent by the city if past practice is followed. He recommended approval of the installations on such basis and further recommended the installation of an additional signal at the crossing of the highway with the Southern Pacific Company's railroad tracks between Front Street and FirtStreet at an estimated total cost of $3,000, whihh would be paid 50 percent by the city and 50 percent by the state unless the Public Utilities Commissioner should see fit to assess some of this cost to the railroad company. He requested authority to present the matter to the Public Utilities Commissioner for his decision and order. The Commission by unanimous vote approved the installation of the traffic signals at the intersections of Main Street with Bartlett Street, Front Street, Grape Street and Oakdale Street on the condition that the cooperation offered is in conformity with the Commission's policy with respect to such matters and on the further condition that the city will assume 50 percent of the expense involved. With respect to the railroad crossing signal, the Commission authorized the Engineer to present the matter to the Public Utilities Commissioner with a request that the allocation of cost be divided equally among the city,the railroad company, and the state. The Engineer was authorized to proceed with the installation of such railroad crossing signal if the Public Utilities Commissioner makes an order in conformity with such distribution of costs.

The Engineer requested an increase of $50,000 in the equipment purchase budget, particularly for the purchase of office equipment and the like which was overlooked in setting up the original budget of $800,000. He also requested an increase of $5,000 in the amount budgeted for the construction of buildings and improvements and an increase of $45,000 for operation of draw bridges and ferries. The $5,000 item, he said, is requested in order to cover the cost of moving buildings from Camp Adair to the shop grounds at Salem, no part of which was contemplated in the $20,000 originally budgetted for such purpose. As to the additional $45,000 requested for draw bridge and ferry operation, the Engineer advised that this is to cover extra expense incurred in connection with the operation of the Astoria-Megler Ferry, particularly extra repairs to boats, extra maintenance of terminals, extra insurance cost, extra salaries and wages, and the Federal tax on transportation. With respect to the $50,000 requested for additional equipment purchases, the Engineer advised that orders are now outstanding for considerable large equipment which will be delivered soon,if the Commission will authorize the requested increase,otherwise it will be necessary to cancel these orders in order to keep total expenditures within the budgeted amount. The overrun, he said, was incurred by reason of the purchase of small equipment such as typewriters, calculators, etc. for office use. As a result of discussion, the Commission approved all three increases by unanimous vote on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The Commission had under discussion the setting of a date for its next regular meeting and decided unanimously to hold such meeting in Portland on Monday and Tuesday, November 24 and 25, 1947. The secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Engineer and the Chief Counsel reported on a proposed settlement with Mr. J. H. Gonyea for right of way needed for the improvement of the Pacific Highway south of Eugene. The Engineer advised that this settlement involves the granting of access to the new highway to Mr. Gonyea; also, that no access privileges are being allowed on this section of highway south of Judkins Point, so the Chief Counsel and he are of the opinion that Mr. Gonyea's request for such access should be denied and that right of way across his property should be acquired without such privilege even if it is necessary to condemn it. Should it be necessary to take the matter to court, he said, it would then be determined whether the Commission has power to control such situations. The Chief Counsel confirmed the Engineer's statement. Chairman Banfield gave as his opinion that if the Commission were to grant Mr. Gonyea this privilege it would defeat the Commission's ideas and break down its policy with respect to such matters. He favored condemnation of the right of way and right of access if necessary. Commissioners Schaupp and Chandler concurred. The Chief Counsel was thereupon authorized to condemn the property if necessary. The Commission by unanimous vote adopted a resolution covering the matter, marked EXHIBIT "Q", and attached hereto, and by this reference made a part hereof with like effect as though extended herein, upon motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp.

In this connection the Chief Counsel recommended that the Commission take appropriate action to designate as a "through-way" the Albany-Junction City Section of the Pacific Highway East as provided for in the "Through-way Bill" passed by the 1947 Legislature. The Engineer was instructed by the Commission to work up full information with regard thereto and to report to the Commission.

The matter of clarifying the oral arrangements effected during the wartime period between the City of Portland and the State Highway Department had the attention of the Commission. The Engineer advised that he has no report on this subject, but the matter is being given attention, and such report will be rendered as soon as possible. Chairman Banfield remarked that the Commission is particularly desirous of having these matters put in writing. The Secretary was instructed to delete this item and other items of unfinished business from future agendas unless reports are to be rendered with respect to them; however, a record is to be kept in his office of such unfinished matters.

The Chief Counsel and the Engineer reported the status of tentative arrangements with the City of Portland with respect to the Sullivan Gulch project. They advised that they are now working with Mr. Wm. A. Bowes, City Commissioner, and the City Attorney in the preparation of an agreement between the city and the state, which will be reported to the Commission as soon as it is in proper form. The Commission took no action on this matter. (See ahead for additional items on this matter.)

The question of permitting the removal of sand and gravel from the beds of navigable streams and the removal of sand from the shore of the ocean was brought up for discussion as a matter of unfinished business. The Chief Counsel advised that he is working with the attorney for the State Land Board

on this matter and suggested that, if a royalty charge is to be made for taking this material, it should be charged only against those who take it commercially and the revenues should be turned over to the State Land Board except such amount as may be necessary to reimburse the State Highway Department for the expense of inspections, etc. The Commission approved such arrangement and left it with the Chief Counsel to work out a satisfactory arrangement with the attorney for the State Land Board, it being understood that whatever arrangement he effects will be satisfactory to the Commission.

The matter of acquiring timber bordering Elbow Lake adjacent to the Oregon Coast Highway in Douglas County, which matter previously was referred to the State Parks Department to report on the cost involved, was brought up for discussion, but action was deferred pending a report from the Parks Superintendent.

The Engineer reported on the proposed acquisition of land adjacent to Rocky Creek State Park, Lincoln County, owned by Mr. Paul Baird, which matter previously was referred to him and the Parks Superintendent for investigation and report on the area needed for right of way. He advised that, insofar as right of way is concerned, a strip 150 feet wide on the upper side of the highway across the Baird property will be sufficient, and on that basis the state would need only about two acres of Mr. Baird's land, which would leave 44 acres that would not be needed for highway purposes unless the Commission wanted to purchase it for wayside or park purposes. As a result of considerable discussion, the Commission ordered a report from the Chief Counsel covering the matter from three standpoints.-- (1) Cost to acquire right of way only across Mr. Baird's property (2) Cost to acquire all of Mr. Baird's property, consisting of approximately 46 acres (3) Cost to acquire timbered wayside across the Baird property and beyond to the summit at Otter Crest.

Mr. W. C. Williams, First Assistant State Highway Engineer, reported on a request to purchase state-owned property at the south end of the Siuslaw River Bridge at Florence. He advised that this matter has been investigated and it appears that the property consists of the old ferry landing at this place, which it is believed should be retained by the state inasmuch as it would afford an opportunity to landscape the bridge end. He recommended that the property not be sold. The Commission approved the recommendation unanimously.

The matter of constructing a parking area along the Columbia River Highway revision at Multnomah Falls had the attention of the Commission as a matter of unfinished business. The Engineer advised that he has no report to make on this matter. The Commission ordered the item deleted from future agendas.

The matter of improving the Columbia River Highway through the town of Scappoose, as requested by a delegation which appeared before the Commission at its August meeting, was brought up for discussion. The Engineer was instructed to keep this project in mind for probable construction as a Minor Betterment Project in 1948.

A request for the installation of a stop and go light at the intersection of Second Avenue East and Third Street, in Tillamook, being the intersection of two state highway routes, had the attention of the Commission. The Engineer advised that the Commission referred this matter to him at the previous meeting for investigation and report, but his report on the subject is not ready for presentation at this time.

The Engineer also advised that he has no report to make on the matter of the "no parking" signs which are being maintained on US99E in the vicinity of Hubbard concerning which objections have been offered although he believes that the reasons which prompted the objections have been remedied. The Commission ordered that this matter be deleted from future agendas.

The matter of appointing a State Parks Superintendent was brought up for discussion. The Engineer advised that the Commission referred this matter to him and the Parks Superintendent at the previous meeting for a report showing a clear line of demarcation between the Engineering and Parks Departments. He reported that he has not had an opportunity to work the report up in detail but expects to have it ready at the next meeting.

The Engineer presented an organization chart showing heads of departments and first assistants and their duties as instructed by the Commission at the previous meeting. The Commission deferred discussion of the matter until its next meeting.

The matter of providing a betterment budget, amounting to approximately $2,000,000 and consisting of projects the construction of which might defer major improvements for a number of years, was reported on by the Engineer. He advised that this matter is being given careful study and he anticipates that the list of projects in the desired category will be ready to present to the Commission at its next meeting.

The Chief Counsel reported briefly on the status of the matter of deadending certain streets along the Esplanade in Klamath Falls. He advised that the matter has not been consummated, but he is working on it and anticipates a satisfactory solution in the not distant future.

The Chief Counsel reported receipt of a letter from Prof. Edward A. Stevens, Oregon State College, Corvallis, inquiring as to the possibility of securing a small parcel of state-owned land at the west end of the Willamette River Bridge in Corvallis on which to construct and maintain a building to be used in connection with the sculling activities of the College Physical Education Department. The Engineer advised that studies for a new bridge at this location have not been prepared, and until that is done it will not be known how much land will be needed for the bridge approach. The Commission indicated a spirit of cooperation with the College in this matter but, in view of the report, decided to defer action on the request for the time being. The Engineer was instructed to have the Bridge Engineer , Mr. G. S. Paxson, personally explain the situation to Prof. Stevens.

The Chief Counsel reported a request from Rogers Construction Company, contractors for the surfacing of the Davies-North Plains Section of the Sunset Highway, Contract No. 2842, that the state take over the defense of certain damage cases which have arisen out of this contract and agree to indemnify the company aginst any loss or liability which may be imposed upon it as a result of its operations in washing the materials which they obtained from Dairy Creek and used in connection with the surfacing work. The Engineer explained that the material taken from the creek was so dirty it had to be washed before it could be placed on the road, and in so doing, the water in the stream was polluted so that people downstream could not use it, and damage claims were being instituted against the contractor as a result thereof. The Chief Counsel recommended that the Commission help them in this matter but not to the extent that they desire because, in his estimation, the contractor should bear the burden of the defense and the losses that may be incurred. The Commission approved the recommendation unanimously.

The Engineer reported the need for further changes in the plans for the Columbia River Forest Highway Project which is under the supervision of the Public Roads Administration, particularly at the Multnomah and Wahkeena Creek Falls Development Areas. According to the original plans, he said, both Multnomah and Wahkeena Creeks were to be diverted into a proposed lake, the outlet from which was to be a single culvert located on the Forest Highway Project, but owing to the lack of suitable foundations it has been necessary to shift the location farther west to a point on the state's project which necessitates its construction by the state. In addition thereto, considerable more riprap slope protection will have to be constructed because the changed highway location throws the center line farther out toward the river; also, the quantities of hydraulic embankment are increased in order to provide for proposed parking areas. The net result of these changes, he said, is to increase the probable cost of the Forest Highway contract from $948,000 to approximately $975,000, and it has the further effect of requiring the state to construct the box culvert under its contract. Due to the fact that Forest Highway cash is limited and has already been alloted to specific projects, he said, and before a change order can be negotiated with the contractor, the additional funds to insure payment of the increase must be made available. The Public Roads Administration, he said, has asked for additional state cooperation in the amount of $25,000. He recommended that this be approved. After due consideration the Commission approved the recommendation by the adoption, by unanimous vote, of the resolution marked EXHIBIT "R", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission discussed briefly the written report of the Engineer dated October 17, 1947, on investigations conducted to determine the effect of building the Ox-bow Dam on the Snake River adjacent to the Baker-Homestead Highway. (See copy of report in general files for details.) The Commission ordered the report filed.

The Engineer brought up for discussion the matter of advancing $50,000 of State Highway funds to the U. S. Army Engineers to permit them to start a flood-control project in the Walla Walla River which, when

completed, will protect the entire Walla Walla Valley. It appears that Congress has approved a $500,000 project at this place but has failed to appropriate funds to start the work, which should be done now in order to provide needed protection as soon as possible. The Engineer pointed out that a portion of the relocated highway between Milton and the Washington State Line parallels the Walla Walla River about 500 feet from the channel, and there is a possibility that it would be severely damaged were the river to leave its banks and flood the valley, as it frequently does during flood periods. Completion of the Army's project, he said, would obviate this condition. He recommended approval of the advancement of $50,000 to the Army Engineers for this purpose on the basis that the state would be reimbursed as soon as Congress appropriates funds for the flood-control project. He pointed out that there is a Federal law which provides for repayment of funds thus advanced. It appeared to the Commission that it would be advisable, in order to secure this protection for the highway, to advance the $50,000 to the Army Engineers in the form of a loan to be repaid as soon as Congress makes an appropriation for this flood-control project. The Commission thereupon voted unanimously in favor of such a loan on the condition that the Chief Counsel will see to it that the state is amply protected.

The Chief Counsel presented a petition directed to the Astoria City Council, requesting the vacation of 53rd Street, Astoria, from the north line of Birch Street to the north line of Elm Street. This vacation, he said, has been requested by the city, which has also signed the petition, and there are no other property owners involved. He recommended approval and execution of the petition. The Engineer advised that the vacation of this street does not affect the State Highway Department in any way. He concurred in the recommendation. The Commission approved the recommendation by unanimous vote. (The petition was signed on the following day.)

The Engineer brought up for discussion the matter of installing a flashing grade-crossing signal at the point where the Northern Pacific Terminal Company's railroad spur track crosses N. W. Front Avenue in the City of Portland. He advised that the former Highway Commission, on February 28, 1941, entered into an agreement with the company for the installation of this signal, which was to be an overhead type of special design because of the unusual conditions obtaining at the crossing. The estimated cost of the installation at that time, he said, was $733 which was to be paid with Federal funds appropriated for such purposes, however work on the manufacture of the signal and the securing of materials was stopped because of the wartime work stop orders and the Federal funds no longer are available. The stop orders no longer are in effect and the company is now requesting information whether the project is to be canceled or allowed to proceed to completion. He further stated that the company has already spent about $500 in the manufacture of the signal which would be lost if the installation were not completed. The Engineer advised that there is a definite need for the signal and he recommended that the project be revived and that the Commission authorize a contribution of $733 of state funds to apply on the expense

involved. The Commission approved the recommendation unanimously.

A petition signed by numerous residents of the City of Creswell, requesting the installation of a flashing beacon on each side of the railroad grade crossing of the Pacific Highway in this town, was presented. The Engineer estimated the cost of such an installation at $425. He advised that the accident rate at this point is rather high, and there is no question but that a definite hazard exists at this point. He recommended approval of the installation of both signals on the condition that the city will furnish the electrical energy required to operate them. The Commission approved the recommendation unanimously.

The Commission discussed and approved agreements, etc., as follows:

Agreement with the City of McMinnville covering construction of the Pringle Corner-McMinnville Section of the Salmon River Highway.

Agreement with Klamath County, covering maintenance of the Bonanza-Malin County road between Bonanza and a point two miles west of Malin after construction as a Federal Aid Secondary Highway has been completed.

Agreement with Union Pacific Railroad Company terminating prior agreement dated December 29, 1938, covering matter of encroachment of the Columbia River Highway on railroad property immediately west of Sandy River near Troutdale.

Agreement with Denver Parks and Victoria Parks, husband and wife, covering additional point of access on the Lenz-Kirk section of The Dalles-California Highway..

Agreement with Edward K. Piasecki, whereby Mr. Piasecki is granted permission to operate a logging road across Camas Mountain State Park in Douglas County.

Agreement with State of Idaho providing for joint construction of an extension of the Adrain-Caldwell Secondary Highway in Malheur County.

Bill of Sale covering purchase by the Pacific Telephone and Telegraph Company of materials salvaged from the former Postal Telegraph Cable Company telegraph line between Medford and Roseburg.

Bill of Sale, providing for sale of salvaged material from the Postal Telegraph Cable Company telegraph line between Medford and Roseburg to the Canyonville Telephone Company.

Bill of sale conveying to Dominico Giancono and wife 5.22 acres situate adjacent to Troutdale section of the Columbia River Highway in Multnomah County.

Agreement with City of Roseburg re moving of buildings from East Second Street (North Umpqua County Road).

Petition to vacate two blocks along 53rd Street, Astoria.

Bargain and sale deed conveying unto Polk County a portion of the Kings Valley Secondary Highway and a portion of the Dallas-Kings Valley Secondary Highway within the boundaries of Camp Adair.

Bargain and sale deed conveying unto Irma O. Pattee and Jessie M. Pattee 0.26 acre of land situate in the City of Condon.

(All this material was signed by the Commission on the following day.)

The Commission also discussed matters concerning which delegations are to appear on the following day but took no definite action on any of them except decided to deny a request from the Astoria Chamber of Commerce to acquire a small triangular tract of state-owned land near the new ferry landing at Astoria on which to erect a chamber of commerce building. It was the thought of the Commission that the use of such property for this purpose would create a hazard to the traveling public.

The meeting adjourned at 11:40 p.m. to reconvene on the following morning.

Portland, Oregon
October 22, 1947

The meeting of the Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

NORTH POWDER RIVER COUNTY ROAD IN BAKER AND UNION COUNTIES
CONSTRUCT BRIDGE OVER NORTH POWDER RIVER

E. C. Hall Co., Portland $ 35,086.40

OREGON COAST HIGHWAY IN DOUGLAS COUNTY
GARDINER SECTION

Denton Construction Co., Portland	$ 98,308.00
R. & M. Construction Co., Central Point	108,071.00

WASCO-HEPPNER SECONDARY HIGHWAY IN GILLIAM COUNTY
EAST COTTONWOOD CANYON SECTION

Gerald Miller, Prineville	$ 85,350.00
Heavy Hauling Co., Astoria	114,358.00
E. C. Hall Co., Portland	118,842.00
T. W. Thomas, Portland	123,852.00
McNutt Bros., Eugene	127,454.00
Denton Construction Co., Portland	133,220.00
K. F. Jacobsen Co., Portland	133,270.00
Leonard & Slate, Oreg. Ltd., Portland	134,842.00
F. L. Somers, Klamath Falls	138,742.00
Peter Kiewit Sons, Omaha, Nebraska	148,510.00
Inter City Sand & Gravel Co., Eugene	149,617.00
Miller & Strong, Eugene	159,944.00
Vernie Jarl, Gresham	165,152.00
Natt McDougall Co., Portland	170,097.00
Smith Bros., Vancouver, Wn.	180,653.00
Carl M. Halvorson, Salem	186,961.00

COLUMBIA RIVER HIGHWAY (N. E. SANDY BOULEVARD) IN MULTNOMAH COUNTY
PARKROSE SECTION

W. R. Grasle Co., Portland	$ 10,850.00

LITTLE SHEEP CREEK SECONDARY HIGHWAY IN WALLOWA COUNTY
WEST UNIT, SHEEP CREEK HILL SECTION

J. C. Papin, Baker	$ 165,080.00
Natt McDougall Co., Portland	178,071.25

The Commission signed agreements and other material that were discussed and approved at the meeting on the previous evening.

The Engineer requested authority to spend $19,000 for a roadside improvement project on the Minor Creek-Agate Beach Section of the Oregon Coast Highway, the work to consist of covering the excavation slopes with topsoil and seeding them to grass and native plants, which work is to be done by state forces. He advised that this project is urgent in order to arrest serious wind and water erosion on the cut slopes of the project, the cuts being mainly through sand formations and in close proximity to the ocean where they are subject to the full sweep of high-velocity winds which

are causing serious erosion. The Commission approved the request by unanimous vote.

Messrs. Gene Washburne and Lloyd Hyde, Swisshome, Oregon, representing the Washburne Lumber Company, appeared before the Commission regarding the improvement of the Alsea-Deadwood Secondary State Highway, in Lane County. Mr. Washburne was principal spokesman. He advised that he has been appointed as spokesman for the eleven sawmills operating in that district, all of which are required to truck their lumber from 60 to 70 miles over the highway to market. He gave as his thought that there is sufficient timber being taken out of this district to justify the improvement of the highway. Chairman Banfield advised that, according to a report from the Engineer, it is going to cost about $275,000 to make a first-class improvement, and about $75,000 to provide a temporary improvement, in view of which it appears that the Commission is in no position to approve the project. The Engineer explained that for the sum of about $75,000 a temporary rock surface could be provided and for about $25,000 extra, some of the worst turns could be widened. With an expenditure of $100,000, he said, a serviceable road could be provided, but that is about all that could be said for it. The matter was discussed at considerable length, and as a result Chairman Banfield stated that the Commission is not in position to make any definite commitment but will have the project analyzed by the Engineer to ascertain whether or not anything can be done to help out the situation. He made it clear that the Commission is making no promises or commitments. The matter was thereupon referred by the Commission to the Engineer for such analysis and report.

Mr. Frank L. Calise, City Manager, Vale, appeared before the Commission inquiring if the narrow bridge east of Vale is to be moved. He stated that what appeared to be survey stakes in the vicinity of the bridge had led the city authorities to believe that a change in location was contemplated. The Chief Engineer informed him that the H ighway Department has no plans for the relocation of the existing highway or for moving the bridge and that the stakes were probably placed there for reference purposes only.

The matter of granting access to the Ray E. Hageman property at the Fort Hill Bridge in connection with the highway construction now in progress there was again discussed. The Engineer stated that the matter has been checked and it is now his recommendation that such access be allowed on the terms outlined by the Assistant Counsel, Mr. De Souza, on the previous day, and subject to the condition that the access shall be built in conformity with state design but at Mr. Hageman's expense. The Commission approved the recommendation unanimously.

Mr. Shull, member, Board of County Commissioners of Multnomah County appeared before the Commission and inquired whether or not the Commission has received a decision from the U. S. Engineers regarding the vertical clearance that should be provided for the proposed Sauvies Island Bridge and the navigability of the channel of the Willamette River at this point. The Engineer stated that he has received no reply as yet but that he would discuss the matter with the Army Engineers in an endeavor to obtain a concession for a low structure.

Mr. Shull also inquired if the basis of apportionment of cost between the county and the state on signal installations could be adjusted on some other than a 50-50 basis. He pointed out that from the county's standpoint the 50-50 basis is not always equitable and suggested consideration of each case separately and the apportionment of the costs to the county and the state according to County Road and State Highway traffic volume. Chairman Banfield explained that the 50-50 basis has been the Commission's standard practice for several months and the Commission is not inclined to change it; moreover, the amount involved is not great and will not hurt any county. Mr. Shull stated his approval of the policy and advised that he would recommend to his Board acceptance of the Commission's offer with respect to the installation of traffic signals on Canyon Road at Sylvan.

The Chief Counsel brought up for discussion and read aloud a draft of a proposed agreement with the City of Portland covering the Sullivan Gulch Project. This matter was discussed at considerable length, during which Chairman Banfield stated that before the agreement could be offered to the other parties concerned it would be necessary to get the mechanics of the financial end straightened out to see whether or not the state would have enough money, both Federal Urban and state, to warrant starting the project, it having been set up on the basis of using Federal Urban money. It was his thought that it would require about seven and one-half years to complete the project, two and one-half years of which would be consumed in preparation of plans and acquiring right of way, etc., and five years in construction on the basis that it would take one year to construct each of the five units. He also mentioned that the agreement should contain provision that the city shall maintain the overpass streets, landscaped areas and traffic lights, etc.

With respect to finances, Chairman Banfield wished to know the amount of Federal Urban money that would be available to this district each year and how much state money would have to bet set aside to match it. He also asked if the mechanics of the project could be worked out on a year-to year basis and advised that the Commission would want to know how long it would take before the City of Portland would be in position to make good on its portion of the contract. He pointed out that this is the longest commitment ever made by any State Highway Commission, and, such being the case, every item entering into it should be thoroughly covered in writing between the city and the state so the Commission can study each one and know what obligations it has to make and what the obligations of the other parties are to be. It is of vital concern, he said, that the Commission know where the money is coming from to finance the work, both Federal Aid or Urban and state funds. If the total funds available still come within the amount that would be allocated to this particular area, that is one thing; but if they do not, then the Commission would have to some more figuring because it is not going to take money away from some other project for this one. As the result of the discussion the Engineer and the Chief Counsel were instructed to investigate the matter further, to work out details and to report back to the Commission.

Mr. Frank A. Bemis of Oakland, Oregon, appeared before the Commission regarding the proposed location of the Elkton-Sutherlin Highway in Dodge Canyon. Mr. Bemis objected to the proposed route leaving the old route and

cutting through his field. He stated that this field was planted to a special kind of grass and was very valuable. As the map that he presented did not show the exact location of the proposed route the Engineer and Chief Counsel were instructed to have representatives of the Engineering and Right of Way Departments go over the proposed location with Mr. Bemis and show him exactly where the contemplated route is located. Arrangements were thereupon made for Asst. Engineer W. C. Williams and someone from the Right of Way Department to call upon Mr. Bemis on October 30.

The Commission recessed for luncheon at 11:40 a.m. and reconvened at 2:00 p.m. with the same persons present.

Mr. William A. Bowes, City Commissioner, Portland, appeared before the Commission regarding the proposed Sullivan Gulch Highway project. He asked the Commission to approve the project for future construction as soon as possible inasmuch as the City of Portland is to vote in May, 1948, on a 2-mill levy covering a period of three years to provide funds to meet the city's share of the costs. He stated that the city can start discharging its obligations as soon as the voters approve the levy. Chairman Banfield pointed out that the Commission cannot program this improvement until the mechanics of the finances are known and arrangements made to balance the accounts. The monies available in 1949 and later, he said, are unknown quantities at this time. He pointed out that funds available to the Commission must be apportioned fairly among the various state districts and that this included Federal as well as state money, and because Congress did not appropriate Forest Highway Funds during its last session, it may be necessary to use state funds to replace them. It appears now, he said, that work on the project could not be started for two years and could not be completed for seven years; also, that the proposed agreement with the city must be based on those premises. He expressed doubt that the form of agreement would be in shape for final approval by the Commission at its next meeting, in fact, he said, the Commission has not yet determined if it can go ahead with the project; however, the Commission will endeavor to get a workable agreement into shape for consideration at that time. The Engineer and the Chief Counsel were thereupon instructed to send to the Commissioners one week before the next meeting a tentative draft of a proposed agreement. A copy of this draft is also to be given Mr. Bowes for his information with the understanding that it is unofficial.

Chairman Banfield inquired as to what the city of Portland has done about acquiring right of way for the proposed traffic circle on Jefferson Street, near S. W. 19th Avenue and was informed by Mr. Bowes that the City Council is waiting for definite information from the State Highway Commission as to just what property the state needs. The Engineer was instructed to furnish such information to the city within the next three days.

Mr. A. R. Bowman headed a delegation from Prineville which appeared before the Commission regarding the rerouting of the Crooked River Highway because of a new dam in Crooked River which the U. S. Reclamation Service proposes to construct near the junction of this highway and the Crooked River-Paulina Highway. Others in the group were: W. B. Morse, State Representative;

Otto Hoppes, laundryman; Orville Yancey, rancher; Ervin Grimes, rancher; L. E. Coles, Manager, Ochoco Irrigation District; Claude Dunham, County Commissioner, all of Prineville, and Kenneth Sawyer, Chairman, Agriculture Committee, Portland Chamber of Commerce; W. D. B. Dodson, Portland, Washington, D. C. representative of the Portland Chamber of Commerce; and Kenneth C. Miller, representing the S. P. & S. railroad, all of Portland. Mr. Bowman recited briefly the history of the Crooked River Irrigation Project. He advised that, under the original project, sufficient water was not provided to irrigate the land that was included in the district, and as a result thereof, the farmers couldn't pay their assessments, the District defaulted in its bonds, and the ranchers lost their money. The bonds, he said, were refinanced by the R. F. C. in 1933, and for the last 12 years a new plan has been studied, the results of which will be ready to present to Congress in about a month.

Mr. Bowman further stated that, according to the present plan, a portion of the state highway will be inundated, and, when the matter first came up several years ago the State Highway Engineer estimated it would cost about $680,000 to rebuild it around the dam. The farmers of the District, he said, are not in position to assume the obligation and he suggested the following proposition to relieve them of their expense; that the Crooked River Highway be rerouted over a county road across Combs Flat to a connection with the Crooked River-Paulina Highway near Davis Ranch, thence along this highway and an extension thereof using an old county road and a CCC road to a junction with the Central Oregon Highway west of Burns. Such routing, he said, would make it possible for the Commission to abandon the present Crooked River Highway between Prineville and the Central Oregon Highway Junction, and would save the Irrigation District the expense of rebuilding the highway around the dam. He explained that what they have in mind is for the state to take over the Combs Flat County Road "as is" and maintain it in its present condition until such time as the Commission feels it should be improved on a permanent basis, which will not cost the state any more than it is now spending for maintenance on the present route, and the only extra expense to the state would be for graveling of the CCC road which is estimated to cost $30,000. Mr. Coles declared that the Combs Flat Road is now in as good condition as is the Crooked River Highway and gave as his thought that the exchange of highways suggested by Mr. Bowman is very fair.

The Engineer estimated the cost to rebuild the highway around the dam at $500,000 and mentioned an act now before Congress the purpose of which is to provide Federal funds to finance projects of this kind. He advised that he is not in position to give any figures on what it would cost to recondition the road suggested by Mr. Bowman and that such information could not be ascertained without an investigation. Chairman Banfield gave as his understanding that the delegation is requesting state highway funds in the amount of $500,000 to subsidize their reclamation project in which the State Highway Commission is not particularly interested. He advised that the Commission does not have the funds available, nevertheless the matter will be investigated by the Engineer from all angles and the Commission will make its final decision as soon as his report on the subject has been analyzed.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and unanimously approved the action thereon as was immediately thereafter publicly announced by Chairman Banfield, as follows:

"Construction of a concrete bridge over the North Powder River on the North Powder River County Road five miles south of the town of North Powder, in Baker and Union Counties. The Commission received only one bid for this project, being that of E. C. Hall Co., Portland, at $35,086.40. The bid has been rejected.

"Gardiner Section of the Oregon Coast Highway, in Douglas County. 0.72 mile of grade and bituminous macadam widening. The Commission received two bids for this work, the low one being that of Denton Construction Co., Portland, at $98,308. The other was submitted by R. & M. Construction Co., Central Point, Oregon, at $108,071. The Commission has awarded this contract to the low bidder, Denton Construction Co.

"East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, in Gilliam County. 5.22 miles of grading and roadbed topping. Gerald Miller, Prineville, submitted the low bid for this work in the amount of $85,350. The next low bid was submitted by the Heavy Hauling Co., Astoria, at $114,358. There were 14 higher bids. The Commission has deferred the award of this contract pending execution of an agreement with the Gilliam County Court concerning the project. The Commission has referred all of the bids to the Engineer with authority to award the contract to the low bidder, Gerald Miller, when the County Court has signed this agreement.

"Installation of traffic signals at N. E. Prescott Street, N. E. Columbia Boulevard, N. E. 105th Avenue, and N. E. 112th Avenue, on the Parkrose Section of the Columbia River Highway, Multnomah County. The Commission received only one bid for this work, being that of W. R. Grasle Co., Portland, at $10,850. The contract has been awarded to this bidder.

"West Unit, Sheep Creek Hill Section of the Little Sheep Creek Secondary Highway, in Wallowa County. 3.17 miles of grading and oil mat surfacing and furnishing crushed rock in stockpiles. J. C. Papin, Baker, submitted the low bid for this work in the amount of $ 165,080. The next low, and only other, bid was submitted by Natt McDougall Co., Portland, at $178,071.25. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, J. C. Papin, when certain conditions have been satisfied, including execution of an agreement by the County Court."

Mr. W. H. Lynch, Division Engineer and Mr. F. E. Andrews, Principal Highway Engineer, representing the Public Roads Administration, came before the Commission at this time regarding certain revisions in the Forest Highway Program. Mr. Lynch advised that, due to a limited Forest Highway appropriation, increased construction costs, etc, it is highly

desirable to modify the presently approved Forest Highway Programs for Oregon for two of the fiscal years as follows:

Delete from the fiscal year 1943 and previous fund program the grading of the Warm Springs Highway through the Mt. Hood National Forest from the Wapinitia Junction to the Forest boundary, 6.9 miles in length, for which the sum of $ 230,000 of Forest Highway Funds were set up. This deletion is recommended, he said, because the State of Oregon has assumed the obligation and will finance the project with state monies.

Fiscal year 1946 (First postwar year), Project 28-D, Columbia River Highway grading, bridge and railroad overpass construction, 3.46 miles in length. Mr. Lynch advised that this improvement is now under contract at a probable cost of $948,000, but because of the revision at Multnomah Falls recently approved by the Highway Commission, the Forest Service, and the Public Roads Administration, an additional $25,000 is required which the Highway Commission has already agreed, at this meeting, to contribute.

North Santiam Highway grading and viaducts, 4.6 miles in length, Project 24-A2, for which $300,000 has been provided in the present Forest Highway Program for this work. Mr. Lynch pointed out that this project is now financed with War Department and state funds and suggested in view thereof that the $300,000 of Forest Highway Funds be expended for other work on the same route in order to advance completion of this highway and make it available as a substitute for the existing railroad. The Interstate Commerce Commission, he said, will not permit the abandonment of the railroad until the highway is constructed to replace it, and this transfer of funds will take care of this situation and will make it possible for the Detroit Dam to proceed. He suggested the following transfer of such funds: $ 225,000 for grading Unit 2 and Unit 1, length 3.19 miles, Project 24-B3, C4; $75,000 for construction of a bridge over Breitenbush Creek, Project 24-B5.

The Commission by unanimous vote approved such modifications and thereupon signed the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington, D. C., covering the matter:

486 Oregon General October 21, 1947

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

The limited forest highway appropriations, increased construction costs, etc., make it desirable to effect certain modifications in the presently approved forest highway programs for Oregon for two of the fiscal years. It is accordingly recommended that the following revisions be approved for the fiscal years as indicated.

(Con't)

Oct.21,'47

Fiscal Year 1943 and Previous Funds

Project 42-A1, Warm Springs Highway, Grading
Length 6.9 miles - $230,000.00

The State of Oregon has now assumed this obligation and it is recommended that the project be cancelled. The reallocation of those funds will be provided in a future program.

Fiscal Year 1946 (First Postwar Year)

Project 28-D, Columbia River Highway, Grading, Bridge and Railroad Overpass, Length 3.46 miles - $1,000,000.00

Unit 1 of this project, covering the grading and draining from the westerly terminus easterly to Dodson, is now under contract at a total probable cost of $948,000. The limited forest highway cash appropriation now available precludes increasing this authorization to finance a change necessitated by the new parking area etc., recently agreed upon, by the State, Forest Service and Public Roads, in the vicinity of Wahkeena and Multnomah Falls. Accordingly the State of Oregon has agreed to cooperate to the extent of $25,000.00

Project 24-A2, North Santian Highway, Grading and Viaducts, Length 4.6 miles - $300,000.00

The grading of this project is now financed with War Department and State funds. It is therefore requested that the $300,000 now approved to the project (24-A2) be authorized for expenditure on other portions of this same route as indicated below, so as to advance the completion of the highway and thus make it available for use as a substitute for the existing railroad and open the way for the Detroit Dam construction to proceed. The Interstate Commerce Commission will not permit the abandonment of the railroad until there is an adequate highway facility available to insure continuation of log haul in that area.

(1)	24-B3, Unit 2, C4, Unit 1, Grading Length 3.190 miles	$225,000.00
(2)	24-B5, Breitenbush Bridge Length 0.083 miles	75,000.00

The total estimated cost of (1) above is $543,000 and of (2) is $244,000. The plan now proposed is to soon let the grading contract for (1) but advertise only the purchase of the steel for (2) so as to insure its availability for erection next season (1948).

The additional funds necessary to carry out this plan have been or will be made available by the State of Oregon and/or the War Department before the work is advertised. The immediate action contemplated

(Con't)

by this program letter is to insure that available forest highway funds be approved for use under the correct project designation.

Very truly yours,

/S/ W. H. Lynch
W. H. LYNCH

OREGON STATE HIGHWAY COMMISSION

By /S/ T. H. Banfield
Chairman

By /S/ A. W. Schaupp
Commissioner

By /S/ Ben R. Chandler
Commissioner

The Commission discussed and signed a letter directed to Hon. Earl Snell, Governor of the State of Oregon, requesting that the following persons who have now reached the retirement age for state employees be retained in their present positions until December 31,1948, such action being in conformity with a decision of the Commission reached by unanimous vote at its previous meeting:

Clifford L. Gardiner	Right of Way Agent
Mark D. McCallister	Right of Way Agent
W. S. McChesney	Right of Way Agent
A. B. Kneass	Real Estate Superintendent
W. J. Minkiewitz	Clerk III
Orrin A. Chase	Asst. Staff Engineer (CE III)
F. D. Eason	Division Engineer (CE IV)
Lambertus Heuperman	Engineer Designer 5 (CE II)
Frank G. Hutchinson	Engineer Designer (CE II)
Hollis W. Libby	Asst. Staff Engineer (CE IV)
Carl P. Richards	CE II
E. A. Skelley	Asst. Staff Engineer (CE III)
C. C. Seeley	District Maint. Supt. (CE II)
W. A. Langille	Information Writer I

The Commission also had under discussion the employment of an accounting firm to study the accounting activities of the State Highway

Department with a view of recommending a division between the Engineering and the Accounting Department functions. The Commission voted unanimously to employ the firm of Whitfield, Stratford and Company, Certified Public Accountants, Pacific Building, Portland, Oregon, to make such study.

There being no further business to come before the Commission at this time the meeting adjourned at 3:15 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

EXHIBITS "A" THROUGH "R"

Minutes of October 21 and 22, 1947

EXHIBIT "A"
Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

EXHIBIT "B1"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites. stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and both necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and both necessary for the accomplishment of the purposes hereinafter expresly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows: to wit:

Real property owned by B. A. Kliks and Louise B Kliks, which property is located in the northwest quarter ($NW\frac{1}{4}$) of Section 26, Township 1 North, Range 3 East, W. M., Multnomah County, Oregon and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R11902A, which property is being acquired for right of way purposes in connection with the Columbia River Highway; *

OCT 21 1947

Exhibit "B1" (Con't)

Real property owned by G. C. Sherlock and Gordon Dolan, which property is located in the southwest quarter ($SW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 15, Township 35 South, Range 1 West, W. M., Jackson County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R12476, which property is being acquired for right of way purposes in connection with the Crater Lake Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State High-

way Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of October, 1947

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file on the office of the State Highway Commission, Salem, being Resolution No. 86, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

OCT 21 1947

EXHIBIT "B2"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from subtting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, cap sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Carlton-Chehalem Valley County Road in Yamhill County, State of Oregon, is a county road which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, said highway is now being improved pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon, and Yamhill County; and

WHEREAS, the real property hereinafter described is necessary for the purpose of procuring roadbuilding materials therefrom for use in connection with the contemplated and proposed improvement of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described, which real property is owned by Elmer Sohrweid and Edith Sohrweid, husband and wife, is necessary for the purposes herinabove expressly and specifically set forth, which said real property is described as follows, to wit:

Exhibit "B2" (Con't)

A parcel of land lying in the Matthew Patton D. L. C. No. 62 in Township 3 South, Range 3 West, W. M., Yamhill County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Elmer Sohrweid and Edith Sohrweid recorded in Book 128, Page 839, of Yamhill County Record of Deeds; the said parcel being described as follows:

Beginning at an iron pipe, said pipe being 753.37 feet south and 2121.56 feet east of the northwest corner of the Matthew Patton D. L. C. No. 62; thence North 21° 38' East a distance of 470 feet; thence North 31° 05' East a distance of 369.54 feet; thence east a distance of 250 feet; thence south a distance of 753.37 feet; thence west a distance of 614.05 feet to the place of beginning, containing 7.80 acres

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department the necessary and an adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of October, 1947.

Exhibit "B3" (Con't)

6 West, W. M. Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 13957, which property is being acquired for right of way purposes in connection with the Elkton-Sutherlin Highway; *

Real property owned by Frank A. Bemis, which property is located in the west half ($W\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 11, Township 25 South, Range 6 West, W. M., and in the northwest quarter ($NW\frac{1}{4}$) of Section 11 Township 25 South, Range 6 West, W. M., Douglas County, Oregon and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3, and is further identified in the records of the Highway Commission as file R 13960, which property is being acquired for right of way purposes in connection with the Elkton-Sutherlin Highway; *

Real property owned by Weyerhaeuser Timber Company, which property is located in the south half ($S\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 1, Township 38 South, Range 7 East, W. M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 14082, which property is being acquired for the purpose of acquiring roadbuilding materials therefrom for use in connection with the Klamath Lake Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be,and in the event that no satisfactory

agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of October, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 87, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for right of way purposes in connection with the Sunset Highway;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described, which property is owned by Mary H. Ross and Anna M. Algesheimer, is necessary for the accomplishment of the purposes hereinabove expressly and specifically set forth, which said real property is described as follows, to wit:

The following described property, known as Tax Lot 49, in the County of Multnomah and State of Oregon, to wit:

Beginning at an iron pipe at the intersection of the center line of the Canyon Road and the center line of the Scholls Ferry Road at the town of Zion; thence south 179 feet tracing the center line of

OCT 21 1947

14304

Exhibit "B4" (Con't)

Scholls Ferry Road to a stone; thence South 74° 38' West 203.1 feet to a point in said road; thence South 46° 4' West 109.4 feet to an iron pipe in said road; thence North 7° 33' West 392.17 feet to an iron pipe in the Canyon Road; thence South 58° 49' East 154.5 feet to a point in said Canyon Road; thence east 184 feet to an iron pipe, the place of beginning, being part of the Donation Land Claim of N. B. Jones in Section 6 in Township 1 South of Range 1 East of the Willamette Meridian; containing 2.10 acres, more or less, including 1.1 acres, more or less, now within the right of way limits of Canyon Road and Scholls Ferry Road.

2. That the Commission does hereby find and declare that the said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said property is being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-first day of October, 1947.

OCT 21 1947

EXHIBIT "C"

Minutes of October 21 and 22, 1947

R E S O L U T I O N

WHEREAS, the State Highway Commission, after due deliberation has found it advisable and expedient to transfer Federal Aid funds allocated to the Forest Boundary-Taylor Creek grading project and to the Forest Boundary-Jones Ranch surfacing project on the Ochoco Highway, Wheeler County, in the Federal Aid Postwar program, to the grading of the Wapinitia Junction-Forest Boundary Section of the Warm Springs Highway, Wasco County, formerly a Forest Highway project in the postwar program, and

WHEREAS, said transfer is only for the purpose of expediting projects and securing the highest utility of available Federal funds, and was not for the purpose of deleting projects or otherwise changing the Federal Aid postwar program,

NOW, THEREFORE, be it resolved by the Commission, all members being present and voting affirmatively, as follows:

1. That any transfer of Federal funds from one project to another project on the Federal Aid postwar program be and the same shall be considered as a mere loan of funds to expedite construction, and shall not in any way be construed as a deletion or elimination of the project from which said funds were transferred, and

2. That as soon as further Federal funds are available and the construction of a given section can and should be undertaken, the Federal funds becoming available shall be restored or allocated to the original project and said project carried on to completion in conformity with the Federal Aid postwar program.

The Secretary is instructed to place this Resolution in the Minutes of the Commission as of October 21, 1947.

OCT 21 1947

14396

EXHIBIT "D"

Minutes of October 21 and 22, 1947

R E S O L U T I O N

WHEREAS, under the provisions of Title 100 O.C.L.A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Malheur County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described county road in Malheur County be and the said county road hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

An Extension of the Adrian-Caldwell Secondary State Highway No. 454:

Beginning at a point on the Oregon-Idaho State Line at the quarter section corner common to Sections 31 and 6, T's. 21 and 22 S., R. 47 E., W. M.; thence southerly along the Oregon Idaho State Line approximately 0.6 mile to a junction with the county road in Canyon County, Idaho, approximately 0.1 mile north of the Snake River; being approximately 0.6 mile in length.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Title 100 O.C.L.A., Subsection 36, Section 115.

3. That this resolution be entered in the minutes of the meeting of the Highway Commission of October 21, 1947, and that the Secretary be and he hereby is instructed to deliver to the County Court of Malheur County and to the County Clerk of Malheur County duly certified copies thereof.

OCT 21 1947

14307

EXHIBIT "E"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been, by the State Highway Commission, apportioned to the City of Umatilla, for disbursement during the calendar year 1945 for street purposes as provided in said law, the sum of $517.17;

AND, WHEREAS, said City has, by appropriate action evidenced by resolution, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify said City for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the fund above specified the following streets in said City:

Umatilla - "K" Street, from 3rd to 1st Street; "I" Street from 1st to Water Street; "G" Street from 4th to 3rd Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by said City, hereby are approved.

3. That the action taken by said City, as evidenced by appropriate resolutions adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said City, so as to qualify said City to receive and use the funds to it apportioned.

4. That Resolutions Forms 1 and 2 adopted by the City on October 1,1945 and approved by the Highway Commission on February 25, 1946 shall be canceled, in accordance with the request of the City on file in the records of the State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Highway Commission, the Secretary shall thereafter mail to the proper officer in said City a duly certified copy of the resolutions adopted by the City, together with a copy of the resolution approving the plans submitted by said City.

6. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 21st day of October, 1947.

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Scotts Mills - - - - - - - - - - - - - - - - - $340.96
Umatilla - - - - - - - - - - - - - - - - - - - 555.74

AND, WHEREAS, each of said cities and/or towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities and/or towns:

Scotts Mills - Grand View Avenue, from 3rd Street to 6th Street
Umatilla - "K" Street from 3rd Street to 1st Street; "I" Street from 1st Street to Water Street; "G" Street from 4th Street to 3rd Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Forms 1 and 2 adopted by the City of Umatilla on June 3, 1946, and approved by the State Highway Commission on September 23, 1946, shall be canceled, in accordance with the request of the City of Umatilla on file in the records of the State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor,

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of October, 1947.

OCT 21 1947

EXHIBIT "J"

Minutes of October 21 and 22, 1947

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

Anderson Valley and Swamp Creek Sections of the Diamond Valley Secondary Highway, Harney County;

Tyee Road-Sutherlin Section of the Elkton-Sutherlin Secondary Highway, Douglas County;

Denny Creek Section of the Klamath Lake Secondary Highway, Klamath County;

Meadowbrook-Red Bridge Section of the Starkey Secondary Highway, Union County,

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 6B-23-12 and 6B-24-7, 6B-24-15 and 6B-24-16, 4B-24-24, and 6B-23-18, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-first day of October, 1947.

Minutes of October 21 and 22, 1947

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2637 with J. S. Rosley for furnishing crushed rock in stockpiles on the Belknap Springs-Fourmile Butte Section of the McKenzie Highway in Deschutes and Lane Counties; completed September 9, 1945.

Contract No. 2744 with Slate Construction Company for slide correction on the Toll Creek-Snow Creek Section of the Santiam Highway in Linn County; completed August 1, 1947.

Contract No. 2749 with J. R. Maginnis for clearing on the Circle Bridge-Hug Point Section of the Oregon Coast Highway, in Clatsop County; completed September 19, 1947.

Contract No. 2778 with Sound Construction and Engineering Co. for grading on the Davies-North Plains Section of the Sunset Highway, in Washington County; completed October 10, 1947.

Contract No. 2795 with Strong & Macdonald for grading on the Spring Creek Hill Section of The Dalles-California Highway, in Klamath County; completed July 5, 1947.

Contract No. 2818 with Del R. Beebe for constructing oil mat wearing surface on the Hampton-Suntex-Juniper Ridge Section of the Central Oregon and Lakeview-Burns Highways in Deschutes, Lake and Harney Counties; completed September 2, 1947.

Contract No. 2824 with J. C. Compton Co. for grade widening and asphaltic concrete paving on the Dixonville-Marks Ranch Section of the North Umpqua County Road in Douglas County; completed September 3, 1947.

Contract No. 2837 with Rogers Construction Co. for regrading, oil mat surfacing and rock production on the Madras-Prineville Section of the Madras-Prineville Highway in Crook and Jefferson Counties; completed September 9, 1947.

Contract No. 2842 with Rogers Construction Co. for bituminous macadam surfacing on the Davies-North Plains Section of the Sunset Highway in Washington County; completed OCtober 2, 1947.

OCT 21 1947

Exhibit "K" (Con't)

Contract No. 2854 with A. H. Saxton & Sons for furnishing crushed rock in stockpiles on the Service Creek-Kimberly Section of the John Day Highway, in Wheeler County; completed July 31, 1947.

Contract No. 2864 with Jack R. Taggart for furnishing crushed rock in stockpiles on the Ironside-Jamieson Section of the John Day Highway, in Malheur County; completed August 11, 1947.

Contract No. 2884 with Stanley & Ehlen for paving on the Nyssa (1st St.-7th St.) Section of the Old Oregon Trail Highway, in Malheur County; completed August 29, 1947.

Contract No. 2885 with Stanley & Ehlen for pavement widening on the Ontario (S. W. 1st St.-S. W. 12th St.) Section of the Old Oregon Trail Highway, in Malheur County; completed September 4, 1947.

Contract No. 2890 with L. E. Snell for painting the Yaquina Bay Bridge on the Oregon Coast Highway in Lincoln County; completed September 22, 1947.

Contract No. 2915 with Werner & Jeske for grading and paving on the Springfield Junction Turnaround Section of the McKenzie Highway, in Lane County; completed August 23, 1947.

Contract No. 2916 with Frank M. Parsons for bituminous macadam widening on the Foster Section of the Santiam Highway, in Linn County; completed September 27, 1947.

Contract No. 2921 with Warren Northwest, Inc. for paving on the Corvallis (Harrison St.) Section of the Pacific Highway West, in Benton County; completed September 15, 1947.

Contract No. 2927 with Grinstad & Vanderveldt for grading and topping on the Lewis and Clark River Section of the Saddle Mountain Park Road, in Clatsop County; completed September 30, 1947.

Contract No. 2930 with Dobyns & Webb for slope and pier protection on the Santiam River Section of the Pacific Highway East in Linn County; completed September 13, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

OCT 21 1947

14318

EXHIBIT "I"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, the Highway Commission found it necessary and desirable to relocate the section of the Columbia River Highway No. 2 known as the Columbia County Line-Portland Section, the northerly terminus being on the line between Columbia and Multnomah Counties and the southerly terminus at the city limits of Portland; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, which eliminated sections or areas are no longer needed for highway or other public purposes; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of one of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The area of land within the limits of the old right of way which lies between Engineer's Station 270+20 and Engineer's Station 266+00 of the reconstructed line, and which area is otherwise shown and identified colored in brown on the map attached hereto, which map is marked "Exhibit A" and by this reference is made a part of this resolution, is no longer needed for highway or other public purposes and therefore all of said area colored in brown is eliminated from the right of way of said highway, and such title, interest, or right which the State has or may have had in said real property, is hereby permitted to revert to the owners of the real properties abutting directly upon the said area colored in brown.

2. The area shown colored in green on said "Exhibit A" includes right of way and other property acquired for the relocation and reconstruction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all of the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for right of way and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such purposes and uses, therefore, the Commission does hereby declare and order that possession of and title to all the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. That the Engineer is hereby instructed and directed to place, erect, and thereafter maintain posts, markers, or other monuments along the boundary or border of said area or areas, by which the public shall be advised that said area is state-owned and controlled.

4. That this resolution shall be entered in the minutes and records records of the Commission this 21st day of October, 1947.

OCT 21 1947

EXHIBIT "M"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, the Commission, on the 24th day of October, 1944, adopted a resolution and entered the same in the minutes of the Commission, by which resolution the Commission authorized certain individuals, named in said resolution, to sign permits authorizing the operation of motor vehicles over public highways when such movements conformed to the regulations and provisions adopted and established by the Commission in and by said resolution, and

WHEREAS, since the adoption of said resolution,,it has developed that the purpose of said resolution can be furthered and public convenience better served by the selection of certain other Highway employes and the vesting in them authority to sign permits issued under the authority of said resolution,

NOW, THEREFORE, Be It and It Hereby is Resolved by the Commission, that the following named Highway employes, to-wit:

W. W. Stiffler	Assistant State Highway Engineer	Salem
Ralph B. Sipprell	Director of Permits	Salem
Arvid F. Parson	District Maintenance Superintendent	Pendleton
Kenneth F. Loter	District Maintenance Officeman	Astoria
L. Paul Simpson	District Maintenance Officeman	Coquille
James M. Brown	District Maintenance Officeman	John Day
James D. Pratt	District Maintenance Officeman	Baker
Leland P. Dixon	District Maintenance Officeman	Burns
John F. Kergil	District Maintenance Officeman	The Dalles

be and they hereby are authorized to issue permits within the meaning, purpose and scope of said resolution, and any permit issued, as provided therein, shall be valid when signed for the Commission by the above named persons;

That this resolution shall be deemed an amendment of said resolution adopted on October 24, 1944, and shall have no force or effect outside or beyond the provisions of said resolution;

That this resolution be entered in the minutes and records of the Commission as of the 21st day of October, 1947.

14320

EXHIBIT "N"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, the State of Oregon, acting by and through its State Highway Commission, is the owner of the following described property:

All of the tide lands below ordinary high-water markings, fronting and abutting upon the Donation Land Claims of Philip Gearhart and J. J. Leuk, and on Government Lots 2 and 3, Section 9, all in Township 6 North, Range 10 West, W. M., Clatsop County, Oregon; containing 283.11 acres, more or less; and

WHEREAS, said property was acquired by the Commission on February 3, 1939, as and for an Ocean Way-side strip, and is being held for State Park purposes; and

WHEREAS, the Commission upon investigation and recommendation of its Engineer, Counsel, and State Parks Superintendent, has found and now finds that said area can best be utilized by the public as a recreational area , and that the use of the area by motor vehicles, or for the landing or taking off of aircraft is a real menace and hazard to persons using and frequenting the area for recreational purposes.

NOW, THEREFORE, acting pursuant to the provisions of Chapter 493, Oregon Laws, 1947, and with the approval of the City Council of the City of Gearhart, a municipality contiguous to the above described portion of the Ocean Shore, be it resolved and it hereby is resolved by this Commission, all members present and voting affirmatively:

1. That the travel or operation of motor vehicles upon the tide lands and recreational area above described and adjacent to the City of Gearhart be, and the same hereby is, prohibited.

2. That the landing or taking off of aircraft within the area above described be, and the same hereby is, prohibited.

3. That the Engineer is directed to place barricades on the roads entering said area and upon all other ordinary means of vehicle access thereto. He is further directed to prepare and post signs so as to advise the public that the area above described is closed to motor vehicles and to the landing and taking off of aircraft.

4. This regulation shall be referred to as State Park Regulation No. 1, and shall be entered in the minutes of the Commission as of October 21, 1947.

Location of Termini		Established Speed
M. P. 4.12 (0.12 Miles North of Miles Crossing)	to M. P. 5.64 (0.53 Miles South of Lewis & Clark Bridge)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

OCT 21 1947

EXHIBIT "Q"

Minutes of October 21 and 22, 1947

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of the Pacific Highway extending from Goshen to the City of Eugene, which relocated section will serve also to accommodate traffic having occasion to use the Willamette Highway, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

14324

EXHIBIT "Q" (CON'T)

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property hereinafter described is needed and required for use in connection with the construction and maintenance of the section of the Pacific Highway known and designated as the Eugene-Goshen Section, which said property is owned by J. H. Gonyea, et al., and is particularly described as follows, to wit:

Parcel No. 1

A parcel of land lying in the William Moore D. L. C. No. 60 in the northwest quarter ($NW\frac{1}{4}$) of Section 14, Township 18 South, Range 3 West, W. M., Lane County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Joseph H. Gonyea recorded in Book 327, Page 243, of Lane County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 180 feet in width, 90 feet on each side of the center line of the Pacific Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 346+10.1 to Station 365+63, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 346+10.1, opposite and 90 feet distant from which point the westerly line of the said strip of land intersects the north line of said property; said point being 1832 feet north and 1000 feet west of the southeast corner of the William Moore D. L. C. No. 60 in Section 14, Township 18 South, Range 3 West, W. M.; thence South 17° 40' 30" East a distance of 1952.9 feet to Engineer's Station 365+63, opposite and 90 feet distant from which station the easterly line of said strip of land intersects the south line of said property.

The parcel of land to which this description applies contains 7.82 acres.

OCT 21 1947

Exhibit "Q" (Con't)

Parcel No. 2

A parcel of land lying in the southwest quarter (SW¼) of Section 11 and in the northwest quarter (NW¼) of Section 14, Township 18 South, Range 3 West, W. M., Lane County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to J. H. Gonyea recorded in Book 322, Page 674, of Lane County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 200 feet in width, 100 feet on each side of the center line of the Pacific Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 327+60.1 to Station 346+73.2, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 327+60.1, opposite and 100 feet distant from which point the easterly line of the said strip of land intersects the north line of said property, said line also being the south line of the A. H. Coryell D. L. C. No.59; said point being 30 feet south and 380 feet west of the southeast corner of D. L. C. No. 59 in Section 11, Township 18 South, Range 3 West, W. M.; thence South 17° 41' 30" East a distance of 1913.1 feet to Engineer's Station 346+73.2, opposite and 100 feet distant from which station the easterly line of said strip of land intersects the southerly line of said property.

The parcel of land to which this description applies contains 7.66 acres.

2. That said property is needed and acquisition of the same is nocessary for right of way purposes in connection with saidsection of said highway.

3. That said section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage.

4. The Commission does hereby further find and declare that, in addition to the acquisition of said real property above described, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcels of real property herein described and the highway which is to be constructed thereover, except that a crossing for farm purposes, not to exceed twenty-five feet in width, may be provided at Station 340+50 and another crossing for farm purposes, not to exceed twenty-five feet in width, may be provided at Station 359+05.

OCT 21 1947

Exhibit "Q" (Con't)

5. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

6. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owners or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto, except the above mentioned crossings for farm purposes, and in the event that no satisfactory agreement can be reached then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except the above mentioned crossings for farm purposes.

7. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

8. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-first day of October, 1947.

OCT 21 1947

EXHIBIT "R"

Minutes of Oct 21 and 22, 1947

R E S O L U T I O N

WHEREAS, the State, acting by and through its State Highway Commission, and the Federal Government, acting by and through its Public Roads Administration, have heretofore agreed with respect to the construction of a project identified as the Columbia River Forest Highway Project 28-D, Unit 1, a portion of which project is now under contract between the Federal Government and the Hydraulic Dredging Company and another portion is under contract between the State of Oregon and the Hydraulic Dredging Company; and

WHEREAS, since the execution of said respective contracts the Public Roads Administration and the Highway Commission have found it advisable and in the interests of the public generally to alter the plans as they apply to facilities and methods of handling the flows of Multnomah Creek and Wahkeena Creek; and

WHEREAS, by virtue of the proposed change of plans there is made possible and there will be incorporated in the project provision for parking of vehicles and there will likewise be provided and developed recreational facilities and accommodations which under the original plan could not be achieved; and

WHEREAS, by reason of said alteration of plans, which alterations are the result of mutual agreement between the Public Roads Administration and the Highway Commission the overall cost of the project will be increased from $948,000 to $975,000, or a total increase of $27,000; and

WHEREAS, the Government's contract provides for the construction of a concrete box culvert to handle the flow from Multnomah Creek, but the altered plans provide for the construction of a culvert at a location off the limits of the Forest Highway Project and within the limits of the State Section of said project, which culvert shall be of a design and capacity adequate to care for the flows from the Multnomah Creek and Wahkeena Creek; and

WHEREAS, by reasonof said modifications of plans it has been found both feasible and avisable to combine the flows from said creeks so as to direct said waters through a single outlet or culvert; and

WHEREAS, the Public Roads Administration has requested the State to make available to meet the additional cost which will be sustained by reason of the proposed modification of plans to care for the flows of said streams the sum of $25,000, and has also requested the State to alter or amend its contract with the Hydraulic Dredging Company so as to meet the conditions which will prevail by reason of the combining of the flows from

said two streams; and

WHEREAS, the Commission, after due consideration of said matter and on the recommendation of its engineers, is of the opinion that the proposed change or changes in plans resulting in the said increased cost warrants the use of state highway funds to the extent and for the purpose proposed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The Highway Commission does hereby consent that the Government may eliminate from its contract with the Hydraulic Dredging Company the culvert which is provided in said contract for the flowage of water from Multnomah Creek, and the Commission further agrees to alter and modify its contract with the Hydraulic Dredging Company so as to provide ample drainage facilities to care for the water from Multnomah Creek when combined with the water from Wahkeena Creek.

2. The Commission agrees further to make available to the Public Roads Administration the sum of $25,000 to meet the additional cost which the Government will sustain by reason of said proposed changes.

3. The State also agrees to assume such additional cost as may accrue or result by reason of the modification of its plans and its contract with the Hydraulic Dredging Company so as to provide facilities of sufficient capacity to take care of the flows from both of said creeks.

4. This resolution shall be entered in the minutes and records of the Commission as of the 21st day of October, 1947, and a copy thereof delivered to W H Lynch, Division Engineer for the Public Roads Administration.

Portland, Oregon
November 24, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
George W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

The State Parks Superintendent was present and reported on the following park matters:

1. Request of James B. Westfall, Astoria, for concession privileges at Bradley State Park: The Parks Superintendent presented the request and recommended that it be denied. The Commission approved the recommendation.

2. The Parks Superintendent also presented a request from Mr. E. Lee Sigfrid, Bend, for concession privileges at Peter Skene Ogden Park. He recommended that this request also be denied. The Commission approved the recommendation.

3. Request of Jack Flaucher, concessionnaire at the Vista House, Crown Point, to close this concession to the public on Mondays during the months of December, January and February: The Parks Superintendent stated his reluctance to recommend approval of this request because it is a public convenience and accommodation; however, suggested that if the Commission so desired, it might authorize Mr. Flaucher to close the place on Mondays during the month of December as a trial proposition. It was the feeling of the Commission that this concession should remain open to the public at all times, and that the Commission would be criticized if continuing service were not provided. The Commission thereupon denied the request by unanimous vote.

4. Proposed acquisition of 308 acres of land from the Crown-Zellerbach Corporation at Tillamook Head: The Parks Superintendent presented a statement prepared by the Crown-Zellerbach Corporation showing the quantity and value of timber growing on the land in question, as follows:

CROWN ZELLERBACH CORPORATION LANDS
PROPOSED SALE TO OREGON STATE PARK BOARD
TILLAMOOK HEAD PARK, CLATSOP COUNTY
VALUATION OF TIMBER

(Con't)

(Con't)

TOTAL VOLUME - 9,709 M 2,368 Cords

HEMLOCK 3501 M

of which 728 M is low quality
2773 M is good quality

SPRUCE 6208 M

of which 1072 M is low quality
5136 M is good quality

Low quality valuation

Hemlock	728 M	at	$2.00	$ 1,456.00
Spruce	1072 M	at	$4.00	$ 4,288.00
				$ 5,744.00

Good quality valuation

Hemlock	2773 M	at	$3.00	$ 8,319.00
Spruce	5136 M	at	6.00	$30,816.00
				$39,135.00

Cordwood

$ 5,744.00		
39,135.00		
$44,879.00	-	Total timber valuation
1,184.00	-	Cordwood "
$46,063.00	- -	Total valuation

Average stumpage value: Hemlock $2.79 per M. feet

Spruce $5.65 per M. feet

Cordwood .50 per cord

He pointed out that the total valuation is $46,063. He advised that there are $160,000 of unexpended funds in his 1947 budget, a portion of which could be used to purchase the tract, and that it would be possible, with selective cutting, to sell some of the ripe timber if the Commission saw fit, thereby reducing the cost of acquiring the tract. In the discussion of this matter the Parks Superintendent pointed out that in order to complete the project a trail would have to be provided for people desirous of "hiking" from Cannon Beach to Seaside, right of way for which would have to be acquired across three privately-owned tracts. The owners of these properties, he said, have agreed to give the state an easement 20 feet wide across their holdings for this purpose, on the condition that the state acquires the Crown-Zellerbach property. He recommended acquisi-

tion of the area, which, he said, is one of the most popular recreational areas in the state and exhibited a map showing the route of the trail across the three privately-owned properties. The Parks Superintendent pointed out that he originally contemplated purchasing the land only after the timber had been cut, but it now appears that the Crown-Zellerbach Corporation does not wish to sell on that basis but will sell on the basis of its cruise, and that the price it is now asking is for the timber only, which means that the state is paying nothing whatsoever for the land. The Commission deferred its decision until later in the session. (The matter was reconsidered on the following day, at which time the Commission voted unanimously to acquire the tract from the Corporation on the basis of its cruise and valuation, on the condition that leases can be obtained from the owners of the three private tracts. The Chief Counsel and the Parks Superintendent were instructed to work out a deal with the Crown-Zellerbach Corporation regarding the sale.)

5. Suggestion of the Parks Superintendent that arrangements be made with three property owners along the Umpqua Highway between Elkton and Scottsburg for the preservation of specimen trees of maple and myrtle and for opening up scenic vistas along the river: The Parks Superintendent advised that this is a very scenic section of highway, but the view is obstructed by a rank growth of underbrush, etc. so the river vistas cannot be seen. He requested authority to enter into agreements with three of the property owners along this section covering the improvement of the waysides, as was done in the case of the Coos Bay-Roseburg Highway between Coquille and Myrtle Point. The Commission approved the request by unanimous vote.

6. Proposed acquisition of Silver Creek Falls Recreational Area: The Commission's Chief Counsel reported on this matter and advised that the form of deed conveying the property to the state has been received from the National Parks Service which, in his estimation, is satisfactory and meets the requirements of the State Highway Commission. He pointed out that the deed contains no restrictions whatsoever other than one which provides that the area shall revert to the Federal Government if the Commission does not operate it for recreational purposes for a period of three years. He recommended acceptance of the deed. The Parks Superintendent concurred in the recommendation. The matter was discussed at some length, and in view of the recommendations of the Chief Counsel and the Parks Superintendent, the Commission voted unanimously to acquire the area on motion of Commissioner Schaupp which was was duly seconded by Commissioner Chandler.

7. The Commission discussed matters pertaining to the 1948 budget of the State Parks Department but deferred action thereon until the next meeting. The Parks Superintendent was instructed to report at that time a breakdown of the Park administration and maintenance operation expenses to show clearly that they are not duplicated in the general Highway Department budget for the same period.

Regarding building construction listed under park betterment items, concerning which the Parks Superintendent explained that he planned to construct single room two-car garages at a cost of about $3,000 each for temporary use as living quarters for caretakers, the Commission asked for details of the plans for such buildings, the question arising whether or not employees should be required to live in two-car garages.

Items involving landscaping and lighting were also mentioned and in this connection the Commission instructed the Engineer hereafter, in preparing estimates for construction work, to include therein such items and all other items that are required to provide a complete project, so it will not be necessary to allocate additional funds to the project later on.

The Assistant Counsel, Mr. J. W. DeSouza, requested authority to acquire real property that is needed as right of way and for other purposes. He presented a list of such properties for which options have been obtained, together with the offers that he recommended for acceptance in connection with each parcel. Following careful consideration of each individual tract, the Commission approved acquisition of the areas at the amounts stated in the option agreements. A resolution marked EXHIBIT "A", attached hereto and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

** In the discussion of this matter the Commission gave special consideration to acquiring right of way for a proposed improvement of the Oregon Coast Highway through the town of Gold Beach, Curry County. The Assistant Counsel advised that the options submitted to the Commission for approval at this meeting, plus the properties previously acquired and plus the properties that will have to be acquired by condemnation, represent all of the right of way that will be required in this town for the improvement presently proposed. It appeared from the discussion that a controversy exists with respect to the widening of this highway south of 4th Street, the terminus of the present proposed improvement. The present right of way is only 60 feet wide and is to be widened to 80 feet, and, according to the present plan, such widening is to be done on the west side of the highway in order to avoid the expense of moving some oil tanks on the opposite side, estimated to cost between $15,000 and $20,000. On the other hand, the school authorities, represented by Mr. Collier H. Buffington, who was present with regard to the matter, object to the widening on that side of the highway because it will take a strip 20 feet wide across the front of their High School grounds and will destroy the landscaping work which the school board has constructed. The Assistant Counsel presented a list of the properties that cannot be acquired by negotiation and will require condemnation, together with the offers that he recommended be made for each parcel, as follows:

Note:

The starred paragraphs on this page and on page 14334 have reference to real property items listed and starred in the attached resolution - EXHIBIT "A".

GOLD BEACH SECTION OF THE OREGON COAST HIGHWAY

		Recommended Offer
9042	Oleta A. Walker	$ 3,000.00
9045	H. W. Crook and Ruth Crook	4,500.00
9049	H. W. Crook and Richard Buffington	700.00
9037A	H. W. Crook, et ux., (contract purchasers from A. H. Gauntlett Estate)	20.00
9036	D. M. Moore, C. M. Morse and C. H. Buffington	1,500.00

These were carefully considered by the Commission, but action thereon was deferred until the following day. (The matter was reconsidered on the following day when the Commission approved the amounts of the offers and authorized condemnation of the properties. A resolution marked EXHIBIT "B5" attached hereto and by this reference made a part hereof with like effect as though extended herein, was at that time adopted by the Commission by unanimous vote.)

Mr. Buffington declared himself with respect to the improvement of the highway south of 4th Street. He pointed out that the present plan of the Commission calls for widening by taking property on the west side of the highway, which would mean taking a 20 foot strip along the frontage of the high school. He objected strenuously to this because it would take property that is needed for the school and would destroy their landscaping project. He gave as his understanding that the original plan was to widen the highway on the easterly side and urged the Commission to adhere to such plan and to acquire the right of way for the improvement now, notwithstanding that the present improvement is proposed only as far as 4th Street. He alleged that the easterly side of the highway is not built up, and, except for the oil tanks, there is no reason why the widening could not be made on that side. The Engineer advised that the widening on the westerly or high school side will provide for economic construction because it will avoid disturbing the oil tanks, which are costly things to move. Plans for the improvement, he said, call for restoration of the landscaping and the rebuilding of the rock wall in front of the high school. Commissioner Chandler advised that he has inspected the site, and, in his estimation, the only justification for widening on the high school side of the highway is the avoidance of the oil tanks. The Commission took the matter under advisement and agreed to give due consideration to moving the oil tanks before rendering its decision. (The matter was reconsidered on the following day, when the Commission instructed the Engineer to make further investigations to ascertain whether or not the highway can be widened on the easterly side south of 4th Street in conformity with the original plan, the Commission being of the opinion that it probably would be better to move the oil tanks rather than to disturb the high school property. The Chief Counsel was authorized to continue with the securing of options for right of way north of 4th Street and to condemn the property if necessary.)

Mr. Buffington then brought up for discussion the widening of the highway just south of the courthouse in the town of Gold Beach, involving the moving of the Central Service Station. He gave as his understanding that if the property owner donates right of way the state will pay the cost of moving the buildings located thereon, and in this instance that is what the owners are asking the state to do. Chairman Banfield advised that the Commission has gone on record as opposed to assuming the obligation for moving buildings and prefers to pay more for right of way rather than to assume such obligations. The Chief Counsel gave as his opinion that it would be unwise and a misuse of state money for the Commission to assume the obligation of moving the building referred to. He recommended condemnation and that the Commission pay for both the land and the building in order to avoid the assumption of such an obligation. The Commission deferred its decision until the following day. (The matter was reconsidered on the following day at which time the Commission declared its unwillingness to move the building and instructed the Chief Counsel to condemn the property if necessary to effect a satisfactory settlement.)

* In connection with the purchase of right of way for the proposed improvement of the Pacific Highway in the City of Eugene, the Assistant Counsel, Mr. DeSouza, reported the status to complete the cooperative project with the city and the county. It appears that the total cost of the right of way needed between the Mill Race Junction and the north city limits of Eugene is presently estimated at $252,000 which is about $15,000 under the original estimate. The Commission decided to proceed with the acquisition of this right of way with the understanding that the City of Eugene will reimburse the state for 50 percent of the cost.

* With respect to the acquisition of right of way needed for the widening of the Pacific Highway through Canemah, a suburb of Oregon City, the Assistant Counsel advised that the City Council has agreed to reimburse the state for the cost of constructing sidewalks insofar as they are within the corporate limits of Oregon City, provided the State Highway Commission will acquire necessary right of way and do the necessary grading for construction of sidewalks, will replace all existing concrete sidewalks where they are disturbed by the highway construction, and will construct concrete curbs throughout the section. The Commission approved this arrangement and ordered the balance of the right of way for this improvement acquired as rapidly as possible on such basis and that the project be advertised for bids to be received at the next regular meeting of the Commission.

* With respect to Item No. 5203 in the attached resolution, marked EXHIBIT "A", being additional payment to Adel E. Guerber for right of way needed for the Berger Ranch-Barnes Road Section of the Sunset Highway, the Commission approved the payment of the additional sum of $450 for the purchase of a water-softening system on the condition that Mrs. Guerber will sign a statement completely releasing the state from further obligation in connection with this acquisition.

* Regarding Item No. 14196, acquisition of the Alpha Psi Delta property in Block 82, Salem, the Commission authorized the purchase of this property, in behalf of the State Board of Control, at $19,000. The Commission

also discussed the matter of acquiring additional properties in Block 86, which is the block proposed for the State Highway Department Office Building, but decided not to authorize these purchases until the Commission has had an opportunity to discuss the matter further with the members of the Board of Control; however, the Chief Counsel was authorized to continue with the securing of options for such properties on the basis that the owners will be given six months to vacate the premises after being notified that the property is needed by the state.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

A delegation from Philomath, consisting of C. M. Hampton, representing the Benton County Lumber Company; F. M. Mann, representing the Ellis and Mann Logging Company; and Clyde Rose, of the Rose Bros. Lumber Company, came before the Commission at this time regarding the recent order which limits to 20,000 pounds gross the weight of loads that may be transported over the Eddyville - Blodgett Secondary Highway. They offered objection to such reduced load limit, alleging that it would not permit the truck hauling of logs. They urged reconsideration by the Commission and that they be allowed to haul loads weighing at least 50 percent of the legal weight limit. Mr. Hampton stated that his hauling operations are confined to two miles on the highway. Mr. Rose advised that his operations require 20 miles of hauling on the highway. Mr. Mann advised that his trucks operate only one and one-half miles on the highway. They all alleged that the load limit as ordered will close down their operations and will throw many men out of work both in their mills and in the woods. They offered to cooperate to a reasonable extent with the Commission in the upkeep of the road and agreed to discontinue hauling altogether immediately after freezes. Mr. Hampton stated that they could haul a satisfactory pay load if the load limit were restored to 50 percent of the legal limit. Chairman Banfield explained that, according to a report from the Highway Engineer, there is a good chance that the road will be wrecked in the next few months if loads are not limited to 20,000 pounds gross weight. When a road once starts to break up, he said, it does not take long for it to go to pieces altogether, which means a large expenditure for repairs. Following the departure of this group, the Commission continued discussion of the matter and, as a result thereof, ordered a gross load limit of 30,000 pounds over this highway as a trial proposition. The Engineer was instructed to watch the operations closely and to close the road during freezes and at any other time if he finds that damage is being done and the closure is necessary to preserve the road surface. Moreover, he was instructed to close the road if the operators are found to be transporting loads weighing in excess of the reduced limit. (Mr. Hampton, Sr. of the Benton County Lumber Company, appeared before the Commission on the following day and advised that they cannot operate unless the gross weight is raised to 35,000 pounds. The Commission granted such increase subject to the same conditions. See ahead for additional paragraph and resolution.)

The Assistant Counsel, Mr. DeSouza, submitted for the Commission's consideration a list of additional properties needed for highway improvements that will have to be acquired by condemnation, together with the offer

that he recommended in connection with each parcel as follows:

		Recommended Offer
PACIFIC HIGHWAY-EUGENE - EAST BROADWAY		
11984	Jennie L. Frazier	$ 450.00
11992	Pearl Morris Hall	1,000.00

RAMSEY CANYON-CRATER LAKE SECTION OF THE SAMS VALLEY HIGHWAY (CON'T)

14086 Robert W. Ruhl $ 700.00

He requested authority to proceed with the condemnation of the properties. After careful study the Commission approved the request and the offers. Resolutions marked EXHIBITS "B1","B2","B3",and "B4", attached hereto and by this reference made a part hereof with like effect as though extended herein, were thereupon adopted by the Commission by unanimous vote.

The Assistant Counsel, Mr. DeSouza, requested instructions relative to the granting of permits for the use of excess highway property for agricultural and other purposes during the year 1948. He was authorized by the Commission to grant such permits where the property is not needed for highway purposes, said permits to be on an annual basis.

The Chief Counsel brought up for discussion a proposed settlement with Mr. B. A. Kliks for right of way needed for the proposed new Columbia River Highway location near Troutdale. He explained that the new highway passes under the railroad track in a cut 40 feet deep and also passes through Mr. Kliks' property at that depth, isolating his residence building which will have no access whatsoever to the highway. He further advised that he offered Mr. Kliks $11,500 for his property, but Mr. Kliks wants $12,500 and the privilege of retaining the house and barn. He pointed out that the Commission cannot condemn the property beyond the limits of the highway right of way because it cannot be shown that the Highway Commission has any use for the excess property. Mr. Kliks, he said, is coming before the Commission on the following day regarding this matter. The Commission deferred its decision pending discussion with Mr. Kliks. (Following discussion of the matter with Mr. Kliks on the following day the Commission referred the matter back to the Chief Counsel with instructions to close the deal with Mr. Kliks on the basis of what he considers best in the state's interests.)

The Chief Counsel also brought up for discussion a proposed transfer to the City of Portland of title to right of way in North Burgard Street, North Swift Street, Olympia and Walker Streets and Going Street, Portland. He advised that these properties were acquired in connection with access road development to the wartime industrial areas and that the Highway Department has been reimbursed for the cost thereof by the Federal Government; also, that these streets are of no concern to the State Highway Department because they are purely city streets, and that the City of Portland is now asking the state to transfer its interest to the city. He recommended approval of the request and that the deeds of conveyance contain provision for the protection of the Government's interest. The State Highway Engineer concurred. The Commission approved the recommendation unanimously.

The Chief Counsel called to the Commission's attention the fact that its resolution, adopted in October 1945, authorizing the acquisition of access

to certain highways, named the Pacific Highway West and the Pacific Highway East, but did not name the section of the Pacific Highway from Junction City to the Oregon-California state line, although that section was also approved in the discussion. He recommended adoption of an amendatory resolution correcting the situation and presented a form of resolution which he said would cover the matter satisfactorily. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission on the twenty-ninth day of October, 1945, duly and regularly adopted a resolution by which in paragraph one of the same, certain highways enumerated therein are designated as through highways, and the acquisition of all access from abutting properties was authorized whenever any one of said highways or section thereof is relocated or the alignment thereof altered; and

WHEREAS, it appears that inadvertently in said resolution the Pacific Highway was designated only as the Pacific Highway East and the Pacific Highway West, whereas said highway should also be designated as the Pacific Highway, from Junction City to the Oregon-California line;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, all members being present and voting affirmatively, that said resolution shall be and the same hereby is amended so as to describe the Pacific Highway to mean the Pacific Highway East, the Pacific Highway West, and the Pacific Highway; that this resolution be entered in the minutes and records of the Commission as of the 24th day of November, 1947, and a correct copy thereof delivered to W H. Lynch, Division Engineer, Public Roads Administration.

The Engineer reported that property owners between Barkley Springs and Algoma on The Dalles-California Highway are proposing to construct a drainage ditch on property that will eventually be required for the reconstruction of this highway, and if the ditch is constructed in the presently-planned location, it will be necessary to move it later on to permit the reconstruction of the highway. He pointed out that the survey of this section has been approved by the Commission and recommended that the Commission authorize negotiations for the acquisition of the right of way along this location now insofar as it will be affected by the construction of the ditch, including that to be acquired from the Southern Pacific Company. The Commission approved the recommendation by unanimous vote and authorized the Chief Counsel to proceed with the securing of options.

The Engineer also brought up for discussion the request of Oregon State College, first presented at the previous meeting, for the purchase of state-owned land near the east end of the Willamette River Bridge at Corvallis

on which to maintain a building for use in connection with sculling activities. He advised that, pursuant to instructions from the Commission, Prof. E. A. Stevens, who has charge of these activities, was contacted by Bridge Engineer G. S. Paxson and the premises investigated, and it appears from the investigation that the property desired by the College will not be used by the State Highway Department for several years, and there is a possibility that it will not be needed at all. He suggested, in view thereof, that a revocable permit be granted the College for the use of a sufficient area on which to construct a building to use as a crew house, with the understanding that the property will be vacated if and when it is needed for highway purposes; further, that no charge be made for such use. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. DeSouza, brought up for discussion a proposed exchange of land with Mr. H. A. Hein, Scappoose. It appears that th state has operated a gravel pit at Scappoose for many years and that the supply of materials is exhausted; also, that Mr. Hein who maintains some buildings near the edge of this pit, is fearful that further operation of the pit will undermine the buildings, so he has agreed to deed to the state other land which he owns adjoining this pit if the state will deed to him the portion of the gravel pit near the buildings. The Assistant Counsel recommended approval of such exchange of properties, as did the Engineer, who advised that it will be to the state's advantage to own the land which Mr. Hein proposes to deed to the state. The Commission approved the exchange by unanimous vote. (The deed providing for such exchange was signed by the Commission on the following day.)

The Assistant Counsel, Mr. George Neuner, brought up for discussion the proposed sale to the City of Albany of fractional lots of land situate in Block 39, Ackerman's Addition to Albany. He advised that city liens in the amount of $1,135 are against this property and that the state's total investment therein is $1,800. The actual cost of the property to the state, he said, was $750.50, which amount the city is willing to pay the state in cash if the Commission will tranfer title to the city He recommended acceptance of the offer, which will relieve the state from paying the liens, and that the conveyance be made by means of a bargain and sale deed in favor of the city. The Commission approved the recomendation unanimously.

The Assitant Counsel, Mr. DeSouza, requested instructions with respect to the reneval of the several hospital association contracts for the year 1948. He was authorized to renew these contracts on the basis of the last agreements, on the condition that the employees of the State Highway Department who are paying for the benefits are satisfied with the arrangements and want the coverago.

The Assistant Counsel, Mr. Neuner, reported briefly on the Enegren Ferry operation under contract with George Gunnell, of Coos Bay, particularly referring to a joint written report heretofore rendered to the Commission by W. W. Stiffler, Assistant State Highway Engineer, and himself. (For details see copy of report in general files.) He advised that an agreement has been reached with Mrs. Gunnell, who has power of attorney from her husband to act in the matter, whereby the State Highway Department is given a 60-day lease of

Mr. Gunnell's equipment without prejudice to the bonding company, the state or the ferry operator. This lease, he said, is binding except in the event of Mr. Gunnell's death, and in that event the financial set up would be different, although, insofar as the Highway Commision's interest is concerned, still can be worked out in a satisfactory manner. He suggested that the Commission authorize the Engineer and the Chief Counsel to complete the details of this operation in conformity with the plan heretofore orally approved by the Commission, on the condition that if any differences arise, they be brought to the attention of the members of the Commission for instructions. Chairman Banfield declared his approval of this suggestion, giving as his opinion that the Commission must rely on the Engineer and the Chief Counsel to clear up this matter. Motion to that effect was offered by Commissioner Chandler, seconded by Commissioner Schaupp, and carried by the unanimous vote of the Commission, whereupon the Engineer and the Chief Counsel were instructed to proceed in accordance therewith. The Commission approved the agreement with Mrs. Gunnell for the lease of the Gunnell equipment as prepared. (This agreement was signed by the Commission on the following day.)

In this connection the Assistant Counsel, Mr. Nouner, also reported that an arrangement has been made with Mr. Andrew Stambuck, former operator of the ferry at this point, whereby Mr. Stambuck agrees to operate this ferry on behalf of the Commission for a 60-day period ending at 2:00 a.m. on January 6, 1948, for a consideration of $1,650 per month. This arrangement, he said, is in letter form and requires Mr. Stambuck to perform the service under the identical terms as it was performed by Mr. Gunnell. Mr. Stanbuck, he said, has accepted the arrangement in writing and is now performing the service in conformity with the terms thereof. He asked the Commission to ratify the arrangement for the record. The Commission approved the arrangement by unanimous vote on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler, it being understood that service to be rendered after 2:00 a.m. on January 6, 1948, will be covered by a supplemental agreement. The Chief Counsel was instructed to direct a letter to Mr. Stambuck authorizing him, on behalf of the Commission, to continue operation of the ferry in conformity with this letter agreement.

The Commission by unanimous vote approved the form of resolution covering the naming of the M. R. Chessman Ferry as prepared by the Chief Counsel for insertion in the minutes of the meeting of the Highway Commission held on October 21 and 22, 1947.

In this connection it was pointed out that the builders of the ferry expect to have construction advanced so that it can be launched on December 10, 1947. Chairman Banfield expressed regret that he could not be present at the launching, inasmuch as he will be out of the city. Commissioner Schaupp expressed himself likewise. Commissioner Chandler advised that he expects to be present, whereupon the Commission delegated him as its representative at this function. The Chief Counsel and the Engineer were instructed to work up the details

The Commission discussed the form of resolution prepared by the Chief Counsel for insertion in the minutes of the previous meeting concerning its

contribution of $25,000 of state highway funds for construction work in connection with the Forest Highway contract on the Upper Columbia River Highway at Multnomah Falls. It appears that there is a misunderstanding with respect to the total amount involved, that the Commission understood that it was assuming only an obligation to contribute $25,000 to the Forest Highway project, whereas in reality it was also assuming an obligation to spend an additional $40,000 for extra work in connection with the state's contract at this point. It also appears that the resolution was prepared to cover both items. In view of the circumstances the Commission deferred until later in the session approval of the arrangement as covered by the resolution. (The matter was reconsidered by the Commission on the following day, at which time the Commission definitely approved not only the contribution of $25,000 to the Forest Highway contract but also assumed responsibility for the extra $40,000 expense in connection with the state contract. The Secretary was instructed to enter the resolution, as prepared, in the minutes of the previous meeting.)

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 on the following day in the same room.

Portland, Oregon
November 25, 1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
George W. Neuner, Assistant Counsel
H. B. Glaisyer, Secretary

Bids as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Benfield announced that the awards of contracts would be made at 3:00 p.m:

OLD OREGON TRAIL AND MEDICAL SPRINGS HIGHWAYS IN BAKER AND UNION COUNTIES
UNION ROCK PRODUCTION PROJECT

Rogers Constr. Co., Portland	$ 30,510.00
Pendelton Sand & Gravel Co., Pendleton	31,414.00
E. C. Hall Co., Portland	32,770.00
J. S. Risley, Milwaukie	36,725.00
P. B. Doherty & Son, Portland	36,838.00
Peter Kiewit Sons' Co., Longview, Wn.	42,832.00
Homer G. Johnson, Portland	44,983.00

NORTH POWDER RIVER COUNTY ROAD IN BAKER AND UNION COUNTIES
CONSTRUCT BRIDGE OVER NORTH POWDER RIVER

Walder & Kenworthy, Portland	$ 29,928.00
E. C. Hall Co., Portland	35,086.40

HOOD RIVER IN HOOD RIVER COUNTY
CONSTRUCT EQUIPMENT STORAGE and REPAIR BUILDING

E. C. Hall Co., Portland	$ 17,042.00
Rushlight Automatic Sprinkler Co., Portland	21,561.00

THE DALLES-CALIFORNIA AND WARM SPRINGS HIGHWAYS IN JEFFERSON AND WASCO COUNTIES
MADRAS ROCK PRODUCTION PROJECT

A. H. Saxton & Sons, Corvallis	$ 28,930.00
Rogers Constr. Co., Portland	29,700.00
Barney B. Helser, Portland	29,700.00
J. S. Risley, Milwaukie	30,156.50
Vernie Jarl, Gresham	30,800.00
E. C. Hall Co., Portland	31,350.00
Homer G. Johnson, Portland	32,120.00
Peter Kiewit Sons' Co., Longview, Wn.	35,090.00
R. O. Dail, Portland	35,200.00
P. B. Doherty & Son, Portland	41,250.00

THREE SECONDARY HIGHWAYS IN MALHEUR COUNTY
ADRIAN-WILDER SECTION

Quinn Bros & Robbins, Boise, Idaho	$ 62,862.00
Babler Bros., Portland	65,365.00
Stanley & Ehlen, Boise, Idaho	69,924.00
Vernie Jarl, Gresham	73,589.00
C. E. Lesebergˇ, Nyssa	73,720.00
E. C. Hall Co., Portland	73,994.00
Frank M. Parsons, Forest Grove	79,076.00
F. L. Somers, Klamath Falls	84,303.00
D-H Paving Co., Vancouver, Wn.	84,306.50

SALEM IN MARION COUNTY
CONSTRUCT TEMPORARY OFFICE BUILDING

Carl M. Halvorson, Salem	$ 27,908.00
Erwin E. Batterman, Salem	28,858.00

PENDLETON-JOHN DAY HIGHWAY IN UMATILLA COUNTY
PILOT ROCK-UKIAH ROCK PRODUCTION PROJECT

F. J. Dussault & F. A. Smith, Portland	$ 35,904.00
Barney B. Holser, Portland	36,720.00
Rogers Constr. Co., Portland	36,720.00
Pendleton Sand & Gravel Co., Pendleton	37,536.00
A. H. Saxton & Sons, Corvallis	38,080.00
J. S. Risley, Milwaukie	38,470.00
R. O. Dail, Portland	38,760.00
E. C. Hall Co., Portland	39,440.00
Homer G. Johnson, Portland	42,762.50
P. B. Doherty & Son, Portland	43,384.00
Peter Kiewit Sons' Co., Longview, Wn.	48,416.00

WESTON-ELGIN SECONDARY HIGHWAY IN UMATILLA AND UNION COUNTIES
WESTON MOUNTAIN-ELGIN ROCK PRODUCTION PROJECT

Rogers Constr. Co., Portland	$ 44,240.00
J. S. Risley, Milwaukie	47,400.00
Pendleton Sand & Gravel Co., Pendleton	48,664.00
P. B. Doherty & Sons, Portland	51,982.00
E. C. Hall Co., Portland	54,510.00
Homer G. Johnson, Portland	55,405.00
Peter Kiewit Sons' Co., Longview, Wn.	55,774.00

WARM SPRINGS HIGHWAY IN WASCO COUNTY
CLEAR CREEK-FOREST BOUNDARY SECTION

T. W. Thomas, Portland	$ 286,315.00
Smith Bros. Inc., Vancouver, Wn.	287,878.00
Peter Kiewit Sons' Co., Longview, Wn.	314,143.50
Morrison-Knudsen Co., Portland	351,730.40

The Engineer reported on a complaint filed by the Coquille City Council at the previous meeting concerning a dangerous condition which exists on the Oregon Coast Highway near the north city limits of Coquille. He advised that this matter has been investigated by Mr. W. W. Stiffler, Asst. State Highway Engineer, who advises that the condition is created by excess curvature in the highway and steep gradient due to the super elevation of the curves. Because of the complicated nature of the problem, he recommended that he be granted authority to make a detailed survey to determine the most feasible solution of the difficulty. The Commission approved the recommendation, and it was so ordered.

The Engineer also reported on a request from the Reedsport P. T. A. and others, for guard rail construction on the Scholfield River Bridge on US101 just south of Reedsport. He advised that investigations reveal the need for some sort of protection for school children. He pointed out that the existing felloe guard which separates the roadway traffic from pedestrian traffic is only eight inches high, being 3 1/2 inches lower than standard, and that the local people are fearful that school children are going to be hurt by reason

of cars jumping over this felloe guard. A handrail or guard fence does not entirely solve the problem, he said, although the raising of the felloe guard to the standard height of 11 1/2 inches will help a lot, provided the school children are instructed and required to utilize the sidewalk at all times. He recommended approval of raising the felloe guard to such height. Chairman Banfield suggested the installation of a "bull rail" on the sidewalk above the felloe guard which he thought would better serve the purpose and would be less expensive to construct. His suggestion was approved by the Commission by unanimous vote, and the Engineer was authorized to proceed with construction of such a rail as a minor betterment job.

Pursuant to instructions from the Commission at the previous meeting the Engineer reported on the protest of Mr. Frank A. Benis to the location of the Elkton-Sutherlin Secondary Highway through his property in Douglas County. He advised that Mr. W. C. Williams, Assistant State Highway Engineer, investigated the matter in company with Mr. Benis and ascertained that his objection is to a short revision to eliminate three curves in the present highway alignment, rather than a major change. The revision, he said, is only about 1,000 feet long and will sever only a very small area of Mr. Benis' cultivated land; in fact, the entire revision will not take more than three acres of his property. Mr Benis, he said, wants the Commission to retain the present alignment, which is tortuous at this point. It is Mr. Williams' opinion, he said, that Mr. Benis' main objection is to the amount the state has offered to pay him for his property, which is $700, whereas he is asking $1,500. He recommended that no revision in the alignment be made and that the Right of Way Department be instructed to continue negotiations for the acquisition of the right of way on permanent alignment as originally proposed. The Commission approved the recommendation unanimously and so ordered.

The Commission discussed a report from the Engineer on the cost to improve the Alsea Highway between the Lincoln-Benton County Line and Tidewater, a distance of about 20.5 miles, by widening and constructing an oil surface thereon. The westerly end of this section, which is 9.3 miles in length, is estimated to cost $650,000 and is scheduled for improvement as a Forest Highway project in the Postwar Program; however, the work is at a standstill because of the failure of Congress to appropriate Forest Highway monies. To construct the remaining 11.2-mile section to modern standards, according to the report, will cost about $600,000. The Engineer recommended, in view of the fact that it probably will be several years before funds will be made available for this purpose, that the Commission authorize the widening of the 11.2-mile section with state forces and the construction of a few turn outs on the nine mile Forest Highway section as a minor betterment project, which would cost about $30,000; also, that a contract be awarded for surface stabilization and oiling on the 11.2-mile state section, which is estimated to cost about $115,000; and, that the Commission authorize the manufacture of 10,000 cubic yards of surfacing materials, a portion to be placed in stockpile and the remainder to be placed on the Forest Highway section. He estimated the cost of such material at $30,000, making a total estimated cost of $175,000 for all of the work involved. He also recommended that he be Given permission to start the widening work with state forces at once and to advertise for bids for production of the rock so there will be sufficient rock on hand to keep the road stable during the spring break up. The Commission indicated a favorable attitude toward the project but

deferred a decision pending discussion later in the session of a betterment program to improve the width, alignment, and surfacing of critical sections of state highways as a proposition to defer major highway construction.

The Engineer presented a plan for the channelization of the intersection of the Oregon Coast Highway with Roosevelt Drive near the north city limits of Seaside. He exhibited a map showing the proposed improvement and pointed out that it necessitates acquisition of a small amount of right of way for widening the intersection in order to provide a "hide-out" refuge for south bound traffic desiring to enter Roosevelt Drive. He estimated the cost of the improvement at about $3,500 and recommended approval of the project for immediate construction. Following careful study of the plans the Commission approved the recommendation by unanimous vote and authorized the Engineer to proceed with the installation.

The Commission approved and ordered filed a letter from the Washington County Court in which the State Highway Department is released from further obligation to maintain a certain county road heretofore used by one of the state highway contractors on the Sunset Highway in the transportation of rock for his contract.

The following persons, representing business interests in North Portland, came before the Commission concerning the traffic tie-up which they state occurs daily during rush hours when eastbound traffic on North Portland Boulevard (Swift Secondary Highway) attempts to enter Union Avenue and Denver Avenue; Frank Kornan, of the Kornan Livestock Farms; J. R. Atkison, representing the North Portland Market; A. A. Tims, Secretary-Treasurer of the Portland Union Stock Yards Company; D. W Hoffman, of Swift & Co.; C. L. Dilling, representing the Western Wax Paper Co.; W. A. Holt, Pacific International Livestock Exposition; and H. S. Eustis and L. G. Schmidt, representing the Shell Oil Co. Mr. A. A. Tims headed the group. He read aloud and presented the following letter directed to the Oregon State Highway Commission:

PORTLAND UNION STOCK YARDS COMPANY
North Portland, Oregon

Nov. 25, 1947

W. E. Williams, President
David F. Hunt, Vice-President

A. A. Tims, Secretary-Treasurer
C. N. Curtis, Ass't Secretary-Treasurer

Oregon State Highway Commission
Salem, Oregon

Gentlemen:

Our company, and all of our tenants located in our Exchange Building, urgently request the State Highway Commission

to consider the construction of another approach from North Portland Boulevard for eastbound traffic to enter Union Avenue. This new approach should eliminate any level crossings over existing roadways.

The present arrangement slows up traffic and with an ever increasing flow of vehicles becomes more hazardous each day.

The number of truckloads of livestock received at our stockyards from January 1st, 1947 to November 21st, 1947 is 27,511, compared to 19,716 truckloads for the same period in 1946. Many of these must cross over to Union Avenue on their return trip.

The location of new industries and the plant expansion of the present ones located in this North Portland area tends to increase the traffic congestion and the danger at this important intersection.

We believe this new approach should be constructed as soon as possible.

Yours truly,

/S/ A. A. Tins
Secretary-Treasurer.

AAT/t

Also speaking in behalf of the improvement were Messrs. Hoffman, Dilling and Kernan. Mr. Kernan suggested a solution involving right of way across property which he owns. He offered the right of way free of cost on the condition that the state would do certain grading work on his premises.

Chairman Banfield pointed out that the matter to which they refer requires an engineering investigation, which has not been made; in fact, this is the first complaint that the Commission has received on the subject. The Commission thereupon referred the matter to the Engineer for such investigation and report.

A delegation representing the heavy trucking interests, headed by Mr. A. L. Vincze, Klamath Falls, and including John Jensen, Klamath Freight Lines, Klamath Falls; Al Hall, Ferguson Transfer Co., Coos Bay; Albert Flegel, Flegel Transfer, Roseburg; Don Hall, Hall Heavy Hauling, Eugene; and Charlie Smith, Smith Bros. Transfer, Baker and La Grande, came before the Commission regarding securing permits for transportation over state highways of loads which exceed the statutory limits as to size and weight. Mr. Vincze stated that manufacturers are now building equipment which weighs considerably heavier than in the past, and, as a result, the heavy haulers are called upon more frequently to transport these loads over state highways. In many instances the

gross weight, even when the equipment is stripped down, exceeds the weight limits which the Highway Commission heretofore has set down as maximum for which a permit can be issued. He asked the Commission to grant more leeway in the issuance of permits and to zone the highways so as to make it possible to grant permits on a 30-day basis. He further advised that, for the most part, the hauls are of comparatively short length, and, in his particular case, are within a 50-mile radius of Klamath Falls, and it would be very helpful in expediting these movements if such a zone system were established and the local representative of the Highway Department given authority to issue permits on short notice within such zone. Under present conditions, he said, there is considerable delay experienced in securing permits because they all have to be approved by the Salem office of the Commission before the local engineer is permitted to grant the permit. Especially is this true, he said, when those authorized to approve permits are not in the office. If the Commission will authorize the zoning of the highways and will design a piece of equipment that it will approve for the hauling of heavy loads, it will help a lot and will do away with the necessity of dismantling and re-assembling the equipment in order to keep the loads within the Commission's present requirements.

Chairman Banfield pointed out that the Legislature has set the limits for the weight and size of articles that can be moved over state highways and, while the Legislature also gave the Highway Commission the authority to issue permits for movements of excess weight and size, there is a limit to which the Commission can go without causing traffic hazards and breaking up the road surfaces. He expressed himself as against the granting of more privileges than have already been granted. He pointed out that the heavy equipment mentioned by Mr. Vincze has been so constructed that it can be dismantled and gave as his thought that that is what should be done. The Commission, he said, cannot grant the request.

Commissioner Chandler pointed out that if the Commission should authorize issuance of special permits for one particular district of the state, it would have to extend the privilege throughout the entire state. The Chief Counsel advised that the Legislature has determined the size and weight of articles that can be moved on the public roads of this state. He also stated that, while the Highway Commission has been given authority to issue permits for excess movements, it is limited in the granting of such privileges to single movements of an emergency character and in isolated sections. He suggested that the group take its problem to the Legislature.

Commissioner Schaupp gave as his thought that the local representatives of the Highway Department should be granted more leeway in the issuance of routine permits so it will not be necessary for them to secure approval of the Salem office, and in this connection Chairman Banfield pointed out that the limit requirements covering the entire state are in the Salem office, and local engineers in one district do not know the limitations in another district. Mr. Flogel urged that something be done to avoid the delay in issuing permits which they now experience under the present system. He said that they are not asking for an immediate answer from the Commission but would appreciate it if the matter is given consideration. The conference was concluded by Chairman Banfield who stated that the Commission will discuss with the Engineer the matter

of giving the local engineer more authority in the granting of permits. (The matter was discussed further later in the session, at which time the Engineer was instructed to render a written report to the Commission on the subject and to include therein suggestions relative to granting more authority to the local engineers in the granting of permits.)

Mrs. Eva Heffner, President of the Oregon Roadside Council, and Mr. Thornton T. Munger, member of the Recreational Resources Committee of the Portland Chamber of Commerce, both of Portland, were present and urged the Commission to give favorable consideration to the matter of constructing and maintaining wayside picnic areas along the principal highways of this state for the convenience and accommodation of tourists who like to stop for picnic lunches. Mrs. Heffner was principal spokesman. She read aloud and filed with the Commission the following letter which she advised was approved by the Oregon Roadside Council at its annual meeting on October 29, 1947:

Gentlemen:

At the annual meeting of the Oregon Roadside Council the following resolution, relative to the establishment of roadside parking or picnicking areas was unanimously adopted and ordered directed to your attention:

Whereas, the State Highway Commission is empowered by law to acquire, maintain and operate parks, recreational grounds, parking places, camp sites, etc., in such manner as will best afford to the motoring public and road users necessary conveniences and accommodations, and which will contribute to the general welfare and pleasure of the motoring public, and

Whereas, the State Highway Commission through its Information and Travel Department are actively engaged in encouraging travel to and in the State of Oregon, and

Whereas, tourist travel furnishes an increasingly important segment of our business communities economic stability and gasoline tax income and warrants all possible encouragement, and

Whereas, the experience of other states who have established off highway areas for picnicking, rest, and relaxation of travelers has proven their practicability and beneficence to both the highway department and highway users,

Now therefore, be it resolved, that the Oregon Roadside Council will actively support and recommends to the State Highway Commission the establishment of off-highway roadside parking or picnicking areas on our main highways in such numbers and locations as is determined feasible on the completion of a State survey, and further, that development be scheduled as rapidly as funds permit with the first units in operation for the 1948 travel season.

Passed Oct. 29, 1947

Mrs. Heffner stated that they did not have anything elaborate in mind but were asking for only a few such areas along main traveled roads, the lack of which is now a subject of complaint of the traveling public. She suggested that a state-wide survey should be made to determine the need for the areas and where they should be placed. Mr. Munger endorsed Mrs. Heffner's remarks.

Chairman Banfield advised that the Highway Commission has already set up in its 1947 budget a considerable sum of money for expenditure by the State Parks Department, which now has authority to do the sort of thing Mrs. Heffner requests. He pointed out that only about two percent of the monies expended by tourists in the State of Oregon comes to the State Highway Department as revenue. Considering this feature, it was his thought that it is properly the function of the Interim Committee authorized by the 1947 Legislature to recommend to the Commission how much money should be spent for purposes such as she has in mind. He added that if the people want an elaborate park system, it would be up to some other agency to furnish it because the State Highway Department is not in position to provide such a facility. Chairman Banfield also recalled a report by the State Parks Superintendent last year, wherein it was stated that experience discloses that the operation of wayside facilities is unsatisfactory. This concluded the discussion.

Mrs. Heffner left with the Commission the following material regarding the subject of her presentation:

1. Letter from C. O. Eyer, Landscape Supervisor, Indiana State Highway Commission

2. Letter from E. C. Eckert, Chief Forester, Michigan State Highway Department

3. Letter from Jac L. Gubbles, Head Landscape Architect, Texas Highway Department

4. List of roadside parks from the State Highway Commission of Indiana.

5. Copy of the official highway map of the state of Indiana showing the location of roadside parks.

(The Commission discussed this matter further with members of the Advisory Board of the Travel and Information Department. This committee was requested to give the matter study and to forward the Commission a recommendation, prior to its next regular meeting if possible, so the Commission will have the benefit of it in discussion of the park budget for 1948.)

Messrs. Evan E. Peterson, City Manager, and Al J. Grant, City Attorney, City of Coos Bay, came before the Commission regarding the master plan of the City Planning Commission for the future development of the city, which involves the rerouting of the Oregon Coast Highway in the northerly part

of the city, particularly between the north city limits and Broadway. Mr. Peterson exhibited a map showing the plan and explained that they would like to have the highway routed along North 7th Street from the city limits to Ivy Ave., thence on a diagonal southeasterly to Broadway (present route) at its intersection with Fir Ave. He urged such routing in order to preserve, for industrial purposes, the area between this route and the location heretofore adopted by the Commission. The proposed location, he said, is at the top of a bluff, and its adoption will eliminate all cross traffic and make for a safer highway

The Engineer pointed out that the Commission has already adopted the previous location for this highway north of Fir Avenue and that construction on that location is now under way. Mr. Peterson suggested the stoppage of the work and that a new contract be awarded for construction on the route suggested by him. Chairman Banfield advised that this project has been under contemplation for several years and that it is now too late to change it. The Commission decided unanimously to adhere to the present plan and let the present contract go forward without alteration.

Mr. Peterson then brought up for discussion the proposed extension of this improvement south of Fir Avenue (south end of the contract now under construction). He pointed out that the railroad will have to be moved out closer to the bay if the present plan is adhered to and suggested that consideration be given to the preservation of dockage space between the railroad and the bay, which could be used in connection with mooring fishing boats, pleasure craft, etc. He was informed that this project has not yet reached the contracting stage; moreover, the preservation of the dockage space is a matter that will have to be worked out with the city and the port officials at the proper time; in the meantime, the Engineer will work up the details. He was also informed that for the present the Commission is only authorizing the taking of options for right of way across tracts where building construction is contemplated in the immediate future.

This matter came up for discussion following the departure of the delegation, at which time the Commission considered the adoption of the one-way traffic plan submitted by the Engineer for this highway between Fir Avenue on the north and Ferry Street on the south, which plan provides for routing southbound traffic on Broadway and northbound traffic on Front Street and 1st Street. The Commission approved the plan and survey of such project and authorized the Chief Counsel to negotiate options for right of way where necessary to protect the state's interests against building development. The attached resolution with respect thereto, marked EXHIBIT "E", and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

Reconsideration was given by the Commission to a resolution prepared by the Chief Counsel covering the contribution of $25,000 of state highway funds to the Forest Highway project on the Columbia River Highway at Multnomah Falls, and the assumption of an additional obligation, amounting to about $40,000 for additional work in connection with the state's contract at this point. The Commission voted to assume both of these obligations and thereupon, by unanimous vote, approved the resolution as prepared for insertion

in the minutes of the previous meeting.

The matter of adopting a general budget covering Highway Department functions during the year 1948 was brought up for discussion, but action thereon was deferred by the Commission until its next regular meeting. The Engineer was authorized in the meantime, to continue with the regular routine activities of the State Highway Department, including maintenance, pending adoption of this budget, and also to take care of emergency matters that may arise.

A request was presented from the Reedsport Chamber of Commerce for the improvement of the Umpqua Highway between Scottsburg and Reedsport. A letter was also presented from the Reedsport City Council requesting the same improvement and particularly requesting the reconstruction of this highway on proposed alignment through the eastern part of this city. The Secretary was instructed to inform the city and the Chamber of Commerce that this project is being considered in the budget for 1948, which is to be discussed by the Commission at its next regular meeting.

The Commission by unanimous vote, confirmed the authority given the Engineer, pursuant to his letter request dated November 5, 1947, to immediately advertise for bids the following rock production projects:

Union Rock Production Project	$ 35,000
Pilot Rock-Ukiah Rock Production Project	43,000
Weston-Elgin Rock Production Project	48,000
Madras Rock Production Project	44,000

The Commission discussed a letter from the Linn County Court, requesting state aid in reconditioning the Richardson Gap County Road which was used as a detour for state highway traffic during construction of the Scio Section of the Albany-Lyons State Secondary Highway. The Engineer advised that this road has been inspected by Maintenance Engineer E. A. Collier and Division Engineer F. D. Eason, who report that it will cost about $1,500 to repair the damage that has been done, supposedly by logging trucks. He advised that the county court wants the state to assume a $1,000 share of this expense. He recommended approval of such payment. The Commission approved the recommendation unanimously, although with some reluctance because of the principle involved.

The Commission discussed briefly and ordered filed a letter from the Redwood Empire Association requesting the improvement of the Redwood Highway between Grants Pass and Applegate Bridge, Josephine County.

The Engineer reported that the City of Tualatin has met the legal requirements with respect to the expenditure of 1945 State Tax Street Funds that it received in 1946 and that the plans for the improvements proposed for such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the resolution marked EXHIBIT "C", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Engineer also reported that the following cities and towns have

satisfied the legal requirements with respect to the expenditure of 1946 State Tax Street Funds which they received in 1947 and that the plans for the several improvements proposed for such funds have been examined and found satisfactory:

Cornelius	Gervais	Merrill
Elgin	Juntura	Monroe
Fossil	Madras	Port Orford

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted a resolution with respect thereto marked EXHIBIT "D", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion a request from the Lake County Court that the State Highway Department conduct surveys of Federal Aid Secondary Highways Nos. 407 and 408 west of Goose Lake so the county can proceed with certain improvements with its own equipment. The Engineer estimated that the surveys would cost about $5,000, and he recommended approval of the request on the condition that the work can be done during the winter months and personnel is available to do it. The Commission approved the recommendation unanimously.

The Commission also had under discussion a request from the County Court of Crook County that the State Highway Department make surveys of three county roads, one of which is on the Federal Aid Secondary Highway System. The Engineer advised that the county desires to improve these roads by grading and surfacing and intends to ask the State Highway Commission, at some future time, to designate the two county roads as Federal Aid Secondary Highways. He stated that the two county road surveys total about 13.2 miles and the Federal Aid Secondary Highway survey is about 6 miles long. He further stated that the county will reimburse the state for the total expense of the surveys for the two county-road sections but is asking the state to bear the expense for the survey of the Federal Aid Secondary Highway, which is estimated to cost about $3,000. He recommended approval of the request on the condition that an engineering crew can be spared for the purpose and that the work can be done during the winter season. The Commission approved the recommendation by unanimous vote.

The Engineer reported that, pursuant to authority previously given him by the Highway Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

Grading and oil surfacing West Unit, Sheep Creek Hill Section, Little Sheep Creek Secondary Highway, Wallowa County; bids received October 22, contract awarded November 13, 1947, to the low bidder, J. C. Papin.

Grading and topping East Cottonwood Canyon Section, Wasco-Hoppner Secondary Highway, Gilliam County; bids received October 22, contract awarded October 27, 1947, to the low bidder, Gerald Miller.

Construction of concrete bridge over Oneonta Creek on the Columbia River Highway, Multnomah County: bids received August 26, contract awarded October 24, 1947, to low bidder, Erick Enquist.

Grading and paving Roseburg-Dixonville Section, North Umpqua County Road, Douglas County; bids received October 21, contract awarded October 24, 1947, to the low bidder, Leonard & Slate, Oreg. Ltd.

The Commission by unanimous vote confirmed the awards as reported.

The Engineer reported that the surveys for the following sections of state highways have been completed and asked the Commission to approve them as the permanent routes of such highway sections:

Delmar-China Camp Creek Section of the Oregon Coast Highway, in Coos County;

Modoc Point-Barclay Springs Section of The Dalles-California Highway, in Klamath County;

Front Street (Fir Avenue-Ferry Street) Section of the Oregon Coast Highway, in Coos Bay, Coos County.

After due consideration of the report of the Engineer with respect to each of the surveys under discussion, the Commission approved and adopted the surveys by the adoption, by unanimous vote, of the resolution marked EXHIBIT "E", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

J. C. Papin, Contract No. 2846 for grading and surfacing the West Unit of the Love Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County, requested an extension of time of 15 days, from September 30, to October 15, 1947, within which to complete this job. He alleged that he was unable to procure sufficient equipment to complete the surfacing work within the contract time limit. The Engineer advised that the contractor did experience some delay in securing equipment to complete the oil surfacing; however, he was also delayed in completing the grading work because of the non-completion of the Love Bridge crossing Powder River, it being impossible for him to grade the approaches to this structure until the bridge was completed. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

John A. Logan, Contract No. 2856 for grading, bituminous macadam and bridge construction on the Tutuilla Creek Section of the Pendleton-John Day Highway, in Umatilla County, requested an additional extension of time of 32 days, from October 29 and to November 30, 1947, within which to complete this project. He attributed his failure to complete the project within the previously-extended time limit to difficulties in securing steel for the bridge structure. He advised that the bridge is now complete with the exception of building the No. 1 wing wall, which work cannot be done until traffic is routed over the new structure. The Engineer advised that the reason given by the contrator for failure to complete the project within the specified time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Heavy Hauling Co., Contract No. 2875 for grading and paving the Astoria (Bond Street-Commercial Street) Section of the Columbia River Highway, in Clatsop County, requested an extension of time of 303 days, from August 31, 1947, to June 30, 1948, in which to complete this job. They gave the following reason for overrunning the time limit: "Completion is dependent upon removal of the Associated Oil Company's service station, which still has not been removed and will not be for some time although the time contemplated in the contract for its removal has long since passed. It is doubted that suitable weather will exist for the completion of paving for some months after actual removal of the service station". The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He further stated that the contractor made every effort to complete the project within the specified time and that it was no fault of his that the right of way was not made available to him. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Albert W. Denton, dba Denton Construction Co., Contract No. 2888 for grading and paving the Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County, requested an additional extension of time of 45 days, from September 15 to October 30, 1947, within which to complete this job. He attributed his failure to complete the project within the previously-extended time limit to difficulties experienced in obtaining an asphalt plant to do the paving work. The Engineer advised that the contractor was unable to arrange for an asphalt plant or to acquire necessary asphaltic materials from plants located in the immediate vicinity, so arrangements were made to have this work done by state forces at the contractor's expense. He gave as his belief that the contractor made an honest effort to complete the work as soon as possible and accordingly recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

K. F. Jacobsen & Co., Inc., Contract No. 2891 for grading and surfacing the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties, requested an extension of time of 213 days from October 31, 1947, to June 1, 1948, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unusually heavy rains during the first three weeks in October, which made it impossible to apply the bituminous macadam and necessitated the postponement of that work until next spring. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Albert W. Denton, dba Denton Construction Co., Contract No. 2899 for regrading and surfacing the Madras Section of The Dalles-California Highway, in Jefferson County, requested an extension of time of 273 days, from September 30, 1947, to July 1, 1948, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: (1) Difficulties in securing steel for bridge construction and, (2) inability to complete grading work until the bridge approaches had been constructed, all of which prohibits the beginning of oiling operations until about May, 1948. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. Late delivery of the steel, he said, will not permit completion of the bridge in time to allow completion of the approaches thereto, and inasmuch as the approaches have to be oiled, it will be necessary to defer such work until suitable weather next spring. Because the delays in delivery of steel were not due to negligence on the part of the contractor, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Natt McDougall Company, Contract No. 2909 for grading the North Unit of the Washington State Line-Buford Creek Section of the Enterprise-Lewiston Highway, in Wallowa County, requested an extension of time of 20 days, from October 31 to November 20, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to extra yardage of material that had to be moved under force account agreement. The Engineer advised that the contractor completed the work called for in this contract within the specified time limit, but slides occurred and he was required to do extra work in removing them, which delayed finishing operations and cleaning up of the site. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Lindstrom Bros., Contract No. 2911 for construction of the Ft. Hill Bridge on the Salmon River Highway near Valley Junction, Polk County, requested an extension of time of 181 days, from December 31, 1947, to June 30, 1948, within which to complete the project. They attributed their failure to complete the project within the specified time limit to storms and resulting high water levels which hampered their operations. The Engineer advised that the contrator has completed construction of the new bridge, that the section has been open for traffic, and that the remaining work to be done consists of removal of the old structure, which has been barricaded at each end to prevent public use. He explained that the remaining work involves placing false work in the river, which is very difficult during the winter months owing to high waters in the Yamhill River, and advised that delay in removing the old structure will cause no inconvenience, danger, or extra expense. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Albina Engine & Machine Works, Inc., Contract No. 2912 for construction of a ferryboat ("W. R. Chessman") for operation across the Columbia River between Astoria, Oregon, and Megler, Washington, requested an extension of time of 86 days, from December 27, 1947, to March 26, 1948, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: (1) A strike involving the Luckenbach ship carrying the main deck checker plate for the new ferry tied up the vessel in San Francisco, the outcome of which was so indefinite that the company had to procure another plate to take its place, which delayed construction according to the original plan; (2) A strike in the factory making the diesel engines for the auxiliary electric generators delayed delivery of these two units until December 6, 1947, at the earliest. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The action of the State Highway Commission on contractors' requests for extensions of time within which to complete the contracts, as listed above, was based upon the recommendation of the State Highway Engineer and his report, which considered, but did not necessarily adopt, either or any of the reasons stated in the contractors' requests.

The Engineer reported that Contracts Nos. 2732, 2748, 2779, 2817, 2823, 2831, 2832, 2839, 2840, 2849, 2858, 2865, 2866, 2867, 2868, 2878, 2881, 2888, and 2910 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the report of the Engineer with respect to the contracts under discussion the Commission approved and accepted the contracts completed as reported and by unanimous vote adopted the resolution marked EXHIBIT "F", attached hereto, and by this reference made a part hereof with like effect as though extended herein.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

The following members of the Advisory Board on Travel and Information Matters came before the Commission with respect to the Travel Department budget for the calendar year 1948: John A. Laing, member of the law firm of Laing, Gray & Smith, and Chairman of the Advisory Board; Donald Sterling, of the Oregon Journal; Dr. E. B. McDaniel, of the Oregon State Motor Association; and Arden X. Pangborn, of the Oregonian; all from Portland. Also present was Mr. Manley Robison, Director of the Travel and Information Department. Mr. Laing headed the group and explained details. He advised that, after careful consideration, the members of the Advisory Board are unanimous in recommending to the Commission a budget of $250,000 for 1948. He submitted a recapitulation of the total expenditures as approved by the Committee, as follows:

RECAPITULATION

TOTAL PROPOSED EXPENDITURES

1948

	Allocated 1947	Proposed 1948	
Item A-General			
Printing (Booklets and Maps)	($19,772.00)	$31,383.00	
Photographic Department	(13,970.00)	9,860.00	
Misc. Auxiliary Promotion	(7,250.00)	7,250.00	
General Office	(5,110.00)	6,010.00	
Salaries	(18,590.00)	20,422.00	
	($64,692.00)		$74,925.00
Item B-Space Advertising			
Magazine	(150,804.85)	140,132.75	
Newspaper	(12,969.00)	18,000.00	
Contingency	(8,834.15)	4,442.25	
Production	(12,700.00)	12,500.00	
	($185,308.00)		175,075.00
	($250,000.00)		$250,000.00

Nov.25,'47

The Commission by unanimous vote approved the budget as submitted.

There followed a general discussion of matters pertaining to the Travel Department. Chairman Banfield expressed appreciation for the services the committee has rendered the State Highway Commission as a guide in carrying on its publicity activities, which, he said, has relieved the members of the Commission of a lot of detail. He asked the committee to furnish the members of the Highway Commission a copy of the minutes of each of its meetings as they are held from time to time, advising that, notwithstanding that the Highway Commission has the utmost confidence in the Advisory Board, it would like to keep a little closer in touch with committee matters, and the submission of the minutes would be helpful to that end. Mr. Laing agreed to furnish the minutes as requested.

Chairman Banfield also brought up the matter of spending state funds for construction and maintenance of wayside areas for the accommodation and convenience of the traveling public. It was his thought that the committee, being in close touch with the traveling public, would be in position to make suggestions that would be of value to the Commission in determining how much money should be spent for such accommodations. He asked the committee to give the subject some thought and to present suggestions to the Commission before its next regular meeting, if possible, so the Commission can have the benefit of the information in the adoption of its general highway budget for 1948 which is to be discussed at that time. Mr. Laing advised that this matter has never been before the committee but that they would be pleased to comply with the request. It was his personal reaction that construction of such wayside picnic areas would be much appreciated by the traveling public.

Commissioner Chandler reported briefly on his attendance at the annual meeting of the Redwood Empire Association held recently at Hoberg's Resort in northern California. He advised that he was particularly impressed with a report of a committee on public accommodations. It appears that it is the the function of the committee to see that everyone who enters a certain area is furnished a card which is to be returned to the Association with information as to the treatment given him in this particular area. The bad reports he said, are investigated and corrective measures suggested for improvements. Commissioner Chandler gave as his thought that this is a fine way to build up good will and suggested some similar undertaking by the Advisory Board. Mr. Laing advised that the committee has been working somewhat along that line but would be pleased to look into the matter further. Mr. Robison agreed to see what could be done to that end. This concluded the conference.

Mr. B. A. Kliks, attorney, Portland, came before the Commission with regard to a settlement for right of way for the new Columbia River Highway project near Troutdale. He advised that the proposed highway passes through his property in a cut about 40 feet below the natural surface of the ground and will isolate his residence building, which, he said, cannot be replaced for less than $14,500. He further stated that his barn, which is on the opposite side of the new highway, will be utterly destroyed. He declared that the site of his property is exceptionally good because it can be seen for a long

distance from each direction. As to the barn, he said that it is now being used as a riding academy headquarters and is netting $30 a day, which revenue will be lost, and the tenant will also lose revenue which he has enjoyed through the sale of dairy products to the public. He estimated it would cost about $7,000 to move the residence building to a new location, and he alleged that construction of the highway as planned will change his location from one of the very best to the worst. He presented additional arguments in behalf of his request for more compensation for the property than has been offered by the Commission's Chief Counsel.

Chairman Banfield advised that the Commission has analyzed this matter and knows the problem which confronts Mr. Kliks. He pointed out that only a small area is being taken by the state and advised that it is not pleasing to the Commission to have to take property for highway purposes under certain circumstances, but in some instances, such as this, it is necessary to do so in order to provide a proper improvement. He further stated that the Commission wishes to discuss this matter among themselves and with the Chief Counsel before making its decision and probably will do so before this meeting adjourns. This concluded the conference.

Following Mr. Kliks' departure, the matter was given further consideration and as a result thereof the Commission referred the matter back to the Chief Counsel with authority to decide the case in the manner that he considers is to the best interests of the State of Oregon.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action with respect thereto by unanimous vote:

The contract for the Union Rock Production Project on the Old Oregon Trail and the Medical Springs Highway, Baker and Union Counties, was awarded to Rogers Construction Co., the low bidder.

All bids received for construction of a concrete bridge over the North Powder River on the North Powder River County Road, in Baker and Union Counties, were rejected as being too high.

Bids received for the construction of an equipment storage and repair building at Hood River, Hood River County, were rejected as being too high.

The contract for the Madras Rock Production Project on The Dalles-California and Warm Springs Highways, in Jefferson and Wasco Counties, was awarded to A. H. Saxton & Sons, Corvallis, the low bidder.

The contract for construction of the Adrian-Wilder Section of three secondary state highways in Malheur County was awarded to Quinn Bros. & Robbins, Boise, Idaho, the low bidders.

The bids received for construction of a temporary State Highway Department Office Building in Salem were referred to the Engineer with authority

to award the contract to the low bidder, Carl M. Halvorson, Salem, if he will agree to construct this building on a site at the State Highway Shops rather than on Waverly Street as originally planned.

Contract for the Pilot Rock-Ukiah Rock Production Project on the Pendleton-John Day Highway, in Umatilla County, was awarded to the low bidder, F. J. Dussault and F. A Smith.

The contract for the Weston Mountain-Elgin Rock Production Project on the Weston-Elgin Secondary Highway, in Umatilla and Union Counties, was awarded to Rogers Construction Co., the low bidder.

The bids for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, Wasco County, were referred to the Engineer with authority to award to contract to the low bidder, T W. Thomas, when approved by the Public Roads Administration.

At 3:00 p.m. Chairman Banfield announced the awards publicly as follows:

"Union Rock Production Project on the Old Oregon Trail and Medical Springs Highway, in Baker and Union Counties. Rogers Construction Co., Portland, was the low bidder for this work at $30,510. The next low bidder was Pendleton Sand & Gravel Co., Pendleton, at $31,414. There were five higher bidders. The Commission has awarded the contract to the low bidder, Rogers Construction Company.

"Construction of a concrete bridge over North Powder River on the North Powder River County Road, in Baker and Union Counties. The Commission received two bids for this project, those of Walder & Kenowrthy, Portland, at $29,928, and E. C. Hall Co., Portland, at $35,086.40. The Commission has rejected both bids.

"Construction of an equipment storage repair building at Hood River, Hood River County. E. C. Hall Co., Portland, submitted the low bid of $17,042. Rushlight Automatic Sprinkler Co., Portland, submitted the next low, and only other, bid at $21,561. The Commission has rejected both bids.

"Madras Rock Production Project on The Dalles-California and Warm Springs Highways, in Jefferson and Wasco Counties. The Commission received ten bids for this work, the low one being that of A. H. Saxton * Sons, Corvallis, at $28,930. The second low bid was that of Rogers Construction Co., Portland, at $29,700. The Commission has awarded this contract to the low bidder, A. H. Sexton & Sons.

"Grading, surfacing and oiling the Adrian-Wilder Section of three secondary highways in Malheur County. Quinn Bros & Robbins, Boise, Idaho, submitted the low bid for this work at $62,862. Babler Bros., Portland, submitted the next low bid at $65,365. There were seven

higher bidders. The contract has been awarded to the low bidder, Quinn Bros. & Robbins, at their bid price.

"Construction of a temporary State Highway Department Office Building in Salem, Marion County. Carl M. Halvorson, Salem, submitted the low bid for this work at $27,908. The next low, and only other, bid was submitted by Erwin E. Batterman, Salem, at $28,858. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, Carl M. Halvorson, when certain conditions have been satisfied.

"Pilot Rock-Ukiah Rock Production Project on the Pendleton-John Day Highway, Umatilla County. F. J. Dussault & F. A. Smith, Portland, submitted the low bid for this work at $35,904. Barney B. Helser, Portland, submitted the next low bid at $36,720. There were nine higher bidders. The Commission has awarded the contract to the low bidders, F. J. Dussault and F. A. Smith.

"Weston Mountain-Elgin Rock Production Project on the Weston-Elgin Secondary Highway, in Umatilla and Union Counties. The Commission received seven bids for this work, the low one being that of Rogers Construction Co., Portland, at $44,240. The second low bidder was J. S. Risley, Milwaukie, at $47,400. The contract has been awarded to the low bidder, Rogers Construction Co.

"Grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway in Wasco County. T. W. Thomas, Portland, submitted the low bid for this work in the amount of $286,315. Smith Bros. Inc., Vancouver, Washington, submitted the next low bid at $287,878. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, T. W. Thomas, when certain conditions have been satisfied."

The Commission resumed discussion of the matter of purchasing the Crown Zellerbach Corporation property, consisting of 308 acres, located at Tillamook Head, Clatsop County, which was first reported on by the Parks Superintendent on the previous day. As a result thereof the Commission voted unanimously to acquire the property for the sum of $46,063, the amount of the company's offer, on the condition that satisfactory leases can be obtained for right of way for a trail across three privately-owned tracts between Seaside and Cannon Beach. The matter was referred to the Chief Counsel and the State Parks Superintendent to work up the details. They were instructed to bear in mind the salvage value of the timber on the tract.

The Commission discussed matters pertaining to the proposed highway in Sullivan Gulch, Portland, and as a result thereof decided unanimously, if the city wishes to place on the ballot for the people's consideration at the May, 1948 election, a two-mill levy to finance its share of the cost of the right of way needed for this project, then the Highway Commission will agree to proceed with the construction of the project if and when Federal Funds are made available to finance the work, it being understood that Federal Aid Urban monies allocated to the Portland area will be used, along with state match money, to

pay the state's share of right of way and construction. The Commission made it clear that it will not undertake the project unless and until such Federal Funds are made available; also, that it is not taking funds from any other part of the state to finance the project. The following press release was thereupon approved by the Commission by unanimous vote and given to the members of the press who were present:

> The State Highway Commission announced today that it would join with the City of Portland and the Public Roads Administration in the building of the Sullivan Gulch Freeway within the city limits of Portland upon the following basis:
>
> As soon as the Federal Government makes Urban Federal Aid Funds available, the Highway Commission, upon the approval of the Public Roads Administration, will allocate to this project as much of these funds as would otherwise be made available to the City of Portland. This allocation would be by the formula used in the Commission's Post-war Programs and would not divert funds from other needed and contemplated projects in the remainder of the state.
>
> The State's cooperation in this project contemplates the city paying 60% and the state 40% of the cost of necessary right of way.
>
> If these conditions are met and the necessary contract terms are agreed upon by the city and state, the state will, with match funds and Federal Urban Funds assume the construction costs of the project.

The Chief Counsel was instructed to prepare a form of agreement with the City of Portland on the basis thereof and to submit it to the members of the Highway Commission for approval before presenting it to the city.

The Commission had under discussion a letter from Mr. Alfred D. Collier, Klamath Falls, requesting the Commission's approval of a plan to provide a place in Collier State Park to house specimens of early-day logging equipment and other relics. The plan provides for the construction of a building to house the material which is to be gathered by Mr. Collier from various mill companies that are liquidating and will dispose of it as scrap unless it is preserved in a manner such as Mr. Collier suggests. Commissioner Schaupp recommended that Mr. Collier and his associates be permitted to erect a building in this park to house this material on the condition that the type of building to be erected will meet with the approval of the State Parks Superintendent and that it is located in the park on a site which meets with the Parks Superintendent's approval, which shall not be in the improved portion of the park; further, that Mr. Collier be informed that the Commission will not allow the material to be strewn around over the grounds where it will present an unsightly appearance and that the building must be kept in a good condition. The recommendation was adopted by the Commission by unanimous vote.

The Secretary was instructed to inform Mr. Collier of the action taken.

A delegation from Eugene, representing the Obsidians, Inc., a winter sports group, and others came before the Commission with an urgent plea that the Commission keep open the McKenzie Highway for travel during the winter months up to the Hand Lake Winter Recreational Area. State Representative H. P. Hendershott, Eugene, headed the group, which included Minor Hawlin, Chairman, Chamber of Commerce, Eugene; Harold K. Phillips, restaurant owner, McKenzie Bridge; Jas. W. Phillips, restaurant owner, McKenzie Bridge; Robert Tuttle, McKenzie Resort owner, McKenzie Bridge; Clarence Balknap, of the McKenzie Development Protective Association, Belknap Springs; and Harold Trotter, of the Obsidians and the Willamette Ski Patrol, Eugene. In support of oral arguments, Mr. Hendershott presented a petition containing 323 signatures representing winter sports enthusiasts, businessmen, service clubs, and other persons who are interested in the promotion and advancement of winter sports in this area. (For details of the request see petition and numerous letters attached thereto in the general office files.)

Chairman Banfield advised that, notwithstanding that the Highway Commission would like to keep this road, and others in the same category, open for winter sports enthusiasts, it cannot approve the project because it is contrary to the Commission's policy to perform such service for special interests alone; however, the Commission has instructed the Engineer to keep these high-elevation roads open for general public travel insofar as it is possible to do so. This concluded the conference.

Mr. Cecil J. Hammond, Sutherlin, Oregon, appeared before the Commission with regard to reinstatement of his PUC log-hauling permit which was canceled by order of the Highway Commission on October 21, 1947, for transporting a load weighing 104,500 pounds over a state highway in the vicinity of Roseburg, being 32,500 pounds in excess of the weight allowed. The Engineer advised that this is the second time Mr. Hammond's permit has been canceled for transportation of excess-weight loads, the first time being about a year ago when he was apprehended with a load of 110,600 pounds. He recalled that the permit was reinstated upon receipt of a letter from Mr. Hammond promising, if he were permitted to resume operations, to abide by the provisions of the law and any permits under which he would be hauling logs, and giving as his understanding that his permit would be permanently canceled if he did not do so. Chairman Banfield reviewed the record and remarked that it indicates to the Commission that Mr. Hammond has not made any serious attempt to comply with the requirements. The Highway Commission does not wish to put anyone out of business, he said, but it must have the operators' cooperation and will take extreme measures, if necessary, to secure it. He asked Mr. Hammond to explain why he continued to overload his equipment after having promised in writing not to do so. Mr. Hammond could give no good reason, or any explanation whatsoever, whereupon

the Commission informed him that his case would be taken under advisement and a decision rendered later.

Following Mr. Hammond's departure the matter was discussed further, and as a result thereof, the Commission ordered reinstatement of Mr. Hammond's permit on December 10, 1947, with the understanding that his permit will be automatically canceled on a permanent basis if he commits another violation, and, in that case it will do Mr. Hammond no good to come again before the Commission to urge reinstatement. The Secretary was instructed to forward to the Public Utilities Commissioner a recommendation to that effect.

Mr. Hampton, Sr., Philomath, of the Benton County Lumber Company, came before the Commission at this time with regard to the reduced load limit that was ordered by the Commission on the previous day for the Eddyville-Blodgett Secondary Highway. He advised that they have discussed this matter and have come to the conclusion that they cannot haul economically if their loads are restricted to 30,000 pounds gross, so if the Commission will not raise the gross limit at least 5,000 pounds, they will have to shut down their mill operations immediately, inasmuch as the truckers will not bring logs to the mill on a 30,000 pounds gross weight basis. Mr. Hampton stated that the loggers will help the state in keeping the road in good condition and will stay off the highway when weather conditions are not favorable. Chairman Banfield explained the reasons given by the Engineer for recommending a reduced load limit for this highway. He pointed out that the original recommendation was a 20,000 pound limit, but this was raised to 30,000 pounds later, subject to the condition that the road shall be closed during freezing weather and at any other time if the Engineer finds that it is being damaged by heavy trucking and that it will also be closed if the truck haulers are observed with loads weighing in excess of the prescribed weight limit. As the result of further discussion the Commission agreed to give the matter further consideration.

Following Mr. Hampton's departure the matter was again brought up for discussion and as a result the Commission decided to raise the gross weight limit to 35,000 pounds and the single axle limit to 12,000 pounds, subject to the same conditions and requirements as were specified on the previous day. A resolution marked EXHIBIT"G", attached hereto and by this reference made a part hereof with like effect as though extended herein, was adopted by the Commission by unanimous vote.

Letters were presented from Mr. Hollis Johnston, architect, Portland, and from Mr. Frederick H. Eley, Salem, offering their architectural services in the design and construction of the proposed State Highway Department Office Building in Salem. The Secretary was instructed to reply thereto that the Commission has not decided how this matter is to be handled, but their applications will be given consideration at the proper time.

A letter was presented from Mr. Forrest E. Cooper, Attorney-at-Law, Lakeview, advising that a proposal is now before Congress to abolish the Klamath Indian Reservation and suggesting, in view thereof, that it would be

advisable for the State Highway Commission to assume jurisdiction over the Sprague River County Road between Chiloquin and Beatty because of the possibility of obtaining a cash grant from the Congress for the maintenance of this road if it were incorporated in the State Secondary Highway System. The Secretary was instructed to inform Mr. Cooper that the Commission will be pleased to give this matter serious consideration when the Federal Funds referred to are forthcoming.

The Commission considered and denied a request from the County Court of Coos County for a 4.7-mile extension of the Powers Secondary Highway south of its present terminus in the town of Powers, Coos County.

The Commission approved and ordered filed a resolution from the City Council of the City of Gearhart approving the action taken by the State Highway Commission at its previous meeting with respect to closing the ocean beach area at Gearhart to vehicular traffic.

A letter was presented from the Crown Zellerbach Corporation requesting the Commission's approval of the assignment to the Corporation interests of the Ostrander Railway and Timber Company in its so-called "Molalla Forest Road" which extends from the Molalla area to the Willamette River west of the town of Canby, and passes over the Pacific Highway East just north of the Canby city limits. The Chief Counsel advised that the form of assignment has been examined and found satisfactory. He recommended approval of the assignment. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution with regard thereto, marked EXHIBIT "H", and by this reference made a part hereof with like effect as though extended herein.

The Engineer reported receipt of a letter from the Civil Aeronautics Administration requesting approval of a traffic pattern and flying clearance for the Hood River Airport, which is to be constructed adjacent to the Hood River Secondary Highway No. 281, Hood River County. He also presented a resolution from the County Court of Hood River County establishing a standard left-hand traffic pattern at 800 feet minimum approaches at the Hood River County Airport and a 50-foot minimum flying clearance over the state highway at the west approach zone to this airport. He recommended approval of the request subject to concurrence by the Public Roads Administration. The Commission approved the recommendation unanimously.

The Commission had under discussion the advisability of inviting the Western Association of State Highway Officials to hold its next annual meeting, scheduled for July, 1948, in Portland. The Commission by unanimous vote instructed the Engineer to invite this group, over the signature of the Highway Commission, to hold such meeting in Portland.

The Engineer reported the need to place a five-ton load limit on the Little Nestucca Secondary Highway between Mile Post 5 (500 feet east of Bear Creek) and Mile Post 9.4 (at Dolph). This section of road, he said, was posted on November 14 under previous authorization from the Commission because it was being severely damaged by log-hauling traffic and was interfering with the delivery of mail and the operation of light farm vehicles transporting milk and

cream. He asked the Commission to confirm the posting. The Commission approved the report and thereupon, by unanimous vote, adopted the attached resolution with respect thereto, marked EXHIBIT"I", and by this reference made a part hereof with like effect as though extended herein.

The Engineer also reported the probable need to order a reduced load limit on the Weston-Elgin Highway over its entire length during the spring months when the frost is leaving the ground, in order to reduce the break down of the road surface and to avoid expensive repairs. He recommended adoption of a 50-percent reduced load limit at this time but effective February 15 to May 1, 1948. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution, marked EXHIBIT"J", and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion the claim of Mr. Ernest W. Travis, Youngstown, Ohio, presented by his attorneys, Coan and Rosenberg, Portland, for damages to his automobile which he alleged occurred as the result of an accident on September 18, 1947, when he drove his car into the concrete traffic separator at the junction of Union, Denver and Swift Avenues, in North Portland, said claim being in the amount of $40.95, the cost of repairing his car. The Engineer advised that investigation reveals that the "Benjamin" light which illuminates the end of the separator was not functioning at the time of the accident due to mechanical trouble, and Mr. Travis drove his car into the end of the separator without knowing it was there. He gave as his belief that the State Highway Department, under the circumstances, is liable for payment of the claim, and he recommended that the claim be allowed. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

Chairman Banfield brought up for discussion the complaint of truckers who appeared before the Commission at the morning session, that there is considerable delay in securing permits covering special movements over state highways. The question arose as to what can be done to expedite the issuance of permits. The Engineer was instructed to give the matter some thought and to report to the Commission in writing what additional authority, if any, he thinks should be given field engineers in order to eliminate the delays.

A resolution was presented from the Bonneville Rod and Gun Club, Bonneville, Oregon, giving as their understanding that the State Highway Commission is contemplating the construction of a lake adjacent to the new Columbia River Highway at Multnomah Falls and suggesting that this lake be prepared in such a manner that it could be stocked with fish as an attraction for visitors, and that the State Highway Commission work in conjunction with the Oregon State Game Commission with such objective in view. The Secretary was instructed to inform the Club that no lake has been constructed at this point, and the Commission is not in position to pass on the matter at this time.

The Commission discussed briefly a letter from Mr. George H. Flagg, Public Utilities Commissioner, directed to the City of Medford suggesting that a meeting be held in Medford among representatives of the Southern Pacific

Company, the Oregon State Highway Commission, the City Council of Medford, and the office of the Public Utilities Commissioner to discuss conditions existing at the Main and 6th Street crossing of the Southern Pacific Company's tracks in this city. The Engineer advised that this crossing is on the route of a state secondary highway and that the Traffic Engineer previously has reported that it should be protected by signals. He recommended that someone from the State Highway Department be delegated to attend this meeting, as suggested by the Public Utilities Commissioner, and that the State Highway Department join with the others concerned in the expense of the installation of a signal light at this place if it is ordered by the Public Utilities Commissioner as a result of the hearing. The Commission approved the recommendation by unanimous vote, thus confirming the action to the same effect taken at the previous meeting.

The Commission discussed a request from the City of Myrtle Point for the installation of a flashing beacon at the intersection of 8th Street and Spruce Street in this city. The Engineer advised that this intersection is on the route of the Coos Bay-Roseburg Highway, that the matter has been investigated by the Traffic Engineer who reports that the accident hazard at this location is by no means acute, and that the approach speeds are not excessive; moreover, there are many other locations in the state that should receive preference if additional flashing beacons are to be installed. He recommended, in view of this report, that the request be denied. The Commission approved the recommendation unanimously.

A petition was presented from residents of Willamina, Grande Ronde, Valley Junction, and other places in this vicinity requesting the installation of an electrically-operated stop light at the intersection of the Salmon River Highway and the Three Rivers Highway at Valley Junction and that this area be zoned to further regulate and control the speed of traffic through this junction. The Engineer advised that he is now working on a plan for channelizing this intersection which will, in his opinion, more adequately serve the traveling public than would a "stop and go" light, in view of which he recommended that the request for such a light be denied. The Traffic Engineer's investigation, he said, does reveal, however, the need for establishment of a controlled-speed zone between Grand Ronde and Willamina because the many curves on this section have restricted sight distances and the volume of traffic is large. Inspection of the accident record of this section, he said, reveals that 235 accidents have occurred during the six-year period 1941-1946, inclusive, in which four people were killed and 67 injured, and that speed was definitely a factor in 23 of them. He recommended the establishment of a 40-miles-per-hour speed limit along this particular section of highway. The Commission deferred action with respect to the lighting and channelization project pending receipt of the Engineer's report. The Engineer's recommendation with respect to establishment of a speed limit of 40 miles per hour between Willamina and Grand Ronde was approved. The attached resolution, marked EXHIBIT "K", with respect thereto, and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

The Commission considered a request from the City of Redmond for the installation of two "blinker" lights on 6th Street (The Dalles-California Highway) at its intersection with the Ochoco Highway at "E" Street and at its

intersection with the McKenzie Highway at "H" Street, as an accident-prevention measure. The Engineer advised that this matter has been investigated by the Traffic Engineer who recommends the installation of only one of the lights, at the 6th and "H" Street intersection. He stated that he concurs in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Henry Roe Cloud, Superintendent, Umatilla Indian Agency, requesting the establishment of a reduced-speed zone on the Old Oregon Trail for a distance of about two miles where this highway passes through the Agency grounds. Mr. Cloud points out that the highway alignment at this point is very straight, which is an inducement for the drivers of motor vehicles to speed, thus causing a hazardous condition for the people who reside in this congested area. The Engineer advised that this matter has been investigated by the Traffic Engineer who reports that because of the curves at the end of the "straight away", cars bunch up and, when they get through the crooked alignment, speed up to pass the slow-moving vehicles ahead. He gave as his belief that the establishment of a reduced speed limit along this section would not solve the problem because this is an outlying rural district and enforcement of a speed zone would be difficult. He recommended, in lieu thereof, the installation of "Slow, Congested Zone" signs. The Commission approved the recommendation.

The matter of designating a system of "through-way" highways in the State of Oregon came up for discussion, but action thereon was deferred until a future meeting when there is more time to give it the study it merits.

The Engineer reported an appreciable increase in traffic over the Corvallis-Eastside Secondary State Highway No. 210, it being apparent that many people are now using this road rather than the Albany-Corvallis Primary Highway. He recommended in view of this condition, that this highway be designated a "through" highway over its entire length, requiring vehicles to stop before entering it. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the resolution marked EXHIBIT"L", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion the abandonment or other disposition of certain sections of the old right of way of the Baker-Homestead Highway, in Baker County, which no longer are valuable for state highway purposes since the highway has been reconstructed on revised alignment. The Engineer recommended that a portion of this old right of way be allowed to revert to the State Land Board as the owner of real property abutting thereon, that some portions be retained by the State Highway Commission for state highway purposes, and that other portions be allowed to revert to the abutting property owners. He exhibited a map showing in color the areas thus to be disposed of. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution covering the matter, marked EXHIBIT"M", and by this reference made a part hereof with like effect as though extended herein.

The Commission also had under consideration the abandonment of certain portions of the old right of way of the Cove-Union Section of the Cove

Secondary Highway, Union County, which no longer are of value for state highway purposes in view of the fact that this highway has been reconstructed on revised alignment. The Engineer recommended abandonment of the portions that are no longer of value for state highway use and that such areas be turned over to the County Court of Union County for future county road use or for reversion to the abutting property owners as the Court sees fit. He exhibited a map showing the several portions referred to. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution with respect thereto, marked EXHIBIT"N", and by this reference made a part hereof with like effect as though extended herein.

The Commission also had under discussion the abandonment of certain portions of the old right of way of the Burns-Crane Highway, in Harney County, which are no longer of value for state highway purposes due to the relocation of the highway. The Engineer presented a map showing the areas to be disposed of, all of which lie within the city limits of Burns. After due consideration of this matter, the Commission by unanimous vote adopted the attached resolution with respect to the disposition of these areas, which resolution is marked EXHIBIT"O", and is by this reference made a part hereof with like effect as though extended herein.

Consideration was given by the Commission to the abandonment of certain portions of the Madras-Prineville Secondary Highway, in Jefferson and Crook Counties, such portions being no longer of value as a part of the state highway because of the reconstruction of the highway on revised alignment. The Commission by unanimous vote adopted the attached resolution with respect to the disposition of these areas, which resolution is marked EXHIBIT "P" and is by this reference made a part hereof with like effect as though extended herein.

The Commission discussed the disposition of the old right of way along the South Unit of the Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County. The Engineer exhibited a map showing portions that are no longer of value for state highway purposes. Following discussion, the Commission approved the abandonment of such portions by adoption of a resolution which is attached hereto, marked EXHIBIT"Q", and by this reference made a part hereof with like effect as though extended herein.

The Commission considered a proposed agreement with Jefferson County regarding the disposition of the old right of way of The Dalles-California Highway south of Madras where the highway has been reconstructed on revised alignment. The Engineer advised that the Jefferson County Court is willing to assume jurisdiction over the old highway southeasterly from Culver but is unwilling to assume such jurisdiction over the old highway between Culver and Madras. He said that the Court wants the Highway Commission to designate that portion as a state secondary highway because it feels that the road is still going to carry considerable tourist traffic to The Cove State Park, and the County does not have the equipment or the funds to maintain the road in proper condition. A resolution was presented from the County Court requesting such secondary highway designation. The Commission took the matter under advisement and instructed the Engineer to render a detailed report in writing prior to the next meeting of the Commission.

A petition was presented from Highway Department employees stationed at the Highway Shops in Salem requesting that they be paid on a monthly basis instead of an hourly basis and that they be relieved from the requirement of working on holidays and Saturdays and that their monthly compensation not be reduced below the amounts now paid. The Commission deferred action on this matter pending study and consultation with the Engineer and the Chief Counsel. The Engineer was instructed to submit to the Commission a written report on the subject.

The matter of adopting a State Highway Department organization chart had the attention of the Commission, but action thereon was deferred until the next meeting of the Commission.

The Secretary presented a certified copy of Ordinance No. 2307 of the City of McMinnville wherein the city prohibits the parking of any motor vehicle on North Baker Street between 15th Street and 17th Street in the City of McMinnville. The Engineer advised that this section of highway is adjacent to the city high school athletic field where there is considerable congestion of traffic during athletic contests and that the Commission was requested some months ago to establish a " o parking" zone at this location and indicated at that time that it would do so if the city would adopt an appropriate city ordinance, which has been done. He recommended action by the Commission to establish such "no parking" zone as covered by the city's ordinance. The Commission approved the recommendation and thereupon by unanimous vote adopted a resolution covering the matter, which is marked EXHIBIT"R", attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, December 29 and 30, 1947. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

Reconsideration was given by the Commission to the purchase of right of way for the proposed improvement of the Oregon Coast Highway in the town of Gold Beach, Curry County, being a continuation of the discussion begun on the preceding day. As the result of discussion, the Commission authorized the Chief Counsel and the Right of Way Department to proceed with the acquisition of necessary right of way and to condemn the same if necessary. The Engineer was instructed to investigate the matter of revising the alignment south of 4th Street to ascertain whether or not it can be shifted so as to avoid encroachment on the high school grounds, objections to which were offered by Mr. Collier H. Buffington on behalf of the school board. It was the thought of the Commission that it would be advisable to shift the alignment to that proposed some two years ago so as to avoid the high school property, notwithstanding that this would necessitate moving oil tanks on the east side of the highway, rather than to interfere with the school property. The Commission, by unanimous vote, adopted a resolution attached hereto and marked EXHIBIT "B5", and by this reference made a part hereof with like effect as though extended herein, authorizing the Chief Counsel to institute condemnation proceedings

to acquire right of way for the improvement which cannot be obtained by negotiation.

The Commission considered and signed agreements, etc., as follows:

Agreement with City of Portland for channelization and signalization of the Front Avenue-S. W. Terwilliger Boulevard Section of the Pacific Highway West (Barbur Boulevard).

Permit agreement with California-Pacific Utilities Company for use of poles for radio near La Grande.

Bargain and sale deed to H. A. and Marie Hein in exchange of properties on gravel pit site near Scappoose.

Agreement with George F. Gunnell re Enegr n Ferry operation.

Agreement with Clackamas County covering maintenance of a county road detour during construction of the Pacific Highway East between Canemah and New Era.

Agreement with Carl M. Stevens, et al providing for the lease of an equipment storage headquarters in Newberg.

Agreement with the Hydraulic Dredging Company covering change in the specifications for the Troutdale-Wahkeena Dredging Project, Contract No. 2894.

Agreement with Columbia Transportation Company renewing the lease of the Astoria Ferry Terminal.

Bargain and sale deed conveying unto Theophil J. Rich, et ux. 0.775 acre of land, being consideration in settlement of damage to their service station property in Washington County.

The Commission also discussed a proposed agreement with the City of Portland and the Secretary of State providing for cooperation in traffic accident analysis, being a two-year extension of an agreement now in effect which expires on December 31, 1947. The signing of this agreement was deferred by the Commission pending a written report from the Engineer explaining details thereof.

The Engineer requested authority to formulate a contract with the Eugene Water Board for moving a 16-inch water main with connections from Franklin Avenue, where it will interfere with the grade of the new highway, to a position on the south side of the new highway on 11th and Franklin Streets between Kincaid and Agate Streets. He advised that the new grade from The Anchorage to Onyx Street will require the lowering of the pipe in place; however, the Eugene Water Board is willing to use the money which such lowering would cost to finance replacement of the pipe on the south side of the right of way so that it will be entirely out from under the pavement, thus eliminating damage from future leakage, and the Board proposes to lay a new main from

Kincaid Street to Agate Street. The cost of lowering the existing main, he said, is $4,000, which is an obligation of the state, and it is proposed that this sum be paid to the city in cash so it can be applied to the cost of constructing the new main. In addition to this cash payment, the Engineer said, the state's contractor is to be required to remove the existing pipe in connection with his grading operations, although the Water Board will furnish gratis, two men to supervise the work and unjoint the pipe as it is removed. He recommended approval of this arrangement, which, he said, will not entail any additional cost to the state beyond that which the Commission has assumed in other instances. The Commission approved the recommendation by unanimous vote and ordered that the matter be covered by appropriate written agreement between the city and the state.

The Engineer presented a request from the Corvallis Chamber of Commerce for assistance from the State Highway Department in removing snow from the forest road which extends from the Alsea Highway to Mary's Peak, a winter sports area serving that community. He recommended that the request be denied because the section maintenance crews are short handed at this location, and it would require the services of an entire crew to do the work and to sand the road afterwards. In order to provide some assistance he suggested that he be authorized to sell to the Chamber of Commerce an old eight-foot push plow, which has a book value of $25 and is of no use to the State Highway Department, which would enable the Chamber of Commerce to carry on its own snow-removal operations using motor equipment belonging to either the Forest Service, the City of Corvallis, or Benton County. The Commission decided unanimously not to perform this work for the Chamber of Commerce, however, authorized the Engineer to sell the old snow plow to the Chamber at its book value of $25.

The Engineer requested authority for an additional expenditure of $1,470.93 for alterations in the new ferryboat ("M. R. Chessman") that is now under construction by the Albina Engine and Machine Works, in order to facilitate the docking of this vessel alternately with "Tourist II" and "Tourist III", which was not anticipated in the original design. The additional work consists of construction of a lavatory and water closet in the main engine room and the installation of the mooring bitts farther to the stern of the vessel so as to pivot the vessel at the same pivot points utilized by the smaller and shorter vessels when backing into the ferry terminal. The Commission approved the request by unanimous vote.

In this connection the Commission instructed the Engineer hereafter to keep all expenses incident to this ferry operation separate from all other expenses of the State Highway Department so the exact cost of the ferry operation can be readily ascertained from inspection of the financial reports as they are rendered from time to time. The Commission also instructed the Engineer, hereafter, in preparing estimates of cost for highway construction, to include therein an amount for every conceivable item that might enter into the project, including lighting, landscape work, etc., so as to avoid, insofar as is possible, the need to allocate additional funds to the job later on to pay for such items as extra work. The Commission particularly ordered that landscaping expense incurred in connection with highway construction be entered in the cost records as construction expense rather than as park expense.

The Engineer presented for the Commission's consideration a program of betterment projects, consisting of widening, realigning, and surfacing of

critical sections of state highways, which could be accomplished and thereby major construction deferred for a number of years. The Commission postponed action on this matter pending study.

The matter of changing the highway route numbers that will be affected by completion of the Warm Springs Highway was brought up for discussion, but action thereon was deferred pending completion of the construction work.

An offer was presented from Mr. John Sigfridson, Astoria, to pay the sum of $50 for an old lifeboat that has been salvaged from the ferry "North Beach" formerly operated between Astoria, Oregon, and Megler, Washington. The Engineer advised that the boat is valued at $35 and recommended acceptance of the offer. The Commission approved the recommendation.

The Commission discussed briefly and referred to the Engineer for investigation and report, a request from the City Council of the City of Rockaway for paving the Oregon Coast Highway full width between curbs and for construction of two storm sewers along this highway for a distance of two blocks in this town.

The Commission had under discussion the proposed agreement with the U. S. Forest Service for snow removal on the forest road which extends from the Mt. Hood Highway to Timberline Lodge. A form of agreement covering the matter, as prepared by the Forest Service, was presented. The Engineer explained that this agreement is identical to the one under which like operations were conducted during the winter season 1946-1947 and that it covers the operations during the coming winter season. He recommended approval of the agreement. The Commission approved the recommendation unanimously and thereupon signed the agreement.

The Commission also approved and signed an agreement with the O. W. R. & N. Company covering an encroachment of the new Columbia River Highway on railroad property at Oneonta, Multnomah County.

The Chief Counsel requested authority to attend a meeting of the Committee on Acquisition and Legal Control of Right of Way, Highway Access and Adjacent Areas of the Highway Research Council in Washington D. C., during December 2 - 5, 1947. He advised that his expenses in connection therewith will be paid by the Council. The Commission approved the request by unanimous vote.

The Commission by unanimous vote approved the minutes of the meeting held on October 21 and 22, 1947.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

T. H. Banfield

EXHIBIT "A"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

EXHIBIT "B1"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1) is a highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, the Highway Commission is authorized, when the route of a state highway passes through the corporate limits of a city or town, to select or designate the street or streets of said city or town over which to route traffic; and

WHEREAS, pursuant to said authority the Commission has selected as one of the streets of the City of Eugene over which to route traffic using the Pacific Highway a street known as Broadway; and

WHEREAS, for the purpose of providing an adequate traffic artery for the movement thereover of traffic entering, passing through, and leaving the City of Eugene by way of the Pacific Highway, the Commission has planned and

EXHIBIT "B1" (CON'T)

contemplates the improvement of a portion of Broadway as a part of said route; and

WHEREAS, pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Pacific Highway routed over Broadway Street in the City of Eugene.

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, which are made part of this resolution. *

3. That all of said real properties are needed and the acquisition of the same is necessary for the specific purposes stated in the description of each ownership.

4. That said section of said highway has been located, planned, and the specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of the Commission, is and will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to

EXHIBIT "B1" (CON'T)

the respective parcels of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. *

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

EXHIBIT"B1" (CON'T)

9. The real properties sought to be acquired are described on the attached sheets, consisting of 2 pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels No. 1 to 4 inclusive. *

10. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of November, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 91, under the heading "Real Property Condemnation Resolutions"and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "B2"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1) is a highway under the jurisdiction and control of the State, and said Highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, the Highway Commission is authorized, when the route of a state highway passes through the corporate limits of a city or town, to select or designate the street or streets of said city or town over which to route such traffic; and

WHEREAS, pursuant to said authority the Commission has selected as one of the streets of the City of Eugene over which to route traffic using the Pacific Highway a street known as Broadway; and

WHEREAS, the Highway Commission is authorized by law to enter into an agreement with the City of Eugene and/or the County of Lane for the

EXHIBIT "B2" (CON'T)

construction, reconstruction, repair, or maintenance of any state highway and may provide for an allocation of the cost of such project to the contracting parties; and

WHEREAS, the City of Eugene, the County of Lane, and the State of Oregon have entered into a cooperative agreement, the subject of which is the location and construction of a state highway, or section thereof, within the corporate limits of the City of Eugene, which project includes also the construction or reconstruction of a portion of a city street and a portion of a county road, both within the corporate limits of said City, the improvement of both of which is, in the judgment of the Commission, necessary in order to provide adequate traffic accommodations into and through said City for traffic having occasion to use the state highway and its connections; and

WHEREAS, pursuant to the provisions of Section 100-115, O. C. L. A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic and it therefore is the judgment and opinion of the Commission that access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of the Pacific Highway, and its connections, through the City of Eugene. *

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described on the attached sheets, all of which are made part of this resolution. *

3. That all of said real properties are needed and the acquisition

EXHIBIT "B2" (CON'T)

of the same is necessary for the specific purposes stated in the description of each ownership.

4. That said section of said highway has been located, planned, and specifications for the construction and improvement of the same made in a manner which, in the opinion and finding of this Commission, is and will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury or damage.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described on the attached sheets, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the respective parcels of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission. *

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said

EXHIBIT "B2" (CON'T)

described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

9. The real properties sought to be acquired are described on the attached sheets, consisting of 7 pages, on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties, said parcels of real property being otherwise identified as Parcels No. 1 to 14 inclusive. *

10. This resolution shall be entered in full in the minutes and records of this Commission as of the twenty-fourth day of November, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 92, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "B3"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Eva L. Campbell, et al., which property is located in the south half ($S\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 24, Township 4 North, Range 32 East, W. M. Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway

NOV 24 1947

EXHIBIT "B3" (CON'T)

Commission as file R13443, which property is being acquired for right of way purposes in connection with the Athena-Holdman Highway; *

Real property owned by Ava L. Bagley, et al., which property is located in the west half ($W\frac{1}{2}$) of Section 23 and in the East half ($E\frac{1}{2}$) of Section 22, Township 4 North, Range 33 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13434A, which property is being acquired for right of way purposes in connection with the Athena-Holdman Highway; *

Real property owned by O. H. Reeder, et al., which property is located in the northwest quarter ($NW\frac{1}{4}$) of Section 26, Township 4 North, Range 33 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R13434, which property is being acquired for right of way purposes in connection with the Athena-Holdman Highway.*

Real property owned by Frankie Kilgore Butts, et al., which property is located in the northwest quarter ($NW\frac{1}{4}$) of Section 21, Township 4 North, Range 32 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 13447, which property is being acquired for right of way purposes in connection with the Athena-Holdman Highway; *

Real property owned by the J. H. Tillman Company, which property is located in the northeast quarter ($NE\frac{1}{4}$) of Section 21, Township 4 North, Range 34 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 13408, which property is being acquired for right of way purposes in connection with the Athena-Holdman Highway; *

Real property owned by J. R. Catron, et ux., which property is located in the north half ($N\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 22, and in the northeast quarter ($NE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 22, all in Township 4 North, Range 34 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7, and is further identified in the records of the Highway Commission as file R 13409, Parcel No. 6 being acquired for right of way purposes and Parcel No. 7 being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Athena-Holdman Highway; *

NOV 24 1947

EXHIBIT "B3" (CON'T)

Real property owned by Mary E. Chandler, et al., which property is located in the north half ($N\frac{1}{2}$)of the northwest quarter ($NW\frac{1}{4}$) of Section 14 and in the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) and in the northwest quarter ($NW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 11, Township 1 North, Range 39 East, W. M., Union County, Oregon, and is more particularly described on the attached sheets and designated as Parcels No. 8 and 9, and is further identified in the records of the High-Commission as file R 11422, which property is being acquired for right of way purposes in connection with the Wallowa Lake Highway; *

Real property owned by G. P. Hunter and Eliza Hunter, which property is located in Lots 5 (the northeast quarter of the southwest quarter) of Section 28, Township 13 South, Range 10 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10, and is further identified in the records of the Highway Commission as file R 12643, which property is being acquired for right of way purposes in connection with the Alsea Highway; *

Real property owned by Leslie Irene McPherson, et al., which property is located in the northeast quarter ($NE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) and in the south half ($S\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 16, Township 35 South, Range 1 West, W. M., Jackson County, Oregon, and is more particularly described on the attached sheets and designated as Parcels No. 11 and 12, and is further identified in the records of the Highway Commission as file R 14090, which property is being acquired for right of way purposes in connection with the Sams Valley Highway; *

Real property owned by Robert W. Ruhl, which property is located in Government Lot 4 of Section 17, Township 35 South, Range 1 West, W. M., Jackson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 13, and is further identified in the records of the Highway Commission as file R14086, which property is being acquired for right of way purposes in connection with the Sams Valley Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of

NOV 24 1947

EXHIBIT "B3" (CON'T)

said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of November, 1947.

FOOTNOTE:

* The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission , Salem, being Resolution No. 93, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full therein.

NOV 24 1947

EXHIBIT "B4"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, by virtue of the laws of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the North Powder River Road in Baker and Union Counties, State of Oregon, is a county road which has been designated and classified as a federal aid secondary highway and as such is qualified for improvement with state, federal, and county funds; and

WHEREAS, said highway is now being improved pursuant to a cooperative agreement or arrangement between the United States Government, the State of Oregon and Baker and Union Counties; and

WHEREAS, the real property hereinafter described is necessary for right of way purposes in connection with the contemplated and proposed improvement of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for the construction and

NOV 24 1947

EXHIBIT "B4" (CON'T)

improvement of the North Powder River Road in Baker and Union Counties, State of Oregon, to wit:

A parcel of land lying in the southwest quarter ($SW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 31, Township 6 South, Range 39 East, W. M., Baker and Union counties, Oregon, the said parcel being described as follows:

Beginning at the southwest corner of Section 31; thence North 0° 29' West along the west line of said Section 31 a distance of 1331.6 feet to the northwest corner of the southwest quarter ($SW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 31; thence North 89° 31' East a distance of 32 feet to a point 40 feet distant easterly from (when measured at right angles to) the relocated center line of the North Powder River Road at Engineer's Station 247+10; thence South 0° 21' East parallel to said highway centerline a distance of 1331.6 feet to the south line of Section 31; thence South 89° 31' West a distance of 29 feet to the point of beginning.

The parcel of land to which this decription applies contains 0.93 acre, of which 0.36 acre lies within the existing right of way, title to which hereby is alleged to be in the public, and 0.57 acre lies outside of the existing right of way.

(Title to said parcel of real property is in Maude K. Hutchinson.)

2. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

3. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can

EXHIBIT "B4" (CON'T)

be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

4. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

5. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of November, 1947.

NOV 24 1947

14417

EXHIBIT "B5"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the highway known and designated as the Oregon Coast Highway, otherwise identified as State Highway No. 9 and U. S. Route No. 101, is a state highway and therefore under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway as now located passes through the town of Gold Beach and it is the purpose of the Highway Commission to widen and more permanently improve said section of said highway, and for which purpose it is necessary that the real properties described on the attached sheets be acquired;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property described on the attached sheets, which sheets for identification purposes bear the date of November 24, 1947, and the signature of W. C. Williams, Assistant State Highway Engineer, are each and all necessary

NOV 24 194

EXHIBIT "B5" (CON'T)

for the proper widening, reconstruction, and other improvement of said highway from Engineer's Station 2+45.7 to Engineer's Station 31+02.

2. That the names of the owners of the several parcels of property sought to be acquired by the State for right of way purposes are:

Parcel No. 1 - D. M. Moore, C. M. Morse, and C. H. Buffington
Parcel No. 2 - Oleta A. Walker
Parcel No. 3 - H. W. Crook and Ruth Crook
Parcel No. 4 - H. W. Crook and Ruth Crook, contract purchasers from A. H. Gauntlett Estate
Parcel No. 5 - John O. Melville
Parcel No. 6 - H. W. Crook and Richard Buffington

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damages, if any there be, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General, and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel, and G. W. Heuner, as Assistant Counsel for the Oregon State Highway Commission, are and each of them is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in their joint or individual judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the twenty-fourth day of November, 1947.

NOV 24 1947

EXHIBIT "C"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by the Oregon State Highway Commission apportioned to the city hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the sum or amount set opposite the name of said city:

Tualatin ----------$ 357.48

AND, WHEREAS, said city has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, be it and it hereby is resolved as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified, the following streets in the following named city:

Tualatin - Park Street, Grove Street, Second Street, Railroad Avenue, Douglas Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named city hereby are approved.

3. That the action taken by said city as evidence by appropriate resolutions adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city so as to qualify said city to receive and use the funds apportioned to said city.

4. That upon entry of this resolution in the minutes and records of the Highway Commission, the Secretary shall thereafter mail to the proper officer in said city a duly certified copy of the resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 25th day of November, 1947.

EXHIBIT "D"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws, 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1947 for street purposes as provided in said law, the several sums or amounts set opposite the names of the respective cities or towns:

Cornelius	$1,566.39
Elgin	1,999.60
Fossil	1,066.99
Gervais	665.86
Juntura	334.94
Madras	1,594.46
Merrill	1,299.64
Monroe	623.75
Port Orford	1,514.24

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Cornelius - "Q" Street

Elgin - "C" Street, Oak Street, Spruce Street, Elm Street, "A" Street, Depot Street, George Street, Virginia Street, Front Street

Fossil - Adams Street, Sixth Street

Gervais - General maintenance - all city streets

Juntura - Hildah Street

Madras - "D" Street

NOV 24 1947

EXHIBIT "D" (CON'T)

Morrill - Court Drive, 2nd Street, Roosevelt Street

Monroe - Railroad Street, Main Street, Howard Street

Port Orford - 19th Street, Jackson Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

3. That the action taken respectively by said cities and/or towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Forms 1 and 2 adopted by the City of Gervais on May 29, 1947, and approved by the State Highway Commission on June 16, 1947, shall be canceled, in accordance with the request of the City of Gervais on file in the records of the State Highway Department, and Resolution Form 3 hereby approved be substituted therefor.

5. That Resolution Forms 1,2 and 3 adopted by the City of Monroe on June 13, 1947, and approved by the State Highway Commission on October 21, 1947, shall be canceled, in accordance with the request of the City of Monroe on file in the records of the State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

6. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

7. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 25th day of November, 1947.

EXHIBIT " E "

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

Delmar-China Camp Creek Section of the Oregon Coast Highway, in Coos County;

Modoc Point-Barclay Springs Section of The Dalles-California Highway, in Klamath County;

Front Street (Fir Avenue-Ferry Street) Section of the Oregon Coast Highway, in Coos Bay, Coos County;

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; aid

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 6B-25-12, 6B-9-7, and 5B-13-12, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of November, 1947.

NOV 24 1947

EXHIBIT "F"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2732 with McNutt Bros for grading and bituminous macadam surfacing on the Coyote Creek-Grave Creek Section of the Pacific Highway in Josephine County; completed November 2, 1947.

Contract No. 2748 with J. F. Johnston for construction of the Pudding River Bridge on the Pacific Highway East in Clackamas and Marion Counties; completed October 31, 1947.

Contract No. 2779 with Sound Construction and Engineering Co., for grading on the North Plains-Gardner Ranch Section of the Sunset Highway in Washington County; completed August 30, 1947.

Contract No. 2817 with J. S. Risley for oiling and rock production on the Robertson Bridge-Hayes Hill-Shattuck Corner Section of the Rogue River Loop Secondary Highway in Josephine County; completed July 3, 1947.

Contract No. 2823 with E. C. Swaggart for furnishing crushed rock in stockpiles on the Wren Section of the Alsea, Corvallis-Newport and Kings Valley Secondary Highways in Benton, Lincoln and Polk Counties; completed February 11, 1947.

Contract No. 2831 with Del R. Beebe for surfacing and oiling on the Smithfield-Elmira Section of the Territorial Secondary Highway in Lane County; completed July 15, 1947.

Contract No. 2832 with Del R. Beebe for regrading and oil mat surfacing on the Veneta-Crow Section of the Territorial Secondary Highway in Lane County; completed July 15, 1947.

Contract No. 2839 with O. C. Yocom Co. for grading and oil mat surfacing on the Deschutes River-Sherars Summit Section of the Sherars Bridge Secondary Highway in Sherman and Wasco Counties; completed August 15, 1947

Contract No. 2840 with O. C. Yocom Co. for grading and oil mat surfacing on the Tygh Valley-Deschutes River Section of the Sherars Bridge Secondary Highway in Wasco County; completed August 15, 1947.

EXHIBIT "F" (CON'T)

Contract No. 2849 with Oscar E. Joelson for furnishing crushed rock in stockpiles on the Lapine Section of The Dalles-California and Fremont Highways in Deschutes and Klamath Counties; completed September 14, 1947.

Contract No. 2858 with Jack R. Taggart for furnishing crushed rock on the Canyon City-Soda Mountain Section of the John Day-Burns Highway in Grant County; completed October 15, 1947.

Contract No. 2865 with Lindstrom Bros. for construction of Love Bridge over Powder River on the Baker-Homestead Highway in Baker County; completed September 27, 1947.

Contract No. 2866 with J. S. Risley for regrading and oil mat surfacing on the Hardman Hill Section of the Heppner-Spray Section of the Heppner-Spray Highway in Morrow County; completed September 25, 1947.

Contract No. 2867 with J. S. Risley for grade widening and oil mat surfacing on the Rhea Creek-Hardman Hill Section of the Heppner-Spray Highway in Morrow County; completed September 27, 1947.

Contract No. 2868 with O. C. Yocom Co. for grading and oil mat surfacing on the Umatilla Dam-Hermiston Section of the Old Oregon Trail Highway in Umatilla County; completed September 22, 1947.

Contract No. 2881 with D. F. McKenzie for grade widening and oil mat surfacing on the Gillespie Corner-Lorane Section of the Territorial Secondary Highway in Lane County; completed November 10, 1947.

Contract No. 2888 with Albert W. Denton for grading and paving on the Ashland (Water St.-Oak St.) Section of the Pacific Highway in Jackson County; completed October 16, 1947.

Contract No. 2910 with Glen O. Stevenson d.b.a. Stevenson Construction Co. for grading and bituminous macadam surfacing on the Salmon River Highway in Polk County; completed October 18, 1947.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Minutes of November 24 and 25, 1947

ORDER REDUCING MAXIMUM LOAD LIMITS

on the

EDDYVILLE-BLODGETT STATE SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY No. 180

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

NOV 24 1947

The maximum weights which shall apply to the following highway, to-wit:

EDDYVILLE- BLODGETT SECONDARY STATE HIGHWAY No. 180 from Mile Post 11.7, at Nashville, to Mile Post 19.29 at Blodgett, in Lincoln County,

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any single axle of a truck or truck-tractor shall not exceed twelve thousand (12,000) pounds: and, the combined gross weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of all of the axles of a vehicle or combination of vehicles, shall not exceed thirty-five thousand (35,000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec 115-394, O. C. L. A., shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important cross-roads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Lincoln County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this twenty-fifth day of November, 1947.

NOV 24 1947

14427

EXHIBIT "H"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, on December 6, 1943, the Commission, as party of the first part, entered into an agreement with the Ostrander Railway and Timber Company, a corporation organized under the laws of the State of Washington, and the Weyerhaeuser Timber Company, a corporation organized under the laws of the State of Washington, by which the Commission granted to the Companies a permit to construct and maintain a viaduct over the right of way of the Pacific Highway East, at a point approximately one mile Northeasterly of Canby in Clackamas County; and

WHEREAS, under date of September 26, 1947, said Ostrander Railway and Timber Company by agreement has assigned all its interests under said agreement to Crown Zellerbach Corporation, a Nevada Corporation; and

WHEREAS, said Crown Zellerbach Corporation has by the same instrument assumed all the obligations, burdens, and conditions imposed on the Ostrander Railway and Timber Company under the agreement of December 6, 1943; and

WHEREAS, Crown Zellerbach Corporation has requested that the Commission consent to such assignment,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That consent is hereby given to the assignment by the Ostrander Railway and Timber Company in favor of the Crown Zellerbach Corporation, as contained in that certain agreement between the two companies, bearing date of September 26, 1947.

2. In consenting to this assignment the Commission does not release Ostrander Railway and Timber Company from any claims, demands, obligations or liabilities arising out of said agreement with respect to any acts, occurences, or omissions happening prior to October 1, 1947.

3. The Secretary be and he hereby is instructed to transmit a copy of the within resolution to the Crown Zellerbach Corporation and to the Ostrander Railway and Timber Company, a Washington Corporation.

ORDER REDUCING MAXIMUM LOAD LIMIT

on the

LITTLE NESTUCCA STATE SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

LITTLE NESTUCCA SECONDARY STATE HIGHWAY NO. 130

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

NOV 24 1947

EXHIBIT "I" (CON'T)

LITTLE NESTUCCA SECONDARY STATE HIGHWAY NO. 130 from a point 500 feet east of Bear Creek, Mile Post 5.0, to Dolph, Mile Post 9.4, in Tillamook County,

shall be as follows: The combined weight bearing on the surface of the highway at contact with the tread of the wheels of all of the axles of a vehicle or combination of vehicles shall not exceed ten thousand (10,000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394 O.C.L.A., shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Tillamook County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

ORDER REDUCING MAXIMUM LOAD LIMIT

on the

WESTON-ELGIN STATE SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

WESTON-ELGIN SECONDARY STATE HIGHWAY NO. 330

AND WHEREAS, the above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highway during the spring months (February 16 to May 1, 1948) when the frost is leaving the ground, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon said road during the period February 15, 1948, to May 1, 1948, shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said road was not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of the said highway that the maximum total weight of load and vehicle which shall be permitted upon said road during the period February 15 to May 1, 1948, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

NOV 24 1947

EXHIBIT "J" (CON'T)

The maximum weights which shall apply to the following highway, to-wit:

WESTON-ELGIN STATE SECONDARY HIGHWAY NO. 330 from Weston, in Umatilla County, to Elgin, in Union County,

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394 O.C.L.A., shall be in full force and effect from the 15th day of February, 1948, to the 1st day of May, 1948, unless modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Umatilla County and a like copy to the county clerk of Union County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this twenty-fifth day of November, 1947.

NOV 24 1947

EXHIBIT "K"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: . . . . . Salmon River Highway . . . . . .

Highway number: . . . . 39 . . . . . Route number: . . . ORE18 . . . .

Location of Termini	Established Speed
M. P. 18.27 (Grand Ronde) to M. P. 27.94 (Willamina)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

NOV 24 1947

14433

EXHIBIT "L"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, by the provisions of Section 115-351, O. C. L. A., the State Highway Commission with respect to state highways is authorized to designate main traveled or through highways or sections thereof by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highwayor highways; and

WHEREAS, the Highway Commission has heretofore, to wit: on the twenty-seventh day of April, 1943, adopted a resolution in which a large number of state highways have been declared to be and have been designated as through highways, and the Engineer was instructed to properly mark the same; and

WHEREAS, it is now the judgment and opinion of this Commission that the following known and designated highway is a highway which carries a large volume of traffic, both local and through traffic, and by reason thereof and by reason of other traffic conditions and facts said highway should, in the judgment of the Commission and in the interests of the general public, be declared to be a through highway:

Corvallis-Eastside State Secondary Highway No. 210 between its junction with the Pacific Highway East, in Albany, and its junction with the Pacific Highway West, in Corvallis;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the above named highway hereby is declared to be and is designated as a through highway.

2. That all traffic entering said highway from intersecting streets, and roads or highways, shall come to a stop before entering said highway.

NOV 24 1947

EXHIBIT "L" (CON'T)

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by law and by this resolution. Such signs as may be erected at said points of intersection shall conform to the types and standards heretofore approved by the Commission.

4. The Engineer is instructed to place such signs or markers as nearly as practicable at the place where the intersecting street, road or highway, meets a prolongation of the nearest property line of such through highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highway from said intersecting roads the place where the stop shall be made.

5. This resolution shall be entered in the minutes and records of the Commission as of the 25th day of November, 1947, and a duly certified copy thereof delivered to the Public Roads Administration and to the County Court of each county wherein said highway is located.

EXHIBIT "M"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Baker-Homestead Highway known as the West Unit, Love Bridge-Black Bridge Section in Baker County, the westerly terminus of which is at Highway Engineer's Station 1049+00 of the relocated line and the easterly terminus of which is at Highway Engineer's Station 1411+91.9 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, some of which eliminated sections or units will no longer be needed for highway or other public purposes and other portions or units of which are needed and therefore must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation; and

WHEREAS, the State of Oregon, represented by its State Land Board is now the owner of some lands abutting upon sections or units of the old right of way which by reason of the relocation of the highway are to be abandoned as highway rights of way;

NOW, THEREFORE,BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the map or print which for identification purposes bears date of August, 1945 and the designation Ore. No. 6B-16-10, and bears also the signature of R. H. Baldock, hereby is approved and made a part of this resolution, a copy of which map or print is filed in the permanent records of the Highway Commission at Salem, Oregon, and a like copy of which is filed with the State Land Board at Salem, Oregon. A like copy of said map shall be mailed to Baker County.

2. The area or unit of land which is within the limits of the old right of way and which area or unit is confined within the following Highway Engineer's Stations, to wit: 1056+50 and 1070+55 of the relocated highway, otherwise described as:

EXHIBIT "M" (CON'T)

All of the following described property lying in Lots 1 and 2 of Section 5, Township 9 South, Range 43 East, W. M., and included within a strip of land sixty feet wide, being thirty feet on each side of the center line of the former route of the Baker-Homestead Highway as surveyed over and across said property and as more particularly described as follows:

Beginning at a point on the center line of said highway known as Station 1169+09.9, which is approximately 100 feet south and 1486 feet west of the section corner common to Sections 32 and 33, Township 8 South, Range 43 East, W. M., and Sections 4 and 5, Township 9 South, Range 43 East, W. M., running thence on a 24-degree curve to the right a distance of 215.1 feet; thence South 24° 16' East a distance of 62.7 feet; thence on a 20-degree curve to the left a distance of 476.3 feet; thence North 60° 28' East a distance of 91.8 feet; thence on a six-degree curve to the right a distance of 264.4 feet; thence North 76° 20' East a distance of 394.4 feet; thence on a 14-degree curve to the left a distance of 250.7 feet; thence North 41° 19' East a distance of 66.7 feet to a point known as Station 1179+32, which point is approximately 46 feet east of the above-described section corner, said parcel containing 2.51 acres, more or less,

hereby is abandoned as a part of the right of way of said highway as now located and established and said above described area hereby is permitted to revert to the State Land Board as the owner of the real property abutting thereon and all right, title or interest which the State of Oregon, by and through its State Highway Commission, has or may hereafter have in and to said land or right of way and hereby is relinquished and quitclaimed to the State Land Board. The above area is shown colored in purple on the attached print.

3. The areas of land within the limits of the old right of way which lie between Engineer's Station 1070+55 and Engineer's Station 1099+00 of the relocated highway, between Engineer's Station 1177+70 and Engineer's Station 1182+00 of the relocated highway, and between Engineer's Station 1201+60 and Engineer's Station 1206+60, and between Engineer's Station 1220+00 and Engineer's Station 1241+60 of the relocated highway, and between Engineer's Station 1242+00 and Engineer's Station 1250+70 of the relocated highway, and between Engineer's Station 1153+70 and Engineer's Station 1164+50 of the relocated highway, and between Engineer's Station 1394+40 and Engineer's Station 1397+00 of the relocated highway, which areas are shown colored in brown on said print or map which is made a part of this resolution, upon construction of the relocated highway will no longer be needed for highway or other public purposes, and, therefore, all of said areas which are colored in brown on said map are eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said

EXHIBIT"M" (CON'T)

real property is hereby permitted to revert to the respective owners of the real properties abutting directly upon the said area colored in brown, except the area in brown lying between Highway Engineer's Station 1153+70 and Engineer'sStation 1164+50, which said area is to be by quit-claim deed conveyed by the Commission to W. B. Colvard pursuant to previous agreement.

4. That the portions of the old right of way which by reason of the relocation of the said highway are no longer within the boundaries of the new right of way, and which portions lie between Highway Engineer's Station 1112+70 and Highway Engineer's Station 1123+30 of the relocated highway, and also between Highway Engineer's Station 1373+30 and Highway Engineer's Station 1380+30 of the relocated highway, which areas are identified and shown colored in yellow on said map or print, are to be retained by the State and possession thereof and title thereto shall continue to remain in the State of Oregon for use in connection with the construction, maintenance and operation of said highway and for such other public uses as said areas may serve.

5. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties title to which is to be retained by the State shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Baker County a duly certified copy hereof and shall file with the Clerk of Baker County a like certified copy. A certified copy should also be sent to the State Land Board at Salem, Oregon.

NOV 24 1947

EXHIBIT "N"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Cove Secondary Highway, otherwise designated as State Highway No. 342 in Union County; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway as originally located are eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the units or sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section of the Cove Secondary Highway known as the Cove-Union Section, which begins at Highway Engineer's Station 764+41.4 on the new route and ends at Highway Engineer's Station 1176+00 of the new route, was completed and made available for travel on June 25, 1947, and that the sections of the old route herein defined and described as Units "A", "B", "C", "D", and "E" shall no longer be part of the route of the Cove Secondary Highway but shall be eliminated therefrom.

2. Those parts of the sections of the old route of the Cove Secondary Highway lying outside the established right of way of the relocated highway which for the purpose of this resolution are identified as Units "A", "C", "D" and "E" and more particularly described as follows:

Unit "A"

Beginning at State Highway Engineer's Station 842+00 of the relocated Cove Secondary Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 20, Township 3 South, Range 40 East, W. M.; thence Westerly via the former route of the Cove Secondary Highway to State Highway Engineer's Station 869+00 of the relocated

NOV 24 1947

EXHIBIT "N" (CON'T)

Cove Secondary Highway in the Southwest quarter (SW¼) of the Southeast quarter (SE¼) of Section 18, Township 3 South, Range 40 East, W. M.

Unit "C"

Beginning at State Highway Engineer's Station 870+00 of the relocated Cove Secondary Highway in the Southwest quarter (SW¼) of the Southeast quarter (SE¼) of Section 18, Township 3 South, Range 40 East, W. M.; thence via the former route of the Cove Secondary Highway to State Highway Engineer's Station 875+00 of the relocated Cove Secondary Highway in the Southeast quarter (SE¼) of the Southwest quarter (SW¼) of Section 18, Township 3 South, Range 40 East, W. M.

Unit"D"

Beginning at State Highway Engineer's Station 901+00 of the relocated Cove Secondary Highway in the Southwest quarter (SW¼) of the Northeast quarter (NE¼) of Section 19, Township 3 South, Range 40 East, W. M.; thence Southerly via the former route of the Cove Secondary Highway to State Highway Engineer's Station 909+80 of the relocated Cove Secondary Highway in the Northwest quarter (NW¼) of the Southeast quarter (SE¼) of Section 19, Township 3 South, Range 40 East, W. M.

Unit"E"

Beginning at State Highway Engineer's Station 937+65 of the relocated Cove Secondary Highway in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 30, Township 3 South, Range 40 East, W. M.; thence Southwesterly via the former route of the Cove Secondary Highway to State Highway Engineer's Station 944+30 of the relocated Cove Secondary Highway in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 30, Township 3 South, Range 40 East, W. M.

shall be and hereby are abandoned as parts of said highway, and hereafter shall be under the jurisdiction and control of the County and may be vacated or kept by the County for such public use as the County may determine.

3. That part of the section of the old route of the Cove Secondary Highway lying outside the established right of way of the relocated highway which for the purpose of this agreement is identified

EXHIBIT "N" (CON'T)

as Unit "B" and is more particularly described as follows:

UNIT "B"

Beginning at State Highway Engineer's Station 869+00 of the relocated Cove Secondary Highway in the Southwest quarter (SW¼) of the Southeast quarter (SE¼) of Section 18, Township 3 South, Range 40 East, W. M.; thence Southwesterly via the former route of the Cove Secondary Highway to State Highway Engineer's Station 870+00 of the relocated Cove Secondary Highway in the Southwest quarter (SW¼) of the Southeast quarter (SE¼) of Section 18, Township 3 South, Range 40 East, W. M.

shall pass to the jurisdiction and control of the County and shall be maintained by the County as a county road.

4. There is attached hereto and made a part hereof a print or map on which are shown colored in brown the sections of the old route of said highway designated as Units "A", "C", "D", and "E", and shown colored in red the section of the old route designated as Unit "B", and there is likewise shown on said print colored in green the route of the highway as relocated.

5. That this resolution be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court of Union County.

ACCEPTANCE

Union County, acting by and through its County Court, has found and does hereby find that the section of the old route of the Cove Secondary Highway as above referred to as Unit "B" is needed for county road and highway purposes, and does hereby agree upon the passage of the within resolution to assume jurisdiction thereover as a county road and to maintain the same for public purposes.

NOV 24 1947

EXHIBIT "N" (CON'T)

Said County Court has found and does hereby further find that the sections of the Cove Secondary Highway referred to in the within resolution as Units "A", "C", "D", and "E" are not needed for county road or highway purposes and does hereby assume jurisdiction thereover for the purpose of vacating the same for the use and benefit of the abutting owners as provided by law.

Union County agrees to take all necessary and proper legal procedures to accomplish the foregoing.

DATED this 14 day of October, 1947

UNION COUNTY, by and through its County Court

Minutes of November 24 and 25, 1947

RESOLUTIONS

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Burns-Crane Highway known as the Burns-Lawen Section in the City of Burns, Harney County, the westerly terminus of which is at State Highway Engineer's Station 0+40 of the reconstructed line and the Eastorly terminus of which is at Highway Engineer's Station 37+00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes, but are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between State Highway Engineer's Station 10+36.3 and Engineer's Station 31+21.02 of the reconstructed highway, and which area is identified and shown in red on map attached hereto and marked EXHIBIT "A", and is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the City Council of the City of Burns, and said road shall thereafter be maintained by the City for public use, all in accordance with the agreement between the State Highway Commission and the City of Burns, dated the 22nd day of July, 1947.

2. The area shown colored in green on said Exhibit "A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way

NOV 21 1947.

proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit "A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Harney County a duly certified copy thereof, and shall file with the Clerk of Harney County a like certified copy and is likewise directed to mail to the City Council of the City of Burns a like certified copy, and shall file with the City Recorder a like certified copy and said County Court and City Council hereby are respectfully requested to take appropriate official action, by resolution or otherwise, by which the City shall accept the said abandoned sections of the said old right of way shown colored in blue on the map attached hereto and marked Exhibit "A", and shall assume jurisdiction thereover as a city street and shall maintain the same for public purposes.

EXHIBIT "P"

Minutes of November 24 and 25, 1947

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Madras-Prineville Secondary Highway No. 360, which begins at State Highway Engineer's Station 139+63.3 of the reconstructed line and ends at State Highway Engineer's Station 663+00 of the reconstructed line; and also the section which begins at Station 993+00 of the relocated line and ends at an intersection with the Ochoco Highway in the City of Prineville; and

WHEREAS, by reason of the relocation of said sections of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, and the eliminated sections or areas are no longer needed for State Highway purposes, but may be useful for road purposes by either the Counties of Crook or Jefferson, or the City of Prineville; and

WHEREAS, the State Highway Commission and the County of Jefferson and the State Highway Commission and the County of Crook, and the City of Prineville, entered into agreements under date of December 27, 1945, setting forth the disposition to be made of certain portions of the right of way of the old highway when the new highway was completed and opened to travel; and

WHEREAS, the above-described highway project is now completed and the new highway is open to travel, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway as affected by reason of said relocation.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section or area of the old right of way which lies between a point identified as being Mile Point 0+00 of the Madras-Prineville Secondary Highway, No. 360, on a line between the East and West halves of Section 22, Township 11 South, Range 13 East, W. M., (said point being further identified as Mile Point 98.65 on the former route of The Dalles-California Highway); and a point on the relocated Madras-Prineville Highway, No. 360, at State Engineer's Station 663+00, in the Northwest quarter of the Southwest quarter of Section 34, Township 12 South, Range 14 East, W. M.; and also the sections or area of the old right of way, which lie between Engineer's Station 993 and an intersection of State Highway and the Ochoco Highway; and which areas are

NOV 24 1947

EXHIBIT "P" (CON'T)

otherwise shown and colored in red on the map attached hereto, marked "Exhibit A", and by this reference made a part hereof, are hereby abandoned as part of the right of way of said state highway, but all of said abandoned sections shall remain and be maintained as a public highway by the County Courts of Jefferson and Crook Counties, and the City of Prineville.

2. The Commission hereby surrenders all jurisdiction over the sections of highway described particularly in Paragraph 1 hereof, and hereby consents that jurisdiction over said highway may be assumed and exercised by the County Courts of Jefferson and Crook Counties, and by the City of Prineville, and said highway shall thereafter be maintained by the Counties and the City for public use.

3. The area shown in green on "Exhibit A" includes right of way and other property acquired for the relocation and reconstruction of the Madras-Prineville State Highway. In connection with all of this area, it is the judgment and finding of the Commission that this area is and will be needed for right of way, for highway construction, improvements, maintenance, and other highway purposes and uses. For such purposes and uses therefore, the Commission does hereby declare and order that possession of and title to all the area or land colored in green shall be retained and held by the State and shall not be permitted to revert to or become the property of abutting owners.

This Resolution shall be entered in full in the minutes of the Commission as of November 25, 1947.

NOV 24 1947

EXHIBIT "Q"

Minutes of November 24 and 25, 1947

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Enterprise-Lewiston Highway known as the South Unit, Enterprise-Forest Boundary Section in Wallowa County, the southerly terminus of which is at Highway Engineer's Station 0+30 of the relocated line and the northerly terminus of which is at Highway Engineer's Station 410+50 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundary of the new location, which eliminated sections or units will no longer be needed for highway or other public purposes; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the several sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the map or print which for identification purposes bears date of December, 1941 and the designation Drg. No. 6B-3-4, and bears also the signature of R. H. Baldock, hereby is approved and made a part of this resolution, a copy of which map or print is filed in the permanent records of the Highway Commission at Salem, Oregon.

2. The areas of land within the limits of the old right of way which lie between Engineer's Station 41+00 and Engineer's Station 45+00, and between Engineer's Station 141+80 and Engineer's Station 158+90 of the relocated highway, between Engineer's Station 172+00 and Engineer's Station 207+00, and between Engineer's Station 374+00 and Engineer's Station 388+80 of the relocated highway, which areas are shown colored in brown on said print or map which is made a part of this resolution, upon completion of the construction of the relocated highway will no longer be needed for highway or other public purposes, and, therefore, all of said areas which are colored in brown on said maps are eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said real property is hereby permitted to revert to the respective owners of the real

EXHIBIT "Q" (CON'T)

properties abutting directly upon the said area colored in brown.

3. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties title to which is to be retained by the State shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission and the Secretary hereby is directed to mail to the County Court of Wallowa County a duly certified copy hereof and shall file with the Clerk of Wallowa County a like certified copy.

EXHIBIT "R"

Minutes of November 25 and 26, 1947

RESOLUTION

WHEREAS, the Pacific Highway West, also known and designated as US99W, is one of the main traveled highways of the State over which there moves an average daily traffic of 5000 vehicles, consisting of both local and through traffic; and

WHEREAS, North Baker Street in the City of McMinnville has heretofore been by the Highway Commission designated as and now is a street of said city over which there has been and is now being routed traffic moving over the said Pacific Highway West; and

WHEREAS, in the opinion of the State Highway Commission the parking of cars and other vehicles for extended periods of time and in large numbers tends to inconvenience traffic, creating a potential traffic hazard and otherwise interferes with the normal flow of traffic upon said street; and

WHEREAS, the City of McMinnville by appropriate resolution (Ordinance No. 2307) has prohibited parking of any motor vehicle upon any portion of said North Baker Street between Fifteenth Street and Seventeenth Street; and

WHEREAS, the city has served on the State Highway Commission a copy of said ordinance; and

WHEREAS, it is the recommendation of the State Highway Engineer that regulations imposing "no parking" restrictions should be maintained with respect to said section of highway; and

WHEREAS, it is the opinion of the Commission, based upon the foregoing facts and conditions that certain parking regulations should be established and maintained with respect to said section of highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

NOV 24 1947

EXHIBIT "R" (CON'T)

1. That the section of the Pacific Highway West, US99W, (North Baker Street), which begins at Fifteenth Street and ends at Seventeenth Street, in the City of McMinnville, be and said section of highway hereby is declared to be a "no parking" area, and from and after the passage and adoption of this resolution the parking of motor vehicles within said area shall be prohibited.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain at appropriate places within said defined area the approved "no parking" signs.

3. That this resolution be entered in the minutes and records of the Commission as of the 29th day of November, 1947, and an exact copy hereof mailed to the Mayor of the City of McMinnville and a like copy to the Superintendent of State Police.

Portland Oregon
December 29, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, First Assistant State Highway Engineer
W. W. Stiffler, Second Assistant State Highway Engineer
George W. Neuner, Assistant Counsel
Floyd Query, Acting Secretary

The Commission by unanimous vote adopted the following resolution appointing Floyd Query as Acting Secretary during Mr. H. B. Glaisyer's absence.

WHEREAS, H. B. Glaisyer, the duly appointed, qualified and acting Secretary to the Oregon State Highway Commission, will be absent from the State of Oregon for the period beginning December 29, 1947, and ending January 10, 1948; and

WHEREAS, it is necessary that someone be appointed to serve as Acting Secretary during the absence of the said H. B. Glaisyer; and

WHEREAS, Floyd Query is, in the opinion of the Commission qualified to perform the duties of such office and serve as Acting Secretary during the absence of the regular Secretary;

NOW, THEREFORE BE IT AND IT HEREBY IS RESOLVED as follows:

1. That Floyd Query be and he hereby is appointed as Acting Secretary to the Oregon State Highway Commission, and that he serve in such capacity during the period beginning December 29, 1947, and ending January 10, 1948.

2. That as such Acting Secretary the said Floyd Query is hereby authorized and empowered to do and perform all of the duties appertaining to the said office for said period.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Offer of the Sparrow Corporation to sell to the state a tract of 40 acres containing 1,203,000 feet of timber at $10 a thousand with the provision that the Corporation will donate 40 percent of the offering price provided that the park will be named Sparrow State Park. The tract is located on the borders of Elbow Lake on the Oregon Coast Highway in Douglas County. The Parks Superintendent did not recommend the purchase of this property but stated that he thought it would be better practice to pick up cutover areas. The offer was refused by the Commission because of the conditions attached thereto.

2. Proposed gift to the state of Sunset Bay County Park on the Cape Arago Secondary Highway, by the Coos County Court. The Parks Superintendent presented a letter from Judge L. D. Felshein and County Commissioners Fred Trewe and Fred Kruse offering to the state the Sunset Bay County Park, consisting of 50 acres. He stated that to put the park in proper condition would require the installation of a latrine, ten tables, and a driven well, estimated to cost a total of about $2,000. It was his thought that the maintenance of this park could be handled by the Cape Arago State Park caretaker. He recommended that the Commission accept the park. Commissioner Schaupp voiced an objection to the acquiring of what he considered as too large a number of parks on the Coast. He stated further that he was not against the acquisition of this one but that it seemed as though all the parks requested were on the coast. The question of overnight parking for fishermen was discussed. The Chief Counsel stated that, under county ownership, overnight parking was permitted for fishermen and that they would object if it were prohibited under state ownership. Commissioner Schaupp gave as his opinion that overnight parking would probably be permissible in this instance only, but not as a policy for all state parks. On the basis of the Parks Superintendent's recommendation, the Commission agreed to accept the park if it is an outright gift and if there are no conditions attached to the gift which are not required in other state parks.

3. Request of the Public Roads Administration to open Castle Rock and Boardman Oases on the Columbia River Highway, in Morrow County. Mr. T. M. Davis, District Engineer for the Public Roads Administration, who was present, stated that in his opinion the trees in these oases are now large enough that the public should be allowed access to the areas. It was his thought that they should be used as places for the general public to stop and lunch as there is good water there now. The Parks Superintendent stated that the present fences should be left in place to keep sheep out of the parks, and that the stile gates now installed would permit pedestrians entrance but not motor vehicles. It was his thought to use them as roadside areas and that to properly equip them would require a compressor tank, a couple of drinking fountains, two latrines, and four tables. Chairman Banfield inquired of Mr. Davis how much the Commission would have to do to open them up, and if it would be agreeable to open them

without the compressor tank and the latrines. He stated further that he was doubtful if the public cared enough for these to use them satisfactorily. The opening of the cases with tables only was agreeable to Mr. Davis. The Commission approved the opening of the two cases and the installation of tables and benches.

4. Wayside picnic areas as proposed by the Oregon Roadside Council and as previously suggested by the Portland Chamber of Commerce Recreational Resources Committee. Chairman Banfield stated that it was his thought to ask the Parks Superintendent to select eight to twelve of these areas throughout the state, fix them up with tables, benches and garbage cans and then have a report made each month by the maintenance men taking care of them to indicate the cost of maintenance and the public's treatment of those areas. The Parks Superintendent, in answer to Commissioner Schaupp's inquiry as to how the areas should be spaced, stated that he thought they should be placed on areas where it is natural to get out and eat, that the locations should be chosen carefully, and that they should not be placed indiscriminately. As a result of discussion the Commission authorized development of several such areas, as suggested by Chairman Banfield.

The Parks Superintendent was instructed to check locations for such wayside areas and then report to the Commission at the next meeting for approval. When the areas are approved a report is to be made each month showing the use by the public, the cost of keeping the areas in a suitable condition and such cost to include any graveling or grading of shoulder areas necessary for the parking of cars.

5. Proposed acquisition of Ft. Stevens area as a State Park: The Parks Superintendent presented a map outlining the area. He stated that this is war surplus property and if the state wants it, it should be sure of what the army will do to help, also, in cases of this sort the areas are usually given to states or counties. The request for acquisition of this area as a park was denied due to the fact that the Commission has just acquired 308 acres as an addition to Ecola Park at Tillamook Head. (Fred Andrus, representing the Astoria Chamber of Commerce, who was to appear the following day regarding this proposed park was notified by telephone of the Commission's decision. The delegation did not appear.)

6. Proposed addition to Umpqua Lighthouse State Park: The Parks Superintendent explained that the proposed area consists of about 360 acres of cutover land just south of Winchester Bay. He stated that he had tried to contact the owner of this property but had not been successful. The proposed new area would be along the highway right of way, and in his opinion would provide wayside protection in addition to completing the park. He restated that he would be fully agreeable to a policy of buying cutover land rather than timbered areas. It appears that the area is owned by the Menasha Wooden Ware Company of Menasha, Wisconsin. The Commission requested the secretary to write to President Smith of this company regarding purchase due to the fact that unsuccessful

negotiations have already been underway for 5 years with the local representative of the company, Mr. Weed of Coos Bay.

6. Proposed release of a portion of the Myrtle Wayside Area consisting of 2 3/10 acres on the Coos Bay-Roseburg Highway between Coquille and Myrtle Point: The Parks Superintendent explained that the original agreement had been negotiated with J. N. and Anna M. Jacobsen, but they have now sold out and the new owner desires release of 2 and 3/10 acres from the 20 acres in the original agreement so that he can build a new warehouse and concrete plant. He recommended that the realease be granted as it was his opinion that the release of this small parcel would not do any material damage to the balance of the area. The Chief Counsel suggested that the release agreement provide that the myrtle trees could not be cut unless permission is given. On the basis of the Parks Superintendent's recommendation the release for 2 3/10 acreas was granted.

The Assistant Counsel, Mr. J. W. DeSouza, requested authority to acquire real property that is needed as right of way and for other purposes. He presented a list of such properties for which options have been obtained, together with the offers that he recommended for acceptance in connection with each parcel. Following careful consideration of each individual tract, the Commission approved acquisition of the areas at the amounts stated in the option agreements. A resolution marked EXHIBIT "A", attached hereto and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

* In the discussion of this matter the Commission gave special consideration to a parcel of land on the Oregon City-New Era Section of the Pacific Highway, owned by George C. and Mabel P. Critesor and further designated in EXHIBIT "A" as item No. 14038. The Chief Counsel stated, in connection with this settlement, that if the owner wants to move his house onto adjacent land, and does not have the land, the Commission might buy the land and move the house onto it for him. Chairman Banfield and Commissioner Schaupp both expressed the opinion that they did not want the Commission to get into the business of moving houses. The Chief Counsel then suggested approval of this item, but that he be given the opportunity to see the owner regarding whether or not he is willing to keep his house if the state will buy additional land on which to move it. The settlement was approved as listed in EXHIBIT "A" and the Chief Counsel was instructed to make further negotiations for moving the house.

All options were approved as submitted with the exception of those for the Capitol Grounds, Salem, which are to be held up for consideration until all options for this project have been secured.

At this time ex-Governor Oswald West of Portland appeared before the Commission regarding the removal of sand from the ocean beaches. He stated that he had worked for 45 years to protect the public's interests in these beaches and that he is the only one who knows the true condition of the titles to them. He stated further that he is not in position to disclose now what is wrong with the titles but that he will write a letter to the

Chairman of the Commission and give it to his nephew, Mr. Willis West, for delivery upon his death, so that all parties concerned would know the damage done by the legislation passed by the 1947 legislature. He recalled that Governor Chamberlain, many years ago, had called upon him to disclose land frauds in the state. His disclosures, he said, showed that 85 percent of the applications for grants to school lands were based on fraudulent signatures and dummy applications. He criticised early state administrators for not taking advantage of an old grant which provided that every mineral spring in the state be given to the state with 6 sections of land surrounding it. Now, he stated, we find that the state is buying these same areas back as state parks. He claimed that it was his legislative foresight which secured the public title to the beaches and that the last legislative assembly had nullified his acts. He warned the Commission and the Engineer that if he could help it there was not going to be a pick stuck in the beaches and if there were it would release a chain of circumstances and public indignation that would strangle them. He censured the Engineer severely for what he considered as his granting of the permit to remove sand from the beaches and stated further that he was asking the cooperation of the Commission in protecting the public interests in the beaches. He said that he expected to see the Engineer at the next session of the legislature and that with his assistance would correct the great wrong done to the people of the state in the 1947 session.

Mr. Arnie Suomela, Master Fish Warden, with the State Fish Commission, appeared before the Commission in connection with the removal of smelt sand from the beach at Yachats. He stated that he had received a letter from the Highway Commission's Secretary last year, asking the Fish Commission's advice on the removal of sand and its effect on the smelt. He stated that his reply was that no smelt sand should be removed between May and August in order to protect the spawning fish, but since that time the controversy over the removal of the sand from the beaches has arisen. He stated that on December 22, 1947 he had been to Yachats and examined the areas in which smelt sand is found. These areas, he said, in general, are very confined, and examination of the areas at that time did not disclose how extensive this particular type of sand is, nor how far seaward the sand extends, so that on the basis of his investigation he could not state whether the sand would be replaced by natural elements. In reply to Commissioner Schaupp's inquiry regarding the quantity of sand that has been removed, Mr. Suomela stated that, to his knowledge, Mr. Christensen, to whom the permit had been granted, had not removed any sand as yet, and that the only time that the Fish Commission could determine the extensiveness of smelt sand would be in the summer when they would have an opportunity to examine the areas during low tides. He stated that if the areas were found to be extensive on the seaward side there was a good chance that the sand would be replaced naturally.

Chairman Banfield pointed out that the permit to Mr. Christensen was granted only after the Fish Commission had given their approval. The Chief Counsel further pointed out that the only restriction in the Fish Commission's letter was that no sand should be removed during the spawning season and that the other safeguards in the permit were placed there by the State Highway Commission. Mr. Suomela stated that the Fish Commission does

not want to see anything happen that would permanently remove the smelt sand and destroy the spawning grounds for the fish. The Chief Counsel inquired if the Fish Commission would be willing to let Mr. Christenson remove sand under its direction. Mr. Sucmela replied that his Commission would first like to determine the extensiveness of the smelt sand on the seaward side to get an idea if it might be replaced.

Chairman Banfield then inquired if the Fish Commission wished to withdraw their letter approving removal of the sand, with the exception of the spawning months, until they had an opportunity to check further. Mr. Sucmela stated that he thought that it would be the proper thing to do. Mr. Sucmela was requested by the Commission to write a letter to them withdrawing the previous approval and requesting the Highway Commission to hold up operations until the Fish Commission has time to investigate the condition.

Mr. L. M. Christenson of Yachats, to whom a permit had been given to remove sand, appeared before the Commission. He stated that he had lived in Yachats for 14 years and that the people around Yachats know that smelt sand was used in the Waldport, Ten-mile and part of the Newport bridge. It was his estimate that 400,000 cu. yds. had been used for this bridge construction. His observation was that the sand comes and goes with the tide and storms. He remarked that as far as conservation of natural resources was concerned he was vitally interested and would do anything to conserve the smelt sand in Oregon. The only reason he was taking the sand was that he sold it for homes along the beach so the owners would not have to pay exorbitant prices for imported material. He reminded the Commission that when he came before the Commission 2 years previously and asked for permission to remove smelt sand to build homes in Yachats, permission had been given him to remove the sand except during May, June and July. He observed that as far as the smelt were concerned it was the residents of the area who secured the bulk of them, not the tourists. He contended that the present controversy was a personal issue, and that some of the people who were complaining most bitterly felt that it was perfectly all right to dump garbage, old automobile bodies and other refuse on the beaches. The only object in getting the sand from the beach is to build homes at a cheaper price, he said, and he proposes to sell the sand at cost, between $1.75 and $2.00 per cu.yd.

Mr. Oswald West spoke again and stated that if the taking of sand from the Yachats vicinity continues that that entire strip of beach would be in private ownership before the next legislature meets. Chairman Banfield interposed that the Highway Commission had not asked for this situation, that it was placed on their shoulders by the legislature, and that they were trying to find a way to determine what the Commission's authority really is. Mr. West replied that the Highway Commission had been made trustee of the beaches by his legislative act in 1913. He pointed out that no board or commission has more or less power than is given by the act that creates it, and that the Highway Commission was given no power to take sand from the beaches and turn the royalties over to the school fund. Chairman Banfield remarked that that was not according to the information that had been given him by the Chief Counsel. Mr. West replied that he did not care what the Chief Counsel's

opinion was, he still was the only one who knew anything about the title to the beaches and that to protect the public interest he had kept his silence all these years. He stated further that the Commission would have to bear the consequences of public reaction and that his real purpose in securing the enactment of the law in 1913 declaring the beaches a public highway was to prevent their falling into the hands of private owners. He stated that he secured the passage of this law in 1913 and at the same time created the Highway Commission. The public interest had been fully protected until, as he termed it, "some fool came in and enacted a new statute during the last legislature". The unfortunate part of the whole situation, he said, was that he could not tell all the facts because the public would lose its rights to the beaches if he did. Chairman Banfield stated that he could assure Mr. West that the Commission has no desire to give away any of the rights that the State of Oregon possesses and that the Commission was desirous only of the clarification of its position. He pointed out that the Commission had been told by some that it has control over the beaches and by others that the control is limited. The Commission, he said, has no desire to have the beaches picked up and hauled away. Mr. West agreed that over the greater part of the beaches the Commisson's control and title is absolute but there are sections where it is not. He said the county court of a coast county has no more interest in those lands than a county court in an inland county. If the Commission permits removal of those materials, he said, it will attract someone's attention who will file an injunction. The Chief Counsel pointed out that no money has been collected from the beach materials, and if any money is collected it will be by the State Land Board and will go to the school fund. He stated, further, that the bill passed by the 1947 legislature was not a Highway Commission Bill. No action was taken by the Commission regarding the removal of sand from the beaches.

The Assistant Counsel, Mr. J. W. DeSouza, presented a list of the properties needed for highway improvements which cannot be acquired by negotiation, together with the offer that he recommended be made in connection with each parcel.

		Recommended Offer
OREGON CITY-NEW ERA SECTION OF THE PACIFIC HIGHWAY EAST		
14045	Southern Pacific Company	$ 400.00
14048	Crown Zellerbach Corporation	1,400.00
14041	New Era Land & Investment Co. - Carl F. and Ebba C. Christensen	8,500.00
14210	Carl F. Christensen and Ebba C. Christensen	14,000.00
14039	Mary Andree	100.00

OCHOCO - O'NEIL SECTION OF THE PRINEVILLE-MADRAS HIGHWAY		
14285	Earl J. Morris and Alice C. Morris	$ 200.00
ELGIN-BOSWELL RANCH SECTION OF THE WALLOWA LAKE HIGHWAY		
11425	Parsons Brothers	7,000.00 (plus state work)
COURT STREET-DORIAN STREET SECTION OF OLD OREGON TRAIL		
12680	Umatilla County, Gladys Mims, Matlock Mims(a minor), Pauline Plamondon	1,800.00
WEST SLOPE-BEAVERTON SECTION OF THE TUALATIN VALLEY HIGHWAY		
13693	Estate of John Barry	400.00
MEACHAM SECTION OF THE OLD OREGON TRAIL		
14216	Pendleton Ranches, Inc.	155.00

He requested authority to proceed with the condemnation of these properties. After careful study of each individual parcel the Commission approved the request and the offers. Resolutions marked EXHIBITS "B1 and "B2" attached hereto and by this reference made a part hereof with like effect as though extended herein were thereupon adopted by the Commission by unanimous vote.

The Engineer presented a request from the City of Portland to terminate a permit given to the Northwest Marine Iron Works, for use of a ship repair area on Harbor Drive between Burnside and Morrison Streets in Portland. He stated that the terms of the agreement provide that the Iron Works upon expiration of the agreement, must restore the property to the same condition as when the agreement began and which is estimated to cost $12,690. In lieu of making the restoration themselves the Northwest Marine Iron Works has agreed to pay to the City of Portland the sum of $12,690 cash, from which the city will deduct $2,190 to repair the seawall and will forward the remaining $10,500 to the State Highway Commission for restoration of the property. The Engineer explained that the City of Portland prefers to have the matter handled in this manner in order to make use of the existing pavement, graveled surfaces and sidewalks, until such time as they must be removed to permit further construction. He recommended that the agreement be terminated on the basis of such cash payment. The Commission approved the recommendation and ordered that the $10,500 to be received be placed in the Advance Deposit Fund, earmarked for restoration of the area.

The request of Mr. W. W. Harris of Ft. Hill to purchase a state-owned borrow pit on the Salmon River Highway at Ft. Hill was presented by the Engineer. He stated that the property had been examined by the Chief Counsel and himself and that the state has no further use for the borrow pit. He recommended that it be sold at an appraisal price to be determined by the Right of Way Department and also that it be sold without access. The Commission approved the Engineer's recommendation unanimously, and instructed the Chief Counsel to report later whether or not Mr. Harris will purchase the property with restricted access.

The Chief Counsel requested approval of a lease from E. W. Miller for a quarry site at Mile Post 1.75 on the Halfway-Cornucopia Highway in Baker County. He explained that the terms of the lease provide payment of $109.00 for a 2-year period and that this site is the specified source of materials for the Halfway-Cornucopia Project, scheduled for letting at this meeting. No action was taken by the Commission pending the award of the contract for this section but instructions were given that if the contract for the Halfway-Cornucopia job were awarded the lease is to be approved. (This contract was awarded to Vernie Jarl the following day.)

The request of Mr. D. E. Glover of Prineville to purchase property in the town site of Lamonta on the Warm Springs Highway in Jefferson County was presented by the Engineer. He stated that although the property was not needed for highway purposes the sale would not produce much revenue. The Assistant Counsel, Mr. J. W. DeSouza, stated that he doubted if over $25.00 would be received. On the recommendation of the Engineer and the Assistant Counsel the Commission denied the request for the sale of the lots.

The Assistant Counsel, Mr. George Neuner, presented a request from the City of Corvallis that the Commission sell a 10 foot strip of land along the east side of US99W in the north part of Corvallis to adjacent property owners for a cold storage plant. He explained that the Commission has a 90 ft. right of way in the area which is proposed to be sold and an 80 ft. right of way adjoining on both ends. It was his thought that eventually the route of 99W would be to the north and west and that this section would then become a city street. He stated further that the property owners interested are willing to pay 7¢ a square foot and it was his recollection that the property had originally cost the Commission 5¢ a square foot. He recommended that it be sold. In answer to Chairman Banfield's inquiry as to why the property was purchased when not needed the Engineer replied that it was obtained in the first instance as a source of borrow materials, and that, if it were not for the fact that a change in location of the highway is contemplated, the property should be retained. Upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Ben R. Chandler, the Commission unanimously approved the sale of the 10 ft. strip of land.

The Assistant Counsel, Mr. George Neuner, presented for the Commission's consideration the cancellation of a lease with Mildred E. and R. W. Foye for a gravel bar on Little Butte Creek in Jackson County. In explanation he stated that the materials have been exhausted, that the Engineer has made

an investigation and that there is no further need for the property. He recommended that the lease be canceled. The Commission approved the cancellation unanimously.

The Chief Counsel presented for the Commission's consideration the matter of trucks parking on the Oregon Coast Highway at Brookings. He explained that the parking objected to was vehicles parked for sale and repair, which, in his opinion, constituted a hazard to the traveling public. He suggested that, for the time being, signs prohibiting parking for business or commercial purposes be installed. In the discussion following he explained further that the law provides that the Commission has the power to prohibit parking on the main traveled portion of the highway, and that by implication the same power is granted over shoulder parking, if necessary, for the convenience and safety of people using the highway. It was his suggestion, that if the Engineer reported that the parking interfered with maintenance or use of the highway it could legally be prohibited. He explained further that the Commission has jurisdiction within cities from curb to curb, and jurisdiction over the entire right of way outside of cities, but that the prohibition of parking should be exercised with discretion to avoid criticism. The Engineer recommended that the Commission adopt a resolution prohibiting parking for sale or repair where such parking is inimical or hazardous to the public interest. Upon motion of Commissioner Schaupp, duly seconded by Commissioner Chandler, the Chief Counsel was instructed to prepare a resolution prohibiting such parking and to present it to the Commission for approval.

The Chief Counsel presented for the Commission's consideration the extension of a lease with the O. W. R. and N. Company and the Union Pacific Railroad Company covering parking space for automobiles at Oneonta on the Columbia River Highway. Upon his recommendation the Commission unanimously approved the extension of the lease.

The Chief Counsel presented a letter from Mr. Stephen B. McDonald who complained of shooting on the beach at Seaside. The matter of installing signs prohibiting the use of firearms was discussed but no action was taken. Chairman Banfield expressed the opinion that the Commission has no police power and that the enforcement of the law in this respect should be turned over to the state police. The Chief Counsel was instructed to write Mr. McDonald citing the statute which prohibits the use of firearms on the highways and beaches.

The Chief Counsel reported regarding progress of property acquisition for the Highway Office Building in Salem. He stated that all of the options had not yet been secured and that no action should be taken on the options obtained until the balance have been secured. No action was taken by the Commission pending the securing of the balance of the options.

The Chief Counsel presented the matter of the proposed agreement with Wasco County and the State of Washington regarding the assembling of engineering and financial data pertaining to the proposed toll bridge across

the Columbia River at The Dalles. He stated that no action could be taken until they had heard from the federal authorities. Chairman Banfield stated that the Commission should keep entirely out of the promotion of this matter, that Wasco County was initiating it and that the Commission is merely contributing to Wasco County's request for $8,000. He pointed out that the Commission had agreed to put up $8,000 to make a survey but that they were not promoting the bridge in any way and that he did not want the Commission put in the position of negotiating with the State of Washington in this matter, and that the matter of promotion should be left to Wasco County. No action was taken by the Commission on the basis that the next move was up to Wasco County.

The Assistant Counsel, Mr. George Mouner, presented a letter from Tripp and Tripp, Realtors of Albany, requesting permission to leave their advertising sign on the Steiwer Hill-Albany Section of the Pacific Highway East. The Engineer stated that it was his understanding that on that property the Commission had bought right of access and he recommended that the sign be removed. The Chief Counsel gave as his opinion that placing of this sign was prohibited under existing restrictions. On the basis of the Engineer's recommendation the Commission ordered that the sign be removed.

The Commission recessed for luncheon from 11:55 a.m. until 2 p.m. at which time the meeting reconvened with the same persons present and participating.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:30 p.m. in the same room:

OCHOCO HIGHWAY IN CROOK COUNTY

CROOKED RIVER SECTION

Vernie Jarl, Gresham	$ 58,712.00
Babler Bros., Portland	59,021.00
Frank M. Parsons, Forest Grove	60,499.00
Perkins Bros., Portland	63,746.00
Leonard & Slate, Oregon Ltd., Portland (1)	64,096.00
Denton Constr. Co., Portland (1)	65,413.00
T. W. Thomas, Portland	67,817.50
C. J. Eldon, Portland	70,218.50
Peter Kiewit Sons' Co., Longview, Wn.	71,228.50

(1) Bidder will not accept this project alone.

OCHOCO HIGHWAY IN CROOK COUNTY

CONSTRUCT CROOKED RIVER BRIDGE

Perkins Bros., Portland (2)	$ 45,630.00
T. W. Thomas, Portland (1) (3)	47,910.00
Lindstrom Bros., Portland	49,820.00
Denton Constr. Co., Portland (1) (4)	50,750.00
C. J. Eldon, Portland (5)	51,660.00
Lockyear & White, Seattle, Wn.	54,800.00
Babler Bros., Portland (1)	54,900.00
Leonard & Slate, Oreg., Ltd., Portland (1)	56,990.00

(1) Bidder will not accept this project alone.
(2) Lump sum reduction of $2,000.00 if also awarded Crooked River Sec.
(3) " " " " " " " " " " " "
(4) " " " " 3,000.00 " " " " " " "
(5) " " " " 820.00 " " " " " " "

COMBINATION BIDS FOR ABOVE TWO PROJECTS

(1) Crooked River Section of the Ochoco Highway
(2) Crooked River Bridge on Ochoco Highway

	(1)	(2)	Reduc.	Comb. Bid
Perkins Bros. / Vernie Jarl	$58.712.00	$45,630.00		$104,342.00
Perkins Bros.	63,746.00	45,630.00	$2,000.00	107,376.00
Denton Constr. Co.	65,413.00	50,750.00	3,000.00	113,163.00

COUNTY ROAD No. 3 IN DOUGLAS COUNTY

CONSTRUCT LOON LAKE BRIDGE OVER LAKE CREEK

Tom Lillebo, Reedsport	$ 22,900.00
Ben F. Doerksen, Roseburg	37,213.36
Miller & Strong, Inc., Eugene	42,000.00

ROME-PRINCETON SECONDARY HIGHWAY IN MALHEUR COUNTY

NORTH UNIT, POLLYFARM-SCOTTS BUTTE SECTION

E. C. Hall Co., Portland	$ 265,162.00
Heavy Hauling Co., Astoria	276,535.00
Peter Kiewit Sons' Co., Longview, Wn.	295,906.50
M. L. O'Neil & Son, Eugene	338,440.50

OLD OREGON TRAIL IN UMATILLA AND UNION COUNTIES

MEACHAM SANDING MATERIALS PROJECT

Holmes Bros., Moses Lake, Wn.	$ 11,500.00
Arthur Gentemann, Portland	15,225.00
Pendleton Sand & Gravel Co., Pendleton	15,375.00
La Grande Concrete Pipe Co., La Grande	15,700.00
N. A. Toole Constr., Ontario	16,500.00
Rogers Constr. Co., Portland	17,875.00

Chairman Banfield requested that hereafter when bids are received on two days and the first meeting day is on Monday the bids will be opened at 9:00 a.m. on Monday as well as on Tuesday.

The Engineer requested that the Commission approve Civil Service step salary increases as provided under the Civil Service set-up. He recommended that these increases be given to all employees who rated "Average or Above", as determined by the merit rating system. In explanation he stated that the merit rating system has five grades, "Outstanding," "Above Average," "Average," "Below Average," and "Unsatisfactory." He further recommended an increase of $25 per month for Engineer Aides I and II, Civil Engineers I and II, and 6¢ per hour for hourly employees. The States of California, Washington, the Public Roads Administration and other government agencies, he said, have increased rates of engineering employees to the point where the state is losing them because it doesn't pay enough. Washington pays $220 per month for chain men and $400 for resident engineers. Our rates are $165 and $350. He requested permission to discuss the matter of the $25 raise with the Civil Service Commission. Chairman Banfield stated that the Commission would not grant the authority at that time as they wanted to study and analyze the problem and determine its effect on other state departments. He pointed out that it was not a question of engineers alone but was a matter of broad policy of state employment. He recalled that the legislature, in the 1947 session, had made certain increases possible in the budget set-up and, he said, he did not feel that the Commission should take any action which might be contrary to legislative action. There may be, he stated, inequalities in the lower levels and if so the Commission would see what could be done about

it, but that the Commission does not favor blanket increases. Referring to the matter of step increases which the Engineer had requested authority to make, he thought that it was a difficult matter to tell the Commission that perhaps people merit an automatic raise and that he did not believe that the Commission is willing to take the broad step requested. Commissioner Chandler requested job descriptions for Engineer Aides I and II and Civil Engineers I and II and also an outline of the merit rating system. No action was taken by the Commission at this time. Later in the day the matter was again discussed and Chairman Banfield stated that it is the Commission's understanding that the matter of granting step increases was entirely within the hands of the Commission. He said that there was nothing in the law which stated that the step increases had to be made.

(The following day these matters were discussed again in connection with the appearance of Mr. Forrest Stewart, Executive Secretary of the Oregon State Employees Association. The Engineer was instructed to bring in a report on proposed increases to employees receiving less than $225 per month, a report on Civil Service step increases based upon the selection of a limited number of the most deserving employees in all classifications, and to report on a request made by Mr. Stewart for pay for holidays for hourly employees for all holidays except Christmas, Independence Day, Labor Day, Memorial Day and Thanksgiving.)

The Engineer requested approval of his written report of December 24, 1947, which had for its subject the matter of a ferry contract executed by Mr. Stanbuck for ferry service on the Enogren Ferry and repairs to ferry equipment. The report was approved by the Commission.

Approval of the Commission was requested for the signature of the Assistant Counsel, Mr. George Neuner, on the trust fund agreement regarding the Gunnell settlement, signed by Mr. Neuner on behalf of the Commission. The Chief Counsel explained that other agents who were present at the time of the execution of the agreement had authority to sign for their principals and that to expedite the matter Mr. George Neuner signed for the Commission, but he would like to have his signature ratified in case any question might come up later. On the basis of the Chief Counsel's explanation the signature on this document was approved.

The Engineer presented a list of all State Highway Department employees who heretofore had been authorized by the Commission to sign Emergency Transportation Permits in behalf of the Commission. He pointed out that due either to transfer or resignation such authority had been canceled with respect to J. G. Toole, H. H. Heath, S. Paul Jones, and Ralph Eggstaff by appropriate action of the Commission. He advised further that Mr. C. H. Armstrong and Mr. Walter Herberger have been transferred from their field positions to the Salem office where they are employed in capacities where it no longer is required that they have such authority; likewise such authority no longer is required by James M. Brown and Frances L. Hamilton because they have severed their connections with the State Highway Department. He recommended that the authority granted these employees be canceled outright. The The Commission approved the recommendation by unanimous vote, and

so ordered. In this connection the Engineer pointed out that Miss Helen M. Wells has replaced Miss Frances L. Hamilton as secretary to the Division Engineer at La Grande and he recommended that she also be authorized to sign Emergency Transportation Permits, issued from the office, subject to the usual limitations. The Commission approved the recommendation and thereupon by unanimous vote adopted the resolution marked EXHIBIT "L" and by this reference made a part hereof with like effect as though extended in full herein.

The request of O. C. Sanford of Coquille for improvement of the Sanford Heights road connection with the Oregon Coast Highway in Coquille was presented by the Engineer. He stated that the road had been there for many years but recently a housing project had been completed which greatly increased the number of people living in the area. The entrance to the highway at this point is bad, he said, and the slope should be cut back to afford a reasonable sight distance. The estimated cost is approximately $2,200, and this is included in the 1948 Minor Betterment Program. This matter was deferred until January 5, at which time the budget is to be discussed.

The Engineer presented a report on the cost to improve Edward Street in the Bunker Hill District of Coos Bay which street forms a connection between the Coos River Secondary Highway and the Oregon Coast Highway. He estimated the cost for regrading, surfacing and paving at approximately $4,000 and recommended that the work be done with state forces when conditions are right. On the basis of his recommendation the Commission granted permission to do the work.

The Engineer presented the matter of an agreement with Jefferson County providing that the old section of The Dalles-California Highway between Madras and Culver be maintained as a State Secondary Highway, and that the section from Culver south to approximately the Deschutes County line, be maintained as a county road. He explained that the total length of this section is about 18 miles and of that length the county has agreed to take over 7 miles. There is no way, he said, that the county can be forced to maintain the other 11 miles. He recommended that the agreement be approved. The Chief Counsel informed the Commission that the statute provides that when a state highway is relocated, and a portion of it is eliminated, the Commission is required to maintain it for the people residing along that portion, or by agreement with the county to have the county maintain it. On the basis of the Engineer's recommendation and the Chief Counsel's advice the Commission approved the agreement.

In conformance with the terms of the heretofore mentioned agreement the Commission by unanimous vote adopted a resolution designating the old section of The Dalles-California Highway between Madras and Culver as a State Secondary Highway. This resolution, marked EXHIBIT "C", attached hereto is, by this reference, made a part hereof with like effect as though extended herein.

The matter of extending a traffic accident analysis agreement with the City of Portland and the Secretary of State which provides for traffic accident analysis in Portland, from January 1, 1948 to December 31, 1949 was presented by the Engineer. In explanation he stated that this was a

cooperative agreement wherein the State and City Police turn in accident reports to the Secretary of State who compiles the reports and then sends them back to the Highway Traffic Engineer for further analysis. The cost of the extra work to render the detailed reports required by the City of Portland amounts to $200 per month, which they agree to pay. Portland is the only city with which such an agreement has been made. He recommended that it be extended. The Commission approved the recommendation unanimously.

The Engineer presented the request of the Roseburg Chamber of Commerce and the Douglas County Court for elimination of traffic hazards on the Pacific Highway north of Roseburg. He stated that previously these two bodies had requested that a study be made of this situation, and accordingly he had had a traffic survey and other investigations made. The results of these investigations showed, he said, considerable congestion in the area immediately north of Roseburg due to extensive roadside construction. Traffic counts taken show an average of 10,270 vehicles in a 24 hour period and also that there had been 76 accidents on this section in the past 6 years. To solve the problem practically, he said, would require the construction of a 4-lane highway. He requested permission to make a location survey to determine the best route and the cost of construction of a facility that will satisfactorily handle the situation. The consensus of opinion among the Commission was that there were many sections of highways that were more in need of improvement than this section, and that the Commission's first responsibility should be that the 2-lane highways are adequate for all concerned before any 4-lane highways are built. Commissioner Chandler stated that in his mind there were three questions involved: First - the money involved, Second - man power to do the work, and Third - the cost of the proposed job. The Commission further indicated that the present road program is taking the time of all available personnel and if this project were approved it might delay other sections in the program. In reply to Chairman Banfield's request as to a "shot-gun" estimate of the cost of the project, the Engineer said that the cost, roughly estimated, would be a quarter of a million dollars. The request was denied because of a lack of funds.

The Engineer reported on the request of a group of heavy hauling companies who appeared before the Commission in November, asking for special permits to cover single movements of over-dimensional machinery and structural materials. He stated that, as a temporary measure, action had been taken to expedite the issuing of permits locally but that in his discussions with the haulers they were not in agreement among themselves as to the maximums necessary to serve their operations. He stated further that another conference is scheduled with this group shortly after the first of the year, following which he would be in a position to make further recommendations. No action was taken by the Commission pending receipt of the Engineer's report.

The Engineer reported the results of bids received in Salem on December 15, 1947 for sale of the tract of land in Coos Bay as follows:

SALE OF TRACT OF LAND

in

COOS BAY, COOS COUNTY

December 15, 1947

Karl Nichols	$1051.00
A. A. Johnson	1000.00
H. I. Hartley	50.00

He recommended that the bids be rejected as the estimated value was approximately double the largest amount bid. The Chief Counsel stated that an investigation of sales of adjoining property showed that two lots similar to the state-owned lots had sold for $1,800 and that two other lots in the vicinity had sold for $1,000 apiece. The Commission approved the Engineer's recommended rejection of the bids but instructed the Chief Counsel to investigate further the value of the state-owned lots and report later.

The Engineer reported on the request of the Douglas County Court for a change in the entrance of the Umpqua Highway into Reedsport. He stated that a survey has been completed for this section and that the relocation cost is estimated at $75,000. There are two right angle turns, he said, both within the city limits, where speeds are restricted but they are not overly dangerous. He recommended that consideration be given to this improvement when a future construction program is adopted. On the basis of the Engineer's recommendation the request was denied, and for the further reason that there is a lack of funds and there are other sections more in need of improvement.

The Chief Counsel stated that Senator Angus Gibson of Junction City, had contacted him stating that the city is requesting the installation of a traffic light at the intersection of the Pacific Highway West and 6th Street in Junction City. The Engineer was instructed to make the necessary investigation and report.

The Engineer requested the Commission's approval of a revised agreement with the University of Oregon pertaining to the elimination of a pedestrian underpass adjacent to the University Campus on the Pacific Highway in Eugene. He stated that University officials had declared that the underpass is not needed and on that basis the Chief Counsel had prepared a new agreement. The saving in construction cost is estimated at approximately $19,000. The Engineer recommended that the agreement be approved. On the basis of his

recommendation the Commission unanimously approved the agreement, but did not sign it, pending the securing of the signatures of University of Oregon authorities.

The Engineer presented for the Commission's consideration the matter of an agreement with Lincoln County covering the correction of a bad drainage condition on the Oregon Coast Highway at Taft. He stated that upon completion of the reconstruction of that section it was found that the bad drainage condition was caused partly by reason of additional drainage from the highway and partly by the lack of any drainage system in Taft. His investigation disclosed that the installation of the drainage pipes and other facilities would cost approximately $3,500. The Lincoln County Court has agreed to pay $500 in cash and to provide other facilities estimated to cost another $500, leaving a balance of $2,500 to be paid by the state. He recommended that the agreement be approved. After careful consideration the agreement was unanimously approved by the Commission. (The agreement was signed by the Commission on the following day.)

The Engineer requested the Commission's approval of a cooperative agreement with the Public Roads Administration covering construction of the Federal Lands Highway Project FLH-8 (1), on the Rome-Princeton Secondary Highway in Malheur County. He explained that there are several sections which cross private property and that the state is required to spend its money in these areas because government public lands funds cannot be used for improvements across private land. The agreement was unanimously approved by the Commission, and was signed by the Commission on the following day.

The Chief Counsel brought up for the Commission's consideration the proposed resolution covering the Sullivan Gulch project. Chairman Banfield recalled that the Commission had taken its action on this matter at a previous meeting and that it is now up to the city to follow the Commission's action. He stated that the city has been pressing the Commission on the Sullivan Gulch subject and that the Commission, in analyzing the project, has found that it did not have the money available to do the work now and furthermore that funds would not be taken from the other parts of the state to do this job. The Chief Counsel then inquired if the press release formulated at a previous Commission meeting is to be considered as the Commission's communication to the city. Chairman Banfield answered in the affirmative and stated that the Commission's position was fully outlined in that release. The Secretary was instructed to provide the Chief Counsel with a copy of the release formulated at the November, 1947 meeting. No other action was taken.

The Commission considered the protest of the Super-Bilt Manufacturing Company of Portland regarding the contemplated moving of its factory when the Sullivan Gulch project is constructed. Chairman Banfield pointed out that the answer to the protest is that the state is not taking Super - Bilt's property, that when the project is undertaken the city will acquire the right of way, but that at this time no definite plans have been formulated with the city for construction of the project.

The Engineer presented for the Commission's consideration an agreement with the California-Oregon Power Company providing for moving approximately 5,800 feet of the company's power line in the reconstruction of the Glendale-Wolf Creek Section of the Pacific Highway. In explanation he stated that the company line was occupying private right of way and that the removing and resetting of the power line was the obligation of the state. The agreement provides that the Power Company will remove and reset its line at an estimated cost of $7,695.92, and that in addition there would be a cost of approximately $145.00 for right of way across private property, filing fees, etc. He recommended that the agreement be approved. The Commission unanimously approved the agreement, as outlined. (It was signed the following day.)

The Engineer presented the request of the Enterprise Chamber of Commerce for surfacing the Flora-State Line Section of the Enterprise-Flora Highway in Wallowa County. He stated that this request was included in the list of betterment jobs to be considered on January 5, 1948. He stated further that the first 15 miles were surfaced and that eventually the Federal Government would spend some money there. No action was taken by the Commission on the request but the Engineer was instructed to make a complete report to the Commission on how much money had been advanced by the state to the Federal Government on this and all other projects.

Consideration of the proposed Special Betterment Budget in the amount of three million dollars($3,000,000) for 1948-1949 was postponed until the January 5th meeting. On the following day the Special Betterment Program was discussed for the purpose of becoming familiar with the projects. No action was taken.

The Engineer reported on the request of Paul Muller, Secretary of the Barlow Road Extension Association, regarding improving and oiling the county road between Tygh Valley and Wamic, and the extension of the Barlow Road westward. He stated that investigation showed that the work requested would cost approximately $194,000; also, that he could not recommend any high priority on this improvement as there are many sections of highways in the state with a considerably greater priority of need. On the basis of the Engineer's recommendation the Commission unanimously denied the request.

The Engineer presented the request of Mr. W. Robert McMurray, Vice-President of Commonwealth, Inc. for the construction of a cloverleaf at the intersection of Union Avenue with Gertz Road in Portland. He stated that a complete study had been made of the situation and that he believed that a most economical and feasible solution had been reached, but that he had not had time to prepare a report for this meeting. He stated that he would have this report ready for the next regular meeting of the Commission. The secretary was instructed to answer Mr. McMurray's letter and tell him that the problem is being studied.

The Engineer presented for the consideration of the Commission the claim of C. J. Montag and Sons for additional compensation in the amount of $10,022.83, in connection with their contract No. 2737 for construction of

the Santiam River Bridge on the Steiwer Hill-Albany Section of the Pacific Highway East. In outlining the claim he stated that the original estimate for materials on which the contract was bid was about 7 percent high and that the actual materials used were less than estimated. The contractor,he said, lost approximately $50,000 on the structure and he recommended that the amount of the contractor's claim be allowed. The Chief Counsel stated that when the claim was first presented to him he advised against paying it because a 6 or 7 percent variation between the estimate and actual cost was not enough for the contractor to put in a claim, but after the Engineer provided him with further information to the effect that the contractor had suffered additional loss due to the increased cost of labor and material, which worked to the advantage of the state and against the contractor, he advised that the Commission could, in all equity and legality, pay the claim as presented. On the recommendation of the Engineer and the advice of the Chief Counsel the Commission unanimously approved payment of the claim. (An agreement thereon was signed by the Commission on the following day.)

The Engineer presented for the Commission's consideration the claim of Stanley & Ehlen for additional payment in the amount of $191.42 for work performed on state highway contract No. 2884, for paving on the Nyssa Section of the Old Oregon Trail highway. He stated that the City of Nyssa had to change its water mains and that they had failed to consult the engineers to find out how low the mains should be installed, and as a result the contractor, in his work, had hit the mains. The Engineer recommended that the claim be paid. The Commission unanimously approved the payment of the claim and on the following day signed an agreement to that effect.

The Engineer reported that the Cities of Cornelius and Richland have fulfilled their requirements with respect to the expenditure of their share of the 1945 State Tax Street Funds which they received in 1946 and that the plans for the improvements to be financed with such funds have been checked and found satisfactory. He recommended, in view thereof, that the plans be approved by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution attached hereto and marked EXHIBIT "E" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer also reported that the Cities of Banks, Dayville, Gold Beach and Helix have fulfilled their requirements with respect to the expenditure of their share of the 1946 State Tax Street Funds which they received in 1947, and that the plans of the improvements to be financed with such funds have been checked and found satisfactory. He recommended that they be approved by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "F" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer also reported that the town of Siletz has submitted plans for the improvements to be undertaken with its share of the State Tax Street Funds to be received during the year 1948. He further advised that these plans have been checked and found satisfactory, and he recommended

approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the resolution which is attached hereto and marked EXHIBIT "E" and which by this reference is made a part hereof with like effect as though extended herein.

The Engineer reported that he has awarded the following contract, bids for which were received by the Commission on November 25, 1947, and referred to him at that time with power to award the contract when certain conditions had been satisfied.

> Grading on the Clear Creek-Forest Boundary Section of the Warm Springs Highway, in Wasco County: bids received November 25, 1947, contract awarded November 28, 1947, to T. W. Thomas, low bidder.

The Commission by unanimous vote confirmed the award as reported.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

Porter W. Yett, Contract No. 2768 for grading and paving on the North Bend-Coos Bay Section of the Oregon Coast Highway in Coos County, requested an extension of time of 365 days from October 31, 1947 to October 31, 1948, within which to complete this job. The contractor alleged that he was unable to complete the work within the contract limits due to shortage of labor, inability to obtain sufficient cement to carry on paving operations, shortage of railroad cars and delay in obtaining cooperation from the public utilities in the removal and replacement of their facilities. The Engineer advised that while Porter Yett had not prosecuted this job with the vigor he should have, that he had been beset by many difficulties beyond his control. He further said that during the summer of 1946 he was unable to arrange for sufficient cement and that in 1947 he had difficulty in securing aggregates from the Umpqua Sand and Gravel Company. The contractor, he said, was also hampered by the power company's delay in removing power lines and the Southern Pacific Railroad Company who did not complete removal of their tracks until late in 1947. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein, stating, however, that the Public Roads Administration will insist on the application of the penalty as agreed with the contractor if the work is not completed by this extension. Chairman Banfield and Commissioner Chandler both expressed the opinion that a one-year extension of time is too long and that the extension should be shortened in order to force the contractor to take advantage of any good weather that comes along. The Engineer was requested to keep a record of the weather. An extension of time was granted by the Commission from October 31, 1947 to September 1, 1948, without penalty.

Kuckenberg Construction Company, Contract No. 2780 for grading, surfacing and oiling the Gates-Niagara Section of the Santiam Highway in

Marion County, requested an extension of time of 107 days from July 31, 1947 to November 15, 1947, within which to complete this job. They alleged that rains, slides and equipment breakdowns had prevented completion of the work within the contract time limit. The Engineer advised that the reasons claimed by the contractor were correct and he recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Rogers Construction Co., Contract 2815, for grading, widening and oil mat surfacing on the Unity Junction-Mill Gulch Section of the Baker-Unity Highway in Baker County, requested an extension of time of 244 days from November 31, 1947 to July 31, 1948 in which to complete the oiling. The contractor alleged that the aggregate production has been completed but due to the rainy fall weather he was unable to complete the oiling in 1947. The Engineer advised that the quarry specified in the contract was unsatisfactory and the contractor had to move his plant to another quarry, entailing the loss of a month's time during the summer oiling weather. He recommended that the extension of time, as requested, be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Rogers Construction Company, Contract No. 2816, for surfacing and oiling on the Unity Junction-Ironside Section of the John Day Highway in Baker and Malheur Counties, requested an extension of time of 244 days from November 30, 1947 to July 31, 1948 within which to complete this job. The contractor alleged that the production of aggregates should be completed within the time limits of the contract, but due to the lateness of the season wanted the remaining oiling work deferred to the summer of 1948. The Engineer advised that the contractor had been delayed on the Davies-North Plains Section through inability of the grading contractor to finish the grading, and this delayed the moving of the contractor's crushing equipment to this job. He recommended that the extension of time be granted, as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Porter W. Yett, Contract No. 2853, for structures and paving on the North Plains-Barnes Road Section of the Sunset Highway in Washington County, requested an extension of time of 303 days from November 30, 1947 to September 30, 1948 within which to complete this job. The contractor alleged that failure of the grading contractor to complete his work early enough, the unusual soil conditions and rainy weather prevented any extensive operations after the completion of the grading contract. The Engineer advised that the reasons stated by the contractor for overrunning the time limit were correct and recommended that the extension of time, as requested, be granted without penalty. A letter was presented from the Public Roads Administration concurring therein.

The Commission felt that the extension of time requested was too long, and that the contractor, if granted the extension as requested, would not push the work to completion. It was their thought that the extension should be the minimum amount of time required to complete the work so as to force the contractor to prepare, during the bad weather, so that he could take advantage of any favorable weather for surfacing operations. The Commission approved an extension of time from November 30, 1947 to June 15, 1948, without penalty.

John A. Logan, Contract No. 2856, for grading, bituminous macadam surfacing and bridge construction on the Tutuilla Creek Section of the Pendleton-John Day Highway in Umatilla County, requested an additional extension of time of 151 days, from November 30, 1947 to May 1, 1948 within which to complete this job. The contractor alleged that due to early fall rains it was impossible to oil the approaches to the Tutuilla Bridge. The Engineer advised that all of the work on the contract was completed with the exception of the bridge and the immediate approaches. Slow delivery of steel prevented completion of the bridge structure. He recommended that the extension of time be granted, as requested, without penalty. The Commission approved the recommendation unanimously.

O. C. Yocom Company, Contract No. 2869, for surfacing and oiling the Scholls-Newberg Section of the Hillsboro-Silverton Highway in Washington and Yamhill Counties requested an additional extension of time of 31 days from September 30, 1947 to October 31, 1947 within which to complete this job. They alleged that heavy rains in the fall delayed the work so that it was impossible to complete it within the contract time limits. The Engineer advised that the reasons as given by the contractor were correct and that the job was satisfactorily completed on October 30, 1947. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

La Grande Concrete Pipe Company, Contract No. 2870, for sanding materials on the Meacham-Hilgard Section of the Old Oregon Trail highway in Umatilla County, requested an extension of time of 213 days from October 31, 1947 to June 1, 1948 within which to complete this job. The contractor alleged that high water and wet weather prevented his plant from running during the month of October, thereby preventing completion of the contract within the required time limit. The Engineer advised that the reasons given by the contractor are correct and that the state will not be inconvenienced by the fact that this contract was not completed within the specified time. He recommended, in view thereof, that the extension of time be granted, as requested, without penalty. The Commission approved the recommendation unanimously.

J. N. and M. J. Conley, Contract No. 2877, for the Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways in Clackamas, Hood River and Wasco Counties, requested an extension

of time of eight days from July 31, 1947 to August 7, 1947 within which to complete this job. They alleged that the Public Roads Administration had obtained permission from Mr. W. C. Williams, Division Engineer, to allow the contractor to delay the state work in order to do some emergency work for the Public Roads Administration and Forest Service. The Engineer advised that the reasons as stated by the contractor were correct and the overrun of eight days was caused by the Public Roads Administration work, but did not increase the cost to the state. He recommended that the extension of time be granted as requested, without penalty. The Commission approved the recommendation unanimously.

Coos Bay Dredging Company, Inc., Contract No. 2878, for construction of bridge pier fenders on the South Slough Bridge Section of the Cape Arago Secondary Highway in Coos County, requested an additional extension of time of 12 days from October 30, 1947 to November 12, 1947 within which to complete this job. They alleged that the construction was delayed in the beginning of the contract due to the scarcity of creosoted materials. The Engineer advised that the reasons as stated by the contractor were correct and that the project was satisfactorily completed on November 12, 1947. He recommended that the extension of time be granted, as requested, without penalty. The Commission approved the recommendation unanimously.

R. A. Heintz Construction Company, Contract No. 2887, for grading, surfacing and oiling and a structure on the Eagle Creek-Sandy Section of the Woodburn-Sandy Highway in Clackamas County, requested an extension of time of 242 days from October 31, 1947 to June 30, 1948 within which to complete this job. They alleged that a 60 days delay in awarding this contract was required by the State Highway Commission due to right of way difficulties, and that this delay along with rainy weather prevented completion of the contract within the required time. The Engineer advised that the reasons as stated by the contractor were correct and he recommended that the extension of time be granted, as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Babler Bros., Contract No. 2898 for re-oiling on the Millican-Brothers Section of the Central Oregon Highway in Crook County, requested an extension of time of 244 days from November 30, 1947 to August 1, 1948 within which to complete the contract. They alleged that rainy weather in the early fall prevented completion of the oiling within the time limits of the contract. The Engineer advised that the production of oiling rock on this job was extremely difficult and that the sub-contractor was unable to produce sufficient rock to complete the oiling before the fall rains set in. He recommended that the extension of time be granted, as requested, without penalty. The Commission approved the recommendation unanimously.

Tom Lillebo, Contract No. 2901, for construction of the Depot Slough Bridge on the ~~Oregon Coast~~ Highway in Lincoln County, requested an extension of time of 244 days from September 30, 1947 to May 31, 1948

within which to complete the job. He requested the extension in order to have favorable weather to complete the last coat of paint on the bridge hand rails. The Engineer advised that all work is completed except the painting of the hand rails and he recommended that the extension of time be granted, as requested, without penalty. The Commission unanimously approved the recommendation.

Pendleton Sand & Gravel Company, Contract No. 2907, for re-oiling the Sandy-Wapinitia Junction-Clear Creek Section of the Mt. Hood and Wapinitia Highways in Clackamas and Wasco Counties, requested an extension of time of 350 days from August 31, 1947 to August 15, 1948 within which to complete this job. They alleged that rainy weather, heavy week-end travel and a shortage of asphalt in Portland were the reasons for non-completion of the contract within the required time. The Engineer advised that the reasons stated by the contractor were correct and that in early September it was found necessary to curtail the contractor's operations due to the cold nights in the high altitudes in the contract area. He recommended that the extension of time be granted, as requested, without penalty. The Commission unanimously approved the recommendation.

L. R. Kauffman, Contract No. 2914, for the Alsea Rock Production Project on the Alsea and Alsea-Deadwood Secondary Highways in Benton and Lincoln Counties, requested an extension of time of 60 days from November 30, 1947 to January 31, 1948 within which to complete this job. The contractor alleged that the job was delayed due to an increase in quantities from 10,000 yards to 16,000 yards required in Lincoln County, which the contractor produced for Lincoln County. The Engineer advised that the contractor, prior to state work on this section was producing rock for Lincoln County and the increase in their requirements, as stated by the contractor, delayed completion of the state job. The materials to be produced under this contract are for use in the 1948 season and the state will not be inconvenienced by the delay. He recommended that the extension of time, as requested, be granted without penalty. The Commission unanimously approved the recommendation.

F. L. Somers, Contract No. 2917, for regrading and oil mat surfacing on the Lower Klamath Lake Section of the Lower Klamath Highway in Klamath County, requested an extension of time of 242 days from October 31, 1947 to June 30, 1948 within which to complete this project. He alleged that the designated "suitable source of topping materials" as stipulated in the contract was unusable, also that steel was not readily available for the structures and that the weather in October was not suitable for oiling. The Engineer advised that the reasons as stated by the contractor were substantially correct but that the contractor although he has not made any claim, is not entitled to any additional compensation by reason of moving his crushing plant, as the state designated four different quarry sites and the provisions of the contract placed with the contractor the responsibility to determine the quantity and quality of the materials in the quarry. He recommended that this request for extension of time be granted without penalty. A letter was

was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

Birkemeier & Sarsonal, Contract No. 2918, for bridge construction on the North Plains-Barnes Road Section of the Sunset Highway in Washington County, requested an additional extension of time of 180 days from November 30, 1947 to June 1, 1948 within which to complete this contract. They alleged that the job was delayed due to slow delivery of steel for the Merle Railroad Grade Separation (structure) and that it is now too late in the year to do a satisfactory paint job. They stated, also, that Mr. Howard, Chief Engineer for the Seattle, Portland and Spokane Railroad has recommended postponement of painting for more favorable weather. The Engineer advised that all work on the structure has been completed with the exception of painting, that the weather in late October was not suitable for satisfactory painting, and that the contractor was requested to defer the painting work pending suitable weather. He recommended that the extension of time be granted, as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Parker-Schram Company, Contract No. 2924, for pavement widening on the Parkrose Section (between 82nd Avenue and 99th Avenue) of the Columbia River Highway in Multnomah County, requested an extension of time of 213 days from November 15, 1947 to June 15, 1948 within which to complete the job. They alleged that the extreme wet weather during October prevented completion of the job within the required time. The Engineer advised that the contractor was unable to complete the asphaltic paving due to wet weather, but has, however, completed the curbs and the excavation, installation of sewers and drainage facilities, and the placing of base materials and leveling courses, so that the project may be used by the public during the winter months. He recommended that the extension of time requested be granted without penalty. The Commission unanimously approved the recommendation.

Perkins Bros., Contract No. 2929, for widening of the Miller's Gulch Creek Bridge on the Pacific Highway in Jackson County, requested an extension of time of 31 days from November 30, 1947 to December 31, 1947 within which to complete the job. They alleged that they were not able to construct the new curb on the north side of the bridge until the state maintenance crew completed paving operations there. The Engineer advised that the state maintenance crew's paving work had been delayed by the rainy weather and that the contractor could not complete the curb until this job was done. He recommended that the extension of time be granted, as requested, without penalty to the contractor. The Commission approved the recommendation unanimously.

The action of the State Highway Commission on contractors' requests for extensions of time within which to complete the contracts, as listed above, was based upon the recommendation of the State Highway Engineer and

his report, which considered, but did not necessarily adopt, either or any of the reasons stated in the contractor's requests.

The Engineer reported that contracts Nos. 2780, 2806, 2846, 2857, 2869, 2877, 2878 and 2909 have been completed according to the requirements of the contracts or modifications thereof and that these jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion the Commission approved and accepted the contracts completed as reported by the Engineer and by unanimous vote adopted the resolution marked EXHIBIT " G" attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission discussed with the Engineer the bids received earlier in the afternoon for highway construction and unanimously approved the action thereon which was publicly announced at 4:30 p.m. by Chairman Banfield, as follows:

"Crooked River Section of the Ochoco Highway in Crook County near Prineville for 0.87 mile of grading and oil mat surfacing. Vernie Jarl of Gresham submitted the low bid for this work in the amount of $58,712.00. The next low bid was submitted by Babler Bros. of Portland in the amount of $59,021.00. There were seven higher bidders. The Commission has referred all of the bids to the Engineer with authority to award the contract to the low bidder, Vernie Jarl, as soon as approval is secured from the Public Roads Administration.

"The Crooked River Bridge on the Ochoco Highway in Crook County near Prineville. Construct a 179-ft. reinforced concrete viaduct. Perkins Bros. of Portland submitted the low bid for this work in the amount of $45,630.00. The next low bid was submitted by T. W. Thomas, Portland in the amount of $47,910.00. There were six higher bidders. The Commission has referred all of the bids to the Engineer with authority to award the contract to the low bidder, Perkins Bros., when approval is secured from the Public Roads Administration.

"Construction of a 214-ft. timber bridge known as the Loon Lake Bridge over Lake Creek on County Road No. 3 in Douglas County. Tom Lillebo, Reedsport, submitted the low bid for this work in the amount of $22,900.00. The next low bid was submitted by Ben F. Doerksen, Roseburg, in the amount of $37,213.36. There was one other bid submitted. As this is a County job the Commission is referring the bids to the Douglas County Court for their action.

"North Unit, Follyfarm-Scotts Butte Section of the Rome-Princeton Secondary Highway in Malheur County. 14.96 miles of grading and oil mat surfacing and approximately 4,500 cu.yds. of crushed rock in stockpile. E. C. Hall Co., Portland submitted the low bid for this work in the amount of $265,162.00. The next low bid was submitted by Heavy Hauling Company, Astoria, in the amount of $276,535.00. There were two other higher bids submitted. The Commission has awarded this contract to the low bidder, E. C. Hall Co.

"Meacham Sanding Materials Project on the Old Oregon Trail in Umatilla and Union Counties requiring approximately 5,000 cu. yds. of crushed rock in stockpile. Holmes Bros. of Moses Lake, Washington submitted the low bid for this job in the amount of $11,500.00. The next low bid was submitted by Arthur Gentemann, Portland, in the amount of $15,225.00. There were four higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Holmes Bros., when certain conditions have been satisfied, including the extension of a lease to a proposed quarry site"

The Engineer presented for the Commission's consideration the type of heating system to be installed in the temporary office building at the Salem Shops. He advised that three types of heating had been investigated; individual oil stoves, electric, and steam. It was his thought that over a period of time steam would be the cheaper and more satisfactory method of heating because the state now has boilers which were secured from buildings at Camp Adair. The present steam heating equipment on the shop premises, he stated, is not adequate to take on the extra load but with the use of the available boilers would provide a surplus capacity in case heat is required in future buildings. The Commission approved the Engineer's recommendation for the installation of steam heat in the temporary office building at an estimated additional cost of $2,000.

The Engineer requested authority to make emergency repairs to dolphins at the Yaquina Bay Bridge on the Oregon Coast Highway near Newport. He advised that two or three months ago only small miscellaneous repairs were necessary but since that time the steel pile dolphins have suffered considerable damage resulting from three unidentified vessels breaking loose from their moorings in Yaquina Bay and drifting against the pier protection. Nine of the original twelve steel pile dolphins on the north side have been destroyed and are missing, and there is also some damage to the dolphins on the south side. He stated further that under the permit granted by the War Department for the construction of this bridge the approved plan requires the construction of dolphins for the protection of the main piers; also, it is to our advantage to maintain them to protect the steel arch ribs from damage from the superstructure of any vessel. He recommended that he and the Chief Counsel be authorized to negotiate a contract with the General Construction Company who are now completing a contract at Yaquina Bay. He stated that a quotation had been secured from this company in the amount of $14,910 to perform the necessary repairs. The Commission, on the basis that this is an emergency job, authorized the Engineer and the Chief Counsel to negotiate a contract with the General Construction Company, as outlined by the Engineer.

Chairman Banfield requested that the Secretary provide a letter which had to do with a statement that if the state were not going to acquire the Fort Stevens property as a park there were others who were interested in securing it. (The Parks Superintendent was contacted the following morning and he provided the Chairman with the information desired.)

The Engineer presented the matter of granting a "Merit Award" to all State Highway Department employees when they retire. He advised that several people had recommended this procedure to him and that he concurred in the recommendation. He also presented a proposed form. The Commission approved the

presentation of merit awards to employees upon retirement.

The Engineer presented the matter of renewing the contract with The Ohio Casualty Insurance Company for a blanket personnel bond covering employees of the Highway Department. He advised that the present bond covers all Highway Department employees for an amount of $5,000 and recommended that the contract be renewed on the same basis. The present insurance is very satisfactory and The Ohio Casualty Insurance Company was the low bidder when costs were compared about a year ago. The Commission approved the continuation of the present bond with The Ohio Casualty Insurance Company but requested that hereafter the Commission be notified 60 days in advance before the expiration of any contract, insurance policy or agreement which requires renewal.

The Commission considered an agreement with Umatilla County providing for abandonment to the County of a section of the Athena-Holdman Secondary Highway No. 334. All of the abandoned portion is to be maintained by the County as a county road as soon as the construction of the relocated section is completed, probably during 1948. After due consideration of this matter the Commission approved the agreement by unanimous vote. A resolution is to be prepared for consideration by the Commission formally disposing of the section mentioned in the agreement as soon as construction has been completed. (The agreement was signed by the Commission the following day.)

The Commission discussed a resolution disposing of parts of the right of way of the Reese Creek-Antelope Creek Section of the Crater Lake Highway in Jackson County. Previously an agreement with Jackson County covering this section had been signed on June 4, 1946. After due consideration of this matter the Commission by unanimous vote adopted the attached resolution with respect to the disposition of these areas, which resolution is marked EXHIBIT "H" and is, by this reference, made a part hereof with like effect as though extended herein.

The Commission considered the adoption of a resolution providing for abandonment of two short sections of the Halsey-Harrisburg Section of the Pacific Highway East in favor of Linn County and the City of Halsey. After due consideration of this matter the Commission by unanimous vote adopted the attached resolution with respect to the disposition of these areas, which resolution is marked EXHIBIT "I" and is, by this reference, made a part hereof with like effect as though extended herein.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. on the following day in the same room.

Portland, Oregon
December 30,1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following persons present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
W. W. Stiffler, 2nd. Asst. State Highway Engineer
J. M. Devers, Chief Counsel
George W. Neuner, Assistant Counsel
Floyd Query, Acting Secretary

Bids, as follows,for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:30 p.m. in the same room:

HALFWAY-CORNUCOPIA SECONDARY HIGHWAY IN BAKER COUNTY

HALFWAY-CARSON SECTION

Vernie Jarl, Gresham	$ 71,538.00
Homer G. Johnson, Portland	74,043.00
Rogers Constr. Co., Portland	77,031.00
E. C. Hall Co., Portland	86,503.50

PACIFIC HIGHWAY EAST IN CLACKAMAS COUNTY

OREGON CITY-NEW ERA SECTION

	Using Asphalt	Using Tar
E. C. Hall Co., Portland	$ 676,578.50	- - - -
Warren Northwest Inc., Portland	700,416.50	- - - -
Kuckenberg Constr. Co., Portland	884,665.50	- - - -

FREMONT HIGHWAY IN LAKE COUNTY

SILVER LAKE-HARVEY CREEK ROCK PRODUCTION PROJECT

F. L. Somers, Klamath Falls (1)	$ 26,500.00
Homer G. Johnson, Portland (1)	26,500.00
M. C. Linninger & Sons, Medford (1)	27,900.00
E. C. Hall Co., Portland (1)	28,500.00
A. H. Saxton & Sons, Corvallis (1)	29,500.00
M. A. Toole Constr. Co., Ontario	32,500.00
Rogers Constr. Co., Portland (1)	33,000.00
Arthur Gentemann, Portland	34,600.00

(1) Bidder will not accept this project except in combination with Harvey Creek-Chewaucan River Project.

FREMONT HIGHWAY IN LAKE COUNTY

HARVEY CREEK-CHEWAUCAN RIVER ROCK PRODUCTION PROJECT

M. C. Linninger & Sons, Medford (1)	$ 26,300.00
F. L. Somers, Klamath Falls (1)	26,500.00
Homer G. Johnson, Portland (1)	26,500.00
E. C. Hall Co., Portland (1)	27,000.00
A. H. Saxton & Sons, Corvallis (1) (2)	28,400.00
Rogers Constr. Co., Portland (1)	31,000.00
Arthur Gentemann, Portland (3)	36,200.00

(1) Bidder will not accept this project except in combination with Silver Lake-Harvey Creek Project.

(2) Bidder will make lump sum reduction of $2,000 for award of both projects.

(3) Bidder will make lump sum reduction of $1,000 for award of both projects.

Mr. Forrest V. Stewart, Executive Secretary of the Oregon State Employees Association, appeared before the Commission and requested that hourly rate employees be paid on a monthly basis and that definite pay days be established for field employees. He stated that there are approximately 1,200 hourly rate employees on the Commission's payrolls and that many of them have complained of tardiness and irregularity in receipt of their pay checks. This, he said, is embarrasing to the employees in that they cannot advise their creditors as to any specific date on which they will receive their checks. He asked the Commission to change the hourly rates to monthly rates so that all employees would receive pay for holidays. He explained that at the present time there are about eleven legal holidays in Oregon and that the hourly employees do not receive compensation for these holidays whereas the monthly paid employees do. He also pointed out that the single step hourly rate of pay does not give the hourly employees a chance to advance by steps as is provided for monthly employees under the Civil Service plan. He was asking, he stated, that only the employees classified as regular employees, not seasonal or temporary, be placed on the monthly basis. It was his thought also that by placing these employees on a monthly basis the preparation of their pay rolls would be expedited and earlier receipt of their pay checks facilitated.

The Engineer advised that the minimum hourly wage is now 94 cents and that these rates have been kept on an hourly basis so that comparison could be made with similar jobs in industry where employees are largely paid on an hourly basis. Commissioner Schaupp inquired if there were other departments in the state that have a similar problem. The Engineer replied that comparison was difficult to make because none of the other state departments were quite like the Highway Department. It was his recollection, however, that all of the other state departments pay on a monthly basis, with the exception of the State Printing Department. Mr. Stewart added that, to his knowledge, the Fish Commission and the Forestry Department also have a few employees on hourly rates.

Chairman Banfield inquired why it takes so long to get the hourly checks. The Auditor, Mr. Malcom H. Hawke, replied that as the employees are on an hourly basis the time reports in the field cannot be prepared prior to the last work day in the month. It then requires from one to three days for them to reach the Salem office. In connection with this he also stated that the time reports from the field are not always received as soon as they should be, and that the Accounting Division could process them much faster if they were submitted sooner. He stated that the Accounting Division gives preference to such pay rolls in preparing the checks and that they have set a goal of getting the checks out within five work days after the first of the month, but because of changes in pay roll procedure, additional deductions, and lack of personnel and space they have not been able always to meet this goal. He stated also that in some instances time reports from the field are not submitted until the 12th of the month. He did not believe it would be feasible to close the pay roll for hourly employees on a date other than the last of the month due to difficulties in determining the employees retirement contribution. Chairman Banfield then inquired what the effect would be if hourly employees were paid twice a month. Mr. Hawke replied that part of the hourly employees had, in the past, been paid twice a month until the Retirement Act went into effect, when it was found that it was much simpler to pay them on a monthly basis. However, the Retirement Act, as revised by the last Legislature, now provides that an employee contribute on the first $2,400 of his annual salary rather than on $200 per month and that semi-monthly pay rolls can now be made.

Chairman Banfield stated that the Commission is interested in reducing the time that employees have to wait for checks and he instructed the Engineer to see that time reports are submitted on time and that the Accounting Department sets other matters aside, if necessary, to see that the preparation of the checks is speeded up. He did not believe that the Commission is in a position to place hourly employees on a monthly basis as industry, as a whole, has never accepted that principle. Mr. Stewart remarked that if a certain designated pay day could be set the employees would appreciate it very much.

Chairman Banfield then inquired about the additional insurance deduction from the pay roll for the West Coast Life Insurance Company, as requested by Mr. Stewart. Mr. Stewart explained that the Association had

worked out and entered into a contract with the West Coast Life Insurance Company whereby an employee could provide life insurance for himself and his family for a very nominal sum. He stated further that the contract with the insurance company provides that the insurance is available to members of the Oregon State Employees Association only. Chairman Banfield stated that he did not believe the Commission would permit deductions when the insurance is available only to members of the Association, and that anything of that sort, as far as the Commission is concerned, must be available to all employees. Mr. Stewart then inquired if the insurance were available to all employees of the State Highway Department, if the deduction would be allowed. Chairman Banfield replied that the Commission would require time to think that matter over. He stated further that the Commission is sympathetic in the matter of hourly employees who lose pay through loss of time on holidays. He referred particularly to the additional holidays provided by state law, and advised that the Commission will try to work out some plan so that hourly employees could receive compensation for some of the holidays. He stated also that the various departments would be requested to see that the pay roll is put out in just as short a time as possible.

After Mr. Stewart's departure and later in the day the Commission again discussed the matter of pay roll deductions for the West Coast Life Insurance Company and unanimously denied the request because the insurance is not available to all employees. The matter of pay for holidays was also discussed later and the Commission instructed the Engineer to bring in a report with respect to providing pay for hourly employees on all holidays except Christmas Day, Independence Day, Labor Day, Memorial Day and Thanksgiving Day. As there are approximately eleven holidays in the average year this would provide employees pay for about six holidays of the eleven.

The matter of salary increases which had been discussed the previous day was again taken up. The Commission indicated that it would consider increases for the lower brackets up to $225 per month and the Engineer was instructed to bring in a report of possible increases to engineering and other employees who receive less than such salary. He was also instructed to bring in a report on step increases based upon a selection of a limited number of the most deserving employees in all classifications. The Commission also stated that they were not in favor of blanket increases. Commissioner Schaupp pointed out that if state wages were raised to the top now that they would not go down as rapidly as industrial wages when reductions were made.

The Commission had under discussion a request from the City of Pendleton for the installation of electric stop and go signals at a number of street intersections in the City of Pendleton where they intersect state highways, particularly at the following intersections: Court and Main Streets, Dorian and Main Streets, Emigrant and Main Streets. The Engineer advised that Court Street is the route of the Old Oregon Trail and that Emigrant Street is the route of the Pendleton-John Day Highway; also, that Dorian Street will be a designated state highway route as soon as the one-way traffic plan for this city has been put into effect. He stated further that the Traffic Engineer has investigated the need for the signals and reports that they are fully

justified because of the volume of traffic which passes through the intersections. He estimated the cost of the installation of the signals at these three intersections, with an interconnecting supervisory cable and a master controller at the City Hall, at $13,516 and the cost of the installation without the interconnecting supervisory cable and master controller at the City Hall at $10,318. He recommended approval of the installation without the master controller at the City Hall if the City of Pendleton will pay one-half the expense involved, will maintain the lights, and will furnish electric energy to operate the signals at city expense. He further recommended that, if the city insists on the master control installation at the City Hall, it be installed but the city should be required to pay 100 percent of the cost of such control installation. The Commission approved the recommendations by unanimous vote.

The Commission also discussed a request from the Southern Pacific Company for state cooperation in connection with the installation of a traffic signal at the Halsey-Sweet Home Secondary Highway crossing of the Southern Pacific Company's main line tracks near the town of Halsey, Linn County. The Engineer advised that investigation reveals this crossing to be one of only two crossings of the Southern Pacific Company's main line tracks between Portland and Klamath Falls without signal protection; also, that there are approximately 34 train movements daily at this crossing and that the daily highway traffic is about 700 vehicles. The potential hazard at this place, he said, is considerable, notwithstanding that the accident record for the past years reveals only five accidents with four injuries and one fatality. He estimated the cost of the installation at $4,000 and recommended approval of the same on the basis that the expenses will be paid 50 percent by the state and 50 percent by the railroad company, and that when the work is completed the railroad company will thereafter maintain the signal at its sole expense. The Commission approved the recommendation by unanimous vote on motion of Commissioner Chandler, which was duly seconded by Commissioner Schaupp.

A request from the City of North Bend for the installation of a "beacon light" at the intersection of Virginia Avenue and Broadway in North Bend had the attention of the Commission. The Engineer advised that this intersection is on the route of the Cape Arago Secondary Highway at a point where the highway makes a right angle turn; moreover, investigation reveals that it is a hazardous corner and that a flashing beacon installed there would be very desirable as a protection to the traveling public. He recommended installation of a four-way flashing beacon, showing amber lights facing highway traffic and red lights facing traffic from intersecting streets, the signal to be paid for and maintained by the state at no cost to the city provided the city will agree to furnish electrical energy required to operate it. It was the thought of Chairman Banfield that the signal would be more effective if traffic from all directions were required to stop before passing through the intersection whereupon the Commission by unanimous vote authorized the installation, at state expense, of a four-way flashing red beacon light at this point on the condition that the city will furnish the electrical energy required to operate it.

A petition was presented signed by 233 residents of Aloha, Beaverton, Hillsboro, and other nearby points, urging the installation of a flashing red light at the intersection of the Tualatin Valley Highway with Wheeler Avenue in the town of Aloha, and the painting of a pedestrian lane on the pavement at this point. The Engineer advised that this matter has been before the Commission on several occasions in the past as a re ult of the petition of one or two people who live in Aloha, but in each instance the request was denied. He further stated that another investigation has been made by the Traffic Engineer as the result of this present petition, but his report on the subject is not ready for presentation. He suggested that discussion of the matter be deferred until the next meeting. Chairman Banfield expressed the desire to know how much it would cost to re-align the highway at this place in order to eliminate the "kink" that now obtains. It was his thought that it might be possible to change the highway location so as to by-pass this town entirely. The Engineer was instructed to make a study of the situation and to report back at the next meeting if possible. He was also instructed to have his report on the traffic light situation ready for discussion at the same time.

A letter was presented from Mrs. Maysel Lacy, Dundee, Oregon, requesting the installation of a stop light or safety lane on the Pacific Highway West (US99W) in the town of Dundee, for the benefit of pedestrians who are obliged to cross the highway in this town. Mrs. Lacy declared that motorists drive through this town at a high rate of speed, and unless something is done to control them and protect pedestrians, a traffic fatality is bound to occur. The Engineer advised that this matter has been investigated by the Traffic Engineer who reports that he cannot justify the installation of a stop light or a pedestrian crossing because it would place too severe a penalty on the traveling public, as there are 6,000 vehicles passing through this town daily. The situation in the town of Dundee, he said, is no different from that in any other small town, and while some hazard does exist for pedestrians who wish to cross the highway, the remedy is primarily a question of enforcement of the 25-miles-per-hour speed limit indicated on the signs that are now in place. He recommended that the request be denied. The Commission approved the recommendation.

The Commission discussed a petition signed by numerous residents and freeholders residing in and near Rowena, Oregon, requesting the establishment of a reduced speed limit of 35 miles per hour for motor traffic on US30 (Columbia River Highway) "from the bottom of Rowena Loops easterly to the Riverview Service Station, as a protection for school children and other pedestrians." The Engineer advised that an investigation has been made of this matter by the Traffic Engineer who reports that he can find nothing unusual at this location that would warrant the establishment of a reduced speed limit, there being very little culture along this section of highway; moreover, inspection of the accident rate on this section reveals that it is very favorable compared with other sections of the highway, only ten accidents having occurred during the six-and-one-half-year period from January 1, 1941 to June 30, 1947. He also advised that this section is located in a rural area where enforcement of any reduced speed limit would be very difficult. He recommended

that the request be denied. The Commission approved the recommendation unanimously.

The Commission also had under discussion a request from Mr. Dale Hollingsworth, Corvallis, that something be done by the Highway Commission to prevent traffic accidents on the Corvallis-Newport Highway between Corvallis and Philomath. Mr. Hollingsworth calls attention to the numerous accidents that have occurred on this section of highway during the past ten years, all of which resulted in damage to vehicles and some of which resulted in fatalities. The Engineer advised that the Traffic Engineer has investigated this matter and reports that a hazardous situation does exist at this point by reason of building development and the large amount of pedestrian traffic that now uses the highway shoulders. The accident record, he said, discloses that during the past six years there have been 42 accidents, of which 16 occurred during the first nine months of 1947. He recommended that a 45-miles-per-hour speed limit be designated for this highway from the city limits of Corvallis, Mile Post 56.33, westerly a distance of 1.96 miles to Mile Post 54.37. The Commission approved the recommendation unanimously and thereupon, by unanimous vote, adopted a resolution with respect thereto, which resolution is attached hereto and marked EXHIBIT "J" and by this reference made a part hereof with like effect as though extended herein.

The Commission again discussed a request from the Oregon State Employees Association that the Commission authorize the withholding from Highway Department pay rolls of certain amounts to pay premiums to the West Coast Life Insurance Company for furnishing group insurance covering families of Highway Department employees who are members of the Association. The Engineer gave as his thought that it would be satisfactory to make such deductions if the benefits were made available to all State Highway Department employees rather than being limited to members of the Association. He also said, in his estimation, it would be a mistake to recognize one group of employees and not others. The Chief Auditor, Mr. Malcom Hawke, who was present, stated his concern because the pay rolls are now filled to capacity with deductions for one purpose or another. He expressed his wish, however, to do the right thing by all Highway Department employees. He mentioned that a deduction is now being made in behalf of the California-Western States Life Insurance Company which is furnishing group insurance coverage for all State Highway Department employees who desire it. Following discussion the Commission voted unanimously not to consider further deductions to pay the premiums to the West Coast Life Insurance Company unless the benefits of the insurance are made available to any State Highway Department employee who desires them, and in this connection the Chief Counsel was instructed to advise the Commission whether or not the group insurance coverage now furnished by the California-Western States Life Insurance Company can be canceled in the event a satisfactory arrangement can be made to secure effective coverage through the West Coast Life Insurance Company.

The Engineer brought up for discussion the matter of adopting a system of "through-way" highways for the entire state. He presented a map showing a suggested system of such highways. The Commission deferred action

on this matter to allow more time for a thorough study of the plan.

The Engineer also presented a revised organization chart of the State Highway Department, showing heads of departments and their first assistants, as previously requested by the Commission. The Commission deferred action on this matter until a later meeting.

The Commission again had under discussion the question of allowing the removal of sand from ocean beaches, particularly with respect to objections offered by ex-Governor Oswald West on the previous day to the removal of so-called "smelt sands" from the beach at Yachats. The Chief Counsel advised that he cannot agree with certain statements made by Mr. West as he is unable to find any grounds for Mr. West's statements that there are outstanding titles to such area which would defeat the Commission in its control of it. He explained in considerable detail the laws which have guided him in arriving at his conclusions, with respect to the Commission's authority, and concluded his remarks by stating that, in his opinion, the Commission has full authority over the ocean shore and the state legislature is strictly within its legal rights in taking action, as it has, with respect thereto. Chairman Benfield asked the Chief Counsel if he knows of any action by the Highway Commission requesting the authority it holds over this property. The Chief Counsel replied in the negative -- that the legislation enacted in 1947 was not drawn by or at the request of the State Highway Commission although when the matter was discussed in committee he advised the members thereof that the Highway Commission favored the act because of its provisions, and instead of being an act which would injure the state, as Mr. West indicated, it really is a friendly act and in his estimation does more to preserve the ocean beach than any other statute. The Commission deferred action on this matter until a future date, however, instructed the Chief Counsel to render a written report in detail and to include therein the substance of the oral report rendered by him at this meeting.

The Commission discussed a request from the Portland Gas & Coke Company that a special permit be granted certain transport companies which it proposes to engage to truck haul petroleum gas from points in California to the company's plant in Portland, the equipment to be used being illegal in the State of Oregon and the weights of the loads in excess of the Oregon statutory weight limits. The Engineer advised that there has developed a shortage of gas in the Portland area, that there is also a shortage of rail transportation; further, that the gas company is doing everything possible to supply its customers and to avoid harmful effects which can easily develop if it runs out of fuel. To accomplish this, he said, the company has arranged with California trucking concerns for truck transportation. He further advised that he has given the matter considerable study and is of the opinion that no harmful effects will result to highway facilities, if permits are granted to these transport companies, provided they will keep their single axle weights under a maximum of 18,000 pounds and their tandem axle weights under a maximum of 32,000 pounds, and will limit their gross loads to a weight determined by the formula $W=800\ (L+40)$. He further advised that, anticipating favorable action by the Commission, the Chief Counsel has prepared a resolution for adoption by the Commission, authorizing, under certain conditions,

the granting of special permits to these carriers as a temporary emergency proposition. The Chief Counsel advised that this resolution is predicated on a dire emergency and is based on authority granted the Commission under statute (O. C L. A. 115-393) which authorizes the Commission to issue permits for isolated movements. He further stated that a large portion of the population of Portland is dependent on gas for fuel, which the gas company is finding it difficult to supply. It appears that no water transportation is available and rail tank cars are very scarce; furthermore, there are no vehicles in the State of Oregon available to transport this type of commodity. The resolution, he said, provides that the carriers concerned must carry public liability and property damage insurance to protect the general public while movements are being made on Oregon highways. He also said that the resolution provides that the Commission can cancel the permit at any time that it feels the movements are contrary to public interest. The Engineer and the Chief Counsel recommended approval of the granting of temporary permits in conformity with the conditions outlined in the resolution prepared by the Chief Counsel, the details of which were explained to the Commission. Following considerable discussion and in view of the existing emergency, the Commission approved the recommendation as a temporary expedient, on the condition that no permit shall be issued for more than 30 days' duration. A resolution covering the matter, attached hereto and marked EXHIBIT "K", and by this reference made a part hereof with like effect as though extended herein, was thereupon adopted by the Commission by unanimous vote.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission by unanimous vote approved the minutes of the meeting held on November 24 and 25, 1947.

The Engineer brought up for discussion the matter of changing the classification of the Medford-Eagle Point Section of the Crater Lake Highway and the Redmond-Ochoco Ranger Station Section of the Ochoco Highway from the Group II classification to Group I classification, which would permit continuous movements of combinations of vehicles 60 feet overall in length with increased weight loads under permit from the Commission as authorized by Chap. 156, Oregon Laws 1947. He advised that several requests for such reclassifications have been received from haulers of lumber and timber; also that inspection and examination of the alignment on both sections reveals that they are adequately designed and will easily accommodate combinations of vehicles 60 feet overall in length, which combinations are allowed under the Group I classification, and the extra weight specified in the Group I permits. He recommended, in view thereof, that these two sections of highway be reclassified as Group I Highways. The Commission approved the recommendation unanimously by the adoption of the resolution marked EXHIBIT "M" which is attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Engineer recalled that the Commission, at its meeting on November 25, 1947, adopted a resolution ordering a 50 percent reduced load limit on the Weston-Elgin Secondary Highway during the spring months (February 16 to May 1, 1948) when frost is leaving the ground. This resolution he said, provided "in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of the vehicles exceed the maximum limit set by law for any one axle". He recommended that this resolution be amended to provide that the weight on any one axle shall not exceed 50 percent of the maximum limit set by law for any one axle so as to avoid any question concerning the intent of the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the resolution marked EXHIBIT "N" attached hereto and by this reference made a part hereof with like effect as though extended herein.

The Commission had under discussion the advisability of cancelling the log-hauling permit of Mr. Harold H. McGee, Springfield, for numerous violations of his log-hauling permit. The Engineer reported that on November 12 Highway Department Weighmasters cited Mr. McGee for an overload of 19,300 pounds and again on November 19 he was cited for an overload of 10,700 pounds. In both instances the excess was over and above an allowable weight of 72,000 pounds. He also reported Mr. McGee's record for the years 1945, 1946, and 1947, as follows:

	Loads Weighed	Violations No.	Violations %	Class	Fine & C. Costs
1945	64	3	4.6	3	$ 119.50
	Permit cancelled Sept., 1945, reinstated Oct., 1945				
1946	11	4	36.4	1	106.60 (1 case suspended)
1947 Jan.-Oct.	249	27	10.8	1	845.35 on 23 viols. (4 cases pending)
Nov	19	5	26.3	1	119.00 on 4 viols. (1 case pending)

He recalled that, in conformity with the Commission's instructions, Mr. McGee's log-hauling permit was canceled on September 27, 1945, for refusal to allow his load to be weighed, but was reinstated on October 21, 1945, upon Mr. McGee's promise not only to submit his loads for weighing thereafter, but also to keep his loads within the prescribed weight limits. It was his thought, in view of Mr. McGee's record, that the permit should be canceled permanently if the Commission has the power to do so. In reply to an inquiry from Chairman Banfield as to the extent of the Commission's authority, the Chief Counsel advised that the Highway Commission has full authority to say

whether or not a log hauler can continue in operation. He pointed out that while the Public Utilities Commissioner is the authority which actually issues the permits, the law requires him to secure a recommendation from the State Highway Commission, so, in case a permit is canceled and the operator requests reinstatement, the Commission can recommend to the Public Utilities Commissioner, if the violations are serious enough, that the permit not be reinstated. In other words, the operator cannot resume his log-hauling unless the Highway Commission so recommends. The matter was discussed at some length, but action thereon was deferred by the Commission pending additional information. The Engineer was instructed to furnish the Commission with an itemized list of all violations of record for which Mr. McGee has been apprehended and in addition thereto to show the amount and various details of the weight violations or dimension violations, the fines and court costs, and any other detail which has a bearing on the subject. Such information, hereafter is to be furnished in connection with all violations of this nature.

A letter was presented signed by Leslie R. Kuehl, Publisher, and William K. Reichard, Editor, Clarkston Herald, Clarkston, Washington, advising that a movement has been started, with its origin in Lewiston, Idaho, to change the name of the Blue Mountain Highway (Enterprise-Lewiston Highway). They offered objections to such change and urged the Commission to retain the name "Blue Mountain Highway" for this road because, in their estimation, no more fitting name could be given it since the highway passes through the Blue Mountains, which was the home of pioneers whose vision and faith made the highway possible. The Engineer pointed out that this highway has always been known as the "Enterprise-Lewiston Highway" and, in his estimation, no matter what name is given to it, objections would be offered by some people. Chair-Banfield suggested that no change whatsoever be made in the name of this highway at the present time. His suggestion was approved by Commissioners Schaupp and Chandler and it was so ordered.

The Commission discussed a letter from the Multnomah County Legion Luncheon Club requesting cooperation from the State Highway Commission in naming a highway leading out of the City of Portland commemorating those men who sacrificed their lives for their country. It appears that the Club plans to plant trees along such named route as a perpetual memorial to these men. The Engineer advised that the highway which extends from Portland to Seaside has already been named the "Sunset Highway" in honor of the members of the Sunset Division, and that an appropriate monument has been erected and dedicated near the junction of this highway and the Nocanicum Highway. He also pointed out that the 1947 Legislature adopted House Joint Resolution No. 18 designating the Pacific Highway East and West the "Blue Star Drive" as a memorial to the men and women of Oregon who served in the Armed Forces during World War II, and in adopting this resolution the legislature further resolved "that the State Highway Commission shall file with the Secretary of State a description of the particular section of State Highway Route No. 99 so designated as 'Blue Star Drive' and shall cause to be erected along said highway suitable tablets and ornamentations to perpetuate this resolution". He requested the Commission's pleasure at this time as to the designation of certain sections of US99 "Blue Star Drive" in conformity with this resolution.

The Commission took the matter under advisement and instructed the Engineer to render a report on the matter of selecting a section of US99 for designation as the "Blue Star Drive".

A letter was presented from Mr. Walter Meacham, Secretary of the Oregon Council, American Pioneer Trails Association, advising that the wording proposed by the Highway Commission for the marker to be erected at Olds Ferry adjacent to the Old Oregon Trail, in Malheur County, does not meet with the approval of the Pioneer Trails Association and that the Memorials Committee of the Oregon Historical Society, which suggested the wording, has overlooked some interesting and important information relating to the colorful history of this pioneer ferry. He suggested that the Highway Commission reconsider its approval of the wording. In the discussion that followed it was pointed out that the Commission, some time ago, decided to refer to the Oregon Historical Society, for recommendation, all matters of a historical nature, which was done in this particular instance. Chairman Banfield expressed himself as being perfectly willing to accept the suggestion of the Historical Society for the wording of the Olds Ferry marker. Commissioner Chandler expressed himself similarly, whereupon it was ordered that no change be made in the wording as now prepared. The Secretary was instructed to inform Mr. Meacham that the Commission is accepting the advice of the Oregon Historical Society in this and other matters of similar nature.

There was presented to the Commission communications, as follows, with respect to the removal of smelt sand from the beach in the vicinity of Yachats, Lincoln County: (1) Letter from the Yachats Ladies Club, Inc. (2) Telegram from H. W. Brink, President, Pacific Wildlife League of Newport (3) Telegram from L. G. Gardiner, representing the Newport Cottage Owners Association. The Secretary was instructed to reply to each of these communications to the effect that the Commission has not taken any action on this matter but will bear their communications in mind in the further discussion thereof. The Chief Counsel was instructed to render to the Commission a written opinion on the authority of the Commission to control the beach sands.

The Engineer requested authority for the Bridge Engineer, Mr. G. S. Paxson, to attend, at state expense, a meeting of the American Concrete Institute which is to be held in Denver, Colorado, February 23-26, 1948. He advised that this meeting is being sponsored by the U. S. Bureau of Reclamation and is to be almost entirely devoted to the subject of concrete disintegration, and that a majority of the nationally known engineers and scientists from government bureaus and the leading universities will attend. It was his thought that Mr. Paxson's attendance at this meeting would be well worthwhile and would be an excellent opportunity to secure valuable information on the subject to be discussed. He estimated that the cost to the state would amount to approximately $175. The Commission by unanimous vote authorized Mr. Paxson to attend this meeting.

The Commission had under discussion the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, February 2 and 3, 1948. The Secretary was instructed to make

the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

The Chief Counsel presented for the Commission's consideration a compromise settlement with Mr. Elmer E. Olson in Lane County, in the amount of $1,100 for right of way on the Willamette Highway. The previous authorization, he stated, was dated March 24, 1947, for $900. He advised that the increase was a nominal figure and payment was justified rather than proceed with condemnation. The Commission approved a settlement with Mr. Olson in the amount of $1,100.

The Engineer presented a revised survey for the relocation of the Oregon Coast Highway through Gold Beach. He recalled that at the previous meeting of the Commission an objection was offered by Mr. C. H. Buffington to the proposed location through school property. The survey as now revised, he said, misses the school property entirely and also the oil tanks which would have had to be moved under the original survey. The Chief Counsel stated that it was his understanding that when all of the right of way was secured as far as 4th Street he was to so report to the Commission and after that the right of way could be secured on the other side of 4th Street for another contract. Chairman Banfield stated that he thought the feeling of the Commission was that the job through the town should not be held up pending the acquisition of right of way for the adjoining project south of 4th Street. Upon motion by Commissioner Chandler, seconded by Commissioner Schaupp, the Commission approved the revised survey as outlined by the Engineer and thereupon unanimously adopted the attached resolution, which resolution is marked EXHIBIT "O" and is by this reference made a part hereof with like effect as though extended herein.

The Chief Counsel asked the approval of the Commission on a satisfaction of mortgage from Fred L. Mallory and O. L. Smith for a parcel of land at Canemah. He explained that the satisfaction had been executed by a previous Commission and forwarded to Mr. Lyle L. McCurdy on September 8, 1936. He stated that he was now advised that the Clackamas County records show that the satisfaction never has been entered and that a new satisfaction has been requested. The Commission approved the satisfaction of mortgage which was signed later in the day.

The Assistant Counsel, Mr. George Neuner, presented the matter of acquisition of uniform width of right of way through St. Helens, particularly the acquisition of an additional area from the Jewell Ice Cream Company. He explained that in 1938 and 1939 a previous Commission acquired an 80 foot right of way through this section when the highway was rebuilt, but that the owners of the Jewell Ice Cream Company had retained 19 feet at that time so now the right of way width in front of the ice cream plant is only 61 feet, whereas the right of way on both sides of the plant is 80 feet wide. Since that time, he said, the Company has added more units to its establishment in view of which he deemed it expedient at this time to consider the acquisition of this 19 foot strip of right of way before the company had fully developed their plant thereon. It was his thought, if nothing is done about

the matter, that the cost of acquiring this property would be much higher later on. The Engineer advised that the owner's objection when the original right of way was purchased was that the 19 foot strip was planted to grass and shrubs and that they wanted it to be that way always, and it was on that basis that the previous Commission had allowed the company to retain the area. The Assistant Counsel, Mr. Neuner, advised further that the acquisition of the property would be expensive and possibly the company would want about $40,000 for the 19' x 107' area. Chairman Banfield inquired what the Assistant Counsel thought the damages really are. Mr. Neuner replied that it seemed to him that somewhere between $15,000 and $20,000 would be a fair figure. The Chief Counsel stated that the Erickson's, owners of the plant, had indicated that damages would amount to $42,000 but the state's right of way agent estimates $36,000 on the basis of the plant not now occupying any of the 19 feet in question. Chairman Banfield inquired if the right of way is needed. The Engineer replied that on the side of the road on which the plant is situated there is only 21 feet between the centerline of the highway and the company-owned property, and, that if parking were permitted in front of the plant it would create a public hazard. The Chief Counsel gave as his opinion that the Commission could prohibit parking in front of the plant if the company retained the 19 feet they have now and that, if the Commission were to prohibit the use of the right of way for parking purposes in front of the adjoining property where the Commission now has an 80 foot right of way, the company might back down on its idea of building on the 19 foot jog. In reply to Commissioner Schaupp's inquiry as to why the property should be acquired if the Commission has power to prohibit parking, Mr. Neuner replied that, if the matter is not taken care of now and the company proceeds to build on the 19 foot jog, it would cut down the highway right of way. The Commission instructed the Engineer and the Chief Counsel to discuss the matter further with the Ericksons and report back at the January 5 meeting. The Engineer is to make recommendation whether or not the property is needed, and the Chief Counsel is to make a recommendation as to how much should be offered for the property.
